Adoption of an ordinance, requiring that all contracting firms operating in Santa Rosa employ local labor as far as possible, will be asked of the city council by the Santa Rosa Central Labor Council.

This was decided when it was reported that an outside firm of home builders is employing outside non-union labor in the erection of several homes in the eastern part of the city.

J. E. Snyder, editor of the Labor Journal, declared that such ordinances are in effect in many cities of California, including Oakland, and have proved beneficial to local labor.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic"—Storage Systems and "Lyon" Tank Water Heaters.

Architect-Engineer Directory Available

Compilation of complete listings of licensed architects in California in the new pocket edition of The Architects' Directory of California, has been announced by Cornell T. Malone of the Los Angeles Builders' Exchange, A-65 Chamber of Commerce Bldg., Los Angeles, and 741 Pacific Bldg., San Francisco. This newest of handy references for building material men is declared by the publishers to be an improvement over previous issues.

The new edition which has been approved by leagues and clubs of architects and building contractors throughout the state gives alphabetical lists of licensed architects in cities in addition to an arrangement of their offices according to streets. This new feature, it is claimed, has simplified the locating of men engaged in the drawing of plans for specific jobs.

With the names of the licensed architects are arranged the identification of designers, specification writers, chief draughtsman, office manager and superintendent. Listings are also given of the consulting, mechanical, heating and ventilating, electrical and structural engineers either figuring or employed in the offices of architects.

Class of work engaged in by certain architects is mentioned in the edition along with the hours of the day and days of the week when material men will be interviewed.

Architects in Oakland and San Francisco are tabulated according to districts giving the names of office personnel, etc. Listings of practicing consulting and structural engineers in both northern and southern California may be found in the engineers' section of the directory. Landscape architects of the state are also given in alphabetical order.

ASWAN DAM ENGINEER IS A SUICIDE

Sir John Norton-Griffiths, an eminent British engineer and managing director of Norton-Griffiths & Co. contractors on the work of raising the crest of Aswan dam in Egypt, committed suicide at Alexandria, Egypt, on Sept. 27. Norton Griffiths & Co. some months ago entered into a contract with the Egyptian government to enlarge and raise the crest of Aswan dam along the lines recommended to the government by a commission of engineers in December, 1923.

The bid of Norton-Griffiths & Co. was \$9,800,000, the lowest of eleven bids. The next highest was \$12,060,000.

On Sept. 20 Sir John had addressed a letter to the Egyptian ministry of public works, stating that work on the dam was being suspended because of the unreasonable demands of the Egyptian inspectors, who he claimed were inexperienced and incompetent. Subsequently it developed that he had reported to the government that payments for the work were far behind expectations and asked for financial assistance.

WHO KNOWS?

A sub-contractor signs an agreement with a contractor whereby he agrees to fulfill his work according to plans and specifications together with approved shop drawings, and on completion of work signs with general contractor, for the owner, a guarantee giving owner right to charge and collect for any defects in material and workmanship occurring within the 1-year period.

Owner claims that sub-contractor deviated from approved shop drawings and is demanding repair for alterations from contractor.

Sub-contractor claims all his work was done with the approval of the inspector and disclaims all responsibility concerning alterations and repairs.

Can general contractor, should he have to make the repairs, collect from the sub-contractor?

A general contractor finds himself in the above position and in a letter to the editor wants to know just what his status is. Who knows?

WATER WORKS MEET SLATED FOR PASADENA

California Section, American Water Works Association, will hold its annual convention at Hotel Huntington, Pasadena, October 23 to November 1, inclusive. The first formal business session will be held Thursday afternoon, followed by an informal dinner and a business meeting in the evening at which officers and committees will make their reports and officers will be elected for the ensuing year. There will be two sessions Friday and a dinner dance in the evening. Saturday morning the members will inspect the Pasadena water properties and the Pine Canyon dam site in San Gabriel Canyon.

F. W. Hanna, chief engineer of the East Bay Municipal Utility District, Oakland, is scheduled to address the meeting on "Electric Welded Steel Pipe Lines."

RETAIL LUMBER ASSN. TO MEET IN PASADENA

Earl Johnson of the Johnson Lumber Co., Pasadena, is chairman of the committee on arrangements for the special convention of the California Retail Lumbermen's Association to be held at the Hotel Huntington, Pasadena, Nov. 6, 7 and 8. His aides are Paul Hallingby of Hammond Lumber Co., Los Angeles, and A. J. Stoner of Sawtelle Lumber Co., Sawtelle. W. S. Spicer of Santa Ana is chairman of the program committee. Other members of this committee are Paul Hallingby, Earl Johnson and E. T. Roble, Auburn Lumber Co., Auburn. Many of the visiting lumbermen plan to attend the California-U. S. C. football game at the Los Angeles coliseum November 8.

ARIZONA FAILS IN ATTEMPT TO PREVENT BOULDER DAM PROJECT

Two important decisions affecting Arizona's fight to prevent the construction of Boulder Dam on the Colorado River has been handed down—one against the state and the other in her favor.

Shortly after announcement of a decision by Comptroller General McCarl declining Arizona's request that funds for the dam's construction be held up, the supreme court granted the state permission to test by suit the validity of the congressional act and Colorado River state compact under which the project is being built.

Meanwhile, initial work on construction is expected to proceed without delay.

Secretary Wilbur announced McCarl's decision which said there appeared to be nothing presented by Arizona requiring or justifying a holding up of funds for construction.

The request to test the law under which the dam at Black Canyon is to be built was filed by K. Berry Peterson, attorney general of Arizona. The suit is expected to be filed against Secretary Wilbur and the states on the Colorado River interested in the project.

The highest court, in permitting Arizona to file its complaint, ordered that California and the other states made defendant and Secretary Wilbur should file with it their replies by January 5 giving their grounds for opposing the suit.

After these are before the court it will decide whether a special master or commissioners should be appointed to take evidence for the court.

Secretary Wilbur said the comptroller general's decision had been forwarded to the attorney general of Arizona.

The Federal Government will proceed to the building of Boulder Dam with all possible speed, notwithstanding the Supreme Court's granting the state of Arizona leave to file suit to enjoin construction, President Hoover declares, according to advances of International News Service.

The government, Hoover said, will "help in expediting settlement of the points of law" between Arizona and the other states affected.

The president expressed the hope that the states could soon get together and iron out their differences.

The eighth annual convention of the American Institute of Steel Construction will be held at Pinehurst, N. C., beginning October 28.

James A. Farrell, president of the United States Steel Corporation; E. W. Beatty, president of the Canadian Pacific Railway Company; and R. P. Thomas, vice president of the United States Steel Corporation, will be guests of honor and the speakers.

CONFLICTS BETWEEN ENGINEER AND ARCHITECT TO BE ADJUSTED

(Reprint from Engineering News-Record, New York City, by Special Permission of the Publishers)

An attempt to seek out and remove the sources of irritation between the architectural and engineering professions is under way. Informal discussions between representatives of the American Institute of Architects and the four founder engineering societies have led to the decision to organize a joint committee of four architects and four engineers to take up the subjects of controversy and make recommendations as to means of rectifying them.

The joint committee is to approach its task as a national rather than as a local undertaking. Its findings cannot be made binding upon local or state organizations. Nevertheless, as most local difficulties and their origin in misconceptions or attitudes of mind which are of national character, much help in local matters may be expected from sound findings on national matters.

Among the subjects of controversy which developed during the past year in the controversy between engineers and architects in New York State are several which have a national aspect. Chief among them is the opinion—as expressed by one of the national directors of the American Institute of Architects—that an architect who is not technically qualified to design structural or mechanical details of a building can be counted upon to employ a structural or mechanical engineer for that work, but that an engineer cannot be similarly relied upon. In the specific instance cited it was held that a chemical engineer cannot safely be called in to act as the principal agent for an owner planning to put up a new plant.

Those architects who hold this view justify it by claiming that an architect alone is qualified by his training to appreciate all the various services required to make a complete building, not only in its structural and esthetic aspects but also in the arrangement of floor space and service facilities. They hold that engineers are not so qualified, that they might through ignorance undertake work for which they are not qualified.

Engineers, on the other hand, claim that the ability to determine what expert services are required in a building operation and that to co-ordinate the services of these experts is not peculiar to architects nor is it an ability which is developed by any course of training which architects alone take. Further, they see in this an implication that the professional and ethical standards of engineers are lower than those of architects.

The second major subject of controversy is closely related to the first. An attempt has been made to divide all building work into two classes and to provide by law that one class is the exclusive field of architects and the other the exclusive field of engineers, or, as was proposed in New York this year, to leave the second class open to both architects and engineers. Here, as before, the matter hinges upon whether one profession possesses a peculiar fitness for such work not possessed by the other. Again, the architects claim that their special ability in planning floor layouts and space arrangements and in specifying required facilities in office buildings, hotels and apartment houses makes it essential that they act as principal agents for the owners on such work. To this the engineers reply that, even granting that architects are better trained in the arrangement of floor spaces and facilities, there is no

sound reason why an engineer should not act as the owner's principal agent, employing architects for that work just as architects employ engineers to design the structural framework, mechanical and electrical equipment of many large buildings. Further, they declare that as public safety is not involved in floor layouts except possibly in the matter of exit and fire towers—matters which are clearly specified in building codes understandable alike by engineers and architects—it is a perversion of the state police power to attempt to exclude engineers from work by law.

A third source of trouble centers in the ability of engineers and architects to design buildings which are structurally safe. The architectural profession points out that all architects have a sufficient grounding in the principles of structural engineering to judge whether plans prepared by them or under their direction are structurally sound. They decline, however, to concede similar blanket qualifications to engineers, maintaining that only structural engineers (or possibly civil engineers) should be permitted to certify to the structural sufficiency of building plans. In this latter opinion they find much support among engineers, many of whom feel that it would be better to limit the filing of the plans for all except small buildings to engineers with special training in structural design. However, they maintain that the same limitation should be placed upon architects; that the architect whose chief interests are in the artistic side of his professional work and who knows little and cares less about the routine work of structural design should be put in the same class as engineers of limited structural knowledge.

These are the major subjects of controversy; the others are of less fundamental importance but are nevertheless sources of friction. One is the wording of the uniform registration law for engineers. As now written, the section concerning public works may be read as requiring that all public works be carried on under the direction of engineers. The American Institute of Architects has gone on record as seeing in this an intentional attempt to exclude architects from public works such as school and state hospital construction. Engineers who were active in the preparation of the law deny having any such ulterior purpose. Public works were specifically mentioned by them in order to make it clear that state officials in charge of such work must be subject to the restrictions of licensure.

Another source of difficulty found in the uniform registration law, as well as in many state registration laws is a lack of definite educational requirement. Architects object to having engineers placed on an equal status so long as their educational requirements appear to be less than those of the architectural profession. Engineers object to the false-front definition of architectural qualifications written into the architectural qualification law but not realized in practice.

New York State's multiple dwelling law with its requirement that certification as to the sufficiency of plans for multiple dwellings be limited to "the owner or a registered architect" is another local matter which has become an important source of international conflict. Arguments pro and con are similar to those used by the two professions in the matter of

dividing all building work into two classes. Engineers find this particular provision of the law particularly objectionable because they believe it to be legislation which was purposely put over by a small group of architects to gain an advantage for their profession which could not have been obtained had the matter been frankly put up to the engineering profession when the law was passed.

All these matters and possibly others are subjects which will come up before the joint committee for action. Viewed narrowly from a selfish professional viewpoint the problems are difficult to solve, if not entirely beyond solution. But viewed broadly, solutions are not difficult to find. There is every indication that men of broad decision will sit on the joint committee. Consequently we have little hesitancy in saying that we look for proposals from the committee which if put into effect will clear up most of the present troubles that are causing concern to members of both professions.

N. Y. STATE LICENSE BOARD SETS UP REQUIREMENTS

Educational requirements which applicants for licenses in the State of New York must have before their applications will be approved by the state board of licensing for professional engineers and land surveyors were established by the board in a set of by-laws adopted on September 27, says Engineering News-Record. The new requirements are given in two sets of examinations to be passed by applicants who are not graduates of engineering schools approved by the state educational department.

Objections have been raised to the New York State engineer license law on the ground that it does not set up adequate preliminary and professional education requirements. The law gives wide discretionary powers to the board and as the board has never heretofore gone on record as to what it would accept as being "of a character satisfactory to the board," frequent claims have been made that a man having little preliminary education in the fundamentals of engineering could obtain a license after six years of active work in engineering regardless of his character.

A four-day written examination has been laid down. Examinations in mathematics through calculus, applied sciences, graphics, materials of construction, structural design, mechanical design, electrical design and administration extending over a period of three days are required of all applicants subject to the examination. The second part covers the fourth day. It gives the applicant an option of one of five examinations in either civil, mechanical, electrical, mining or chemical engineering, depending upon which branch he has specialized in.

The Link-Belt conveyor data book, a 176-page leather-covered volume has been prepared by the Link-Belt Co., Chicago, Ill., to facilitate the selection and application of the proper type of belt conveyor in material handling. For this purpose a large amount of engineering data is included, much of it in tabular form.

HOME CAN BE BUILT FOR ONE-FIFTH LESS THAN IN 1929

According to the experience of a middle west lumber dealer, a frame house can now be built for about 13 per cent less than in the spring of 1929. In some localities the difference is probably as much as 20 per cent.

Manager Adolph Pfund of the National Retail Lumber Dealers Assn., reports that a lumberman in a mid-west city recently called for an itemized bid on the construction of a frame dwelling reproducing exactly one that was erected in March and April, 1929, on which all cost data were available. The contractor not only undertook to make a replica of the house for \$4,349.46, instead of \$5,013.33 (exclusive of his own compensation) but undertook to guarantee his bid.

It was found that every item of material, equipment and labor, except gas service, surveying, insurance and the building permit (which were identical), was lower than a year ago. The greatest decreases were in excavation, 35 per cent; and in finish hardware, also 35 per cent. Next in lower prices were window shades, which were down 33 per cent; then came tile, 24 per cent; worked lumber 20 per cent; painting, 16 per cent; yard lumber, 14 per cent; mason work 12 per cent; carpenter work, 10 per cent, and wiring 10 per cent. The

Items in which there were only negligible reductions were plastering, plumbing, heating and rough hardware. The following table gives the details of the bid. They do not include the contractor's profit which, however, would probably be figured on a lower percentage basis than in 1929.

Six Rooms and Bath				
Built	March and April 1929	Cost, 1929	Cost	App. Dec-1930
Excavating	\$100.00	\$65.00	35	%
Mason	601.33	530.50	11	%
Millwork	875.27	700.00	20	%
Lumber	917.76	790.00	14	%
Carpenter labor	614.66	554.66	10	%
Plastering	335.00	325.00	3	%
Plumbing	483.00	475.00	2	%
Heating	250.00	210.00	16	%
Painting	400.00	385.00	3	%
Finish Hdwe.	58.00	38.00	35	%
Rough Hdwe.	39.95	39.00	2	%
Wiring	98.00	88.00	10	%
Tile	45.00	34.00	24	%
Gas Service	34.45	34.45		
Elec. Fixtures	80.00	60.00	25	%
Shades	30.00	20.00	33	%
Surveying	8.00	8.00		
Insurance	37.25	37.25		
Permit	5.60	5.60		
	\$5013.33	\$4349.46	13%	

The continued growth of our large cities is making it necessary to rebuild them almost completely. Old office buildings located on space that has become immensely valuable are being replaced with modern structures that rise from 30 to more than 50 stories and accommodate several thousand workers. Tenement sections are giving way to towering apartment houses, hotels and even churches. Narrow streets are being widened so as to handle more traffic. The method of setting back the upper stories of tall buildings from the street was originally devised to solve the problem of air and sunlight, but has created a new type of American architecture.

As real estate values in the cities have risen, they have forced the residential sections, except high-priced apartments, further away from the business districts, and suburban development has been made feasible by automobile transportation as well as the extension of rapid transit and subway systems. Desirable home sites are no longer limited to those in close proximity to transportation lines, and it is now becoming an advantage to be situated some distance away from the main traveled highways.

Large building projects within a city, as for example, the New York Central Building and the Chrysler Building in the 42nd Street section of New York City, have given stimulus to residential building throughout Westchester County from where it is convenient for workers to commute daily. This simultaneous rebuilding of New York City and the suburban development within a radius of more than 40 miles illustrates what may be expected to take place in every other large city during the years to come, and to furnish a huge demand for building labor and materials.

Such growth of the larger cities is all the more remarkable when it is considered that there is a very definite counter-trend in the movement for "decentralization" on the part of many concerns, which have found that by moving their plants out into the smaller towns they could secure better working conditions and lower costs, although the executive offices are usually kept in the commercial and financial centers.

New York City and the metropolitan area, which includes Long Island, Northern New Jersey and the Westchester County section, and comprises a population of approximately 11,000,000 or 9 per cent of the country as a whole, had, according to the Dodge figures, contract awards during the first seven months of 1930 aggregating \$576,000,000 or 19 per cent of the total for the 37 eastern states. Its share of the total commercial building construction was 34 per cent, of other non-residential building 15 per cent, of residential building 22 and of public works and utilities 13 per cent.

MODERN MOLDING MACHINE

Located in the main foundry of the Trafford Works of the Westinghouse Electric and Manufacturing Company a modern "sand slinger" travels along a 300 foot track picking up sand, straining it and depositing and ramming it into the molds at the right. This molding machine, powered by electricity, reduces the drudgery of foundry methods, doing in half an hour what would ordinarily take two men half a day. The head swings on a radius of 15 feet to fill and ram molds for motor frames, pedestals, bodiplates, and other large apparatus.

CHANGING TRENDS IN BUILDING CITED BY NATIONAL CITY BANK

Two important industries hold back the recovery, and affect the prospects for fall business, viz.: house-building and the manufacture of automobiles. The reason, the National City Bank of New York points out, is that they had been previously overdone. Industrial construction and public works are making a good showing, but house-building drags.

Herewith is published the result of a survey in the construction field by the National City Bank.—Editor.

The volume of building construction has always exercised an important influence on the general business cycle in this country and the question is frequently asked as to where one may look for signs of a recovery in this basic industry. Mortgage money has become cheap and plentiful during the past several months, material costs are somewhat lower and real estate authorities have urged that the present is an opportune time to build. On the other hand, there is still reported a surplus of space in many localities, including office buildings, factories and high-priced apartments, the demand for which is slack because of depressed business conditions. Public utility and engineering projects are proceeding in large volume, partly as a result of the efforts of business leaders to push this class of work so as to relieve unemployment, but where they have involved a further increase in the steady rising tax burden the reaction of taxpayers has not been altogether favorable.

Meanwhile the total current expenditure for all classes of building continues to sag and the contract awards from January 1 to August 1, 1930, amounting to \$3,005,542,000, compare with \$3,667,983,000 in the corresponding period of 1929, \$4,028,300,000

in 1928, the peak in recent years, and are the lowest since 1924. These figures, compiled by the F.W. Dodge Corporation, cover the thirty-seven States east of the Rocky Mountains and represent more than 90 per cent of the building for the country as a whole. Cumulative totals for the first seven months have run 18 per cent behind last year, but there has been a striking change in their three component parts, residential building being 48 per cent behind and non-residential only 13 per cent behind, while public works and utilities are 20 per cent ahead, a considerable portion of the gain being due to highway construction and pipe lines.

It is quite possible that present conditions in the building industry, such as cheap money, etc., offset by the reported surplus of space, which is a temporary condition and is likely to be over-emphasized when a survey is made in a time of business depression, are not the only determining factors in the outlook for new building and that the key to the future is to be found in the changing trends in mode of living. During the past ten years there has been a marked growth in the larger cities, the census of 1930 showing 93 having a population in excess of 100,000, while in 1920 there were but 68. This group now takes up 36,000,000 people, or more than one-fourth of the entire country. Whereas the population of the country as a whole increased in the decade by 16.1 per cent, no less than 47 cities now in the 100,000 class than increased at a more rapid rate than this average figure. Of the five leading cities, which together account for more than 15,000,000 people, New York and Chicago increased by approximately 24 per cent, Philadelphia by 7 per cent, Detroit by 57 per cent and Los Angeles by 113 per cent.

THE OBSERVER

What He Hears and Sees on His Rounds

Scaffolding, while not a big item in the construction job, is an important item.

Scaffolding, poorly constructed, may mean the loss of life to workmen on the job or to the pedestrian in the street.

From Harrisburg, Pa., comes news that adds another hazard in the matter of scaffolding.

Fire in the auditorium of the new state education building on October 3 damaged the \$400,000 structure to considerable extent. Although no authoritative estimate of damages was made public, it is stated that the greater portion of the structure, except structural steel and exterior stone work, will require reconditioning. The blaze was discovered at 4 A. M. in a large amount of inflammable scaffolding which was being used by men decorating the walls and ceiling of the auditorium. Much of the damage to the building, which was to have been completed in December, was caused by smoke and water.

The general level of wholesale prices in September varied little from the August level, but tended upward, according to the index number of the Bureau of Labor Statistics of the U. S. Department of Labor. This index number, which is based on 550 commodities or price series in 1926 as 100.0, stands at 84.2 for September, compared with 84.0 for the month before. The purchasing power of the 1926 dollar in September was \$1.188.

Fuel and lighting materials moved upward, anthracite and bituminous coal, coke, and petroleum products being at higher levels than in August.

Metal products as a whole were downward, iron and steel and non-ferrous metals contributing to the lower prices.

Building materials also showed a net loss, prices of lumber, brick, structural steel, and paint materials averaging lower than in the previous month.

A skyscraper college, a 40-story building is in course of construction for the University of Pittsburgh. It has been named the Cathedral of Learning. It will house the classrooms, lecture halls and laboratories of the university. The ground plan of the structure is approximately 33x250 ft., and the tower is 80 ft. square. The building was conceived by Chancellor John G. Bowman as a symbol of the spirit and achievement of the steel city. The Stone & Webster Engineering Corporation is manager of construction, and the architect is Charles C. Klauder, of Philadelphia, with whom is associated H. G. Balcom, of New York, who designed the steel-work.

According to word from New York, arrangements have been made for the affiliation of Ames, Emeric & Co., investment banking house, and Ulen & Co., engineering, management and construction company. There will be no merger of the two organizations, each company retaining its separate identity and continuing under the same executive management as previously, without change of policy. This affiliation, it was stated, takes advantage of the mutually complementary businesses of the two organizations.

The Sacramento Board of Education contemplates a bond issue for \$2,000,000 to finance erection of new schools and additions and alterations to standing school buildings. A survey for the needed improvements will be made by Charles C. Hughes, city superintendent of schools, who will submit a report on November 3.

Announcement has been made of the addition of three new courses in the architectural department of the College of the City of New York. They comprise a course in modern methods of heating and ventilating based upon recent developments in the uses of gas, oil, and mechanical stokers; a course in applied building con-

fundamental economic conditions in the United States are described as sound in a statement issued by the directors of the Society of Industrial Engineers. The statement, issued after an executive session of the board of directors, says:

"Enthusiastic pessimism is raising hell with business in the United States.

"There is no excuse for continuation of the present sight-seeing trip of business into the Vale of Despond.

"Optimism, courageous use of credit, increased spending are the ingredients for a generous dose of common sense, needed by the victims of pessimistic whooping cough.

"The key log of the jam is unemployment.

"Give the workers work to do and they will buy.

"Business executives must take courageous action now.

"They must show backbone and spunk, in getting their credit to work.

"They must drag the idle credit dollars from their vaults and get them back to their jobs.

"Active selling, backed by intelligent production, backed by credit dollars, will turn the pendulum the other way."

Skyscraper building in America will go on. Economists say we must build higher to earn a return on land values. Moreover the trend is still toward condensing business in certain areas.

It is not known who designed the first skyscraper but in 1887 a Chicago architect, L. S. Buffington, made such claim, and so did W. L. B. Jenny, who built the first steel-framed building, the Home Insurance Company's, in 1883. In New York back in 1854 metal frame construction was used.

Skyscraper principles were carried farther in 1887 by the 14-story Tacoma building in Chicago, generally known as the first real skyscraper.

"Today the nation has 4785 skyscrapers ten stories or higher," says the research bureau of the C. A. Dunham Company, Chicago.

"There are 384 buildings over 20 stories high, at the last recent survey. Forward plans point to continuation of skyscraper building on a large scale.

"Growth of the skyscraper has created many new problems which have called for the highest type of

inventive genius. But the skyscraper is with us to stay. And many say it will become taller."

Stirrings in the direction of creating a better financial basis for house building may be discerned in several different quarters, says Engineering News-Record. Were anything needed to emphasize their importance, the present law state of residential building activity would supply a forcible argument. The building shortage reacts directly on general business activity and helps to maintain the slackness prevailing for some months past. Of the factors underlying the low building activity, high labor costs and poor financing are probably the principal ones. An associated factor is the absence of means for establishing assured values in dwelling-house property. But this lack could be overcome by systems of appraising location and plan values, coupled with a system of inspecting and certifying construction work. Some attempts in the latter field are under way. Their success may prepare the way for methods of establishing a free money market for house building, and fixing low interest rates comparable to those which commercial business enjoys.

California ranked second in building activities for the month of September. With sixty-three cities reporting, the operations for September involved an expenditure of \$17,025,561. The following is a listing of the twelve leading states in building expenditures for the month of September:

	No. of Places	Amount
New York	46	\$44,448,424
California	63	17,025,561
Illinois	53	16,928,215
Ohio	38	10,715,223
Pennsylvania	28	9,365,576
New Jersey	37	8,859,091
Michigan	22	7,893,911
Massachusetts	30	6,546,847
Texas	18	6,155,714
Wisconsin	19	4,219,620
Connecticut	20	2,989,635
Oregon	8	2,935,427

NEW HANDBOOK

A new edition of the "Handbook of Domestic Oil Heating" published by the American Oil Burner Association will make its appearance about Jan. 1, it is announced by Harry F. Tapp, executive secretary of the Association. The last edition, which was compiled and edited by Mr. Tapp, was published two years ago. The new handbook will cover commercial and industrial installations as well as domestic installations.

CHARACTER COUNTS

Since credit stabilization is in operation in several large cities of the United States, it is understood material men in extending credit to contractors are doing so along the lines of a banking institution authorizing a loan to a customer. First of all, a careful check of a contractor's resources are made and their investigation includes his past personal record as a builder. A contractor's reputation is always at stake. Character counts heavily for or against him. No person in any reputable business can afford to excite the suspicion or criticism of his community by conduct unbecoming a business man. The clean, honest, industries and thrifty contractor is in a position to obtain credit.—(Bulletin Natl. Assn. Building Trades Employers).

TRADE NOTES

Standard Show Case & Fixture Co., Ltd., has filed certified articles of incorporation with the county clerk in Oakland. The company is capitalized for \$200,000. Incorporators are John F. Calloway, Elgin T. Hittell and Reece Clark, all of Berkeley.

Directors of Riverside Portland Cement Company have declared a regular quarterly dividend of \$1.50 on the 6 per cent preferred stock and the regular quarterly dividend of 3 1/4 cents on the class A stock. Both dividends will be payable November 1 to stockholders of record October 15.

Pacific Electric Mfg. Corp. of San Francisco, has opened a branch office at 89 Broad St., Boston, Mass. This will be in charge of G. A. Wright, who has had wide experience in the field of electrical transmission and distribution equipment.

Regal Floor Co., capitalized for \$25,000, with the principal place of business in San Francisco, has been incorporated. Incorporators are William Cinnamond, Joseph M. Cinnamond and F. J. Harlis.

Richmond Paint Products Company, with headquarters in Contra Costa County, capitalized for \$250,000, has been incorporated. Incorporators are W. E. Dohrman, William Reuter and Fred Hurlbert, all of Oakland; C. B. Hall, San Leandro; E. J. Duffey, Richmond, and Dr. George Silseon and A. C. Aldrette, both of Berkeley.

Drendell-Trumbull Electric Manufacturing Co. in San Francisco, has been incorporated. Incorporators are L. Siebert, M. Dunn, C. A. Christin, F. J. Kilmartin and D. V. Ryan.

CITY AND COUNTY CONSOLIDATION PROPOSED IN LOS ANGELES

The Los Angeles city council has inaugurated plans to establish Los Angeles city as a separate county with a consolidated city and county government, similar to that of San Francisco. The council, on recommendation of its finance committee, instructed the city attorney to outline the necessary legal steps for this procedure.

City and county consolidation has been projected several times, but the latest proposal is different in that it leaves the municipalities and unincorporated portions of the county as they are, with the city itself as a county alone. Authority for a separate county must be obtained from the legislature.

NEW YORK STATE PLANS TO WIDEN HIGHWAYS

Widening of all main roads in New York State by 1940 to widths of more than 40 ft. is planned by the state department of public works, which has adopted an ultimate road-width map based upon a traffic survey made last August. The width of roads on the map was determined by a census of the number of cars traveling over them during a twelve-hour daylight period. Frederick Stuart Greene, state superintendent of public works, states that he feels confident the legislature will appropriate sufficient funds to carry out the plan in the next ten years.

ALONG THE LINE

John Pengelly, brick contractor, has been appointed a member of the Stockton city council, succeeding Karl C. Bruck, retired councilman of the Seventh District.

Col. B. C. Allin, director of the Port of Houston, Texas, has been appointed consulting engineer on Stockton's port terminal development.

The appointment of Allin was made by the city council on recommendation of W. B. Hogan, city manager. Allin will receive a salary of \$100 a month, beginning November 1.

William E. Hague has been named secretary-manager of the Alameda County Chapter, Associated General Contractors of America. Hague was at one time secretary of the General Contractors' Association of San Francisco. He assumed his East Bay position on October 1.

W. E. Tretheway, 73, president of the Stockton Iron Works, died in that city October 16, following a long illness. A native of London, Tretheway arrived in Stockton at the age of eleven years. He learned the trade of pattern maker in the plant of the Risdon Iron Works in San Francisco and later accepted a position in the pattern department of the Stockton Iron Works working his way to the presidency of the institution. Four daughters and two brothers survive.

The partnership between Henry Z. Osborne and Walter E. Jessup of Los Angeles, for the practice of engineering, has been dissolved and the business of the firm will be continued under the name of Henry Z. Osborne. Mr. Jessup recently accepted the invitation of the American Society of Civil Engineers to edit the technical magazine, "Civil Engineering," to be published by that organization, the first number of which will be issued this month. For the last six years the firm just dissolved has conducted a broad field of engineering, covering city planning, business and industrial zoning problems, public utility rate cases, traffic and irrigation problems, public improvements of all kinds and appraisals. Mr. Osborne was former chief engineer of the Los Angeles board of public utilities.

MUNICIPAL LICENSE REQUIRED COURT RULES

The Washington State Supreme Court upheld an ordinance passed by the city of Tacoma which requires plumbers to be licensed. The decision reverses lower courts.

The Supreme Court said that defective plumbing may cause an epidemic of disease in a thickly settled community, threatening the lives of many.

In answering the claim that a trade such as plumbing differs from a profession, such as architecture, the court said:

"It is not for us to say that the legislative branch may not be as fully justified in dealing with one as with the other. Certainly the journeyman plumber may be as dangerous to the public health and safety as the architect." (East Bay Labor Journal).

TRADE LITERATURE

A new motor grader catalog has been issued by the Austin - Western Road Machinery Co., Chicago, Ill., covering in detail the latest developments in Austin single and dual drive power graders.

"The Motor Truck as an Engineering Job," an article by Harry W. Miller which appeared in the Australian Motorist, has been reprinted by the International Harvester Co., Chicago, Ill. This company has also issued a 32-page illustrated bulletin showing trucks at work on engineering jobs under widely varying conditions.

Apparatus and accessories used in the testing of cement and concrete are described in a 14-page illustrated bulletin of the Fisher Scientific Co., Pittsburgh, Pa.

S. F. FINANCES AVAILABLE FOR CASCADE TUNNEL

Private capital is prepared to finance construction of a twenty-seven mile tunnel through the Cascades in Washington state, according to word from Wenatchee, Wash.

H. H. Meyer of San Francisco, said to represent San Francisco capitalists that have financed a number of toll bridges, has been studying the proposed project and an announcement is expected shortly.

A double tunnel that will provide a track for railroads and a route for motor vehicles is one plan proposed. Approximate cost of the bore is given as \$100,000,000. Parallel tunnels are also proposed with the approximate cost given as \$100,000,000.

SACRAMENTO ENGINEERS NAME COMMITTEE CHAIRMEN

The Sacramento Chapter, American Association of Engineers, has named the following committee chairmen to serve for the ensuing year:

L. V. Campbell, civic and legislature committee; F. P. Basler, fellowship and membership committee; R. E. Pierce, publicity and public information committee; L. B. Reynolds, program committee; W. A. Mason, qualifications committee, and C. P. Plummer, auditing committee.

J. C. Hammond has been reappointed secretary of the Chapter.

MORE FUNDS FOR HIGHWAYS THROUGHOUT STATE

A new plan to increase the amount of state funds available to highway districts from \$500,000 to \$3,000,000 annually will be presented by Carl Mau of Redding at the state-wide meeting of the California State Chamber of Commerce next Thursday at the St. Francis Hotel.

Mau is chairman of a special committee of the chamber on the revision of the joint highway district law.

An analysis of proposed additions to the secondary road system of the state will be made by Carl Lamus, president of the Sacramento Chamber of Commerce and chairman of the highway committee of the Sacramento Valley Council of the state chamber.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684).

- R-3349-S SALESMAN, young man with car, to do promotion work for dealers. Must have experience selling roofing to owners. Salary and expenses. Location, Northern Calif.
- R-3367-S ENGINEERING ASSISTANT, 26-30 years, to check quantity estimates, run levels, assist time-keeper and make himself generally useful to contractor's superintendent on grading job. Must be able to stand cold weather and camp life. Salary \$150 and board. Location, Northern Arizona, Headquarters, San Francisco.
- R-3355-S DRAFTSMAN, first class topographic draftsman and tracer, for oil company. Salary about \$175 month. Apply by letter with references and samples of ability. Location, Texas.
- K-323-W-1797-C-S CHIEF CONSULTING ENGINEER having broad knowledge of all details of automobiles and with at least five years' experience on the standardization of automotive design, to develop specifications on automobiles, trucks, motorcycles and automotive equipment. Knowledge of tractors, their design and equipment desirable. Salary open. One third to one-half in paper rubles for living expenses, balance in United States money in an American bank. Applications only by letter which will be forwarded to Moscow for decision. Location, Russia.
- R-3366-S MECHANICAL ENGINEER preferably graduate, not over 32 years, with 3-5 years' experience on the board, for general mechanical design and detailing. Salary \$175-250 month. Location, San Francisco.
- W-1270-C ENGINEER, for executive position. Must be experienced in lumber. Duties will be to study uses for product, markets, determine policies and budgets. Apply only by letter. Location, Midwest.

CALAVERAS FLOOD CONTROL 'DAM IS ACCEPTED

Acceptance of the Calaveras Flood Control Dam, recently completed by Bent Brothers of Los Angeles, was voted by the Stockton City Council, October 14.

A resolution authorizing an appropriation of \$210,000 as final payment on the project will come before the council next Monday.

A "rider" on the resolution of acceptance provides that the city will be protected for all time against possible damage suits the contractors might institute. The dam cost approximately \$1,650,000.

A formal dedication and public celebration at the dam are planned for the near future.

GRADE-CROSSING ELIMINATION COSTS CITED

Railroads of the United States in 1920 spent \$28,445,680 for the protection or elimination of highway grade crossings. Of that amount \$25,113,338 was spent for separation of grades and \$589,941 for abandonment or removal of highway grade crossings. For automatic warning devices, gates, signals and signs designed to protect human life at crossings, \$2,742,401 was expended.

REVISED PLASTER ORDINANCE BEING ENFORCED IN L. A.

The new Los Angeles city plastering ordinance requiring three coats for all exterior work, which went into effect September 16, is being enforced on all jobs for which permits were issued subsequent to that date, according to Southwest Builder and Contractor.

The ordinance provides that:

1. Grounds for plaster lath, fiber lath and/or wood lath shall be not less than seven-eighths of an inch in thickness instead of three-fourths of an inch. Grounds for metal lath shall be the same as in the past, not less than three-fourths of an inch in thickness. This exception of plaster applied directly to tile or masonry.
2. All exterior plastering shall be three coat work instead of two coat work as the old ordinance provided and shall be not less than seven-eighths of an inch in thickness except when applied directly to tile or masonry.

3. The minimum gauge of string wires has been changed from No. 16 B. & S. to No. 18 W. & M. and wires shall be nailed at points not more than thirty-two inches apart instead of every stud.

4. Waterproof paper instead of being nailed every eighteen inches shall be nailed at points not more than four feet apart horizontally and three feet apart vertically.

5. Every first coat of exterior plaster and/or stucco instead of having a minimum thickness of three-eighths of an inch measured from the face of the backing shall have a minimum thickness of not less than five-sixteenths of an inch measured from the face of the backing. Plastering applied directly to tile or masonry is excepted as in the past.

6. The mortar mix for exterior work instead of being one part of portland cement to three parts of sand, shall now be one part of portland cement to more than four parts of sand.

7. Every second coat of exterior plaster and/or stucco instead of having a minimum thickness of one-fourth of an inch measured from the face of the first coat shall have a minimum thickness of three-eighths of an inch measured from the face of the first coat.

8. Every third coat of exterior plaster and/or stucco shall be of approved material and be of sufficient thickness to comply with the total minimum thickness required. If brush coat is used, it must be applied after the third coat of cement plaster is applied.

9. Instead of two coat work on wood lath, there must now be three coats. The minimum thickness of the latter shall not be less than one-half inch measured from the face of the lath or plaster reinforcing except where metal lath is required and then the minimum thickness shall be the same as in the past, not less than three-fourths of an inch measured from the back of the lath.

10. The first coat on wood lath shall be thoroughly scored, scratched or combed and shall have been applied and in place for not less than twelve hours before the second coat is applied and shall be not less than one-eighth inch in thickness measured from the face of the lath or plaster reinforcing.

11. Two coat work may still be used on composition lath, but with a minimum thickness of one-half of an inch of plaster measured from the face of the lath, instead of three-eighths of an inch.

12. The second coat on wood lath shall have been in place not less than twelve hours before the third coat is applied.

13. The third coat on wood lath shall be of sufficient thickness to provide the minimum thickness of one-half of an inch of plaster measured from the face of the lath.

NEW OIL BURNER TEST CODE IS DRAFTED

The technical research committee of the American Oil Burner Association completed its draft of the test code for testing oil burners and steam boilers at a meeting in New York on October 7, according to an announcement by Harry F. Tapp, executive secretary of the Association.

The test code was developed in connection with the research work now being conducted at Sheffield Scientific School, Yale University, by Professor L. E. Seelye. The work is being done in co-operation with the research laboratories of the American Society of Heating and Ventilating Engineers and the American Oil Burner Association.

Members of the committee who participated in the final draft of the code were J. H. Melville, Melville Burner Corporation of Evanston, Ill., chairman; R. W. Beckett, Silent Automatic Corporation of Detroit; Homer Linn, American Radiator Company, New York; Professor Seelye; W. C. Schoenfeldt, technologist of the American Oil Burner Association, and Harry F. Tapp, secretary.

CALIFORNIA MAINTAINS ROAD BUILDING RECORD

That California has forged to the forefront of American states in highway construction is revealed in an announcement of a record expenditure of \$25,294,000 in road projects during the present state biennium.

Before the end of the biennium next July an additional \$1,425,000 will have been spent, thus completing a total budget of nearly \$30,000,000 for the two-year period and ranging as one of the greatest highway programs in California history.

In making public this schedule of road extensions, C. H. Purcell, state highway engineer, announced that all highway construction has been pushed in compliance with the appeal of President Hoover to provide work.

LEAGUE OF MUNICIPALITIES ELECTS OFFICERS

C. H. Bidwell, mayor of Sacramento, was elected president of the League of California Municipalities at the annual convention at Long Beach, succeeding Gordon Whinnall, city planner of Los Angeles. Mr. Bidwell is an attorney.

The engineering group of the league elected as its chairman, C. R. Blood, assistant city engineer of Sacramento; vice-chairman, V. C. True, office engineer of Los Angeles; city engineering department secretary, Roy W. Fowler, city engineer, Santa Cruz.

The city managers' group chose A. E. Stockberger of Alhambra as chairman; James S. Dean, Sacramento, vice-chairman; and J. W. Price, Anaheim, secretary.

The city planners' group elected Rooves Conover of Monterey, chairman; Mortimer J. Clark, Long Beach, vice-chairman; and Bernard Brennan, Glendale, secretary.

B. J. Pardee of Visalia, was elected president of the California Sewage Works Association, which met at the same time the League was in session. He succeeded F. A. Batty of Los Angeles. W. A. Allen of Pasadena was elected first vice-president; John Jacobson of University of California Farm Davis, Calif., second vice-president, and E. A. Reinke was re-elected secretary-treasurer.

REAL ESTATE EXECUTIVE PICTURES RADICAL CHANGES IN PLANNING OF THE HOME

Single family houses in this country will undergo radical changes in the next ten years, says Herbert U. Nelson, Executive Secretary of the National Association of Real Estate Boards.

Interested in housing on behalf of the thousands of Association members who handle homes or home sites, Mr. Nelson, writing on the home of the future, sees more and more attention paid to giving the home dweller better light and air.

So the houses he says which will dot the landscape a decade from now will have flat roofs that can be utilized for outdoor living rooms. They will have opaque windows as wide as store show windows, providing an abundance of air and light without loss of privacy because, though the sunshine can get in, the public gaze cannot.

He predicts "thinner and thinner" walls and partitions which will save so much space and expense that the home builder can add another room without increasing the dimensions of house plans used at present.

And he pictures the future home dweller reclining with comfort on a hot summer night, with pleasant breezes fanning his cheek from the house cooling system.

They Still Want Beds

But he does not think the ultra-modern designs recently advanced by some architects are practical, and says that the public is accustomed for hundreds of years to sleeping in beds will not accept the space-saving ship bunks put in one of these plans.

"The pitched roof will not be seen in the future," says Mr. Nelson. "It was brought here from the northern countries of Europe where it was originated to shed snow and rain. The 'pitch' was relied upon to carry off the water. The modern downspouts and gutters and the waterproof character of the modern roofing materials make it unnecessary to pitch roofs now to combat the elements.

Flat Roofs Seen Already

"There is no reason why a house cannot be roofed with a flat surface which can be used for an outdoor living room in these days of small building lots when yard and recreation space is at a premium.

"One sees flat roofs in some southern cities but they are beginning to appear in northern cities and suburbs, and I predict that in time there will be no more pitched roofs in this country. One family has built an open air place on their roof garden which they have landscaped effectively. It is one of the most pleasant places I know of.

"Nor do flat roof houses have to be monotonous. Ornamentation and special architectural treatment can make them as varied as the pitched roof type. A single room in any shape can be erected on the roof so the roof surface will form a sort of promenade around such a room. There are many other treatments that the architects can work out.

Give Them The Air

"The point is that people never have enough space, and there is a definite trend to search out all possible unused space in home construction. Why cover up the roof so it cannot be used, when the house can be made just as interesting architecturally with a flat roof?

"With physicians continually stressing the importance of adequate air and light, future generations are going to demand even more provisions for these important elements, yet the growing congestion of our cities makes it difficult to get either. The home of the future, therefore, will be so constructed that it will receive two or three times the amount of air and light secured by the homes of today.

"I believe we will come to use opaque windows, such as those used in factories at present. The glass admits light but cannot be seen thru. These will be as large as some present day store windows, which will give houses the pleasing appearance of sun parlors. Several of these giant windows will be placed in each side wall, with the center one of transparent glass.

And No Cellar Steps

"The basement will be eliminated entirely. It is costly, inefficient, and serves few useful purposes to the modern family except as a storage place for the heating system. Heating systems will be the garages which will be attached to the houses. Within the next ten or fifteen years, every house built will be built with a garage.

"Building lots will change in size, because of the advent of the attached garage. Sites will be wider and shorter to accommodate the attached garage on the side. This tendency is so strong that it may affect architectural styles in that such designs will have to conform to the wider lots. The attached garage is, of course, a space saver. One does not require a deep lot as in the days when the barn was placed at the end of the back yard, probably in order to keep the stable odors as far as possible from the house. Perhaps people didn't realize this when they began substituting garages for barns. At any rate, until recently, the garage was placed about where the barn had been.

Turn Houses Inside Out

"Floor plans will be shifted so that the living rooms will appear at the back of the houses and the kitchen and service rooms on the street side. Living rooms were originally placed along the street because the street was thought of as a parkway, lined with trees and gently traversed by carriages. Then it was pleasant to sit on the front porch or to linger in the front room windows.

"Then too front yards were used as play places for the children and mothers sat on the verandas with their sewing and watched their offspring romp close to the old fashioned curb. Now, in our cities, the front yard is the very last place in which mothers want their children to be, and even suburban parents are fearful of passing automobiles.

"Fewer houses have porches, and no one in our cities wants to sit on them anyway. The dust, dirt, and noise from the street, the automobile racing by, the thud of heavy trucks, makes the front of the house a far from pleasant place in which to linger. Thus, there is a tendency already to turn houses around on their lots and place the living rooms at the back and the kitchens on the street. The living room then can open onto the back yard which can be made attractive with flowers and landscaping, and a far greater degree of quiet can be enjoyed by the home dweller.

"Walls and partitions will be thinner and thinner without decreasing the durability of the house. There is already a trend in this direction due to the improvement of insulating materials and the use of new wall materials. Centuries ago when a man built a house, he usually built it of stone with walls a foot and a half thick. He did this to keep his house warm and dry as possible during bad weather. His construction kept his house cool in summer.

Two Inch Walls

"Now insulating materials of infinitesimal thickness will do this, and new building materials are provided durable walls that need be only a few inches thick. Most walls are eight inches under present building codes, but these codes will be revised in the future to permit four and, perhaps, even two inch walls and partitions.

"Stop and think of the saving in cost of materials in such a change. In addition, there will be saving in usable space that will surprise the builder when he figures it out. Suppose you usually make walls 8 inches and you find you can make them 4 inches and achieve the same structural result. You could save space enough to make a bathroom or a small bedroom. The further development of such wall materials as steel, and other products, will actually cut down on the cost, and add floor space to the average home.

Nice For The Summer

of the future will have one plant which will heat it, make its ice, and wash and cool its air when necessary. "The future home dweller will not have to go to summer resorts in the hot weather. The cooling systems, that I am sure will come, will not only regulate the temperature throughout the house but will make it possible to regulate the temperature in an individual room.

"Picture the home owner of the future coming home on a sizzling hot evening and finding cool breezes playing through his bedroom.

"I do not think the public will accept some of the ultra-modern house ideas and designs that we have seen in the magazines recently. Our members get to know the public mind on this subject pretty well, and we find that the rank and file of people have very definite and deep-rooted ideas of what homes should be.

"They like improvements if they can't see them, but if you change the house too radically, they won't like it. They won't accept the circular rooms one architect predicts, and they won't sleep in ship's cabin bunks that another architect forecasts.

"People want homes to look like the homes they dream about. If you can improve the home without altering the dream too much, they will accept it. Put when young couples dream about the home they want, they don't dream about revolving doors, or futuristic angles. The pink and white sugar cottage is still popular!"

PANELBOARD PRODUCTION

A new publication covering panelboards has been issued by the Westinghouse Electric & Manufacturing Company, Brooklyn, New York. This 12-page booklet, identified as Special Publication 1590, contains typical panelboard specifications to help the architect and consulting engineer, descriptions of Westinghouse panelboards, and many illustrations showing these panels and their construction.

The publication has been given A. I. A. File No. 3133 told A. I. A. File Number 31631. A request addressed to any office of the Westinghouse Electric & Manufacturing Company for a copy of S. P. 1590 will bring a copy of this publication.

BUYS PLANNING MILL

H. C. Evans has become sole owner of the Tulare Planning Mill Company, King and H. Sts., Tulare, having purchased the interest of his partner, H. H. Newby. Evans and Newby had been partners in the business for 22 years. Newby will remain in Tulare, but has not announced his business plans for the future.

ARCHITECT'S CONCEPTION OF QUANTITY SURVEYOR PROFESSION

By Wilbur T. Trueblood, President, St. Louis Chapter, A. I. A.

Address of Mr. Trueblood at the Fifth Annual Convention of the American Institute of Quantity Surveyors in St. Louis, Mo., April 15, 1930.

As an architect, I can realize that the quantity surveyor has a big job. Anyone who lists the items and estimates the amount of labor and material in any proposed work has much to do. There can be no doubt in my mind that any architect would do everything within his power to help in such a work, for he knows its value.

As I say, this listing and estimating is a big job. A quantity surveyor must think of many things. I am reminded of a nursery rhyme. If you will look back to your childhood, and review Alice in Wonderland, you also will remember this:

"The time has come," the walrus said

"To speak of many things,
Of ships and snails and sealing wax

And cabbages and kings."

The walrus evidently was getting ready for a general survey. I'm not sure if it was ever to be a quantity survey, but it was the start of a list, and it is a famous one, but it is an old list and not nearly complete.

If the walrus were here tonight, I think he would tell you that his list should begin thus:

"The time has come," the walrus said,
"To think of many bricks,
Cement, and sacks, and chimney stacks,
And varnish cans, and picks;

"Of yards of dirt, and length, and girt;
And gravel pits, and sand;
Of building loads, and city codes,

And wondering if they'll stand.

"Of boards and planks, and water tanks
And excavating tools;
Of depth, and height, and dynamite,
And, maybe, swimming pools.

"Of plastering, and lathing,
And elevator shafts;
Of knobs and doors, and concrete floors,
And men, and time, and crafts.

"Of painting trades, and shovel blades,
And salamander pots;
Of nickel plate, and completion date,
And all the whats and nots.

"And when we're done, but have added one,
To the vast and varying;
We have a list—perhaps we've missed
The most important thing."

While this sounds facetious it is only a jumbled up part of the many, many things that a quantity surveyor must keep in mind and about which he must have a very definite and accurate knowledge. We as architects realize the size and importance of their work. We know that a great amount of patience and a great deal of care, and time, and skill, is expended in listing the things which must be included in the building program.

The erection of a building is not a game. Everyone connected with it is engaged in the serious business of creating a building. For all of us who are thus engaged together in this work — architects, builders, quantity surveyors, workmen — there exists the great responsibility of giving to our client a good building, a safe building, and an economically built building.

employer and boy is not widely practiced, there is coming into use a system which amounts to the same thing. That is the joint apprenticeship committee system. These committees are composed of representatives of employers and of journeymen and, in some cases, of the city school boards. Apprentices are under agreement with the committee to serve their full time and to abide by the laws of the committee, which on its part takes the responsibility of seeing that the boy has employment and proper opportunities for training throughout his apprenticeship.

Where joint committees do not operate, the union may serve the same purpose, the apprentice being in effect indentured to the local union and governed by the terms of the working agreement between the union and the employers, with the union acting as placement agent to keep the boy employed.

Apprentice training has more vitality, is more closely organized, and is affecting the building situation more definitely in those centers in which the division of vocational education of the local school board, acting under the Smith-Hughes law, is cooperating than in the cities in which the contractors or the unions are trying to work out the problem alone.

In the building trades, at least, there seems to be no shortage of material for training and long waiting lists of applicants for apprenticeship are common. An experience some time ago of the commission on apprenticeship in one large city illustrates the point.

In an effort to arouse interest among contractors and the public in the program and work of the commission, its secretary broadcast an address through a local radio station. "The results," he said, "were illuminating and disappointing. We were flooded with requests from boys and parents for more information and with applications for apprenticeship, but not one contractor came forward with a request either for details of the system or for an apprentice."

JURISDICTION OF SUPERIOR COURT IN LIEN CASES DEFINED

The superior court has exclusive jurisdiction in mechanic's lien cases where the amount demanded is from \$300 to \$2000 and the property involved is outside a city having a municipal court, according to a decision by Division Two, District Court of Appeals, denying a writ of prohibition which O. N. Scott had sought against the Los Angeles Superior Court, says Southwest Builder.

Scott is a party to five actions in the Superior Court, each to foreclose a mechanic's lien and in each of which the amount demanded is less than \$2000. Seeking to restrain trial of the cases, Scott alleged that the Los Angeles municipal court had exclusive jurisdiction.

The appellate opinion denying this contention was delivered by Justice Gavin Craig and concurred in by Presiding Justice Lewis Works and Justice Ira Thompson. The property against which the liens are directed is in the city of Pasadena.

The appellate court pointed out that Sec. 13, Art. 6 of the Constitution gave the Legislature power to fix the jurisdiction of municipal courts and this was fixed at \$2000, based on a previous method of territorial allocation. The change gave the superior court original jurisdiction in demands for amounts between \$300 and \$2000. It was concluded, and it therefore has exclusive jurisdiction of mechanic's liens between those amounts outside the City of Los Angeles.

APPRENTICESHIP METHODS CHANGED BY SPECIALIZATION

Specialization in industry has greatly altered the system of apprenticeship whereby a young man learned an entire trade, the Commissioner of Labor Statistics, Ethelbert Stewart, stated orally Sept. 19 at the Department of Labor, says the U. S. Daily.

When a man is needed today in one definite phase of an industry, there is little need of his learning a trade, it was explained. Another factor contributing to the decline of the old system has been the hesitancy on the part of employers to hire men to train. Usually there is an abundance of labor available which has already been trained.

Additional facts set forth by Mr. Stewart follow:

Apprenticeship still exists today. But it is now a common practice for a boy to get his training in a school rather than through actual work at his chosen trade although he may also receive the latter type of training in addition to schooling. Of late years one of the notable developments in the apprenticeship system has been the establishing of corporation schools. The Santa Fe Railroad started such a school in a western state to train men for railroading. And its popularity and production of capable men led to the institution of similar schools in other lines of industry.

Vocational training in high school does not usually enable a boy to learn a trade thoroughly. As a matter of fact, this type of training is scattered throughout a number of fields. Probably its greatest practical value lies in giving a youth an idea of the work for which he is best fitted and in which he will be best satisfied. In addition, he acquires knowledge that is helpful to him in everyday life, often enabling him to cut down living expenses. Through this education he may learn, for example, how to perform minor adjustments on his automobile, how to do carpentry work on a small scale, or how to do a bit of blacksmithing.

Some cities have organized movements for training apprentices in accordance with provisions of the Federal Vocational Education Law. In some cities evening school attendance is required and in others, part time day school attendance on paid for time. Figures for 1928 in 18 of the larger cities of the country show that there were in the building trades alone more than 19,000 apprentices formally indentured, registered with unions, or bound in some manner. School attendance was not required for all these apprentices, however.

While apprenticeship in the building trades by formal indenture between

TREATED LUMBER IS NEW FIELD FOR RETAIL DEALER

(By T. F. Laist, Chairman Subcommittee on Treated Lumber, National Committee on Wood Utilization).

Just at a time when retail lumber dealers are more alert to new business opportunities than ever before the distribution of treated lumber comes to the front. Treated or chemically preserved wood is not new, as every lumberman knows, but heretofore only a comparatively few retail lumber dealers have taken advantage of the trade possibilities which it offers when carried in stock in standard sizes and grades suitable for house, small building construction and farm uses. As such, treated lumber affords a new and profitable field to the retail dealer.

Most lumbermen agree that if lumber as a building material is to retain its present position, constant efforts must be directed toward increasing its usefulness to the ultimate consumer. Through the application of preservatives to wood, its chief enemies—decay and depreciation through insect attack—are checked. In the past a large market has been lost to wood for purposes where its use would have been both desirable and economical had it not been for these enemies. The question today is whether to use treated wood or dispense with lumber altogether.

New Markets

These facts are generally recognized, and as a result the progressive retail lumberman is on the lookout for ways and means of not only maintaining present markets, but of opening new ones. Manufacturers and wholesalers already have exploited treated lumber in the railroad and industrial field, and have increased the volume and profits of their business. Only a small portion of this business, however, has passed through the retail dealer because it has not been practicable to carry in stock the items and quantities desired.

It has been well nigh impossible for the small user to obtain the few hundred feet of treated lumber in the proper sizes and grades that he has needed to give his buildings the protection against decay and insect attack which they should have.

As a result of this situation within the lumber and wood preserving industry itself, the home builders, the small consumer, and until recently even architects and contractors, have looked upon treated wood as of usefulness mainly in heavy requirements, and readily available only in large quantities. As advances have been recorded in the home building field of recent years, however, architects and builders have gradually come to realize that treated lumber is suited to many of their needs in houses and small buildings. Herein lies new business for the retail lumber dealers who stocks items and grades which can be employed.

Installing Stocks

Distribution through the retail dealer is the logical means of making this material available to the millions of small consumers. Retail lumber dealers all over the country are realizing this new business opportunity, and many of them are installing stocks of treated material. However, in Ohio where a systematized plan of distribution is being carried out under the sponsorship of the National Committee on Wood Utilization of the Department of Commerce, the greatest advances are being made.

This plan which is being worked out in cooperation with the Ohio Retail Lumber Dealers Association has two major purposes. First, of making supplies of treated lumber in standard sizes and grades suitable for house and small building construction available through

the retail lumber dealers. Secondly, the plan provides for a widespread promotion campaign to familiarize the consuming public with the advantages and uses of treated wood.

By virtue of several months' activity, treated lumber may be obtained through the retail lumber yards in Ohio in the following standard sizes and grades:

Educating Public

With supplies of treated lumber available, the National Committee and its cooperating agencies are engaged in familiarizing the lumber consuming public with its uses. "Treated Lumber, Its Uses and Economies," a new bulletin, has just been published by the Committee and is being given a wide distribution among lumber users. The Ohio retail lumber dealers are aiding the movement by calling the attention of their architects, contractors and builders to the new publication which recommends treated lumber for use in house, small building and farm construction. In this connection the bulletin says:

"The acquisition of a home is in most instances the most important investment which the average citizen undertakes. Generally home ownership depends on the securing of a loan, and the terms of this loan are based largely on the value represented by the house. It is therefore evident that the home owner must not only consider the question of good design, plan and construction, but he must also check up on the quality of the building materials used because the life of the house is in direct proportion to the life of the materials employed. The best construction methods will not prevent a wood structure from decay and insect attack unless the materials are of good quality. If good building materials have not been employed, there are certain vital parts of a wooden structure which are particularly subject to decay and insect attack. If the home owner will insist on protecting his interests by using treated wood in the construction of such parts, he will undoubtedly find this fact taken into

consideration by the banker who grants the loan. The use of preserved wood will therefore contribute to the increase in individual home ownership."

Certain trends of modern architecture favor setting the house as close to the ground as possible, and in such cases treated wood may be used to the advantage in foundations and sills, according to the new bulletin. In such points out other uses which the retail lumber dealer may recommend to his customers as follows:

"In many cases home owners are desirous of remodeling their houses and this affords an opportunity for the use of treated lumber to effect an appreciable economy through its use. It is reasonable to expect that proportionately greater savings will accrue to the smaller consumers on whom the burden of repair and premature depreciation rests more heavily. For this reason the National Committee on Wood Utilization is sponsoring the retail distribution of treated lumber, to make it available to the average lumber consumer."

Retail lumber dealers in other states will doubtless watch the progress of the treated lumber movement in Ohio with an eye toward capitalizing on the distribution of this material themselves. Full information can be obtained from the National Committee on Wood Utilization at Washington and copies of the new bulletin may be obtained at a nominal charge from the Superintendent of Documents, Government Printing Office, Washington, D. C., or through the District and Cooperative Offices of the Bureau of Foreign and Domestic Commerce, Department of Commerce, in leading cities.

The Portland Chapter of the Associated General Contractors of America has protested the activities of the Oregon Institute of Technology in sending out a circular relating to a course of instruction which is intended to help men who are practical carpenters to "break into contracting." Such a proposal, the chapter feels, is a dangerous one. In a letter to the institute, Mr. George B. Herington, secretary of the chapter, points out that the industry is cursed with financially irresponsible persons who "break in."

There is no objection in the industry, Mr. Herington says, to legitimate competition by people who are able to pay for their own mistakes, nor any objection to the man who wishes to start upon his own and who does so with proportionate business responsibility and understanding as a back-ground for his small or large endeavor. However, he says, the contracting business is a business and must be so approached and when it is not, the insecure adventurer gets hurt, the owner always gets hurt, labor gets hurt and the material man gets hurt.

Instead of teaching "breking in" contracting, Mr. Herington urges that the institute instruct men in responsibility in construction and pledges the full support of the association in this endeavor.

GALVANIZED IRON IMPORTING FORBIDDEN BY AUSTRALIA

The Australian Minister for Trade and Customs has issued a proclamation which became effective October 4, prohibiting the importation of all galvanized iron, according to a radiogram received by the U. S. Department of Commerce, from Trade Commissioner James E. Peckham at Sydney. The minister's consent has been given for the importation of such goods if they were actually in transit on October 4.

Ryan), 616 Norwalk Highway, Chicago, Ill., manufacturers of rotating seal, wiping rings, automobile packing, individual seal packing for any condition, floating gland packing for vibrating rods such as steam hammer, desire a high type caliber representative who has had merchandising experience and with capital to handle the complete West Coast. 31

LOWERING COST TO OPERATION AT A PROFIT

The present competitive situation has tended to force manufacturers to work on closer price margins than at any time during the past several years. The matter of eliminating waste and cutting costs has, therefore, assumed a position of prime importance, because it may well mean the difference between profit and loss in manufacturing operations. In these circumstances, a system of budgetary control has often been found to be a valuable aid in increasing the efficiency and profitableness of manufacturing operations.

The fact that manufacturing executives are tending to give this subject an increasing amount of attention makes particularly timely a report entitled Budgeting Manufacturing Operations, recently published by the Policyholders Service Bureau of the Metropolitan Life Insurance Company. The facts presented in this report are based on the budgeting practices of more than 80 representative manufacturing concerns. Consideration is given to procedure in developing and administering the production budget, as well as results obtained through its use.

According to the Foreword, the survey was conducted for the purpose of examining methods of budgetary control of manufacturing operations, the cost of which generally represents a large percentage of the total operating cost. Continuity of production is fundamental to stability of employment for the working force. "The planning incidental to budgeting." It continues, "places in the hands of management definite information for outlining the extent of manufacturing operations in advance—a powerful tool for helping to level the peaks and valleys of the employment curve."

The report reviews in considerable detail some of the noteworthy features of budget practices and systems used by the organizations which operated in the survey. Among the important aspects of the problem studied are production schedules, material, labor and manufacturing expense budgets; methods of control for plant and equipment expenditures; comparison of actual and budgeted accomplishments; and incentive systems for securing the latter. The publication is illustrated with reproductions of forms and charts and is obtainable without cost upon request to the Policyholders Service Bureau, 1 Madison Ave., New York, N. Y.

In the annual report of the highway department of the District of Columbia the suggestion is made that a clause be inserted in contracts for paving work in the congested section requiring a double shift of workers to minimize delays to traffic.

Engineering News Section

BRIDGES

KERN COUNTY, Calif.—Until Nov. 12, 2 P. M., bids will be received by State Highway Commission to construct four timber bridges from 17 to 21 miles west of Wasco, one composed of twelve 19-ft. spans, one composed of four 19-ft. spans and two composed of two 19-ft. spans each, all on frame bents with concrete footings.

LOS ANGELES, Cal.—E. G. Perham 1128 Stearns Drive, was awarded contract by the county supervisors at \$25,000 to construct two bridges in San Gabriel Canyon, on the Crystal Lake Road, one over the North Fork, the other over the West Fork.

SAN RAFAEL, Marin Co., Cal.—A. T. Howe, at \$3834 awarded contract by county supervisors to construct two reinforced concrete bridges, one at First Valley Inverness and one at Second Valley Inverness—Point Reyes Road District No. 4, involving: 135 cu. yds. class A Port. cement concrete; 12,600 lbs. reinforcing steel. Complete list of bids follows:

A. T. Howe\$3834
L. Carcano4623
L. Lambretti4725
N. Maggiora4950
Otis H. Smith5139
Seimer & Kendall6763

SAN LUIS OBISPO COUNTY, Cal.—Until October 28, 2 P. M., bids will be received by L. H. Gibson, district engineer, State Highway Commission, Bank of Italy Bldg., San Luis Obispo, to repair timber bridge over San Carpelo Creek about 11 miles north of San Simeon, by constructing timber truss span 75 ft. 10 inches long on concrete piers to replace some of the existing bents. Certified check 10% payable to Director of Public Works required with bid. Plans obtainable from engineer.

YUBA CITY, Sutter Co., Cal.—Until October 31, 2 P. M., bids will be received by J. B. Heiken, secretary, Joint Highway District No. 12, Yuba City, for:

(1) construct concrete trestle bridge 120-ft. in length, across Main Drainage Canal of Reclamation District No. 1500;

(2) construct concrete bridge, 20-ft. in length across Central Irrigation Canal of Sutter Mutual Water Co.

Both structures are located near town of Robbins. Certified check 10% payable to secretary required with bid. Plans obtainable from the engineer, Edward Von Geldern, at Yuba City.

SACRAMENTO, Cal.—C. J. Nystedt, Capital National Bank Bldg., Sacramento, at \$44,966 awarded contract by county supervisors to construct bridge (Hagle bridge) over Laguna Creek. Award made on basis of untreated Douglas fir pile and steel construction.

MERCED, Merced Co., Cal.—Following contracts awarded by county supervisors to construct bridges in various sections of the county:

E. K. Angle, Dos Palos, \$2534 for concrete bridge over canal on Centenella road.

E. K. Angle at \$1750 (total) for timber bridge over Rosa slough on Dos Palos road; 2 timber bridges over irrigation canal on Lone Willow road.

Roy Kruger, Gustine, at \$2825 for concrete bridge on Warren Ingomar road.

C. B. Cameron & Son, Merced, at \$1225 for timber bridge over Black Rascal Creek on Bartholomew road.

Liner & Allen, Merced, at \$2475 for concrete bridge over Duck Slough on Tuttle road.

United Concrete Pipe Co., Merced, at \$607 for concrete pipe culverts on North Branch of Mariposa Creek on Tuttle road.

SACRAMENTO, Cal.—Until October 29, 10 A. M., bids will be received by Harry W. Hall, county clerk, to reconstruct East fender of Walnut Grove bridge. Certified check 10% payable to Chairman of Bd. of Sups. required with bid. Plans obtainable from County Engineer Chas. Deterding.

MODESTO, Stanislaus Co., Calif.—George L. Ulrich Const. Co., Modesto, at \$-975 awarded contract by county supervisors to construct reinforced concrete bridge No. 372 over Hood Creek in Section 17, T. 1 N., R. 11 E., together with earth fill approaches and construction of temporary roadways around proposed structure.

FRESNO, Fresno Co., Cal.—Madsen, 247 Maple St., Fresno, at \$2,992 awarded contract by county supervisors to construct a combination concrete and wooden bridge across the channel of the C and K Canal at Centerville. Project involves: 73 cu. yds. reinforced concrete; 12,632 bd. ft. lumber. Complete list of bids follows:

M. Madsen\$2992
W. T. Harris3188
Geo. G. Wood3323
W. H. Jones3631
D. W. Chamberlin3913
Engineer's estimate3500

HUMBOLDT COUNTY, Cal.—Smith Bros. Co., Eureka, at \$4,547.24 submitted lowest bid to State Highway Commission, 546 Wabash Ave., Eureka, to remove and replace the timber lift span of the bridge over Eureka Slough at Eureka, consisting of one 75-ft. truss span.

Following is a complete list of bids: Smith Bros. Co., Eureka, \$4,547.24; Henry Padgett, Fields Landing 4,870.00; Fred Maurer & Son, Eureka, 5,333.50; Mercer-Fraser Co., Eureka, 6,134.00. Bids forwarded to Sacramento office for award.

OAKLAND, Cal.—County Surveyor George A. Posey preparing plans for bascule type of bridge in Park street over the Oakland-Alameda Estuary. This type of structure was favored following a meeting of Oakland city officials, Alameda city officials, county supervisors and City Port Commission. Will be 400 feet long with 44 ft. roadway. The cost is estimated at between \$500,000 and \$700,000.

LAS VEGAS, Nevada—The state highway department has announced that the state will build a new bridge on the Arrowhead Trail between

Bunkerville and Mesquite some time early next spring. The department plans to expend about \$150,000 for this work. George R. Egan, chief bridge engineer, will have charge of the survey and plans.

OAKLAND, Alameda Co., Cal.—C. J. Nystedt, Scotts Ave. and Commerce St., Stockton, at \$15,536.50 awarded contract by county clerk for repairs to the highway and railroad approaches and the realignment of one highway approach of Fruitvale Ave. bridge in Alameda and Brooklyn Townships.

Followings is a complete list of bids received:

C. J. Nystedt, Stockton\$16,536
A. W. Kitchin, S. F.16,207
M. B. McGowan, S. F.19,930

LOS ANGELES, Cal.—City council will call election shortly to vote bonds of \$1,330,000 for a grade separation at the Santa Fe and Union Pacific tracks at the river and N Main St., including a bridge at Aliso St.

DREDGING, HARBOR WORKS & EXCAVATIONS

OAKLAND, Cal.—City Port Commission, 424 Oakland Bank Bldg., rejects bids received Oct. 14 for clam-shell dredging at Ninth Avenue Pier. Bids were: American Dredging Co., \$445 cu. yd.; Pacific Coast Dredging Co., \$4625. This is second rejection of bids.

SACRAMENTO, Cal.—Until 3 P. M. Oct. 29, bids will be received by the U. S. Engineers' Office, California Fruit Bldg., for raising the existing levee along westerly side of Yolo Ey-Pass, beginning at a point about 0.9 mile SE of Yolo station on the Sacramento Northern Railroad, and extending to the pump house at SE corner of Reclamation District No. 2068. Work consists of 21,750 ft. of levee and involves: 247,000 cu. yds. embankment. Plans may be obtained from above.

MONTEREY, Monterey Co., Cal.—City Manager R. M. Dorton has announced that bids will be called some time in March or April, 1931, for construction of a breakwater to provide a harbor for the city of Monterey.

LOS ANGELES, Cal.—J. P. Immel, 500 W Fifth St., Oxnard, has been awarded a subcontract by Thos. Haverty Co., general contractor on the Santa Clara river project, for moving 280,000 yards of dirt in the Santa Clara production area, constructing levees for a distance of 32 miles between Piru and the ocean. The contract includes all of the dragline work.

RICHMOND, Contra Costa Co., Cal.—City council sells \$86,250 block of municipal harbor bonds to Mechanics Bank of Richmond for a premium of \$11,028. Sale of the bonds enables the city to contribute \$90,000, allotted as its share of the cost of completing the training wall in the harbor, the Federal Government paying the remainder on the project, the total cost of which is placed at \$190,000.

OAKLAND, Calif.—City Port Commission, 424 Oakland Bank Bldg., authorizes construction of timber bulkhead along holdings of American Dredging Co. in Brooklyn Basin. The work will be undertaken by the construction forces of the Commission.

INDIO, Riverside Co., Cal.—Until 8 P. M., Nov. 1, bids will be received by the Coachella Valley Storm Water District, at Indio, for excavation of channels for the district, in three separate contracts, as follows:

Specifications No. 12—10,000 cu. yds. excav. of flood channel, Section 26, Twp. 6 R., S. 8 E., S. B. & M.

Specifications No. 14—33,000 cu. yds. excav. in Sections 26 and 35, Twp. 6 S., S. 8 E., S. B. B. & M.

Specifications No. 15—12,000 cu. yds. in Secs. 29, 30 and 32 Twp. 7 S., R. 9 E.

Plans obtainable from the engineer, G. N. Adams, 216 Rowan Bldg., Los Angeles. Certified check or surety company bond, 10%, must accompany each proposal.

MARYSVILLE, Yuba Co., Cal.—Until October 27, 3 P. M., under Circular Proposal No. 31-132, Specifications 2508, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, to construct four dykes on the Yuba River, between 3 and 8 miles easterly, and upstream from the town of Marysville. Plans obtainable from above office.

VALE, Ore.—Until 2 P. M., Nov. 8, bids will be received by the Bureau of Reclamation, at Vale, Ore., for construction of embankments and earth canal lining on the Vale Main Canal, Vale Project, Oregon. The work is located near Harper, Little Valley and Ballwood, Oregon. The principal items and estimated quantities are:

(1) 11,700 cu. yds. excav. for canal lining;

(2) 6300 cu. yds. excav. for embankments.

Plans may be obtained by application to S. O. Harper, acting chief engineer, Denver. Guarantee of 10% must accompany each bid.

SAN FRANCISCO.—Dutton Dredge Co., Ltd., Mills Bldg., at \$6.50 per hour (dredge operation) awarded contract by Board of Public Works to repair, building up and filling in foreshore of existing levee at Mills Field Municipal Airport and at \$5.00 per hour (dredge operation) to construct boat channel.

LONG BEACH, Cal.—The city council has authorized city engineer Herbert Paterson to complete a survey for a retaining wall and walk to be constructed along the central beach from Alamitos Ave. to 20th Place. The estimated cost is \$400,000. G. W. Flirth, structural engineer, will have immediate charge of the survey.

IRRIGATION PROJECTS

MERCED, Merced Co., Cal.—Election will be held in December to form proposed West San Joaquin Irrigation District, sponsored by People's Protective Association. The district will comprise approximately 250,000 acres, including lands in Merced, Fresno and Stanislaus counties. After formation, bonds will be voted to finance construction of a complete system of irrigation works.

MODESTO, Stanislaus Co., Cal.—Until 10 A. M., October 27, bids will be received by Modesto Irrigation District to improve Upper Main Canal, involving:

Schedule No. 1—Placing 131,500 sq.

ft. of 2½-in. concrete lining and 6500 sq. ft. of 2-in. concrete lining.

Schedule No. 2—Placing with reinforcing steel of 200 cu. yds. of concrete in sidewalks, weir, etc.

Schedule No. 3—Placing 50 cu. yds. concrete in walls and floor of main canal tunnel.

Schedule No. 4—Raising concrete sidewalks of Upper Canal, involving 910 cu. ft. of concrete.

District will furnish cement, the admixture, reinforcing steel, and aggregates of concrete work. Plans obtainable from secretary.

GREENFIELD, Monterey Co., Cal.—Until November 1, bids will be received by George D. Hawley, secretary, Clark Colony Water Co., Greenfield, to construct approximately 3500 feet of cement ditch and to haul 250 yards of gravel. Specifications obtainable from Ernest Thayer, manager of Clark Colony Water Co. at Greenfield.

STREET LIGHTING SYSTEMS

ANAHEIM, Orange Co., Cal.—Until 8 P. M., Nov. 5, bids will be received by the city council for remodeling the lighting systems on North and South Los Angeles Sts., bet. Cypress St. and Broadway, and on East Centre St. between Los Angeles St. and Philadelphia St., under 1911 act, involving 62 standards and glassways. The standards are to be furnished and installed by the contractor under a license agreement with the Consolidated Steel Corp. Plans obtainable from city engineer, E. P. Haggood, upon deposit of \$5. E. B. Merritt, city clerk.

SAN RAFAEL, Marin Co., Cal.—A. C. Rice, at \$3383 awarded contract by city clerk (\$343) to install ornamental street lighting system together with underground system in Fourth Street from E St. to point 77 feet west of 8 St., involving 24 Westinghouse 15 trust standards. 1911 Act.

Following is a complete list of bids:

A. C. Rice.....	\$5,388
R. Flatland, San Francisco.....	5,600
H. C. Reid, San Francisco.....	5,625
City Imp. Co., Berkeley.....	5,749
Butte Electric Mfg. Co., S. F.....	5,835
Hyans & Main, Fairfax.....	8,855
R. B. Hess.....	8,815

MACHINERY AND EQUIPMENT

OAKLAND, Cal.—Guy K. Harrington, 2841 Castro Way, Sacramento, at \$643, only bidder, awarded contract by city council to furnish and deliver one traffic-line marking machine for City Street Department.

SACRAMENTO, Cal.—Until 10 A. M., Nov. 17, bids will be received by the State Purchasing Agent, P. O. Box 621, Sacramento, for equipment, to be delivered to Dept. of Public Works, Division of Highways, Headquarters Shop, as follows:

15 more or less heavy duty 8-ft. leaning wheel graders with scarifier attachments;

10 more or less heavy duty, 8 ft. leaning wheel graders;

5 more or less 7 ft. leaning wheel graders.

All above to be equipped with rubber tired roller bearing wheels and to conform to specifications attached hereto. Prices to be f.o.b. main line terminal points in carload lots.

LA HABRA, Orange Co., Cal.—The city council has instructed the city clerk to advertise for a vacuum street sweeper.

MODESTO, Stanislaus Co., Calif.—City council has adopted Ordinance 390 providing a \$3,300 appropriation to finance purchase of two motor cars and one motor truck for the street department and \$1,000 for the purchase of a chassis for the Fire Department. H. H. Gragg, city clerk.

CORONA, Riverside Co., Cal.—Until 7 P. M., Nov. 4, bids will be received by the city council for furnishing the city with one 8-ton to 10-ton gasoline roller, and one 9-foot road grader. A. M. Hinkley, city clerk.

SACRAMENTO, Cal.—Until Nov. 3, 5 P. M., bids will be received by Chas. C. Hughes, secretary, Board of Education, Administration Bldg., 21st and L Sts., to furnish and install vocational training equipment. Certified check 10% payable to Board of Education required with bid. Specifications obtainable from Assistant Business Manager of the Board at the above address.

ORANGE, Orange Co., Calif.—Until 1 P. M., Nov. 3, bids will be received by the city to furnish one automobile with enclosed cab and steel pickup body for use in Water Department. One model 1919 Ford chassis to be taken in trade. Certified check, 10%. Paul E. Clark, city clerk.

FLAGSTAFF, Ariz.—C. C. Tillison, an electrical engineer of Clarkdale, employed by the United Verde Copper Co. has been working on an engineering plan to take water through a 116-mile tunnel from a dam to be constructed at Marble Canyon, emptying into the Verde river. This water to be used in the Verde Valley and below Phoenix to irrigate approximately 2,000,000 acres of land. The project, to cost \$210,000,000, it is claimed will develop over 1,000,000 horsepower.

RAILROADS

SEATTLE, Wash.—Municipal Utilities Committee of the City Council has authorized preparation of plans to extend municipal car line through the new Denny Hill district. Bonds of \$300,000 will be voted to finance the project.

BOULDER CITY, Nev.—Bids will be asked shortly by U. S. Bureau of Reclamation, Denver, Colo., for the construction of the 7-mile Government railroad from Boulder City, Nev., to the site of the Boulder Dam.

FIRE ALARM SYSTEMS

OAKLAND, Cal.—Until November 6, 12 noon, bids will be received by F. C. Merritt, city clerk, to furnish traffic signals and traffic signal lights. Bond of 50% of contract price required of successful bidder. Specifications on file in office of clerk.

FIRE EQUIPMENT

SAN FRANCISCO.—Until October 27, 3 P. M. (date extended from Oct. 20), under Proposal No. 644, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver cotton rubber-lined fire hose for Fire Department, as follows:

2,000 ft. 3½-inch;

12,000 ft. 2½-inch;

5,000 ft. 1½-inch.

Specifications and further information obtainable from above.

PACIFIC GROVE, Monterey Co., Cal.—Election will be held November 4 to vote bonds of \$15,000 to finance purchase of a motor fire engine. Elgin C. Hurlbert, city clerk.

LOS GATOS, Santa Clara Co., Cal.—Until November 3, 7:30 P. M., bids will be received by Dennis M. Wining, city clerk, to furnish and deliver 500-ft. of fire hose coupled complete, 2½-inch internal diameter and capable of standing pressure of 400-lbs. per square inch. Samples must accompany bid. Further information obtainable from clerk.

RESERVOIRS AND DAMS

MOULTON LANDING, Colusa Co., Cal.—Bids will be asked shortly by U. S. Engineer Office, California Fruit Bldg., Sacramento, to construct reinforced concrete weir at Moulton Landing; will be 500-ft. long and will include two abutments 40-ft. in length.

WHITTIER, Cal.—City council rejects bids to construct 10,000,000-gal. reservoir for city water department and work will be done by force account, under the supervision of the City Engineer M. R. Bowen.

PIPE LINES, WELLS, ETC.

FAIR OAKS, Sacramento Co., Cal.—Sacramento Pipe Works, 16th and North B Sts., Sacramento, awarded contract by Fair Oaks Irrigation District to furnish steel slip-joint pipe, as follows: 2000 ft. 30-in. 8-gauge and 2000 ft. 30-in. 10-gauge at \$3.24 ft. and 2000 ft. 12-in. 12-gauge at \$.89 ft.

SEATTLE, Wash.—Queen City Construction Co., 603 Eighteenth Ave., South, Seattle, at \$1,207,116.36, using lock-bar pipe, awarded contract by Board of Public Works to construct Cedar River Pipe Line Project No. 1, in addition to a connection with the city's main supply lines in Beacon Ave.

SEWERS AND SEWAGE DISPOSAL PLANTS

LONG BEACH, Cal.—City Engineer Herbert Paterson has completed plans for storm drain in NE section of the city. Estimated cost, \$786,800. The district is designated as No. 8. At present, the plans include a portion of Signal Hill but will be revised if Signal Hill does not participate.

OAKLAND, Cal.—W. J. Tobin, 527 Balfour St., Oakland, at approximately \$23,000 awarded contract by city council to construct drainage structures and sewers in portions of Hopkins St., Midvale Ave. and other streets; pipe 8-in. to 36-in.

WATER WORKS

SPOKANE, Wash.—Morrison-Knudsen, 319 Broadway, Boise, Idaho, at \$31,283 submitted low bid to city council to construct 1,250,000-gallon concrete water tank together with connecting pipe lines. Alloway & Georg, next low at \$89,913.

Chicago Bridge & Iron Works low for 1,250,000-gallon steel tank together with connecting pipe lines. Pittsburgh-Des Moines Steel Co. next low at \$74,600.

Bids taken under advisement.

STOCKTON, San Joaquin Co., Cal.—City council will appropriate \$2500 for the purchase and installation of fire hydrants W. B. Hogan is city manager.

SAN MATEO, San Mateo Co., Cal.—Nash Englehardt Mfg. Co., 502 W. Santa Clara St., San Jose, at \$795 submitted lowest bid to City Clerk to

construct pumping plant in San Mateo City Park.

Following is a complete list of bids received:

Nash Englehardt Mfg. Co., 502 W. Santa Clara St., San Jose ...\$ 795
Fairbanks Morse Co., S. F. 942
Bradford Pump Co., 1000
Simons Machinery Co., S. F. 1090
Wooden & Little, S. F. 1127
Kimball Krogh Pump Co., S. F. 1321
Byron Jackson Pump Co., S. F. 1604
Bids held under advisement for a week or so.

PHOENIX, Ariz.—Until 10 A. M., Oct. 29, bids will be received by the city manager, Geo. H. Todd, for construction of water mains, Job No. W-3041-B. The proposed work includes the furnishing of all material, equipment, labor, etc., for the complete construction of extensions to the water system of the city of Phoenix on Third St. from Gray to Hadley Sts., and the approximate quantities for the comparison of bids are as follows: 802 lin. ft. 8-in. B. bell and spigot cast iron water pipe;

12 lin. ft. 6-in. class B bell and spigot cast iron water pipe;
2 each, 8-in. valves with adjustable valve box and cover;
2 each, 6-in. valves with adjustable valve box and cover;
2 each, 8½-in. tees;
1 each, 8-in. tap plug;
2 each, 8-in. 45-deg. curves;
2 each, 6-in. 90-deg. curves;
2 each, 4-in. fire hydrants with 6-in. connections.

Alternate proposals will be received on De-Lavand class 150 centrifugally cast iron water pipe; McWane open bell class 150 cast iron water pipe; Mono cast class 150 cast iron water pipe; McWane precast cast iron water pipe.

MERCED, Merced Co., Cal.—Byron Jackson Pump Co., Sixth and Carlton Sts., Berkeley, at approximately \$3000 awarded contract by Merced Irrigation District to furnish and install three drainage pumps and motors complete.

SANTA CRUZ, Santa Cruz Co., Cal.—City Engineer Roy Fowler is comparing plans for installation of 11,000 feet of 20-inch pipe water extensions to connect the Bay street reservoir with the Crossing street pumping plant. The cost is estimated at \$35,000.

HAYWARD, Alameda Co., Calif.—Election will be held Nov. 1 in Castro Valley Water District to vote bonds of \$150,000 to finance construction of domestic water system to be served by the East Bay Municipal Utility Dist.

SAN FRANCISCO—Until November 7, 11 A. M., bids will be received by Constructing Quartermaster, Fort Mason, to furnish and install water softener at Power Plant at Letterman

General Hospital. Plans obtainable from above.

SAN FRANCISCO.—Chicago Bridge and Iron Works, Rialto Bldg., at \$5,410 awarded contract by Constructing Quartermaster, Fort Mason, to construct 50,000-gal. steel water tank on a 55-ft. trestle at Fort Miley. Present tank and trestle to be removed by contractor for new work.

GRANTS PASS, Ore.—Until Oct. 28, 5 P. M., bids will be received by C. R. Duer, city auditor, for two units of municipal water construction, Section No. 2, installation of distributing mains and Section No. 3, concrete lining of reservoirs.

These improvements call for the installation of new cast iron mains, setting valves, hydrants and fittings and various connections to the now existing distribution system, together with concrete lining of two reservoirs. This work is divided into sections, and bidders may submit bids on either one or both sections. The principal items of construction are approximately:

Section No. 2—Distribution System
10,000 cu. yds. excavation and backfill.

4,500 lin. ft. 16-in. pipe;
10,000 lin. ft. 12-in. pipe;
1,200 lin. ft. 10-in. pipe;
13,000 lin. ft. 8-in. pipe;
24,000 lin. ft. 6-in. pipe;
Set 110 gate valves;
Set 93 hydrants;
Install 70,000 lbs. cast iron fittings.
Material listed above has been previously purchased by the City of Grants Pass. In addition to the foregoing, there will be pavement and sidewalk cuts, cutting in and connecting new mains to the old system. Alternates will be considered for doing the excavation by machine or by hand.

Section No. 3—Reservoir Lining
Concrete (175 barrels) 600 cu. yds.;
Reinforcing steel, 38,000 lbs.;
Two truss roofs, 66 ft. by 103 ft.
Certified checks payable to City Treasurer required as follows: 1,500 under Section 2; \$750 under Section No. 3. Bond of 50% of contract price required of the successful bidder.

Plans on file in office of City Auditor and obtainable from Baer & Cunningham, consulting engineers, 414 Spalding Bldg., Portland, on deposit of \$15 for both sections or \$10 for one section, both returnable.

CONTRA COSTA CO., Cal.—Hutchinson Co., 1450 Harrison St., Oakland, awarded contract by California Water Service Corp. for digging trenches in connection with pipe lines from Golinda Station to Pacheco, Walnut Creek and Danville.

CHICO, Butte Co., Cal.—Parker Hardware Co., Chico, at \$195.36 awarded contract by Board of Education to install pump in connection

PLAYGROUNDS & PARKS

SANTA ROSA, Sonoma Co., Cal.—W. L. Proctor, 1000 Spring St., Santa Rosa, at \$555 submitted only bid to city council to furnish material and construct Rose Portal in Fremont Park. The bid is above the estimate and was taken under advisement.

STREETS AND HIGHWAYS

OAKLAND, Cal.—City council declares intention to construct cement concrete sidewalks in portions of Ney Ave., Ritchie St., 82nd Ave., 69th Ave. and Monticello Ave., 1911 Act. Hearing Nov. 6. Frank C. Merritt, city clerk. Walter N. Frickstad, city engineer.

OAKLAND, Cal.—Until October 30, 12 noon, bids will be received by Frank C. Merritt, city clerk, to construct reinforced concrete retaining wall with guard railing in portion of Hopkins street, between High Street and Green Acre Road. Bond of \$1500 required of successful bidder. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

CARMEL, Monterey Co., Cal.—City council starts proceedings for cement concrete paving in 6th St. bet. Monte Verde and San Carlos and Monte Verde St. bet. Lincoln and Dolores, and bet. 6th St. and Ocean Ave.

PACIFIC GROVE, Monterey Co., Cal.—Until Nov. 6, 7:30 P. M., bids will be received by Elgin C. Hurlbert, city clerk, (3269) to improve:

Bayview Ave. bet. Jewel Ave. and Dennett St.;

Cedar St. bet. Lighthouse and Bayview Aves.;

Del Monte Ave. (Alder Street) bet. Lighthouse and Esquivel Aves.; and Jewel Ave. from Pacific Ave. to point 510 feet westerly, involving grading; cem. conc. curbs and gutters; 4-inch decomposed granite base pave, with 2-in. asph. conc. wearing surface; two conc. catchbasins; 4-in. vit. clay pipe lateral sewers. 1911 Act. Bond Act 1915. Certified check 10% payable to city required. Specifications obtainable from H. Severance, city engineer.

PACIFIC GROVE, Monterey Co., Cal.—Clark and Henery Const. Co., Chancery Bldg., San Francisco awarded contract by city council (3254) to improve Pacific Ave. and point 70 ft. north of Pacific Ave., involving cem. conc. curbs and gutters; 2-in. asph. conc. pavement on existing base; 2 conc. catchbasins; 4-in. vit. clay lateral sewers.

OAKLAND, Cal.—City council declares intention to construct cement sidewalks in portions of Allendale Ave., Birdsall Ave. and 7th Avenue. 1911 Act. Hearing Nov. 6. Frank C. Merritt, city clerk. Walter N. Frickstad, city engineer.

SANTA BARBARA, Cal.—Until 10 A. M., Nov. 3, bids will be received by the county to construct graded and drained old macadam road, located on the old turnpike road, bet. state highway (Hollister Ave.) and overhead crossing over the Southern Pacific Railroad right-of-way in the 3rd Road District. Plans obtainable from county surveyor, Owen H. O'Neill, on deposit of \$5. Certified check. 10%. D. F. Hunt, county clerk.

SAN JOSE, Santa Clara Co., Cal.—City council declares intention (5216) to improve portions of Morlan Ave. bet. Santa Clara and 13th Sts., involving grading; 1½-in. asph. conc. surface pavement on 2½-in. asph. conc. base, cem. concrete walks and curbs. 1911 Act. Hearing Nov. 10. John J. Lynch, city clerk. Wm. Popp, city engineer.

TEHAMA CO., Cal.—Until March 10 (1931), 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for surfacing Section E and applying bituminous surface treatment on Sections A, B, C, D and E, Route No. 1, Loop Route, Lassen Volcanic National Park. The length of the project to be surfaced is 7.71 miles and the length of the project on which bituminous surface treatment is to be applied is 29.77 miles. Contractors who desire to furnish a bid on this project this Winter are requested to go over the ground not later than November 1, 1930. It is expected that \$150,000 will be made available for this project. Plans obtainable from above office on deposit of \$10, returnable, checks for same to be made payable to Federal Reserve Bank of San Francisco.

ARIZONA.—Until March 3 (1931), 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for surfacing and applying bituminous surface treatment on Project No. 4 (surfacing) Bright Angel Springs, North Entrance, on North Rim of the Grand Canyon National Park, Arizona, 9.97 miles in length. It is expected that \$90,000 will be made available for this work. Plans obtainable from above office on deposit of \$10, returnable, checks for same to be made payable to the Federal Reserve Bank of San Francisco.

BAKERSFIELD, Kern Co., Cal.—Stroud Bros., Bakersfield, at \$124.71 submitted low bid to county supervisors to construct concrete landing

and walks at the county airport. Complete list of unit bids follows:

Stroud Bros. (a) 821.2 sq. ft. 4½-in. concrete walks, 18c; (b) 4000 sq. ft. 7½-in. concrete landing, 27½c (c) 4000 sq. ft. (alt. 6-in.) landing, 24c. Total \$1243.71.
Weltzel & Larsen, Bakersfield (a) 18c; (b) 28½c; (c) 25c. \$1287.32.
Currie & Duglar, Bakersfield (a) 23½c; (b) 31c; (c) 25c. \$1432.98.
Dean & Stroble, Bakersfield (a) 19½c; (b) 32c; (c) \$1440.13.
Clark Gramling, Bakersfield (a) 30c; (b) 43c; (c) 36c. \$1566.35.

Taken under advisement until October 20.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Works, 3rd floor, City Hall, completes plans to improve Santa Cruz Ave. bet. DeLong St. and the county line; estimated cost \$4500. Project involves:

450 cu. yds. excavation;
100 cu. yds. embankment;
938 lin. ft. armored concrete curb;
468 lin. ft. 6-in. V.C.P. side sewer in place.
12,200 sq. ft. asph. conc. pavement, 2-in. asph. conc. surface with 6-in. class F concrete base.

SANTA BARBARA, Calif.—Wm. H. West, 124 Depot Road, Santa Barbara, at \$22,550 awarded contract by county supervisors to construct San Julian Road, involving:

49,630 cu. yds. excavation;
426 lin. ft. 18-in. corr. iron pipe;
122 lin. ft. 24-in. do;
72 lin. ft. 30-in. do;
195 cu. yds. reinf. conc. for culverts, walls, etc.;
2,500 miles 5 wire fence, including gates;
6 each gates.

PALO ALTO, Santa Clara Co., Cal.—Proceedings have been started by the city council to improve 16 streets (2 miles in all) in various sections of the city at a cost of \$35,000. Streets included are: Princeton bet. Stanford and Cambridge; Oberlin bet. College and California; Harvard bet. Stanford and California; Sherman bet. Second and Third; Dana and Forest Court bet. Duffield subdivision; Harker bet. Melville and Hutchison; Pine bet. Harker and Hopkins; Embarcadero bet. Alma and Kingsley; Lane B East, bounded by Addison, Lincoln, Emerson and High; Palo Alto Ave. bet. Fulton and Everett; Addison between Channing and Pike; Pope bet. University and Hamilton; Hale bet. Palo Alto Ave. and University; Webster bet. Melville and Embarcadero; Santa Rita bet. Waverley and Cowper. J. F. Eyshee is city engineer.

SALINAS, Monterey Co., Cal.—Until November 3, 2 P. M., bids will be received by C. F. Joy, county clerk, to improve portion of the Nativid road from Nativid to point approximately 1 mile north of the county hospital in Supervisor Districts Nos. 1 and 2. Specifications obtainable from Howard Cozens, county surveyor, on deposit of \$10, returnable.

LOS ANGELES COUNTY, Cal.—Following bids received Oct. 22 by State Highway Commission for clearing 5.3 miles between 4 miles north of La Canada and Colby Canyon:
Morris Const. Co., Long Beach (irregular) \$ 7.67
Dnn G. Munro, Los Angeles 15,525
R. G. Le Tourneau, Stockton 20,930
Bids held under advisement.

SANTA BARBARA, Cal.—Cornwall Const. Co., Santa Barbara, at \$25,362 awarded contract by State Highway Commission to grade and pave with Portland cement concrete, 0.6 mile about ½ mile north of Santa Maria.

SAN BERNARDINO CO., Cal.—Martin Green, San Bernardino, at \$32,389 awarded contract by State Highway Commission to pave with Portland cement concrete, 0.3 mile at Malaga St.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, 3rd floor, City Hall, completes plans and bids will be asked in the immediate future to improve Montgomery St from Union to Greenwich Sts.; Alta St. from Montgomery to point 303 ft. easterly; Filbert St. from Montgomery to point 16 ft. westerly, and from Montgomery to point 22 ft. easterly; Greenwich St. from Montgomery to point 22 ft. westerly, involving:

3,040 cu. yd. excavation
1,285 cu. yd. "B" concrete (retaining walls, balustrade, stairs, fences)
115,000 lb. reinforcing steel
1,540 lin. ft. 4x4 in. rein. concrete fence, single rail
23,600 sq. ft. 6-in. "E" concrete pavement
11,200 sq. ft. 8-in. waterbound macadam base and oiled surface
6 tons asph. concrete conform pavement
2,740 lin. ft. armored concrete curb
6,990 sq. ft. 1-course concrete sidewalk
250 lin. ft. 4x16-in. redwood curb
33 lin. ft. wood guard rail, heavy type
450 lin. ft. wood fence, light type
190 lin. ft. wood bulkhead
110 lin. ft. 2-pipe railing concrete posts
3 9-unit rod wearing reflectors
810 lin. ft. 8-in. vitrified sewer
540 lin. ft. 12-in. vitrified sewer
20 lin. ft. Class B 8-in. cast iron sewer
35 lin. ft. Class B 12-in. cast iron sewer
140 lin. ft. 6-in. vitrified side sewer
32 8-in.x6-in. Y's or T's
10 12-in.x6-in. Y's or T's
120 lin. ft. 12-in. vitrified culvert
15 brick manholes
6 brick catchbasins
2 storm water inlets
2 lighting system complete

Work under Street Improvement Ordinance of 1918. Assessment district has been formed to finance this project. Hearing before Board of Public Works on November 7.

SAN JOSE, Santa Clara Co., Cal.—City council declares intention (\$218) to improve Vermont St. bet. Myrtle and Elm Sts., involving grading; 1½-in. asph. conc. surface pavement on 2½-in. asph. conc. base; 4-in. vitrified house lateral sewers; cem. conc. walks and gutters. 1911 Act. Hearing Nov. 10. John J. Lynch, city clerk. Wm. Pepp, city engineer.

HAYWARD, Alameda Co., Cal.—City Engineer Jesse B. Holly preparing specifications for 6-inch macadam surface on portions of Warren and Prospect Sts.

SACRAMENTO, Cal.—Until October 29, 10 A. M., bids will be received by Harry W. Hall, County Clerk, to construct asphaltic concrete shoulders of Fairboks Blvd., from a point near Sierra Oaks easterly. Certified check 10% payable to Chairman of Bd. of Sups. required with bid. Plans obtainable from Chas. Deterding, county engineer.

SACRAMENTO, Cal.—Until October 29, 10 A. M., bids will be received by Harry W. Hall, County Clerk, to construct asphaltic macadam pavement or asphalt concrete pavement in Sixty-fifth street. Certified check 10% payable to Chairman of Bd. of Sups. required with bid. Plans obtainable from County Engineer Chas. Deterding.

OAKLAND, Cal.—Until November 5 10:30 A. M., bids will be received by Geo. E. Gross, county clerk, to improve portion of Hayward Redwood Canyon Road (County Road 7355) from point approx. 5 miles south from Pinehurst Road for a distance of 2 miles, involving:

80,000 cu. yds. grading;
50 yd. 12-in. corr. culvert;
700 ft. 15-in. do;
800 ft. 18-in. do;
70,000 sta. yds. overhaul.

Certified check 10% payable to county clerk required with bid. Plans obtainable from Geo. A. Posey, county surveyor, on deposit of \$25, returnable.

Texas Forms Bureaus For Building Homes

Several Texas cities have begun plans to establish bureaus which will work for the protection of the homebuyer from unsound investments in buildings badly built by irresponsible contractors, says T. the Constructor. Houston, San Antonio and Dallas have already begun plans for establishing such bureaus and Fort Worth is studying the matter.

The plans being adopted by these cities are modeled on the one now in operation in Oklahoma City which was adopted last March by the Better Homes Construction Bureau organized by the building and loan associations of the city. This bureau set up minimum specifications, employed a staff of inspectors and announced that no new construction would be financed by its members that did not meet the specifications and which had not been supervised by the inspectors.

Through the operation of this bureau mortgage loans have gained prestige as sound investments and a general loosening up of construction funds has resulted while the unscrupulous jerry-builder has been eliminated, it is stated. Moreover, it is claimed legitimate contractors are profiting by this move through the impetus it has given to sound construction.

The bureau makes loans up to 75 per cent of the appraisal value on homes meeting Class A specifications, up to 60 per cent on Class B homes and 30 per cent on Class C homes and no loans of any amount on homes of no classification. Through its operations the number of homes rated as Class A increased from 5.4 per cent of the total to 36 per cent and "no classification" homes were reduced from 18 per cent to less than 1 per cent after the bureau had functioned 5 months.

QUANTITIES OF MATERIALS FOR HETCH HETCHY PIPE LINE

SAN FRANCISCO.—Until October 29, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to construct Newark-San Lorenzo Pipe Line in Alameda County, under Contract No. 122, Hetch Hetchy Project. Bids are to be received in two sections, Part No. 1 and Part No. 2. The cost is estimated at \$800,000 and a bond of 20 per cent of the total contract price will be required of the successful bidder. The approximate quantity of materials are:

Riveted Pipe 46-in. and 38-in.		Lock Bar and welded pipe 44-in. and 36-in.	
Section A		Section B	
46-in. or 44-in.		38-in. or 36-in.	
Part No. 1			
Furnish 46-inch or 44-inch pipe		35,000 lin. ft.	Section A
Furnish 38-inch or 36-inch pipe		32,000 lin. ft.	Section B
Part No. 2			
Deliver and install 44-inch or 46-inch pipe		35,000 lin. ft.	Section A
Deliver and install 38-inch or 36-inch pipe		32,000 lin. ft.	Section B
Furnish and install beveled courses for curved sections of:			
46-inch or 44-inch pipe courses		100	Section A
36-inch or 38-inch pipe courses		100	Section B
Expansion Joints:			
46-inch or 44-inch pipe joints		4	Section A
36-inch or 38-inch pipe joints		4	Section B
	Sec. A	Sec. B	Total
Furnish and install manholes.....	20	20	40
Furnish and install 8-inch nozzles.....	10	10	20

Certified check 10% payable to clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.			

Certified check 10% payable to clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

TRANSFER BODIES SOLVE READY-MIXED CONCRETE DELIVERY

Believing that an efficient concrete mixer cannot be built light enough to mount upon a motor truck and still stand up under continuous daily service, Norris K. Davis, Inc., San Francisco, is meeting the demand for the delivery of ready-mixed concrete with a series of concrete transfer bodies in which concrete is carried directly from a central mixing plant to the job.

These are available in capacities of 1, 1½, 2, 3 and 4 cu. yds. for mounting on any make of truck chassis of appropriate capacity.

The body consists of a rotating cylinder supported on four rollers that revolve in heavy-duty roller bearings. Power for rotation is obtained either from the truck engine through a power take-off and reduction gear or by a separate power unit.

Welded to the drum shell are two high-carbon steel flanged track rings and a driving gear made from a chrome nickel steel forging. An adjustable brake to hold the drum in any position is mounted on one of the track rings. The loading gate, of steel construction, is equipped with a renewable rubber gasket joint to assure an airtight and water-tight seal. It is located midway between the two track rings and is loaded from above. The discharge gate, at the rear, consists of a steel plate sliding in machined adjustable guide.

Opening and closing is by means of a hand wheel with double rack and pinion. Wear on the body is very

slight, due to the fact that it is necessary to revolve the drum for only about the first 200 ft. and the last 400 ft. of the journey; during the rest of the time no rotation is necessary. Most loads can be discharged by gravity; it is only necessary to elevate the drum for low-slump concrete.

BUSINESS IMPROVING TRADE SURVEY DISCLOSES

More improvement than in any recent month is reflected in the October trade survey of "Credit Monthly," publication of the National Association of Credit Men. The improvement applies to both sales and collections of wholesale and manufacturing firms in the 100 cities covered.

Seven cities reported sales brisk, sixty-six reported them fair and twenty-seven, slow. Two cities moved from the "fair" column to "good" during the month, and twelve shifted from the "slow" classification to "fair."

The cities reporting brisk sales were Milwaukee, Wis., Tampa, Fla., Austin, Texas, and Des Moines, Ottumwa, Cedar Rapids and Waterloo, Iowa.

Three cities reported collections good, whereas only one city reported good collections a month ago. These cities were Cedar Rapids, Ia., Austin, Tex., and Huntington, W. Va. Sixty-four other cities reported collections fair, while thirty-three reported them slow. Fifteen cities reported an improvement in collections during the month, moving from the "slow" column to "fair."

Lien Cannot Hold Against Lot Improved In Error, Court Rules

A lien cannot hold against a lot improved by mistake, it was ruled by the supreme court of North Carolina in the case of C. A. Honeycutt, Baltimore Builders Supply Co. and Trumbo & Son, Inc., vs. Kenilworth Development Co., an appeal from the superior court of that state.

West & Hazelrigg purchased a lot from the Kenilworth Development Co. and later started to build a house. After work was well under way the builders discovered they had started the house on the wrong lot and endeavored to effect an exchange of lots but the subdividers would not deliver a deed when they found a mortgage had been placed on the lot purchased.

Later the lot on which the house was started was sold to J. C. Miller. In determining the validity of claims for lien filed upon it the court held "the record does not disclose any contract or agreement whatever between said Development Co. and West & Hazelrigg, who undertook to build a house thereon. In other words, West & Hazelrigg, through mistake, purchased building material and commenced the erection of a house on a lot which they did not own, and therefore, there existed no contractual relation between West & Hazelrigg and the defendant Development Company. The plaintiffs furnished material for said building to West & Hazelrigg, and they were also ignorant of the mistake in the ownership of the lot."

"The statute gives a lien upon 'every building' * * * together with the necessary lot on which such building is situated," etc. But neither the statute nor the decision construing it permit a lien to be filed on a lot upon which a third person has 'squatted' or undertaken to erect a building without title thereto and without a contract or agreement express or implied with the owner thereof."

PRIZES OFFERED FOR ELEVATED STEEL TANK DESIGNS

In order to develop further the natural architectural possibilities which it believes inherent in elevated steel tanks, the Chicago Bridge & Iron Works, Chicago, Ill., is sponsoring a competition, open to any architect, engineer or draftsman, for the design of a typical tank and tower.

Eight prizes ranging from \$2000 to \$100 are offered.

These will be awarded by a jury consisting of Howard Cheney, president, Chicago chapter, American Institute of Architects; R. W. Zimmerman, architect, Chicago, and George T. Horton, of the Chicago Bridge & Iron Works.

In order to participate in the competition, it is necessary to make formal application to the professional adviser, Albert M. Saxe, 430 North Michigan Ave., Chicago, Ill., on or before December 1, 1930.

SAN BERNARDINO ROOFERS TO PAY LICENSE FEE

A new roofing ordinance endorsed by contractors of San Bernardino has been submitted to the council of that city with a request for adoption. It would require roofing contractors to pay an annual license fee of \$100 and post a surety bond of \$3000 guaranteeing compliance with the provisions of the ordinance. The penalty proposed is a fine not to exceed \$500, or a jail sentence not to exceed 6 months or both.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on November 12, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Kern County, four timber bridges from seventeen to twenty-one miles west of Wasco (Vi-Ker-33-C), one composed of twelve 19-foot spans, one composed of four 19-foot spans, and two composed of two 19-foot spans each, all on framed bents with concrete footings.

Proposal forms will be issued only to

those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS DIVISION OF HIGHWAYS

C. H. PURCELL,

State Highway Engineer.

Dated October 15, 1930

BRITISH LUMBER MARKET CONTINUES DULL

The British lumber trade has shown no improvement in depressed conditions and business has been on very restricted lines, states a cablegram from Acting Commercial Attache Donald Henshaw at London to the Lumber Division of the Department of Commerce.

The demand for Douglas fir has fallen off considerably with ample stocks on hand, a marked decrease in arrivals, and c. i. f. quotations remaining unchanged. Stocks of pine are sufficient for present requirements and prices remain firm. The American hardwood situation is unchanged with stocks still excessive and arrivals moderate. The hardwood freight rates being definitely fixed until the end of the year may have a steadying effect on the market.

There are signs of activity in the demand for plywood but not sufficiently pronounced to justify further contracts for stock replenishment except, on distinct evidence of an advance in prices, a fair volume of business in Douglas fir plywood has taken place in anticipation of further increase in prices.

IRRIGATION PROPOSED FOR 250,000 ACRES

A resolution has been adopted by the Merced County Supervisors authorizing an election seeking the formation of the West San Joaquin Irrigation District. The project was first proposed in 1920 and is being sponsored by the People's Protection Association.

If organized, the district will be one of the largest irrigation organizations in California, comprising approximately 250,000 acres. The land is located in Merced, Fresno and Stanislaus counties.

The election will be held on December 17.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

Building Plans for State Institute for Women Are Progressing

Preliminary plans for the proposed California Institute for Women to be erected in Erlie Valley, in the Tehachapi range, Kern county, are being prepared by the State Department of Public Works, Division of Architecture.

The institution will be a corrective prison for women felons, vagrants, and misdeameants.

The trustees of the institution and State Architect George B. McDougall are now considering plans for the first unit of the institution where women are to be rehabilitated rather than kept in strict confinement by walls and armed guards. Some of the 120 women prisoners now at San Quentin and such others as may be convicted of felonies or as narcotic vagrants and misdeameants will be housed in the institution.

Two "cottages," in which will be confined 46 inmates each and an administration hospital building, will comprise the first unit. The cottages will be two-story, concrete structures built around a court. Each building will have its own kitchen and dining room and inmates' room, size 8 by 10 feet. Each room will contain a bed, wardrobe, table and chair. The windows will be escape proof because of a steel sash arrangement cross gridded by heavy frames.

The administration building will accommodate 14 employees and 10 hospital beds besides administrative offices. A new hospital building will eventually be erected, along with a superintendent's home, swimming pool mere cottages and other structures. The total of \$147,000 has been allotted for the cottages, \$91,000 for the administration hospital building, \$10,000 for repairing and furnishing of the existing farmhouse for temporary headquarters; \$40,000 for installation of sewer and water systems and mechanical services, leaving \$12,000 to cover miscellaneous work and contingencies.

The Legislature of 1929 passed a bill which was approved by the governor, appropriating \$475,000 to purchase site and start construction of necessary buildings. The site was purchased in Kern county last June for \$110,000, it consisting of 1680 acres formerly known as the Britte ranch, located nine miles west of Tehachapi. The site has an elevation of 4000 feet.

Trustees of the institution are Mrs. Ernest Wallace of Alhambra, Fred D. Parr of San Francisco, Mrs. Everett B. Latham of Los Angeles, J. Frank Burke of Santa Ana, and Mrs. Ingram B. Slocum of San Francisco.

Two bulletins issued by the Headley Emulsified Products Co., Philadelphia, Pa., deal with waterproofing, damp-proofing and general protective coatings (bulletin 330) and describe an asphalt base aluminum coating (bulletin 420).

Uniform Plumbing Code To Be Drafted

A uniform plumbing code, to be worked out along the lines of the present Uniform Building Code of the Pacific Coast Building Officials' Conference, was proposed by George Grimshaw, city plumbing inspector of Berkeley, at a meeting of the Plumbing Inspectors' Association of California, at the Hotel Oakland, last week.

A committee will be appointed at the next joint meeting of the Southern and Northern Divisions of the association to be held in Fresno in December to draft such a code.

Grimshaw stressed the need of such a code and pointed to the fact that the Uniform Building Code has been adopted by sixty-two cities in the State of California as well as in other cities along the Pacific Coast.

Highway Performance Bond Rate Is Reduced At Portland, Oregon

The Portland, Ore., office of the Fidelity and Deposit Company announces a reduction in bond rates for highway work for the Federal Government, the State of Oregon and various cities and counties. The rates are reduced from $\frac{1}{2}$ to 1 per cent of the contract price.

The new rate will be the basis of bonding highway work by all the various companies represented in Portland. It is said and was officially accepted by the leading bonding organizations October 29. Only the grading work is affected, however, as paving and surfacing has been bonded on a 1 per cent basis for some time. Building bonds are not affected by the change. The new rate, however, will make a big difference to contractors bidding on state and federal highway contracts. Indirectly it will mean a saving to taxpayers, it is pointed out.

Separate classification for state and other highway contracts will be discontinued, the announcements states. All highway construction work including federal, state, county, borough, township and including municipal street paving and streets and highways for private owners will be 1 per cent of the contract price for performance only for any period up to 24 months. Thereafter renewal premium at once-half of 1 per cent per annum on the unfinished work. Performance includes statutory liability for labor and material where that exists—not maintenance.

Maintenance is separately charged for at \$2 per \$1000 per annum in advance, computed on the cost of pavement plus all items required to be maintained for a period greater than 12 months.

Small bridges incidental to highway work and included in highway contract are given the highway classification and rate.

Aftercoolers, for cooling and drying air after it is compressed and before it is delivered to the service pipes, are described in an 8-page folder of the Pennsylvania Pump & Compressor Co., Easton, Pa.

State Registrar Cites "Abandonment Of Contract" in Law

James F. Collins, director of the State Department of Professional and Vocational Standards, has issued the following statement with regard to that section of the Contractors' License Law in the abandonment of contract:

"It will be the policy of the Registrar hereafter in interpreting the paragraph of the Contractors' Registration Law referring to the abandonment of contract, to consider the refusal to pay, or failure to pay the stipulated sum set forth in the contract as compensation for the performance of the work by sub-contractor, as an act in illegal abandonment of the contract made by the general contractor with the sub-contractor.

"In order that such an interpretation may be placed on the paragraph, it will be necessary to show that a definite sum was agreed upon to be paid for the performance of the sub-contractor. It will also be necessary for the complainant to show that the work was completed according to the terms of the contract, and that a demand for payment was made, and either refused, or that the attitude or acts of the defendant were such as would indicate a lack of intention to pay.

"The Registrar in so interpreting the law, assumes that the sub-contractor executed the contract agreeing to perform the specific work set forth in the instrument under the plans and specifications provided, with the expectation of receiving for his work the sum stipulated in the contract and that he looks solely to the general contractor for his pay, and is not a party to any agreement for the limitation of payments to the monies received by the general contractor for the work, unless such special terms are made a part of the contract itself."

CHICO CONTRACTORS PROTEST LICENSE FEE

Contractors of Chico have submitted protests to the city council against the present building licenses as being discriminatory.

They ask that the ordinance be amended in accordance with a plan presented by William Shala, providing all the contractors pay a uniform fee of \$25, general contractors to pay extra fees where more than one phase of carpentry and painting enters into one job.

At a meeting of the city council, the matter

REINFORCED BRICKWORK IN MODERN BUILDING DESCRIBED

By Norman W. Kelch, Associate Member, American Society of Civil Engineers; Secretary-Manager, Clay Products Institute of California.

A more descriptive title to this paper would be "A Brief Commentary on the Practical and Technical Developments of Running True to the Unquestioned Prerogative of Speakers

starting a talk on clay products by beginning with Mr. Nonh and recounting the history of man and brick, I am going to go back only about 50 years to describe the development of what might be considered a new engineering material, composed of one old engineering material, brick, and two rather modern engineering materials, portland cement and steel.

Brick masonry, being a homogeneous mass of fire-resistive materials having a high compressive strength, has long been successfully used for what may broadly be defined as "gravity type" construction, involving chiefly vertical compressive stresses. In order to more evenly distribute these stresses, brick walls of bearing-wall type buildings have for sometime past been reinforced with what has been termed "bonding irons," consisting of flat strips of wrought iron or steel, laid in the horizontal mortar joints at the center of the wall usually under the joists of each story carefully spliced for continuity in length, and locked at corners.

Various kinds of so called "hooping irons" have been used in brick masonry construction from time to time for various kinds of structures including chimneys, storage bins, etc., the type and position of these reinforcements being almost exclusively determined by judgment or opinion. It is of interest to remember that the old Palace Hotel in San Francisco, which withstood the earthquake and fire so gallantly in 1906, had its brick walls reinforced with steel cables from the old Comstock Mines. To what extent these cables were of advantage is, of course, a matter of conjecture. Nevertheless the thought of reinforcing the brickwork is of note.

During more recent years, however, or, as a matter of fact, since the advent of reinforced concrete, considerable attention has been directed toward the inserting of reinforcing steel rods or bars into brickwork for the purpose of definitely resisting bending stresses, with the result that to those familiar with its strength and practical application it has become recognized as reliable fireproof construction of what may be broadly termed the "suspension type," and as such is identified as "reinforced brickwork."

Reinforced brickwork is constructed by laying or embedding the reinforced steel in the mortar joints as the brickwork progresses. This may consist either of rods, wire or mesh. In the case of vertical steel it can be set in position prior to and the brickwork built around it as in the case of stirrups in beams, column steel, wall steel, etc. When vertical steel is $4\frac{1}{2}$ inches or so from the outside then, of course, it is embedded in the regular wall joint of mortar. When it is nearer than this distance the brick may be laid on edge or they may be cut around the reinforcement, the cutting having no effect on the strength inasmuch as the size and shape of the brick in this work where cement mortar is used is in a large measure secondary. The accompanying illustrations indicate how the work may be done. Lintels, beams and slabs naturally require centering or rough forms. The first course of brickwork

Paper presented at the Ninth Annual Convention of the Pacific Coast Building Officials' Conference at Long Beach, Calif., September 29 to October 4, 1930. Reprinted through courtesy of West Coast Builder.

is laid on the form and the reinforcing is placed either between the joints longitudinally as the first course is laid or if the section is deep the reinforcing is laid on top of the first course which would in that case pro-

Six-story apartment house, San Francisco, having 8-inch exterior walls constructed of 4-inch common brick facing backed with load bearing tile $3\frac{1}{2}$ inches by $5\frac{1}{2}$ inches by 12 inches reinforced in center of wall with $\frac{1}{2}$ -inch rods 2 feet on centers bolted through steel frame.

Building in Chicago having reinforced brick columns and walls using same principle of design as for reinforced concrete.

vide about $2\frac{1}{2}$ inches of fireproofing on the bottom.

Tests have shown that in no cases do any of the bricks below the reinforcing fall off but at the time of failure under test load their appearance is similar to reinforced concrete similarly tested.

Considering only compressive, shearing and bending stresses, brickwork and plain concrete are in a large measure similar. Likewise from an engineering standpoint, reinforced brickwork is similar to reinforced concrete in that, in both cases, the steel is the same; also, both have a binding and bonding mortar consisting of portland cement and sand; and each has a coarse aggregate. The difference between them lies chiefly in the composition of the coarse aggregate—the one being rocks of varying composition, and the other, a brick of known composition, strength, fire-resistiveness and durability.

Reinforced brickwork in the true sense of the term has perhaps had its greatest initial development technically and practically in North India where it has gained recognition primarily due to its availability and economy. With hand-sawed lumber, unsurfaced, rarely costing less than \$150 per 1,000 feet and often hard to get at that price; also portland cement being expensive, and suitable stone being unavailable locally in most of these sections, reinforced concrete was practically out of the question. However, brick being easily available and there being a need for fire-resistive masonry to withstand lateral and bending forces, the English and Indian engineers set about to develop reinforced brickwork and this has now been done to a very high degree. It has been used for large storage bins, columns, beams, girders, floor and roof slabs, decks of bridges, etc., with entire success, and is now a standard method of construction over large areas of North India.

Although this practical value of reinforced brickwork has been recognized, it is only in recent years that modern scientific methods have been applied to determine its full value in our present construction field.

With the knowledge and data now available through practical experience, tests and research, it is quite feasible to design reinforced brickwork involving the various structural stresses commonly applied to reinforced concrete.

Among the printed data on this subject are two noteworthy reports, one entitled "Notes on Reinforced Brickwork," by A. Brebner, C.I.E., printed at the Government Press, Calcutta, 1923 as Technical Paper No. 33 of the Public Works Department, Government of India; and the other is entitled "Reinforced Brickwork," by Mason Vaughn, University of Missouri Bulletin No. 37, Volume 23, 1923. The following is quoted from the Indian report:

"The similarity between reinforced brickwork and reinforced concrete has already been referred to. The principles of reinforcement are identical in both, the aim of the designer being to place the reinforcement in such a position that it will take up certain stresses; for this purpose in reinforced brickwork, rods are well embedded in the mortar joints of the masonry in suitable positions. Experiments have demonstrated that the steel and the masonry surrounding it act as one compact mass in almost exactly the same way as the concrete and reinforcement in reinforced concrete work.

"At first sight it would seem that brickwork could not be a homogeneous mass in the sense that concrete is, and that the regular joints in the work would present planes of weakness along which failure would readily

ly take place. In practice, however, it has been found that this is not a fact. On the contrary it has been proved that this factor is so insignificant that it can be neglected. It has also been established that there is no reason why reinforced brick structures should not be as successful as reinforced concrete ones of a similar nature, provided ordinary precautions are taken in designing and carrying out the work."

From the results of the full size beam and slab tests reported by Mr. Vaughn, certain definite design factors can be obtained.

It was found that slabs of brick laid flat, $\frac{3}{4}$ inches thick with $\frac{1}{4}$ -inch rods in each longitudinal joint ($\frac{1}{4}$ -inch centers) are safe for a load of 25 to 30 pounds per square foot on spans up to 8 feet, with a factor of safety of three. For slabs of brick laid on edge, $\frac{3}{4}$ inches thick, with $\frac{1}{4}$ -inch rods in each joint ($\frac{1}{4}$ -inch centers) it was found that such slabs, with a factor

eraged. The value given for j was secured by using the value of k found for that series in the formula

$$j = 1 - \frac{k}{3}$$

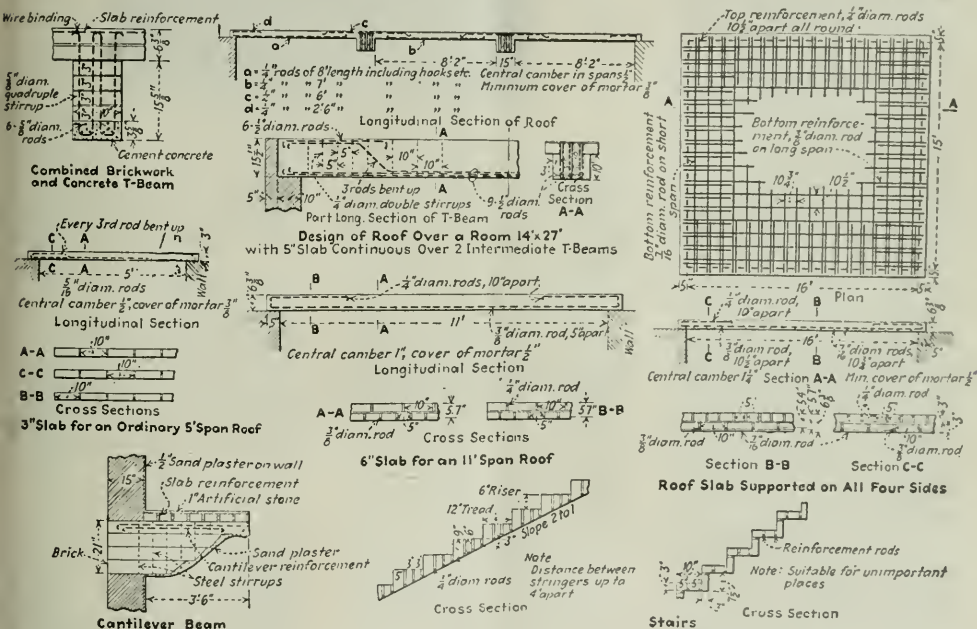

The value found for n was calculated from the formula

$$n = \frac{2p(1-k)}{2p(1-k)}$$

"It will be noted that the different beams of each series are quite consistent among themselves and that there is very good agreement among the different series. As expected, the S2 series gave the best results." (The S2 series referred to were reinforced solid masonry beams. Most of the others contained a longitudinal hollow space between the reinforcing and the upper compression area of the beams, the thought being to separate the moment couples with a space so as to gain increased strength with lessened weight). "There is no evident reason

to be a likely explanation since the stresses near the neutral axis were low and the gross stresses were not high.

"The safe loads given in Table No. 32 are calculated on the basis of one-third the average maximum load carried by the series. This seems conservative since the loads given in each case give stresses well below the safe loads of 16,000 for f_s and 650 for f_c . It seems likely that, with the substitution of either harder steel having a higher yield point or of larger sections of steel in the longitudinal steel and with increased stirrup reinforcing beams of this size would be quite as strong as are the commonly used grades of reinforced concrete beams. The steel used in these tests was rather softer than ordinary reinforcing grades. It is significant that in no single test of the 23 in the second series and flow in the first, was there any sign of failure in compression of either brick or mortar. The highest

Various details of reinforced brickwork as it has been developed in different types of construction in India

of safety of three, are safe for loads of 30 pounds per square foot on spans up to 14 feet and 60 pounds per square foot on spans up to 10 feet.

The results of Vaughn's experiments on reinforced brick beams show that in practically every case failure occurred by straining the reinforcing steel in tension or by diagonal shear of the masonry and that metal stirrups were successful in taking the diagonal shear stresses in the deeper beams of longer spans. Quoting from his report:

"Table No. 22 gives certain information not tabulated in earlier chapters and Table No. 33 (omitted) gives values of d and p observed and calculated from known measurements and value of k , j , and n calculated from observed data secured from the beams. The value of k was secured by graphically locating the neutral axis and computing the ratio. The value of k for each beam of each series was determined separately and the three av-

why the same amount of steel should have shown a higher yield point in these three beams than in some of the others, unless possibly there may be some connection between the yielding of the longitudinal steel and the stirrup steel. The S2-A and S2-B beams had one-fourth inch stirrups while the S2-C beams had only No. 9 wire stirrups. Diagonal tension failures, when they occurred came quite near the yield point of the longitudinal steel, showing that the two reinforcements were very nearly balanced. The H1 series, while reasonably consistent within the series in all respects and while carrying maximum loads not greatly different from those of the other series, seems very far off in the values it gives for k and n . No explanation, other than that the design is wrong in having too much hollow above the neutral axis, is apparent since the same men did the work on all beams and the same material was used. This does not seem

stress attained in compression was in the S2 series where at 18,000 pounds total load, the stresses were calculated to be $f_s = 42,500$ pounds per square inch and $f_c = 4,350$ pounds per square inch. The beam of the machine was actually balanced for some time at over 19,000 pounds load, but of course the steel was elongated so that no reading could be taken and therefore this load was not recorded. It would, however, show a considerably higher unit compressive stress. This would seem to indicate for the particular brick, mortar and workmanship used a safe stress under these conditions as high as 80 pounds per square inch in compression. Whether this would hold good for other conditions involving different brick and mortar materials can be determined only by trial. Probably brick giving the same compressive strength, modulus of rupture and absorption and with similar control of conditions, a stress of 600 pounds per square inch and a value

of $n = 15$ would be a perfectly safe basis for design. The effect of different actors involved in the strength of brickwork under these conditions is not indicated by our present knowledge of the strength of brickwork.

"As in other respects, the results are in fair agreement as to the value of n , with the single exception of the H1 series. The value range from 13.3 to 21, with an average 18, excluding the H1 series which gave the extraordinary value of 84. Averaging in this figure, the average value comes to 19. The modulus of elasticity was calculated from the beam deflection and deflection previously referred to for the S2 series, the value determined thus being 2,758,000. Taking n as 13.5, the modulus would be 2,255,000. This seems like fair agreement.

"The slabs tested showed remarkably good results. The flat brick slabs with only 0.15 square inch steel per foot width were under reinforced to develop the full strength of the brick. However, the safe live load of 25 lbs. per square foot which it actually carried was very satisfactory. The indications are that by increasing the steel to 5-16-inch bars this slab could be used over longer spans successfully or on shorter spans and heavier loadings. According to Diagram 21 given on page 28 of "Hool and Whitney's Concrete Designer's Manual," the brick on edge slabs were reinforced correctly on the basis of 18,000 lbs. on steel and 800 on the brick or over reinforcing for the assumed stresses. Assuming k and n in the same as observed in the S2 series of beams at failure, the stresses at failure were 21,700 pounds per square inch in steel and 1,895 in brick. In all tests, both beams and slabs, the deflections were

$$\text{well within the allowable limit of } \frac{1}{360} \text{ of the span at the design loads.}$$

"1. Slabs and beams of reinforced brickwork are technically practicable under American building conditions.

"2. Such slabs and beams react in a manner practically identical with the reactions of reinforced concrete, due allowance being made for properly proportioned stresses in concrete and steel.

"3. The modulus of elasticity of brickwork made with cement-sand mortar and brick of the quality used in this series of tests may be assumed a 2,000,000 pounds per square inch for ordinary calculations.

"4. Stresses under the conditions of this experiment, of 650 pounds per square inch on the brickwork in comparison is safe and probably unnecessarily conservative.

"5. Shearing stresses in beams are not so well resisted by brickwork as by concrete. While small beams may be safe without stirrups, no important beam should be made without at least light stirrups. Stirrups in general should be heavier than called for by standard concrete practice, just how much, is a question yet to be determined. The evidence available indicates that the difference need not be great. It seems very important that some top reinforcing be given near the ends of beams either by placing small rods in the uppermost mortar joint or by bending up one or more rods.

"6. Slabs made of not more than one course of brick seem to have no difficulty in resisting shear likely to come on them if the slab is properly designed in other respects.

"7. Careful and accurate control of the moisture in the brick or, more properly, the per cent of unsatisfied absorptiveness of the brick is very important. Brick with too high absorption will injure the mortar by removing too much water. Brick completely saturated or glazed to prevent absorption are hard to lay, probably do not develop the full adhesion of the mortar and do not take full advantage

of the water-cement ratio law. The necessary degree of control will have to be based on further experiment to determine the correct conditions.

"The direct cost of brickwork as compared with concrete is likely to be about the same with some probability of saving in form work and possibly some speeding up of completion schedules and other indirect savings."

In the July, 1930, issue of Brick and Clay Record appeared an article by Dr. Kanamori, civil engineer in a department of the Imperial Japanese Government entitled, "Reinforced Brickwork Opens Greater Possibilities." In it is shown photos of heavy

Top of brick bearing wall building, Los Angeles, showing reinforcing bars embedded directly in brickwork. Note wall anchors

work used in conjunction with some large canals and quays, the walls appearing to be 20 to 30 feet high.

Without discussing the technical phases of this work it may be stated that it is entirely successful. One quotation, however, may be of interest.

"... I will state that the nature of reinforced brickwork is like reinforced concrete and the formula for building reinforced concrete may be used in designing reinforced brickwork except introducing 25 for n (the ratio of modulus of elasticity) which is 15 for reinforced concrete. Below is given a practical formula for determining the dimensions of reinforced brickwork:

$$bh^2 = \frac{4.8}{Bc} M, \text{ as } a = 0.01 bh$$

Where

b = width of reinforced brickwork

h = thickness of reinforced brickwork

a = sectional area of reinforcement

Bc = allowable compressive strength of brickwork which usually is to be taken as 500 pounds per square inch

M = bending moment due to external force.

retaining walls of reinforced brick.

"Comparing the result of tests and this formula we arrive at a factor of safety of 3 to 5 from which I can say that if reinforced brickwork would be designed by this formula no danger need be expected. I have built many structures such as buildings, retaining walls, quay walls, bridge piers, abutments, and so forth, where my construction practices have been employed.

"There is no question that the reinforced brickwork should be used instead of brickwork when any tensile stress would be occurred in the structure.

"We can make them more safe and stronger, saving much cost.

"Further, I have found that reinforced brickwork is more convenient and economical in building than reinforced concrete and what is still more

An example of typical reinforced slab construction

important, there is always a very appreciable saving in time.

"Another important factor to be reckoned with in using reinforced brickwork as opposed to reinforced concrete is that with the first mentioned there is no necessity for using forms, thus there is a first saving in labor for erecting and dismantling forms after the concrete is set; neither

TABLE NO. 32

Beam No.	Days Age at Test	Max. Load	Safe Load	Wt. Lbs.	Cause of Failure
S1-A	49	14,000		1,645	Steel Slipped
S1-B	44	7,900	5,000	1,800	Steel Slipped
S1-C	42	11,000		1,850	Diagonal Tension
S2-A	41	18,000		1,745	Tension in Steel
S2-B	40	18,000	6,000	1,540	Tension in Steel
S2-C	46	17,000		1,540	Tension in Steel
H1-A	44	15,000		1,440	Horizontal Shear
H1-B	44	13,000	4,000	1,395	Diagonal Tension
H1-C	53	11,000		1,370	Diagonal Tension
H2-A	44	13,500		1,388	Diagonal Tension
H2-E	44	15,000	4,500	1,400	Tension in Steel
H2-C	42	13,000		1,498	Diagonal Tension
H3-A	56	14,000		1,260	Diagonal Tension
H3-B	50	14,600	5,000	1,270	Tension in Steel
H3-C	49	15,000		1,240	Tension in Steel
H4-A	48	16,000		1,420	Diagonal Tension
H4-B	45	14,000	5,000	1,370	Diagonal Tension
H4-C	45	16,000		1,370	Diagonal Tension

is necessary for any time to be lost while the concrete is setting.

"Furthermore, no surface finish is required, often a very expensive item in the case of reinforced concrete."

"In conclusion, the use of reinforced brick in place of reinforced concrete is much to be preferred, possessing as it does all the strength of concrete with the advantages and virtues of brick and of course it is decidedly better than ordinary un-reinforced brickwork."

Perhaps necessity was more or less responsible for starting the development of reinforced brickwork even as here in California where, due to considerations of earthquake forces, the minds of building officials, engineers and architects are considering practical and economical ways and means of supplying additional security to structures, there is being developed various and ingenious methods of reinforcing masonry walls. Some prominent architects are embedding the horizontal reinforcing bars in what might be termed "horizontal chases" or "spaces" made by omitting a course of brickwork at different levels which chases or spaces are filled solidly with cement mortar. These are usually placed under the joists.

Similarly vertical spaces or flues have been built within the wall ranging from one brick in length to several bricks in length and one brick or more in width; when the brickwork is scaffold high or story high, the reinforcing steel is inserted or dropped into the spaces or flues which in turn are filled with cement grout or cement mortar. Such vertical reinforcements are usually placed near corners or are used in the principal masonry masses as they occur usually between groupings of windows.

A combination of the horizontal and vertical reinforcements as just outlined has been used and found to be a very effective method of providing a great amount of additional stability to such bearing wall buildings as schools, hotels, apartments and the like having a relatively large number of window openings and in such cases the added cost has been found to be negligible.

Chimneys, parapet walls and the like are also receiving specific attention in the matter of vertical reinforcements.

Except for more uniformly distributed vertical loads, it is difficult for me to look upon a reinforced concrete band, the full width of a hall, as providing additional lateral stability to a building. Usually these bands are constructed in sections, thus having a series of cold joints and the top of the beam is cold before the brickwork above is laid. In the case of short vertical walls it may, of course, be of some value, but experience seems to indicate that the destructive earthquake force is the direct horizontal wave. In consideration of this it would seem that we need vertical continuity and a maximum of horizontal shearing resistance in bearing wall buildings. Therefore, if we deliberately destroy vertical continuity with a series of cold horizontal joints it would seem that the possible benefit to the building in consideration of the rarely destructive vertical waves is neutralized by the faulty such construction, which I would consider hazardous the safety of the building in consideration of the well recognized destructive horizontal force.

If, however, in either consideration, horizontal reinforcements is considered of some value in resisting horizontal forces it would seem much wiser to place it directly in the joints of the brickwork and thus not destroy the vertical continuity of the masonry, for there are on cold construction joints in masonry.

It is to be hoped and, we may say, expected that the use of steel to reinforce brickwork by the "assumed"

method will, before long, be done by the "designed" method.

Clay Products Institute of California is conducting further research and tests along this line, but as the work is still in progress no definite report can be made at this time.

However, since reinforced brickwork is shown to possess all the strength of reinforced concrete and, considering such outstanding virtues as durability of enduring materials of known strength and fire resistance, effecting positive protection of reinforcing steel against fire and rust, the total absence of so-called "cold" construction joints thus developing a maximum of continuity in all directions, freedom from expansion and contraction movement, the fact that while it is apparently a rigid mass it possess a certain degree of flexibility which permits minute movement of structure without rupture, the certainty of skilled workmanship, marked economy in cost and simplicity of construction, and among the last technically but among the first economically, high architectural value, it does seem to follow that the Pacific Coast Building Officials' Conference will not too long hence be called upon to incorporate in the Uniform Code, legislation for "Reinforced Brickwork."

Garage Ordinance Amendment Passed By S. F. Supervisors

Bill No. 9374, amending the San Francisco garage ordinance, has been passed to print by the Board of Supervisors. The amendment makes a public garage of any building storing four or more automobiles not the property of residents of the building and was sponsored by the Garage Owners' Association. The measure, it is said, is aimed at certain apartment house owners who make a policy of renting automobile space to persons not tenants in their buildings.

Under the amendment, building owners who indulge in this practice would have to pay a quarterly fee of \$12.50, the same amount charged the public garages.

The amendment reads as follows:

Section I, Subdivisions "d" and "e" of Section I or Ordinance 8564 (New Series), the title of which is recited above, are hereby amended to read as follows:

(d) A "public garage" shall mean any building, structure or part thereof wherein four or more automobiles are kept or stored by the public, or wherein storage facilities for four or more automobiles are advertised by any sign or device affixed to or painted upon said building or structure or any part thereof or otherwise, or where a charge is made for the storage and keeping of four or more automobiles.

(e) A "private garage" shall mean any building, structure or part thereof wherein less than four automobiles are stored or kept by the owner or owners thereof, or by the public, whether or not a charge is made for the storing and keeping of same.

In Apartment house buildings, hotel buildings, flats or dwellings, the above definitions (c), (d) and (e) shall not operate against providing and making a charge for automobile storage space as follows:

In Apartment house buildings not exceeding three hundred (300) square feet for each apartment within the building.

In hotel buildings, not exceeding one hundred and fifty (150) square feet for each room within the building, provided that the spaces in which automobiles are stored conform with the State Housing Act of 1923 and amendments thereto, and also provided that all enclosures or exterior walls rest on the foundations to the surface of the floor constituting the ceiling of the garage shall be of masonry as required for class "C" building.

In flats or dwellings not exceeding

four hundred fifty (450) square feet for each flat or dwelling.

Said definitions shall not operate against an owner having a greater space than herein defined, provided when it is exceeded in apartment house buildings and hotel buildings, the construction shall be class "A" or "B" as defined in the Buildings Laws of the City and County of San Francisco, and provided that if located in flats or dwellings the construction shall be as required for apartment house buildings and hotel buildings, and provided further, that any apartment house building or hotel building, or flat or dwelling, wherein four or more automobiles are kept or stored by any person or persons not residing in the building shall be a public garage as herein defined.

GENFIRE-TRUSCON IN CONSOLIDATION

The Genfire Steel Co. announces consolidation with the Truscon Steel Co., effective October 25, 1930.

This move was undertaken primarily to enable the new augmented Truscon Steel Company to render a more complete and efficient service than any other company attempting to manufacture a similar line of products. With this consolidation there is being established a new department of the Truscon Steel Company, to be known as the Dealer Commodity Department, which will handle the commodity products of the combined companies.

Mr. A. A. Fraser, as Assistant Branch Manager of the San Francisco Office of the Truscon Steel Company, will have charge of this new department and will be assisted by the same office and sales personnel as is functioning in the Genfire Steel Company.

HEATING ASSOCIATION PROTECTS PURCHASERS

Whenever low cost natural gas is brought into a district records show that an influx of gas appliance sales concerns immediately follow with many different types of gas burning appliances to sell in the newly developed market. While many of these appliances are of proven quality and worth, a large percentage are of indifferent quality.

With the installation of natural gas in Northern California, steps were taken by the Furnace Dealers' Association of Northern California, Inc., to prevent this condition.

"In the East Bay section," J. L. Kenney, president of the Furnace Dealers' Association, says, "ordinances governing the construction of gas appliances and their correct installation are now in effect and are being rigidly enforced."

Every gas appliance now installed must be in accordance with the provisions of the law and must be inspected by an authorized inspector of the respective city where installation is made. The dealer must take out a license before he can legally make any installation large or small.

"Our Furnace Dealers' Association of Northern California, Inc., made up of reliable and reasonable heating concerns, has cooperated to the utmost with the authorities to give protection against inferior gas heating appliances."

"Many installations have already been made under our association 'bonded heating' seal, and our office has received many compliments on the quality and workmanship on installations made by our 'bonded heating' members."

Members of the association are Pacific Gas Appliance Company, Superior Sheet Metal Works, Aladdin Heating Corporation, Dickson & Hubbard, Ruid Heater Company, Dillard-Scarve Company, agents, Atlas Heating and Ventilating Company and Kerosene Heating Company.

THE OBSERVER

What He Hears and Sees on His Rounds

Creation of sinking funds by cities of Oregon from which to finance construction of sewage and garbage disposal plants was recommended by Chris Schubel of Oregon City, president of the League of Oregon Cities, in the opening speech of the annual conference of the organization at Salem. Schubel would have the legislature enact a general statute permitting cities to create sinking funds outside of the 6 per cent tax limit, for this specific purpose.

Announcement of the second arc-welding prize competition to be sponsored by the Lincoln Electric Co., Cleveland, Ohio, gives engineers and designers in every industry an opportunity to share in the 41 awards, ranging in size from \$7,500 to \$100, which will be awarded for papers describing skill and ingenuity in the utilization of arc-welded construction.

Papers entered in the competition will be judged by a jury composed of members of the electrical engineering department of Ohio State University under the chairmanship of Prof. Erwin E. Dreese.

The competition will be open to any person in the world except employees of the Lincoln Electric Co. and will close Oct. 1, 1931.

Mostly all industries cater to installment buying. Whether it is a radio, automobile, furniture, clothing or what-not, these luxuries and necessities of life are to be had on the partial payment plan. The building industry is following the same procedure. Contractors specializing in plumbing, steamfitting, painting, decorating, sheet metal, electrical and foundation work find the present a most desirable time to do likewise. Fixed monthly payments with interest are accepted from substantial parties wanting alteration or remodeling work and in some cases two years' time is allowed to complete payments. Home owners needing an extra bedroom, a modernized bathroom, an additional radiator, painting, decorating, etc., will save considerable by proceeding now, instead of waiting for the building upswing with the seller demanding more for his service and product.

In the belief that there are attractive architectural possibilities to be found in the natural characteristics of elevated steel tanks and that no serious thought or effort has been given to these esthetic possibilities, the officers of the Chicago Bridge & Iron Works have undertaken to sponsor a competition in the hope of securing designs for a typical tank and tower from which may be developed structures of improved appearance.

For the eight most interesting designs, the following prizes have been offered: first prize, \$2,000; second prize \$1,000; third prize, \$500; and five honorable mention prizes of \$100 each.

A jury of awards consisting of Howard Cheney, president of the Chicago chapter of the American Institute of Architects; R. W. Zimmerman, architect, of Chicago; and George T. Horton, president, Chicago Bridge & Iron Works, has been appointed. Albert M. Saxe, architect, Chicago, has been appointed professional adviser in the competition.

Participation is open to all architects, engineers and draftsmen who

make application to the professional adviser at 430 North Michigan Ave. on or before Dec. 1, 1930.

Physical requirements for the competitive tank are as follows: (1) 200,000 gal., or 26,700 cu. ft. capacity; (2) top of tank 110 ft. above ground level and the low water line, or bottom of the tank not less than 85 ft. above ground level; (3) size of riser pipe at least 5 ft. in diameter; (4) all portions of the entire tank and structure must be built of structural steel, all of which shall not be short lived either as the result of its design or the thinness of the sections.

Mayor John L. Davie has urged the city council to pass an ordinance limiting the height of buildings in the Oakland downtown business district.

He states that he realizes the pride the citizens have in the rapidly developing skyline of Oakland, but is of the opinion that tall buildings in the business area result inevitably in congested traffic conditions.

The mayor says that Oakland now has the opportunity of avoiding such future disaster while in its first period of growth toward metropolism. He would limit the height of downtown buildings to a maximum of 150 feet. This would spread the business district, he states.

Award of a contract for industry's first windowless factory building, a \$1,500,000 plant, entirely without daylight, and embodying radically advanced ideas for scientific creation of artificial lighting, ventilation and other working conditions, is announced by the Austin Company, engineers and builders. The structure will be built for the Simonds Saw & Steel Company at Fitchburg, Mass. It will occupy five acres and will be one-story in height.

The unique building will have solid sun-resisting walls. Its roof will have neither windows nor skylights. Illumination will come from hundreds of 1000 watt electric lights arranged to provide uniform light intensity which is rarely possible in daylight factories dependent upon the cleanliness of windows or upon the weather.

One of the many innovations will be the painting of machinery in orange color to increase their visibility and help reduce accidents.

A. T. Simonds, president of the Simonds Saw & Steel Company, recently let a contract for the erection of a \$1,500,000 plant at Fitchburg, Mass., declaring his decision to build at this time was based upon the confidence of the firm's officials that business recovery is near, and their belief that present construction costs are favorable for immediate expansion against future needs.

We need more business men of the Simonds type.

The most optimistic outlook for an early improvement in business conditions is in connection with building, according to Kenneth S. Thomson, executive secretary of the Oakland Association of Credit Men.

Thomson declares that the various lines of building material show a business improvement which seems somewhat better than seasonable. He sug-

gested that the corner has been definitely turned in this one industry, at least.

"A basic reason for this is not hard to find," said Thomson. "Building has been scraping the bottom for a long time, longer than most industries. I believe it is due for a long steady pull on the upgrade."

"The first thing which will help building will be the launching of many large projects in California and thru-out the country and the second is the big program of modernizing and re-modelling old homes which has now gotten definitely under way."

Thomson says that the success of the Oakland association and the national organization with which it is affiliated demonstrates that the foundation of business is reciprocity and that co-operation is no longer a mere sentiment but a definite business necessity.

The Uniform Building Code of the Pacific Coast Building Officials' Conference is wandering far and wide. Eighty-six cities have already adopted the legislation.

Huntington Park and Newport Beach are the two latest California cities to adopt the code.

Santa Clara, a town without a building inspector, is considering its adoption, as is Gilroy, another city in the Santa Clara Valley.

Mayor Chester Thompson of Rock Island, Ill., has requested permission to adopt the code as official for his city.

Glendora, Calif., recently incorporated, contemplates adoption of the code.

San Diego has appointed a committee of eleven to submit a report concerning the adoption of the code.

The Gibbs Lumber Co., of Anaheim, Calif., furnishes the following table of comparative costs during the past 10 years, of lumber for a small 5-room bungalow, using rough fir dimension lumber, redwood bevel siding, cedar shingles, redwood exterior finish, fir inside finish, sash and doors and hardwood floorings:

October	Contractors Price	Percent
1920.....	\$1,024.45	100
1921.....	796.07	.778
1922.....	705.18	.688
1923.....	832.63	.812
1924.....	701.32	.685
1925.....	625.75	.61
1926.....	632.45	.62
1927.....	597.32	.583
1928.....	576.97	.563
1929.....	556.40	.553
1930.....	510.25	.50

The San Francisco Labor Council has joined with the San Francisco Building Trades Council, the State Building Trades Council of California and the California State Federation of Labor in demanding that free labor be employed in the construction of state buildings.

This demand is being made upon the Governor and the members of the State Board of Prison Directors.

The reason for this action was the fact that in the construction of a new building at San Quentin penitentiary it became known that it was planned to use prison labor.

Five damage suits aggregating nearly \$250,000 have been filed in Los Angeles against the Valley Paving & Construction Company of Visalia and the California State Highway Commission, by relatives of Mrs. Annette C. Ives, who was killed in an automobile accident near Earllinart, Tuare County, a year ago. The suits allege that a car in which Mrs. Ives was riding struck a depression left in the pavement by the construction company, and overturned.

TRADE NOTES

ALONG THE LINE

The Twentieth Annual Convention of the National Association of Builders' Exchanges will be held at the St. Anthony Hotel, San Antonio, Texas, February 16-19.

Los Angeles county supervisors have instructed the heads of all departments to make a survey to determine what contemplated work can be started immediately to relieve unemployment in the county.

Declaring that a reduction of office rentals would retard business and impair capital, delegates to the Northwest Building Owners and Managers' Association, meeting in Spokane, Wash., October 24, voted not to cut rentals.

City council of Port Angeles, Wash., in awarding the contract for the construction of 10 miles of concrete sidewalks, pledged the successful contractor to employment of only local labor on the job.

Governor Roosevelt of New York recently announced that he was in favor of State Unemployment Insurance. He suggests that both employer and employees be joint premium payers.

A hundred or more zinc mine workers in Illinois recently walked out because the employers decided to reduce their wages twenty per cent.

Thomas Phelan, a Cambridge, Massachusetts plumber, claims that not once in the fifty years he has worked at the trade has he forgotten his tools.

FEWER FAILURES ON PACIFIC COAST SAYS R. G. DUNN COMPANY

Commercial insolvencies increased during the third quarter of the year by comparison with 1929 in all sections of the United States except the Pacific region, according to records compiled by R. F. Dunn & Co.

Failures numbered 5,904 concerns for the entire country compared with 5,082 in the third quarter of 1929 and with 5,210 in 1928. In addition there were 102 bank suspensions in the third quarter of 1930 against 81 in 1929. Liabilities for all districts totaled \$135,954,991 against \$100,296,792 in 1929 and \$121,745,149 in 1928. Liabilities of bank failures were \$73,877,397 against \$4,180,270 in 1929. Liabilities of commercial insolvencies by sections as follows:

West \$6,613,672; Central West \$9,127,777; South Atlantic \$9,468,306; South Central \$13,865,195; New England \$11,963,549; Pacific \$11,545,982; Central East \$31,056,707; and Middle Atlantic \$42,225,506.

By comparison with 1929, the number of insolvent concerns reported during the third quarter of 1930 increased four per cent in manufacturing lines, 21 per cent in general trading lines, 15 per cent in all other commercial lines.

Fewer bankrupt concerns were reported during the third quarter than in the first and second quarters this year. The number of commercial insolvencies in the first quarter was 7,368, and in the second 6,403. Liabilities totaled \$169,357,551 in the first quarter and \$167,731,532 in the second quarter.

Glasgow Brothers has leased quarters in the Fairchild Building at Placerville, Calif., and will carry a complete line of plumbing and electrical goods.

Power Mfg. Co., Marion, Ohio, has created a number of regional sales districts in charge of representatives from the home office. Sales of Victor diesel-type engines will hereafter be handled through these offices, located at Marion, Ohio (two offices), Memphis, Tenn., Dallas, Texas, and San Francisco.

Truscon Steel Co., Youngstown, Ohio, has engaged Wharton Clay to help extend professional and trade contacts and to develop fields for the application of new ideas in up-to-date merchandising.

Porter-Cable-Hutchinson Corp., Syracuse, N. Y., has been formed by consolidation of the Porter-Cable Machine Co., Syracuse, and the Hutchinson Mfg. Co. of Norristown, Pa. Manufacture of wood-working machinery will be continued at both Syracuse and Norristown plants. Sales agencies will be consolidated.

Lincoln Electric Co., Cleveland, Ohio, has appointed W. S. Stewart, formerly in charge of Pacific Coast offices of the company, district manager in charge of the Cleveland territory.

Utilities Equipment Corp., Ltd., Los Angeles, has taken over Jones-Lyman & Co., Inc.

U. S. ARMY PROPOSES TO SPEND \$2,762,300 ON ALAMEDA AIR BASE

Total expenditure of \$2,762,300 for development of the proposed United States army air depot in west Alameda over a period of three years is anticipated by the war department if voters of Alameda approve the gift of land to the government at the election scheduled for November 4.

Initial expenditure of \$743,000 during the year 1931 is planned and this will be followed by a request that congress appropriate \$1,078,000 to continue development of the air depot the following year.

Completion of the air depot is planned in 1933 when congress will be asked to provide an additional \$941,300 to finish the project.

Plans call for a depot having a capacity to recondition 30 to 40 planes a month from the start and will require the services of a commissioned staff of 20 officers and 500 civilian workers. The staff and plant capacity is expected to be materially increased from year to year.

It is proposed to use the air depot here as a supply station and headquarters for the air corps stationed in 12 western states, Alaska, Hawaii and the Philippines.

During the year ended June 30, 1929, the state board of licensing for professional engineers and land surveyors in New York State acted upon 1497 applications for license. Only 843 of these applications were acted upon favorably. Of the remainder, 456 were rejected and 198 held over for more information.

R. H. Morchouse, former secretary of the Pacific Coast Division of the National Association of Wooden Box Manufacturers, has been made secretary-treasurer of the national association, succeeding Paul L. Grady resigned to enter other business.

A resolution demanding the removal of M. M. O'Shaughnessy from the consulting board of the Marin Municipal Water District has been adopted by the Marin County Real Estate Board. The real estate interests declare O'Shaughnessy has issued inaccurate information and aligned himself with a group opposed to the good of Marin.

C. H. Purcell, California state highway engineer, has been requested to address the annual meeting of the Washington State Good Roads Association to be held at Wenatchee on November 21. Mr. Purcell has been asked to outline the work accomplished on California highways during his administration as highway engineer.

CONTRACTOR IS HELD LIABLE TO PAY SUB-CONTRACTOR

Under ordinary circumstances a sub-contractor cannot recover payment for a principal contractor for work not accepted by the owner's engineer or architect, providing the contract states that he shall approve the work before payment. Yet if the contract does not clearly indicate this latter intention of the parties the principal contractor may be liable for payment for materials not approved by an engineer or architect assumed by the owner, says The Contractor.

In the United States Court case of F. J. Lewis Mfg. Co. v. Snyder, 37 F. (2d) 299, a contract between an owner and a principal contractor provided that all material furnished should be of the best quality, and that if the work, in the opinion of the engineer, did not comply with the specifications, it should be replaced at the expense of the contractor.

The engineer refused to approve the materials of a sub-contractor, who, therefore, was compelled to furnish the more expensive material required by the engineer. The sub-contractor sued the principal contractor to recover additional payment.

The refusal of the engineer to use the materials was based upon the fact that a part of the materials previously furnished by the sub-contractor were not satisfactory, not that the present materials which he proposed to use did not meet the specifications here involved. In fact it did meet them. Therefore the higher court held the principal contractor liable for extra payment for the more expensive materials, saying:

"A contracting party may undoubtedly bind himself to do a thing which subsequently becomes impossible of performance, and thus become liable for nonperformance if the cause of the impossibility arise from his own act or might have been foreseen by him, but the sub-contractor did not put himself in that situation."

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from **Newton D. Cook, Room 715, 57 Post Street, San Francisco.** (Phone Utter 1684).

W-1782 - C-S CONSULTING MECHANICAL ENGINEER, to advise on organizing heavy repairs for passenger and freight railroad cars and to equip, organize and supervise operation of central car repair shops. Contract for one year, renewable. Salary open, one-third to one-half in paper rubles for living expenses, balance in U. S. money to American bank. Applications only by letter which will be forwarded to Moscow for decision. Location, Russia.

R-3378 - S ENGINEER, preferably structural, with at least 10 years' construction experience, for sales promotion work. Should be able to talk and write convincingly on engineering subjects. Territory to be covered is Mid-Continent oil fields. Salary \$300-\$400 and expenses. Apply by letter. Headquarters, Seattle.

R-3349-S SALESMAN, young man with car, to do promotion work for dealers. Must have experience selling roofing to owners. Salary and expenses. Location, Northern California.

R-3355-S DRAFTSMAN, first class topographic draftsman and tracer, for oil company. Salary about \$175 month. Apply by letter with references and samples of ability. Location, Texas.

R-3309-S ENGINEER, mechanical or electrical, not over 30 years, with 3 to 5 years experience on hydro-electric plant operation for service and testing work. Must have mechanical skill, agreeable personality and be willing to travel. Salary about \$175 month and expenses in the field. Apply by letter. Headquarters, San Francisco.

R-3333 - S CHEMICAL ENGINEER graduate, with 1-3 years experience, for research work on development of plant equipment. Excellent opportunity for man with thorough chemical engineering training and with more than average ability. Salary \$150-\$175 month to start. Apply by letter.

"Build Now" Advises Building-Loan Head

not delay but should borrow now and build. This is the urgent advice of H. S. Wanzer, President of the California Building-Loan League. Every element of cost in home construction has decreased in recent months to the point of remarkable bargain prices, making it possible to construct a home today for approximately \$4,200, that would have cost in 1923 as much as \$6,000, according to a statement issued by the head of the building and loan movement of this State.

"This is decidedly a buyer's market," said Mr. Wanzer. "The supply of materials just now is greater than the demand. Prices are at low levels but this cannot be expected to continue for any great time. Already lumber and cement have shown an upward turn and it is to be expected that the other major materials which go into home construction will soon show a similar turn. Today every advantage is on the side of the home builder. He can build a better home, the kind of

house he always has wanted, for less money than at any time during the past decade."

The reason for this is that building materials are still selling considerably below prices for 1925. Examples of these prices, compared with five years ago, are as follows: Cement 30 per cent less; construction lumber, 30 per cent less; hardwood, 15 per cent; sash, door and millwork, 35 per cent; electric equipment, 20 per cent; plumbing, rough and finish, 25 per cent; rock and sand, 20 per cent; paint, 10 per cent; hardware, 20 per cent; heating plants, 20 per cent; glass, 20 per cent; metal lath, 22 per cent; reinforcing steel, 8 per cent; steel windows, 11 per cent; steel joists, 10 per cent; structural steel, 10 per cent; common brick, 30 per cent; roof tile, 30 per cent, and labor costs through increased efficiency, 15 per cent less. These figures show an average reduction of 20 per cent in nineteen major materials.

Legitimate building is always justified and is now receiving considerable encouragement from the government and financing interests. Money is comparatively easy to borrow and can be obtained on favorable terms, particularly to construct single family dwellings as the vacancy factor in this class of housing is considered low. The family man now paying rent, who has the confidence and intelligence to build his own home at this time, will find the material dealer, the craftsman and the financing agency ready and anxious to render him the highest type of service. It is to his best interest to take advantage of this situation.

The 234 California building and loan associations are interested primarily in loans on small homes, the average of loans now in force does not exceed \$2,500. Loans are all made on a monthly repayment plan of financing which helps the home buyer to actual ownership of his property and does away entirely with the expense of periodic renewals. The popularity of the helpful building and loan type of financing is indicated in that loans are now in force on 137,000 California homes.

TRADE LITERATURE

Commercial concrete plants are considered in two recent publications of the Butler Bin Co., Waukesha, Wis. Bulletin 130 illustrates and describes loading plants for use with truck-mounted mixers, while bulletin 190 gives similar information with regard to ready-mixed concrete plants where a stationary mixer is used.

"How to Make Good Waterproofed Concrete" is the title of a 28-page illustrated bulletin issued by the Medusa Portland Cement Co., Cleveland, Ohio.

PARAFFINE COMPANIES, INC., PLANS NEW FINANCING

Definite rumors are current in the financial district that the Paraffine Companies, Inc., is about to engage in short term financing, which has been underwritten by a leading Pacific Coast investment house.

It is reported that Paraffine has concluded negotiations for several advantageous acquisitions to its domestic business, and that it plans additional investments in some of its foreign subsidiaries with a view of expanding its operations at home and abroad.

While no definite figures as to the amount of the financing are available, it is believed that it will constitute but a small fraction of the company's net worth, and that the ratio of earnings to interest charges on the new issue will be in excess of thirty times.

This report is considered particularly interesting as an indication of the company's policy to extend its lines throughout the world.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

CONTRACTOR STRESSES NEED FOR BUILDING MODERNIZATION

By Harold K. Ferguson, President, H. K. Ferguson Company

The present seems to me to offer an opportune time to do some more thinking about the development of our industrial cities.

While we are checking up our plants and organizations in preparation for renewed activity, there is need for a better perspective of the whole problem of housing: First, for the individual citizen, second, for the downtown business office, and third, for the industrial production unit.

Possibly because of the rapid growth of American industry our industrial centers present some odd contrasts due to the lack of coordination in planning. We have been opportunists seeing only our own problem without a full appreciation for the broader aspects of civic development.

A recent survey which has been made for us in several of the principal industrial centers of England and the Continent reveals the fact that in many regards the cities of Europe are far ahead of us especially in the development of adequate housing facilities for people of the employed classes.

The skylines of our cities have been advertised to the world as monuments to the vision and courage of American business, until we have come to believe it. Sandwiched between our skyscrapers are antiquated buildings, survivals of a by-gone generation, many of which are scarcely a credit to our streets. Indeed, even some of our newer buildings are either ill fitted for the purpose for which they were intended or are doomed to early obsolescence.

The young men of the next generation may be the ones who will tackle the job of reconstructing the obsolete areas of our cities, creating decent homes and favorable surroundings for the less favorable of our people, but it is going to be done.

A way will be found to bring about the construction of broad streets, modern housing developments, new commercial centers, creating sound values where little or no value exists today.

A new spirit which is being fostered by the colleges and universities of our country is going to make itself felt in our public and industrial life before many years have passed; it is the spirit of dissatisfaction with things as they are—the spirit which refuses to accept without question the heritage of the past.

"What our age needs most," declared Dr. William E. Wickenden, President of Case, "is not faith, nor knowledge, nor legal reform, nor research, important as these things are, but it is the wisdom to see things whole."

City plan commissions, better housing studies, are the nuclei of thought and activity which are going to transform our so-called modern cities so that our much advertised "standard of living" will be available to thousands who today huddle together in wretched surroundings.

Sometimes a rude shock reveals our weak spots and accelerates the movement toward modernization and improvement. The foundations of a new and remodeled Baltimore were laid over the ruins left by the fire of 1904. San Francisco has built a model city over the ruins of its earthquake.

In Japan an advanced type of earthquake resistant construction, broad streets and fireproof structures will minimize the toll of future disasters.

The efficiency of American industry has also been advertised to the world until we have actually come to feel satisfied that in general it is safely entrenched behind its research department, scientific production methods and its high-pressure sales departments.

Flattered by limitation and praise we had almost accepted the idea that the old immutable law of supply and demand was at last defeated and that prosperity was here to stay, when a depression of major proportions occurred to show us the truth about ourselves.

As a matter of fact, although in the aggregate American industry spends hundreds of millions annually for research, and although many concerns have modernized their plants and are scientifically managed, there are a vast number of concerns which are still trying to live on their reputations. It used to be possible to increase profits by raising prices; today dividends are being paid by concerns which are smart enough and quick enough to outdo their competitors.

We often find that there is a narrow dividing line between loss and profit in the operation of an industrial plant. An executive of a paper manufacturing concern in the middle west a few days ago stated, "We are in business today because two years ago we overhauled our power plant and brought it up to top-notch efficiency." Another concern of our acquaintance which was at the point of buying additional land to expand its production found to its surprise that by a re-arrangement of its production layout, it could double its output with the floor space it already had.

What a good many concerns need, however, is an impartial survey of the entire business taking into account economic factors such as strategic location for economic assembly of raw materials, for proximity to principal market centers; advantageous labor markets; sources of cheap power. A new locality thought to be more favorable to the growth of a business can be tested at moderate expense by establishing a branch plant. Should experience justify the undertaking, the entire business can be moved to the new locality. The economies possible through such a shift of operations may easily turn the red figures into black.

Strengthening of individual spots of weakness in a business often affords a measure of relief. But a thorough study of a business as a whole will go farther to reveal the fundamental weaknesses that retard progress and prevent satisfactory earnings.

It has been interesting to watch the reaction of various business concerns to the new conditions which have been forced upon us during the last year. Some having passed through similar periods were ready with the strategy required for the emergency and were able to cash in on the unpreparedness of others. Others, after a brief hiatus, adjusted themselves, brought out new lines, developed new sales strategy and

proceeded as before. A great many seem to be much like the old lady who "enjoyed poor health."

A friend of mine the other day apologized to a New York banker for calling on him so frequently about an important business transaction. The banker replied, "We are glad to see you coming because instead of talking about charts and curves and conditions, you bring a constructive plan which gives us something to think about besides our worries."

If one will examine a list of corporations which are paying dividends as usual, one will find that there are reasons other than "good luck." In the background there has been careful planning. Plants are modern. Equipment is up-to-date. There is a spirit in the organization that jumps into the collar like a good horse when he feels the lead.

Fortunately for American business there is a healthy lot of stock-taking going on behind the closed doors of directors' rooms nowadays. Executives who have discovered the weak spots in their plants and organizations are looking the facts squarely in the face. A good many long headed thinkers in public and business life are predicting that out of the depression of 1930 is going to come the broadest and most far-reaching program of civic and industrial modernization that the world has ever seen. The next decade will see millions spent in our principal cities for the reconstruction on a modern plan of their slum sections.

In the years just ahead hundreds of industrial plants which have lagged behind clinging to obsolete methods and equipment will either bring themselves into line or be left behind in the race.

Returning not long ago to my own city from visiting such modern plants as the Point Breeze Works of Western Electric Company at Baltimore and the American Enka Corporation's new rayon plant at Asheville, North Carolina, I had occasion to drive through one of our older industrial sections. Along both sides of the street were factory buildings forty or fifty years old which house firms that have been well-known for a generation. Much of their equipment, to say nothing of the buildings, should have been on the scrap heap years ago.

These firms and many like them in every industrial center must sooner or later face the fact that this is 1930 and that a 1900 model factory is just as helpless in the hurly-burly of modern competition as a 1900 automobile on Fifth Avenue.

A business acquaintance of mine declared the other day that he had learned that one of the best uses he can make of his time is to visit the plants of other concerns, not necessarily in his own line. "If, by visiting six plants, I can get for my company six new ideas, it is worth far more to the business than checking up on lead pencils and typewriter ribbons."

When I feel myself getting pretty sick I do not waste time experimenting with home remedies. I forget the old medicine chest and go out to see the best diagnostician I can find. When he finds out what is wrong with me, he may send me to a specialist or two. Among them they will get me well in a reasonable short time.

A sick industry which will not admit to itself that it is sick or that organization, is likely to remain sick for a long while. Many of these tries to find a remedy within its own never get well.

Building News Section

APARTMENTS

Permit Applied For.

APARTMENTS Cost, \$100,000
LOS ANGELES, Cal. No. 364 S.
Cleveland Avenue.
Four-story reinforced concrete apart-
ments (54x104 ft. (57 rooms)).
Owner and Builder—Webster Treat.
5369 Wilshire Blvd., Los Angeles.
Architect—Clarence Smale, 5369 Wil-
shire Blvd., Los Angeles.

Plans Completed.

APARTMENTS Cost, \$300,000
LOS ANGELES, Cal. No. 1861 Chero-
kee Avenue.

Ten-story and basement Class A re-
inforced concrete apartments (86
x95 ft.) (200 rooms).

Owner — Cherokee Properties, Ltd.,
Quincy Bldg., Los Angeles.
Architect—Marcus P. Miller, Board
of Trade Bldg., Los Angeles.

Sub-Contracts Awarded.

APARTMENTS Cost, \$85,000
OAKLAND, Alameda Co., Cal. Exact
location withheld.

Three-story frame and stucco apart-
ment with concrete basement (30
x- 3- and 4-room apts.)

Owner—A. Jensen, care architect.
Architect—H. K. Jensen, 354 Hobart
St., Oakland.

English type of architecture, com-
position and shingle roof, steam heat-
ing system, and all modern conven-
iences.

Structural Steel—McGrath Steel Co.,
354 Hobart St., Oakland.

Lumber—Smith Lumber Co., foot of
18th Ave., Oakland.

Pans—Steelform Contracting Co., Mo-
nadnock Bldg., San Francisco.

Bids are being taken on other por-
tions of the work.

Segregated Bids Being Taken.

APARTMENTS Cost, Approx. \$300,000
ALAMEDA, Alameda Co., Cal. NW
Webster and Taylor Sts.

Seven-story reinforced concrete and
steel apartments (60 2, 3 and 4-
room apts.)

Owner—J. S. Bercovich, Actico Bldg.,
Oakland.

Plans by Thomas Keenan, 1440 Broad-
way, Oakland.

Preliminary Plans Prepared.

APARTMENTS Cost, \$30,000
SAN MATEO, San Mateo Co., Cal.
Apartments (type and height of build-
ing not given).

Owner—Withheld.
Architect—J. Lloyd Conrich, 630 Lake
St., San Francisco.

More definite information will be
given shortly.

Sub-Bids Being Taken.

APARTMENTS Cost, \$125,000
SAN FRANCISCO, NE Fair Oaks and
25th Sts.

Six-story and basement class C steel
frame and concrete apartments (36
3-room apts.)

Owner—V. Guilles, 1203 Guerrero St.
Plans by Owner.

Engineer—J. M. Smith, 251 Kearny St.
Contractor—F. C. Fisher, 112 2Noe St.
Construction will not be started be-
fore December 1st.

Preparing Plans.

APARTMENTS Cost, \$—
SANTA BARBARA, Santa Barbara

Co., Cal. NE Millas St. E Ca-
brillo Blvd.
Three-story Class C brick and con-
crete apartments (240x200 feet)
(200 rooms).

Owner—C. W. Ross et al.
Architect—Walker & Elsen, Western
Pacific Bldg., Los Angeles.

Prospective Bidders.

APARTMENTS Cost, \$200,000
BERKELEY, Alameda Co., Cal. Sac-
ramento St. and University Ave.
Three-story class C brick apartments
(56 2- 3- and 4-room apts.)

Owner—Davis-Pearce Co., Grant and
Weber Sts., Stockton.
Architect and Manager of Construc-
tion—Davis-Pearce Co., Grant and
Weber Sts., Stockton.

Following are the general contrac-
tors who are figuring the plans:
H. L. Petersen, 731 Treat Ave., San
Francisco.

Monson Bros., 475 6th St., San Fran-
cisco.

Wm. Horstmeyer, 461 Market St.,
San Francisco.

G. F. W. Jensen, 320 Market Street,
San Francisco.

Preparing Preliminary Sketches.

APARTMENTS Cost, \$200,000
SAN FRANCISCO Van Ness Ave.
District.

Six-story and basement Class C con-
crete and steel frame apartments
(36 2, 4 and 5 room apts.)

Owner—Withheld.
Plans by Lawrence Ebbetts, 320 Ful-
ton St., San Francisco.

Will have incinerator, elevator, 10-
year composition roof, steam heating
system, etc.

Plans Being Prepared.

APARTMENTS Cost, \$—
LOS ANGELES, Cal. No. 682 Irolo
Street.

inforced concrete apartments.

Owner—Picadilly Holding Co.
Architect—Milton M. Friedman, Rives
Strong Bldg., Los Angeles.

Plans Being Completed.

APARTMENTS Cost, \$175,000
SAN FRANCISCO, Green Street near
Octavia Street.

Six-story Class A steel frame and
concrete apartments (112 rooms).

Owner and Builder—F. L. Hansen, 282
Seventh St., San Francisco.

Engineer—John C. Little & Co., 251

A Demonstration of the SKILSAW PORTABLE ELEC- TRIC HAND SAW

Will solve your cutting problems.
(Four Models, 1/2 to 1 h. p.)

ELECTRIC HAMMERS
ELECTRIC DRILLS
GRINDERS, BUFFERS

PETER H. NELSON

Labor Saving Portable Electric
Tools.

1248 Mission St. Underhill
San Francisco 7662

Kearny St., San Francisco.
Sub-bids will be taken within a few
days.

Contracts Awarded.

APARTMENTS Cost, \$20,000
EMERYVILLE, Alameda Co., Cal.
One-story and basement frame, and
stucco apartments (six four-room
apts.; Spanish type).

Owner—Mrs. O. H. Reese.
Architect—George Ellinger, 1723 Web-
ster St., Oakland.

Carpentry—Jake Olson, 2422 Wilbur
St., Oakland.

Concrete Work—Norman McLeod, 1163
Wellington, Oakland.

Plastering—Tim Sexton, 354 Hobart
St., Oakland.

Beach St., Oakland.

Sheet Metal—City Cornice Works, 3119
San Pablo Ave., Oakland.

Ornamental Iron—C. Frauneder, 335
8th St., Oakland.

Finish Hardware—Associated Hard-
ware Co., 3560 San Pablo Avenue,
Oakland.

Tile—Rigney Tile Co., 3012 Harrison
St., Oakland.

Hardwood Floors—Lavenda Eros.
Refrigeration—Hollbrook, Merrill and
Stetson, 665 6th St., San Francisco

Electric Wiring—Scott - Butner Elec.
Co., 19 Grand Ave., Oakland.

Painting—Chas. Mathews.

Other awards will be made at a la-
ter date.

Plans Being Revised.

APARTMENTS Cost, \$250,000
VALLEJO, Solano Co., Cal. Sonoma
and Capitol Streets.

Six-story and basement Class C con-
crete apartments (60x132 ft.: 72 2,
3 and 4-room apts.; tile roof).

Owner—Dr. Burton Jones, 327 Georgia
St., Vallejo.

Plans by A. J. Mazurette, 576 Fifth
St., Oakland.

Segregated bids are being received

BONDS

SACRAMENTO, Cal.—Board of Ed-
ucation, C. C. Hughes, secretary, will
call an election shortly to vote bonds
of \$2,000,000 to finance erection of new
schools and additions and alterations
to standing school buildings. The ten-
ative program of the school depart-
ment provides that the junior high
schools be housed in structures sepa-
rate from the elementary school build-
ings. Many of the junior high schools
now are housed in grammar school
buildings because of lack of necessary
buildings.

CHURCHES

Preparing Preliminary Plans.

BIBLE SCHOOL Cost, \$—
PORTERVILLE, Tulare Co., Calif.

Two-story and basement reinforced
concrete bible school and modern-
izing present church.

Owner—First Methodist Church of
Porterville.

Architect—Robert H. Orr, Corporation
Bldg., Los Angeles.

Exterior and interior of the present
building will be remedied, involving
excavating, exterior stucco, plastering,
art glass, redecorating, enlarging ban-
quet hall and the installation of a fully
equipped kitchen. Bible school will
be a two-story and basement struc-
ture, providing for 750 pupils; rein-
forced concrete construction, composi-

tion roofing, treated exterior, blackboards, steel sash, oil burning hot air heating and ventilating system.

MARYSVILLE, Yuba Co., Cal.—Rev. Victor Halboth, pastor of the First Lutheran Church, has appointed a building committee to work out means to finance erection of a new edifice. Committee consists of E. Lang, Fred Heitman and F. W. Stohlman.

Working Drawings Being Prepared.
CHURCH Cost, \$40,000
SAN MATEO, San Mateo Co., Calif.
San Mateo Drive.
One-story frame and stucco church with tile roof (auditorium to seat 350).

Owner—First Congregational Church.
Architect—Kent and Hass, 525 Market St., San Francisco.

Present organ is to be used. Plans will be ready for bids in about thirty days.

Preparing Working Drawings.
CHURCH Cost, \$500,000
WEST LOS ANGELES, Cal. Selby and Ohlo Avenues.

Reinforced concrete church plant (auditorium to seat 1300).
Owner—Roman Catholic Bishop of Los Angeles and San Diego.
Architect—Newton & Murray, Architects Bldg., Los Angeles.

Preparing Preliminary Plans.
CHAPEL Cost, \$100,000
WEST LOS ANGELES, Cal. Hilgard Avenue.

Reinforced concrete memorial chapel.
Owner—University of California
Architect—Reginald D. Johnson, Architects Bldg., Los Angeles.

Contract Awarded.
ORGAN CASE Cost, \$3022
SAN FRANCISCO, St. Dominics Church.
New organ case.
Owner—Roman Catholic Archbishop of San Francisco, 1100 Franklin St., San Francisco.
Architect—Arnold Constable, 580 Market St., San Francisco.
Contractor—Brass & Kuhn, 1917 Bryant St., San Francisco.

Plans Being Completed.
CHURCH Cost, \$70,000
OAKLAND, Alameda Co., Cal. Emerson and Excelsior Aves.
Reinforced concrete church.
Owner—Roman Catholic Archbishop of San Francisco, 1100 Franklin St., San Francisco.
Architect—W. E. Schirmer, 700 21st St., Oakland.
Bids will be taken in about 30 days.

FACTORIES AND WAREHOUSES

Plans Being Figured — Bids Close Nov. 3.
STORAGE BLDGS. Cost, \$12,000
OAKLAND, Alameda Co., Cal. Elmwood Ave., bet. 29th and Fruitvale Avenues.
Two one-story concrete storage buildings.
Owner—Morris Dreying Co., 101 Webster St., Oakland.
Architect—R. C. Schuppert, 4637 Park Blvd., Oakland.

Sub-Bids Being Taken.
WAREHOUSE Cost, \$30,000
SAN FRANCISCO, NW Carroll and Newhall Streets.
One-story steel frame and concrete warehouse (south side crane and runway).
Owner—Truscon Steel Co., Call Bldg., San Francisco.

Architect—Eng. Dept. of Owner.
Contractor—MacDonald & Kahn, Financial Center Bldg., San Francisco.

Plumbing—George Weinholtz, 1450 Howard St., San Francisco.
Sub-bids are being taken on other portions of the work.

Completing Plans.
WAREHOUSE Cost, \$100,000
TERMINAL ISLAND, Los Angeles Co.
One-story reinforced concrete warehouse (40,000 sq. ft.).
Owner—Crescent Wharf & Warehouse Co., Berth 233, San Pedro.
Architect—J. C. Longueville and T. J. Scott, Associated, 1616 Chelsea Rd., San Marino.

Sub-Contracts Awarded.
INDUSTRIAL BLDG. Cost, \$15,000
SAN FRANCISCO, SE Fifth and Folsom Sts.
One-story and mezzanine floor reinforced concrete industrial building.
Owner—Louis Lurie, 315 Montgomery St., San Francisco.

Architect—S. Heiman, 57 Post St., and O'Brien Bros. & W. D. Feugh, 315 Montgomery St., San Francisco.
Contractor—Louis J. Cohn, 1 De Haro St., San Francisco.
Steel—Schraeder Iron Works, 1247 Harrison St., San Francisco.
Plastering—Harry Liston, 117 29th Ave., San Francisco.

As previously reported, electrical work awarded to W. H. Morgan, 2241 15th St., S. F.; plumbing to Thomas Skelly, 1344 Ninth Ave., S. F.; reinforcing steel and steel sash to Truscon Steel Co., Call Bldg., S. F.
Other awards will be made shortly.

Contract Awarded.
COTTAGE, ETC. Cost, \$13,863
IDLEWILD, Del Norte Co., Cal.
Superintendent's cottage, bunk house, truck shed, combination wood shed, septic tank and station sign for highway maintenance station.
Owner—State of California.
Architect—State Department of Public Works, State Office Bldg., Sacramento.
Contractor—Oliver S. Almlie, 709 N. Fifth St., Grants Pass, Ore.

EUREKA, Humboldt Co., Calif.—Harris Sheet Metal Works, Eureka, at \$875 awarded contract by city council to construct corrugated iron roof on shed of Municipal Water Department.
Ohman Hardware Co., Eureka, at \$982.50, only other bidder.

GLENDALE, Ariz.—Dudley R. Webster, 1439 N. Second St., Phoenix, has purchased Armour & Company creamery plant here. It is understood new equipment will be installed after January 1 to cost \$125,000.

Contract Awarded.
SLED, ETC. Cost, \$3300
ROSEVILLE, Placer Co., Cal.
Truck shed, gasoline and oil house for highway maintenance station.
Owner—State of California.
Architect—State Department of Public Works, State Office Bldg., Sacramento.
Contractor—Yoho & Dauger, Sacramento.

Contract Awarded.
HANGAR Cost, \$35,000
SACRAMENTO, Sacramento Co., Cal.
Freepport Blvd. at Municipal Airport.
Steel frame and wood hangar and air terminal station 80x100-ft.
Owner—City of Sacramento (to be leased to Boeing Air Transport Company).
Architect—Harry Devine, 1405 41st St., Sacramento.
Structure will be of steel frame and wood construction covering an area of 80 by 100 ft. with an exterior covering of corrugated iron.

Plans Complete.
WAREHOUSE Cost approx. \$150,000
SAN FRANCISCO, Sanome and Val-lejo Sts.
Three-story reinforced concrete warehouse.
Owner—Poultry Producers of Central California, 700 Front St.
Architect—H. C. Haumann, 251 Kearny Street.
Bids will be taken in about 1 week.

Contract Awarded.
COTTAGE, ETC. Cost, \$10,644
GAREBIRVILLE, Humboldt Co., Cal.
Superintendent's cottage, office and store house, bunk house, combination wood shed and garage, gasoline and oil house, septic tank and station sign for highway maintenance station.
Owner—State of California.
Architect—State Department of Public Works, State Office Bldg., Sacramento.
Contractor—McCarthy & Johanns, 1363 14th Ave., San Francisco.

Plans Being Prepared.
WAREHOUSE Cost, \$30,000
SAN FRANCISCO, NW Carroll and Newhall Streets.
One-story steel frame and concrete warehouse (south side crane and runway).
Owner—Truscon Steel Co., Call Bldg.
Architect—Eng. Dept. of Owner.
Contractor—MacDonald & Kahn, Financial Center Bldg.

To Be Done By Day's Work.
SHELTERS Cost, \$25,000
SAN FRANCISCO, Fifth Street bet. King and Berry Sts.
Two one-story reinforced concrete shelters.
Owner—Southern Pacific Co., 65 Market Street.
Plans by Eng. Dept. of Owner (J. H. Christie, engineer, 65 Market St.)

Plans Being Completed.
SERVICE BLDGS. Cost, \$45,000
REDWOOD CITY, San Mateo Co., Cal.
Group of service bldgs. (wood frame and tile walls).
Owner—Pacific Gas & Electric Co., 245 Market St., San Francisco.
Plans by Eng. Dept. of Owner.
Group includes warehouse, garage, service departments, superintendent's offices, etc. Bids will be taken in about two weeks.

Sub-Bids Being Taken.
ALTERATIONS Cost, \$8000
SAN FRANCISCO, S Pacific W Sanome Street.
Alterations to warehouse.
Owner—Tea Garden Products Co.
Plans by Austin Co. of California.
Contractor—Austin Co. of California, 720 Ray Bldg., Oakland.
Reinforcing Steel—Gunn, Carle & Co., Ltd. 444 Market St.
Sub-bids are being taken on other portions of the work.

Plans Being Prepared.
MFG. PLANT Cost approx. \$300,000
SOUTH GATE, Los Angeles Co., Cal.
Quartz manufacturing plant.
Owner—Philadelphia Quartz Co. (A. W. Elkinton, vice president), 6th and Grayson Sts., Berkeley.

POWER PLANTS

PASADENA, Cal.—Consolidated Steel Corp., 1200 N. Main St., Los Angeles, awarded contract by city directors at \$22,510 to furnish and install electric hoist for the Municipal Light Plant. The low bid of the Judson-Pacific Co. of San Francisco did not meet the specifications.

PASADENA, Cal.—Until 11 A. M. Nov. 22, bids will be received by the city directors for furnishing and installing steam generating equipment and appurtenances for the municipal light plant, at Glenarm St. and Raymond Ave. Proposals are requested as follows:

(I) Two 15,000 sq. ft. (approx.) boilers, including boiler proper, steel supporting members, super-heater water columns, valves and appurtenances as specified, delivered and erected;

(II) Two sets of tubes, headers, connections, recirculators, inlet boxes and appurtenances for side, rear and front furnace walls for use in conjunction with the boilers as set forth in Item I, as specified, delivered and erected;

(III) Two boilers complete with water walls as set forth in Items I and II as specified, delivered and erected;

(IV) Additional price (for 2 units) of 3½-in. O. D. tubes on 7½-in. centers are used in front furnace wall over burners. This alternative to be added to Items I, II or III as specified, delivered and erected.

Certified check, 10%. Plans and specifications may be seen at the office of the city clerk, Bessie Chamberlain.

CHICO, Butte Co., Cal.—Pacific Gas and Electric Co., 215 Market St., San Francisco, has approved order to reconstruct and re-route Chico-Inskip 60,000-volt transmission line, involving an expenditure of \$55,880.

HERNDON, Fresno Co., Cal.—Construction will be started at once on 50,000 kilowatt steam-operated generating plant at Herndon on the San Joaquin river 10 miles north of Fresno. It is announced by A. Emory Wishon, president of the San Joaquin Light and Power Corp., Power Bldg., Fresno. The plant will cost \$4,610,000 and will burn natural gas from the Kettleman Hills, which will be piped through a 12-in. main from Fresno. Construction is to be completed June 1, 1932 and will be carried on under the supervision of Harold K. Fox, chief construction engineer for the company, Power Bldg., Fresno.

LOS ANGELES, Cal.—Bids will be asked at once by the county supervisors to furnish and deliver 200 tons of used boiler tubing. Further information obtainable from county clerk.

Applications for plans may be filed with the Commandant, Mare Island Navy Yard, accompanied by checks for \$5, payable to Chief of the Bureau of Yards and Docks. The deposit is returnable.

SANTA BARBARA, Cal.—Until 2 P. M., Oct. 30, bids will be received by the city purchasing agent, Carl E. Hasse, to furnish light truck equipped with dump body. Further information obtainable from purchasing agent. Cert. check or bond, 10%.

FULLERTON, Orange Co., Calif.—Until Nov. 18, 7:30 P. M., bids will be received by F. C. Hezmalhalch, city clerk, to furnish and deliver:

Item 1. One motor truck chassis, including closed cab and dual wheels, of 1½-ton capacity, with St. Paul hydraulic hoist. Model 4-UBS, specifications to be furnished by the bidder, said hoist to be installed on chassis.

Item 2. One small coupe automobile, 1930 model, specifications to be furnished by the bidder.

MARE ISLAND, Cal.—Bids will be asked shortly by the Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 6310, for a 40-ton electric gantry crane and runway at the Mare Island Navy Yard. Individuals or firms desiring bidding data should forward to the Commandant, Navy Yard, Mare Island a check or postal money order for \$5, payable to the Chief of the Bureau of Yards and Docks, as security for the safe return of the drawing and specifications, with request that they be furnished them. Applications and deposits will be placed on file, and the drawing and specification mailed as soon as they are available.

RAILROADS

SAN FRANCISCO.—Until Nov. 10, 2 P. M., under Proposal No. 653, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver rolled steel car wheels for Municipal Railway, as follows:

500, diameter 34 inches.

48, diameter 28 inches.

Specifications obtainable from above.

OAKLAND, Alameda Co., Cal.—Until Nov. 3, 4:30 P. M., bids will be received by City Port Commission, 421 Oakland Bank Building, for laying track materials to serve 3½-ft. extension at Outer Harbor Terminal. Plans obtainable from Commission.

STOCKTON, San Joaquin Co., Cal.—City council has recommended to Interstate Commerce Commission granting joint permit to Western Pacific and Santa Fe Railroads to construct spur track through the Boggs Tract and across Rough and Ready Island along the deep water channel.

FIRE ALARM SYSTEMS

SAN CARLOS, San Mateo Co., Cal.—City Council has authorized the installation of a box fire alarm system; estimated cost \$900. System will be installed by members of the fire department.

FIRE EQUIPMENT

FAIRFIELD, Solano Co., Cal.—City council contemplates bond issue to raise funds to finance purchase of a motor driven fire engine.

SAN FRANCISCO.—Following bids taken under advisement by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish fire hose:

(a) 2,000 ft. 3½-inch;

(b) 12,000 ft. 2½-inch;

(c) 5,000 ft. 1½-inch.

American Rubber Mfg. Co. (a) \$1.03;

(b) \$.53; (c) \$.33.

Pioneer Rubber Mills (a) \$.98; (b)

\$.539; (c) \$.345.

RESERVOIRS AND DAMS

BENBOW, Humboldt Co., Calif.—Benbow Co. will construct a dam in the south fork of the Eel River two miles below the Hotel Benbow to provide power for Benbow Light and Power Company which concern supplies light and power to the town of Garberville and to other properties. The dam will cost \$50,000.

SANTA ANA, Orange Co., Cal.—A. Kempkey, consulting engineer, Hobart Bldg., San Francisco, is making explorations in Santiago Creek, above Orange County Park, at the site of the proposed dam to be built jointly by the Irvine Co., the Serrano Irrigation District, and the Carpenter Irrigation Districts. The dam for which bonds have been voted, will cost about \$750,000.

SAN DIEGO, Calif.—H. N. Savage, city hydraulic engineer, recommends to city council the construction of a 154-ft. dam in Mission Gorge, about 10 miles from San Diego; estimated cost \$4,700,000. Funds, the engineer reports, could be secured by transferring \$3,250,000 El Capitan bonds, \$500,000 Chollas reservoir funds, \$600,000 Sutherland dam funds, and \$350,000 of the surplus from the Otay pipe line funds. He recommended that the approval of voters be asked at the election next April. The city council has taken the report under advisement for study.

LOS ANGELES, Cal.—Maguire and Young, 1009 Central Bldg., submitted low bid to county at \$3620 for exploration tunnels for San Gabriel Dam No. 1. The items upon which bids will be taken are:

(1) 725 ft. driving 16 tunnels, more or less, without timbering;

(2) 75 ft. driving 16 tunnels, more or less, where timbering is necessary, including excav. and all timbering costs. The bids were:

	(1)	(2)
Maguire & Young.....	\$5.75	\$7.45
J. G. Donovan.....	6.35	7.65
F. G. Cannon.....	7.00	9.50
Gist & Bell.....	7.00	8.50
H. E. Warden.....	9.15	9.65
Dan G. Munro.....	9.75	11.00
H. M. Earuch Corp.....	12.00	7.00
Soteras Const. Co.....	11.00	18.00
M. N. Guho.....	14.00	18.00

LOS ANGELES, Cal.—F. G. Cannon, 4271 Lincoln Ave., Culver City, at \$10,402.50 submitted low bid to county supervisors to drill 23 diamond drill holes at the site of San Gabriel Dam No. 1, Continental Diamond Drill Co. only other bidder at \$12,795. Unit bids, as per proposition listed in our issue of October 18, follow:

F. G. Cannon, (1) \$3.75; (2) \$4.30;

(3) \$4.30; (4) \$4; (5) \$4.55; (6) \$4.55;

Continental Diamond Drill Co., (1)

\$4.95; (2) \$4.45; (3) \$4.45; (4) \$5.65;

(5) \$5.45; (6) \$5.45.

PIPE LINES, WELLS, ETC.

SAN FRANCISCO.—Western Pipe & Steel Co. of California, 444 Market St., at \$648,867 for welded pipe and \$671,507 for lockbar has submitted only regular bid to the Board of Public Works to construct the Newark-San Lorenzo Pipe Line, under Contract No. 122, Hetch Hetchy Project, involving 12.7 miles of pipe line. Montague Pipe and Steel Co., San Francisco, submitted the only other bid, which was rejected due to the fact that the company asked certain regulation with regard to the time limit and bonus conditions.

SEWERS AND SEWAGE DISPOSAL PLANTS

FAIRFIELD, Solano Co., Cal.—City council contemplates bond issue to secure funds to finance improvements to sewage system.

OAKDALE, Stanislaus Co., Cal.—City council plans to extend sewer system in Laurel Ave. at a cost of \$600 and water and sewer extensions in Maxwell Ave. for distance of approximately 350 ft.

MOUNT VERNON, Wash.—Thomas Scalzo, 1929 Lane St., Seattle, at \$93,766 awarded contract by city council to construct approx. four miles of clay pipe sewers, including pump houses, sewer pumps, manholes and catch-basins. C. E. Orisy, engineer, Republic Bldg., Seattle.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—See "Streets and Highways," this issue. Resolution of intention to improve Industrial Way and portion of Butler road and certain rights of way.

SEATTLE, Wash.—E. French Chase city sanitary engineer, is preparing plans for the Charleston St. unit of the Lake Washington intercepting sewerage system; estimated cost, \$200,000. Bids will be asked about Jan. 1. Three pumping stations will be included in the project.

SAN FRANCISCO.—L. J. Cohn, 1 De Haro St., at \$11,961 submitted low bid to Board of Public Works to construct Army St. sewer between Pennsylvania Ave. and Mississippi St., involving:

DO NOT RISK AN EXPERIMENT

SPECIFY -- USE

Timpie Hydrated Lime

STRONG—PURE—PLASTIC

Ten Years of Uniformly Satisfactory Experience in High

Class Pacific Coast Construction

FOR BRICK MORTAR, WHITE COAT AND SAND FLOAT FINISH

Sold by Representative Dealers Everywhere

363 lin. ft. 2-ft. 6-in. by 3-ft. 9-in. reinforced concrete sewer;
464 lin. ft. 2-ft. 6-in. by 3-ft. 9-in. reinf. conc. sewer exclusive of piles;
827 lin. ft. 6-in. V. C. P. under-drain covered with concrete or embedded in broken rock;
1 reinforced concrete special structure, exclusive of piles;
2 brick or concrete manholes;
1,300 lin. ft. wood piles, below cut-off in place.

E. J. Tracy, \$12,144; M. J. Lynch, \$12,914 were next two low bidders. Complete list of bids will be published tomorrow.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—See "Streets and Highways," this issue. Resolution of intention to improve Industrial Way and portion of Butler road and certain rights-of-way.

MISCELLANEOUS CONSTRUCTION

VANCOUVER, B. C.—Until Dec. 1, bids will be received by Canadian Pacific Railway to construct 4,600-foot tunnel, connecting company's right-of-way in Burrard Inlet with its False Creek Yards; will be 22½-ft. high, varying in width from 35-ft. to 16-ft. Contractors are also asked to figure on the construction of a 2-ft. concrete lining with which the roof and sides of the tunnel will be reinforced throughout its entire length. Excavation will involve approximately 86,000 cu. yds., the strata ranging from sand to rock. Plans obtainable from C. A. Cottrell, general superintendent of the B. C. district at Vancouver.

WATER WORKS

ANTIOCH, Contra Costa Co., Cal.—Until November 10, 8 P. M., bids will be received by J. E. McElheney, city clerk, to construct cast iron water mains in portions of B St. and 9th St. Certified check 10% payable to Town of Antioch required with bid. Plans on file in office of clerk.

OAKLAND, Cal.—Until Nov. 3, 5:30 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, to furnish 3,800 lin. ft. of 4-inch thickness 24-inch diameter electric welded steel pipe for distributing system. Specifications obtainable from secretary at Room 33, 512 16th St., Oakland.

RENTON, Wash.—Until Nov. 4, 5 P. M., bids will be received by Agnes Edwards, city clerk, to furnish and deliver Seattle, 20 days after award of contract, 4,200 lin. ft. 10-in. class B bell and spigot sand-cast c. i. pipe.

MARTINEZ, Contra Costa Co., Cal.—O. G. Ritchie, 154 North 11th Street, San Jose, at \$1,517 awarded contract by Southern Pacific Co. to haul, unload and trench and backfill for c. i. water pipe line between Bay Point road and south abutment of the Martinez-Penicia Bridge.

RENTON, Wash.—Until Nov. 11, 5 P. M., bids will be received by Agnes Edwards, city clerk, to furnish and deliver 850 meters for Municipal Water Department:

(a) 800 5¾-in.;

(b) 50 3-in.;

Bidders are to furnish specifications. Further information obtainable from clerk.

EUREKA, Humboldt Co., Cal.—Until November 5, 8 P. M., bids will be received by John Griffith, city superintendent of public works, 524 D St., to furnish and deliver 1,800 lin. ft. of 16-in. class B cast iron water pipe or equal with bell and spigot joint; f.o.b. wharf, Eureka. Delivery not sooner than 5 days and not later than 60 days after award of contract.

SEATTLE, Wash.—Board of Public Works will ask bids in about three weeks to construct reservoir and two standpipes for Municipal Water Department; estimated cost \$750,000. Will form gravity system for West Seattle district to be fed by the \$1,000,000 Lake Youngs pipe line, replacing the present pump system.

The two steel standpipes will each be 30 ft. high and 92 ft. in diameter, with a capacity of 1,000,000 gallons each. They will be located at Fourth Ave. Southwest and Trenton St. extended. Two contractors, one for grading and the other for the tanks, will be involved in the standpipe construction. Est. cost \$75,000.

Two reservoirs are planned, but only one will be constructed at this time. It will have a capacity of 75,000,000 gallons and will be located bet. West Barton street and West Cloverdale and from Eighth Ave. southwest to Fourth Ave. southwest. Cost of one reservoir together with valve houses is placed at \$700,000. Grading and lining contracts will be involved on the reservoir job.

SPOKANE, Wash.—Morrison-Knudsen, 319 Broadway, Boise, Idaho, at \$81,283 awarded contract by city council to construct 1,250,000-gallon concrete water tank, together with connecting pipe lines.

PITTSBURG, Contra Costa Co., Cal.—Assemblyman Robt. P. Easley has prepared estimates of cost for water system development for Pittsburg. The total cost is placed at \$342,524, itemized as follows: Reservoir site, 25 acres, or 1400 sq. ft., \$35,000; dam, \$74,560; concrete work, \$75,000; rights of way, \$8000; 2-pump filtration plant, cost of installation, \$7920.

\$19,500; 5-mile 22-in. line, \$104,544;

COALINGA, Fresno Co., Cal.—Until November 3, 7:30 P. M., bids will be received by E. J. McCroskey, city clerk, to clean and paint interior surfaces of municipal hard water storage tank, by scraping, wire brushing and chipping where necessary, so that

surfaces of tank, standpipe and underside of cover, are ready for painting. After interior surfaces have been cleaned, contractor to apply one coat of Bitumastic Solution to the interior surfaces of tank and standpipe, and two coats of Bitumastic Solution to the underside of cover.

After the interior surfaces have been coated, contractor to apply one hot coat of Bitumastic Enamel to the surfaces of tank and standpipe, furnishing all labor and material. Certified check 10% required with bid. Specifications obtainable from city superintendent.

FAIRFIELD, Solano Co., Cal.—City council contemplates bond issue to raise funds to finance extensions to water system.

EL CENTRO, Imperial Co., Cal.—Pacific States Cast Iron Pipe Co., 417 S. Hill St., Los Angeles, awarded contract by city council at \$4047 to furnish 4000 ft. 6-in. and 3000 ft. 4-in. cast iron pipe. Other bids were: U. S. Pipe & Foundry Co., \$4170; C. G. Clausen & Co., \$4198; National Cast Iron Pipe Co., \$4315.

ANAHEIM, Orange Co., Cal.—Until November 5, 8 P. M., bids will be received by Edward B. Merritt, City Clerk, to furnish and deliver Class B cast iron pipe, as follows:

(1) 2624 ft. 4-in.;

(2) 4576 ft. 6-in.;

(3) 160 ft. 8-in.;

(4) 5000 lbs. fittings.

Further information obtainable from clerk.

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., Nov. 12, bids will be received by the city council for constructing reinforced concrete sediment basin, mixing tanks and clarifier structure at Water Treatment Plant No. 2, 340 N. Foothill Rd. Plans were prepared by Salisbury, Bradshaw & Taylor, consulting engineers, Petroleum Securities Bldg., Los Angeles. Estimated cost \$28,000.

PLAYGROUNDS & PARKS

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., Nov. 18, bids will be received by the city council for landscape work in Roxbury Park, in accordance with specifications, etc., which may be seen at the office of the city clerk, E. J. Firmlinger.

Detail Plans Being Made.

PARK, ETC. Cost, \$10,000

SANTA ROSA, Sonoma Co., Cal.

Park and playground.

Owner—City of Santa Rosa.

Landscape—Howard Gilkey, Howden

Bldg., Oakland.

This work is to be done in connection with Memorial Park which will cover 20 acre site.

STREETS AND HIGHWAYS

SUTTER COUNTY, Cal.—Until Nov. 10, 2 P. M., bids will be received by C. H. Whitmore, district engineer, State Highway Commission, 502 State Office Bldg., Sacramento, to grade and pave with Portland cement concrete, 0.3 mile near the county hospital in Sutter county.

HUMBOLDT COUNTY, Cal.—Chiegrist & Sutros, San Francisco, at \$15,020 awarded contract by State Highway Commission to grade and surface with untreated crushed gravel or stone, 0.4 mile at High Rock Hill 1911

10 ft. 8x29-in. do;

569 ft. 2.25x2.15-ft. conc. arch culvert

95 ft. 3.5x8-ft. conc. box culvert;

7 storm water inlets with 34-inch openings;

6 storm water inlets with 21-inch openings;

1 storm water inlet top with 21-in. opening.

1 concrete handhole with cast iron top;

233 cu. ft. conc. end, curtain and header walls;

2 guard railings;

16 manholes;

2 manhole tops;

1 lamp hole;

Certified check 10% payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

BRAWLEY, Imperial Co., Cal.—City Engineer C. J. Park preparing plans to improve streets in west side residential district, involving 220,000 sq. ft. paving; 100,000 sq. ft. sidewalks; 30,000 ft. curb. Est. cost \$90,000.

IMPERIAL COUNTY, Cal.—Hazard Const. Co., 2508 Kettner Blvd., San Diego, at \$489,125 awarded contract by State Highway Commission to grade and pave with asphalt concrete 13.1 miles between Arroyo Salado and the northern boundary.

LOS ANGELES, Cal.—Hall-Johnson Co., 905 Westminister St., Anaheim, at \$116,775 awarded contract by county supervisors to improve Sunset Blvd. and Ellis Lane bet. Duarte Road and Pomona Blvd., involving grading, 505,000 sq. ft. 4-in. Warrenite surface pavement on 4-in. asph. conc. base, etc.

SAN FRANCISCO—J. Verano, at \$21,920 submitted low bid to Board of Public Works to improve Section C of Alemany Blvd.; estimated cost, \$25,000. Project involves:

1,520 lin. ft. 6-in. open tile drain in broken rock;

60 lin. ft. 6-in. V. C. P. drain connections to manholes;

4,620 lin. ft. 8-in. V. C. P. sewer;

5,700 lin. ft. 12-in. do;

900 lin. ft. 15-in. do;

550 lin. ft. 18-in. do;

120 lin. ft. 21-in. do;

165 8x6-in. Y or T branches;

172 12x6-in. do;

30 15x6-in. do;

17 18x6-in. do;

4 21x6-in. do;

62 brick manholes;

54,000 gals. fuel oil for oiling boulevard subgrade in place;

400 lbs. seed barley for slope planting in place.

Next two low bidders were: C. B. Eaton, \$22,134; E. J. Treacy, \$22,552. A complete list of bids will be published tomorrow.

SAN FRANCISCO—C. B. Eaton, 715 Ocean Ave., at \$19,215 submitted low bid to Board of Public Works to improve Cayuga Ave. from Onedio Ave. to Seneca Ave., and Seneca Ave. from Otsego Ave. to Alemany Blvd., etc., involving grading, armored concrete

curbs, 1-course concrete sidewalks, 8-in. and 12-in. vitrified clay pipe sewers, side sewers, brick catchbasins, 2-in. asph. conc. surface pavement on 6-in. class F concrete base.

A. G. Raich next low at \$19,316. Complete list of bids will be published tomorrow.

OAKLAND, Calif.—City council declares intention to improve Hopkins St. bet. Coolidge Ave. and High St., Hopkins St. place and portions of Coolidge Ave., Maple Ave., Laurel Ave., Midvale Ave., 35th, Magee, Loma Vista, Brown, Patterson, 38th, 39th and Maybelle Aves., involving grading, curbs, pave., walks, storm water drains, sewers with manholes, lamp holes and wyes. Est. cost \$100,000. 1911 Act. City will pay 22½% of the total from the Treasury. Hearing November 13. Frank C. Merritt, city clerk. Walter N. Frickstad, city engineer.

SALINAS, Monterey Co., Cal.—City council declares intention (91) to improve Pajaro St. bet. Sausal and Lake Sts., involving grading, hyd. cement concrete curbs, sidewalks, 6-in. hyd. cem. conc. pave. 1911 Act. Bond Act 1915. Hearing Nov. 17. M. R. Keef, city clerk. Howard F. Cozzens, city engineer.

PACIFIC GROVE, Monterey Co., Cal.—Until November 7, 3:30 P. M., bids will be received by Elgin C. Hurlbert, city clerk, (3266) to improve Lighthouse Ave., bet. Alder St. and Dennett St., involving grading, cem. conc. curbs and gutters; 2½-in. asph. conc. base pavement with 1½-in. asph. conc. surface; 2 conc. catchbasins. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. H. Severance, city engineer.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—City council declares intention (72) to improve Industrial

Way and a portion of Butler road and certain rights-of-way, involving steel reinforced hydraulic cement concrete storm water conduits; grading; hyd. cem. conc. sidewalks, curbs, gutters; 8-in. hyd. cem. conc. pavement with 2-in. asph. conc. surface; 15 electroliners of Enterprise Cop-Lite c. 1. columns, Wesco-Lite design with G. E. Ornamental Novalux units and lamps together with underground system; vit. pipe sewers; manholes; catchbasins. Est. cost \$211,000. 1911 Act. Bond Act 1915. Hearing November 17. Daniel McSweeney, city clerk.

SAN LUIS OBISPO, San Luis Obispo Co., Calif.—City Engineer Leon Moore preparing alternative plans for both cement and asphaltic concrete pavement for streets in the Loma Vista Tract.

SANTA ANA, Orange Co., Calif.—Until November 12, bids will be received by county supervisors to improve Laguna Ave. in 5th Supervisorial District, 2.1-miles in length, involving:

11,500 lin. ft. grading;

1,600 cu. yds. gravel base and shoulders;

5,400 tons asphalt concrete pavement.

County will furnish disintegrated granite on grade. Specifications obtainable from Nat H. Neff, county superintendent of highways.

MERCED COUNTY, Cal.—Representatives of the California Highway Commission, Mariposa and Merced County Officials, and interested property owners met recently at Merced to discuss plans for re-locating 14 miles of the Merced-Yosemite All Year Highway.

Edward Wallace, division highway engineer explained the new routing between Orange Hill School house in the lower Cathay Valley and Mariposa.

Instead of the present route to the right of Guadalupe Mountain, passing through Bridgeport at Agua Fria Creek, the road would run northward toward Mt. Bullion, swing to the right through the old locations of Agua Fria and Carson and follow through Arkansas Flat and over Carson Pass into Mariposa.

The new route would be 1.8 miles shorter than the present road and would eliminate much curvature and grade. It would touch an elevation of 2400 feet, about 500 feet higher than the present road.

The improvement would cost \$700,000, which, according to Wallace, would be \$400,000 less than the cost of improving the present road. M. B. Harris, chairman and George Mansfield secretary of the commission, were present.

MENLO PARK, San Mateo Co., Cal.—B. F. Cain, Menlo Park, at \$635.27 awarded contract by town trustees (30-2) to improve Hoover St., for its entire length and Oak Grove Ave., from point 45 ft. s. w. of Hoover St. to pt. 45 ft. s. e., and Valparaiso Ave. from pt. 45 ft. s. w. of Hoover St., to pt. 45 ft. n. e., involving grading; cem. conc. curbs and walks; part circle galv. iron culverts; 4-in. water-bound rock macadam base pavement with 1½-inch Colas surface; vit. salt glazed pipe sewer laterals. Complete list of bids follow:

B. F. Cain, Menlo Park	\$ 6,365
L. L. Ryder, San Jose	6,523
W. A. Dontanville, Salinas	6,610
M. J. Bevanda, Stockton	8,452
E. Kavanagh, Redwood City	7,121
J. P. Holland, San Francisco	10,757

OAKLAND, Cal.—Heafey-Moore Co., 344 High St., Oakland, awarded contract by city council to improve portions of Marguerite Drive and Hillview Lane, involving excavation, 90.75 cu. yds.; conc. curb, \$70 lin. ft.; conc. gutter, \$.25 sq. ft.; penetration macadam pave., \$.155 sq. ft.; cem. side-walks, \$.165 sq. ft.; conc. inlet with c. i. grating, \$60; 10-in. vit. pipe conduit with concrete covering, \$2.50 lin. ft.; conc. box culvert with reinforced concrete, \$.55 lin. ft.; conc. hand-hole with c. i. cover, \$18.50.

SANTA MARIA, Santa Barbara Co., Cal.—Until November 3, 7:30 P. M., bids will be received by Flora Rivers, city clerk, to improve Cypress St., between Broadway and Suey Ave., and portions of other streets, under 1911 Act, involving:

(1) 94,000 sq. ft. 4-in. asph. concrete pavement;

(2) 53,000 sq. ft. 3-in. oil macadam;

(3) 11,554 sq. ft. cement gutters, with a small amount of incidental work.

Plans on file in office of citrk.

VENTURA, Ventura Co., Cal.—Southwest Paving Co., 801 Washington Bldg., Los Angeles, awarded contract by County at \$230 ton for surfacing shoulders on Hueneme Rd., Saviers Rd., E 5th St. and Woods Rd., Cash Contract No. 608, involving 14,000 tons asphaltic surfacing mixture; total, \$33,200.

MARIN COUNTY, Cal.—Until Nov. 19, 2 P. M., bids will be received by State Highway Commission to grade and surface with bituminous macadam 3.0 miles between Alto and Waldo.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 502 State Office Building, Sacramento, California, at 2:00 o'clock P. M. on Monday, November 10, 1930, at which time they will be publicly opened and read, for performing work as follows: Sutter County near the County Hospital (III-Sut-3-A), a distance of about three-tenths (0.3) mile, to be graded and paved with Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash or a certified or cashier's check made payable to the Director of Public Works, for an amount equal to at least ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,
State Highway Engineer.

By C. H. WHITMORE,
District Engineer, Dist. III
Dated: October 23, 1930.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M., November 19, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Butte County, the substructure of a bridge across North Fork of Feather River at Pulga (II-But-21-C), consisting of two reinforced concrete abutments, two reinforced concrete piers, six concrete footings and four erection anchors.

Marin County, between Alto and Waldo (IV-Mrn-1-C), about three (3.0) miles in length, to be graded and surfaced with bituminous macadam.

Santa Barbara County, at Nojoqui Creek (V.S.B-2-D), about three-tenths (0.3) mile in length, to be graded and paved with Portland cement concrete.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds contract and specifications may be obtained at the said offices, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

C. H. PURCELL,
State Highway Engineer.
Dated October 22, 1930.

LIEN FORFEITED BY
FAILURE TO PROSECUTE

A contractor who negligently fails to prosecute a mechanic's lien forfeits his right to payment, says The Constructor.

In *Hendrickson v. Frieland*, 150 Atl. 226, a contractor filed a mechanic's lien in 1926. It was agreed at the trial that his attorney should prepare the case for trial before a jury. He neglected to open prosecution of the claim until one year later and explained the delay by stating that he was obtaining facts upon which to base the suit. The court held the contractor not entitled to prosecute the lien, saying:

"Until prosecuted to judgment, the lien is arbitrary, and, in view of this extraordinary feature, and of the disadvantage under which the owner naturally labors in defending against a stale, unjust claim, founded upon a contract to the terms of which he is usually an entire stranger, the one-year limitation should be strictly enforced, unless the claimant (contractor) is able to set up a most excellent demonstration that it was not only not because of any fault of his, but in spite of the exercise of at least ordinary diligence on his part, that he failed in that time to reduce his lien to the litigated lien embodied in a judgment."

Send For a Sample Copy
Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

Send for free sample copy today.

CONSTRUCTION COSTS DOWN TO ROCK BOTTOM

That the effect of the premature seasonal decline in construction operations and the policy of caution and conservatism being followed by business in general has already been fully discounted to bring the cost of construction in the United States down to rock bottom, as claimed last month by the Associated General Contractors of America, is borne out by its statistical analysis for the month of September, which has just been completed.

In its analysis for August, which showed a decline in construction costs for the fifth consecutive month, bringing the cost index number down to a two-year low level of 198.4, the association declared that no further decline could be expected and that the low level of the general readjustment period had been reached. This was borne out in the September analysis which showed that despite a further falling off in construction activity, the cost of construction remained stationary.

"Although there appears to be little expectation of a real revival in construction before spring," according to Edward J. Harding, managing director of the Associated General Contractors, "reports indicate that there will be a fairly active construction program for fall and early winter, much of which undoubtedly will be induced by the present low costs. It seems certain that the next movement on the cost chart will be upward and that it will come with the spring revival, if not before."

Mr. Harding points out that the cost chart, which is a composite of wage and material costs, is now at a level lower than the monthly average for any year since 1926 and that the average of prices for basic construction materials is lower than the monthly average for any year since 1917.

Further studies of the association, based on reports of the F. W. Dodge Corporation, indicate that although contemplated construction projects reported for the first nine months of 1930 were \$335,000,000, or five per cent above those for the same period of last year, any hope that this year's total construction will even approximate that of last year must be abandoned. These studies show that total contract awards for the first nine months were 20 per cent below those for the same period of 1929, despite an increase of 14½% in public works and utilities awards. Awards of residential contracts showed the greatest decline, 43%, while the total of building awards, exclusive of public works and utilities, was 30% off.

Portugal has passed a law prohibiting the employment of any more foreigners.

SAN FRANCISCO BUILDING PERMITS IN OCTOBER REGISTER \$2,292,210

Building construction undertaken in San Francisco during the month of October involved an expenditure of \$2,292,210, according to figures compiled by the Bureau of Building Inspection of the Department of Public Works. During the month 642 permits were issued.

The October figures include the one million dollar annex to the Mills Building and a theatre to be erected in Ocean Avenue at a cost of \$190,000. Both of these buildings are of Class A construction.

During the past ten months, records of the Building Bureau show, 5,655 permits were granted for improvements aggregating an expenditure of \$19,120,934 as compared with 6,095 permits for the corresponding period in 1929 when the operations totaled \$29,576,535.

Following October, 1929, the total registered 633 permits for improvements, costing \$2,444,543.

Following is a summary of the totals for the month of October, 1930:			
Class	No. of Permits	Est. cost	
A	2	\$1,190,000	
C	21	144,775	
Frames	156	670,537	
Alterations	460	265,328	
Government Work	3	21,570	
Total	642	\$2,292,210	

Builder Not Liable For Non-Performance

While it is well established that ordinarily a contractor is liable in damages for failure to fulfill the terms of a building contract, conversely it is true that the owner cannot compel performance where the evidence shows that the contractor was ready and willing to perform his obligations and it was impossible for him to do so, says The Constructor.

In Young v. Barelli, 125 So. 258, a building contract provided:

"Close up present drain from refrigerator to sewer at the proper place and provide new drain from ice box to outside of building at surface of ground."

When the contractor was ready to perform this part of the contract, he was unable to do so because the sewer was not completed. Therefore, the court held the contractor not liable in damages for his failure to complete the contract, and said:

"The specifications provide for the connection of the refrigerator drain with the waste line through the sewer. The evidence shows that at the time the main line was installed, the sewer, though in the ground, was not in use, due to some litigation in which the town was involved. In this situation, the contractor and the owner decided to run the drain pipe to the cesspool, which was done. We do not see any good reason to hold the contractor liable for not doing something it was not possible from him to do."

MUNICIPAL CONTRACT OF SALE HELD VALID

The courts have always shown inclination to uphold the validity of contracts involving municipal improvements. Therefore, unless the laws of the state prohibit contracts relating to municipal improvements, the courts will hold such agreements enforceable, says The Constructor.

In Johnston v. City, 226 N. W. 164, a state law provided that before any municipality shall enter into a contract for a public improvement to cost five thousand dollars or more, the council shall advertise the proposed contract in at least one newspaper for not less than ten days before the meeting to approve the contract.

A council entered into a written contract with a contractor for installation of a public improvement for \$36,000. The ordinance provided that the money for payment for the improvement should be obtained from the net income derived from operation of the plant and that the obligation of \$36,000 should in no sense be a debt of the city.

Certain taxpayers filed legal proceedings to prohibit the council from fulfilling the obligations of the contract contending that both the ordinance and contract were void because the state law had not been complied with. However, the court held the ordinance and the improvement contract valid, saying:

"The authority of municipalities in the conduct and management of their proprietary business and to make contracts in pursuance thereof has been given a liberal construction. . . . The purchase and installation is shown by the evidence to be reasonably necessary to the maintenance."

MUNICIPAL WATER SYSTEM NETS \$273,835 PROFIT

Net profits of the San Francisco Water Department for September amounted to \$273,835 after paying all expenses, including bond interest.

This was revealed by a report to the Board of Public Works submitted by Nelson A. Eckart, manager of the Water Department.

This September profit, as well as the actual profit of every month since last March, when the system was acquired by the city, has exceeded the estimates the engineers made prior to the system's acquisition.

The sum of \$273,835 represents an increase over the previous month's profits of \$21,799. It is made up of increased water sales amounting to \$17,118 and a decrease of \$4280 in operating expenses.

Deducting a capital expenditure of \$79,563 for new construction, and \$3,333 for redemption of bonds, the department showed net earnings of \$110,939 available for transfer to the treasury to meet general city expenses or for possible reduction in water rates.

EDUCATING THE INDUSTRY IN SCIENCE OF QUANTITY SURVEY

(By H. R. Bigelow, Director Chicago Technical College)

In the United States the field for quantity surveys is large. It offers unlimited possibilities to the trained man. The task of training men to handle this work intelligently lies with the organization itself. The American Institute of Quantity Surveyors co-operating with educational institutions who are aware to the requirements and possibilities in this work, should shortly be in a position to outline the training of the men who will be making these surveys in the future.

With the billions of dollars invested in the Building Industry and individual construction work running into hundreds of thousands of dollars, it is natural that men must be trained intelligently to handle this work. Where a small mistake may make a difference in the profit on a job—or perhaps mean a loss to the contractor; where incorrect reading of plans may result in the faulty purchase and assembly of materials; where it costs thousands of dollars to correct mistakes made by untrained men, it is natural that the industry is becoming conscious of the need of the scientific preparation and efficient handling of estimates.

Training is Essential

It is no longer possible to get by in this field with slipshod, guesswork methods. You cannot place an estimate on a barrelhead (or saying goes), and expect accurate results. Time was, when an estimate was practically a wild guess. A man would spend days of calculating, write figures all over a dozen sheets of paper without regard to order, draw a large circle around the final result and let it go at that. His only outline for this work was in his mind and he had no way of checking back over his figures. It was absolutely impossible to trace an error.

Today, a man cannot continue to hold his place in this field unless he abides by a systematic, orderly plan. There is a definite order of things and it has come about with scientific training. As a further step, the industry is coming to understand that more efficiency can be realized thru developing as careers in themselves, the separate branches of each profession.

How can we best train the coming generation so it can handle such specialized branches as quantity surveying? Surely not through the long and tedious "trial and error" system. Practical experience is invaluable, but which one of you men would want your sons to go through the same long process of development that you have gone through when the same goal might be reached in far fewer years and with much less effort? You have blazed the trail. You are leading the way in this industry and will have the pleasure of knowing that you have made it easier for those who are to come.

Quite possibly this audience is made up of men who started their careers in widely divergent lines. I imagine that the organization is made up primarily of construction engineers. I judge then, that many may have started as building laborers, or at a trade. They, most likely, learned to read plans, to estimate, went into contracting for themselves, saw the possibilities in quantity surveys and here they are.

Others may have started as estimators, others as architects, or as civil or structural engineers. Yet, here we all are after years and years

of hard work. We want to pass on to others what has already been learned so they will be saved the toll and hardships we have experienced. In other words, we have become educators, because the sole aim of the educator is to give to the student what has already been proved to be of value so it can be applied to present day problems without each individual going through the same process of research and development.

Qualities for Success

The kind of men who get farthest along today, are those who have education and culture. The powerful will and a sense of mastery alone, cannot place a man at the head of an industry. Our industry pays a liberal premium to the men with open minds who recognize that growth means change. He who attains a high place in the industry is accustomed to allow himself a free play of ideas, has a respect for facts, and is trained in research. Thus do we try to outline for the individual of the coming generation the fact that he must be trained to think intelligently about the problems confronting him.

Obviously, the way to start training men who can handle work of this kind is to go to the very bottom and work up. To handle a quantity survey intelligently we believe a man must understand thoroughly building construction, plans, interpretation of specifications, properties of materials, use of intelligent English, etc.

Being interested primarily in instruction and training, it is natural that I should base my remarks on this subject, from that angle. The institution I represent has devoted many years to developing courses of training in the building construction field and it is most likely because I represent Chicago Technical College that I have been asked to address you today. Naturally, my remarks come to you from the viewpoint of an educator.

The Dignity of the Profession

Quantity survey work is not a trade. It is a profession, or if you please, a science, requiring men of high calibre. It requires men on a par with college graduates, who have worked for a degree in Building Construction Engineering. The years of practical experience which you, as quantity surveyors, have put in, cannot be equaled with a mere smattering of knowledge. The requirements for admission into this organization prove that members must be able to handle the work intelligently.

There is a dignity about your profession that has been attained because the men doing this work have realized its importance and we must all strive to maintain the high standard of this calling through an earnest and honest effort to educate those who will follow in our footsteps. The Accountant, the Doctor, the Lawyer, the Banker, all have definite prerequisites to specialize in work like quantity surveys the foundation that will enable them to finish before they can honestly practice their professions. It is our earnest desire to give to all who place this profession on an equally scientific basis.

We, as an educational institution, are interested primarily in training today, either trains its own men or for its trained men. The NIRA can help in training men for quantity survey work, but the bulk of the burden

must be carried by outside sources. That is one reason for the courses now offered in Construction Engineering.

A Plan of Education

There are two institutions in the United States today who can offer training in building work sufficient for men to handle quantity surveys. One is Chicago Technical College. Realizing the need for trained men, these two schools have developed courses whereby men can be trained in the fine points of building construction work until they are capable of handling highly specialized work.

Practical men who have struggled to get the training they have, are not always in sympathy with what they call "theory" and "booklearning". Yet statistics prove over and over again that the educated men as a group, far better off than their uneducated brothers. Take the average man and give him an education. Immediately he is above the average uneducated man. The isolated case often cited, of the genius who was not educated in the schools and colleges, and yet is successful, does not in any way prove that education is not valuable.

Thus we are sure that the future for quantity surveyors lies in the foundation they can get through a course of training. They not only receive the technical training for their work, but they also learn how to conduct themselves, meet people, make contacts, maintain poise and develop a professional bearing that will elevate the entire profession.

"All this from a College education?" you ask. Yes, all this and more! The cultural development, self-confidence and business ability developed through college training will be of almost innumerable value in selling the idea of quantity survey to the entire construction industry.

Theory and Practice

The question of "theory" and "practice" has long been a bone of contention between educators and those who believe that one can only learn thru practice. A combination of the two is ideal. We claim, however, that the theory must come foremost if a man wishes to advance very far in his profession. Every year we have this demonstrated in our classrooms. Men engaged in the various trades come to us for training. They seem to have gotten in a rut and cannot get out of their particular grooves because they do not have the theory. They know what to do under certain conditions but they do not know why. And they never will advance until they learn what theory teaches them—the scientific reason why they do certain things. Let me illustrate.

A plumber has been enrolled for a course in Plan Reading. He is skeptical about our ability to teach him anything about his trade, but wanted to read plans. In going over a plumbing lay-out his instructor asked him what would customarily be installed at a certain point. Without hesitation he said, "a trap." "Why?" asked his instructor. Well, he didn't know why, but he learned his trade from his father and his father had learned it from his grandfather, and they had always put traps there so it must be right.

It is just such thinking, that the training offered today to our younger generation is eliminating. It makes the difference between scientific thinking and mechanical effort. It makes clear to the worker that even if he is digging a ditch there is a reason for it. It takes him out of the class of the

ditch digger who, after much questioning, decided that he "digs the ditch, to get the money, to buy the food, to make the strength, to dig the ditch." Educational Institutions and Quantity Surveyors

Now then, what can the educational institutions do for quantity surveyors? They can lay a foundation in Building Construction Engineering. They can give instruction in quantity surveying, emphasizing every detail necessary for intelligent work in this field.

Building construction today requires a knowledge of engineering. Scientific training in this line will include instruction in parts of the Structural Engineering and Architectural Engineering professions. The student must understand the Architect's and Engineer's language and point of view. In our opinion he should also have training in building finance, management, costs and professional relations, as well as a thorough foundation in analysis, details, assembly of materials, construction methods, plan reading, estimating, superintendence and contracting.

With this background, he can readily step into quantity survey work and handle it creditably. He has been educated to the importance of this work. He has been taught the importance of forms. He has learned to arrange his material in its logical sequence and to systematize his work and himself. From the very day he commences work in this course of training he learns that slipshod methods will not be tolerated. He becomes methodical, taking things in their logical order until it becomes second nature to him.

Every subject covered in a course like this instills in his mind the importance of orderliness. With his mind functioning in an orderly and logical manner he is ready to handle the responsible tasks which will be set before him. In other words, he is equipped to handle quantity surveys, in the way that you, as pioneers in this field would like to have them handled by your successors.

Quite likely, the students of today will be coming into this field in large numbers. With the building industry becoming conscious of the advantages of quantity surveys, the demand for experienced men will increase.

Therefore, our aim as the leaders in this branch of industry must be to set the example to those who are to follow us. We must leave sound precepts, and a logical, orderly plan of development for all.

"First the blade, then the ear, then the full grain in the ear."

HARDWOOD EXPORTS TO FRANCE IMPROVING

French imports of American oak, red gum and sap gum have been heavier while the general hardwood trade at Havre has remained normal, with stocks and prices unchanged, states Consul E. C. Kemp at Havre and Commercial Attache Donald J. Reagan at Paris, to the Lumber Division of the Department of Commerce. Recent arrivals at Havre of 107,000 square feet of American oak flooring are equal to approximately one-third of the total American exports of hardwood flooring to France during 1929.

The market for softwoods has been disturbed by constant offerings at depressed prices, as North European shippers are eager to dispose of balances before the seasonal closing of the ports. The demand for building lumber, mostly European, is declining after a fairly active season and stocks for the winter season are nearing completion.

CLARK, FORMER SAN FRANCISCAN, HEADS CAMPBELL WINDOW CO.

Milton T. Clark, former vice-president of the Truscon Steel Company, has been elected president of the recently organized Campbell Industrial Window Co., Inc., with headquarters in the Pershing Square Building, New York City.

Mr. Clark started in the general contracting business in San Francisco and later was appointed chief of the Municipal Bureau of Architecture, which position he resigned to become associated with the Truscon Steel Co.

The Campbell Industrial Window Company will specialize in the field of industrial windows and doors for every type of installation and service requirement. Its line of products includes casement windows, horizontally pivoted industrial windows and projected windows of the commercial, architectural and office types, utility windows and continuous windows and doors. These windows have ventilators which are protected by a weather stripping which shuts out the wind, rain and snow, and excludes dust, dirt, smoke and soot and reduces the cost of heating a building. This feature is practically the only improvement made in this class of window in the last 20 years, and eliminates the only objection to this type of sash, the manufacturers declare.

The ability of the organization to handle a large volume of business on a big scale is further demonstrated in that doors of every type are manufactured—standard doors and frames, industrial doors, pier and wheel doors, fire department doors and airplane hangar doors.

The company handles a complete line of window hardware and mechanical operating devices. It is also prepared to furnish a high grade of cast iron products, such as basement windows, coal chutes, chimney and ash dumps for fireplaces, irregular dampers and ventilators for foundation and attic walls.

In addition to Clark, other members of the Board of Directors of the Campbell Industrial Window Company are: Martin J. Belin, Jr., Director, Vice-president and General Manager of Sales, American Radiator Co.; H. E. Campbell, Director and Vice-president, Campbell Metal Window Co.; Donald M. Forgan, Vice-president and Treasurer, American Radiator Co.; R. J. Hamilton, President, American Radiator Co., Secretary and Treasurer, American Radiator & Standard Supply Corp.; Abston Sargent, President and Director, Campbell Metal Window Co.; Jack Williams, President, Campbell Casement Window Co.

STATE INSPECTORS TO SCOUR CITY FOR UNLICENSED BUILDERS

A large force of state inspectors, in the employ of the Department of Professional and Vocational Standards, will begin to arrive in San Francisco today in preparation for a city-wide drive on unlicensed contractors and sub-contractors. It is announced by F. E. Fisher, chief inspector for the Section of Contractors' Registration.

Every contractor engaged in the construction industry here who is found to be operating without a State license will be given three days to procure his license. Those who go beyond the stipulated time will be prosecuted in the San Francisco courts, Fisher announced.

The law, which became effective August 14, 1929, and under which more than 29,000 contractors are licensed in California, is now so well known to everyone in the construction industry of the state that there is no excuse for the failure on the part of a contractor to be without a license. Police powers of the law have been resorted to most sparingly in the past, it having been the aim of James F. Collins, Registrar of Contractors, to administer the law thru a campaign of education rather than thru the medium of prosecutions, Fisher said.

The time has come, however, the chief inspector declared, when a policy of rigid enforcement of all the provisions of the law must be followed. This policy, he explained, is taking the form of a concentration of field inspectors in the metropolitan areas of the State for an intensive drive on all unlicensed contractors. San Francisco and the Bay District is the first of these areas selected by the Department.

The city will be divided into districts and an inspector will be assigned to each district. Each inspector will visit every piece of construction work, large or small, now under way in his district and every contractor and sub-contractor on the job will be required to show his license card and evidence that he is compli-

ing with the workmen's compensation and safety laws of the State. Those who are unable to comply with the inspector's demands will be served with a formal notice to apply at the Department's San Francisco office, 849 Phelan Building, for a license within three days. Those who fail will be arrested and prosecuted in local courts, Fisher announced.

PULVERIZED FUEL SAFETY CODE IS REVISED

A revision of the American Standard "Safety Code for the Installation of Pulverized Fuel Systems" is announced by the American Standards Association. The rapid increase in the use of pulverized fuel in many industries, resulting in new developments in methods and design of equipment, is responsible for the revision. The original code was approved by the American Standards Association in 1927.

The code covers the construction of buildings housing fuel pulverizing equipment, the ventilation of these buildings, and specifications for dust collection systems. Specifications are given covering methods of preventing explosions through static, through the drying of coal, and through its transportation through pipes. The code also contains suggestions for safe operating rules to be printed in instruction cards which can be used for guidance of the employees in charge of the operation of such systems.

The standard which is part of a comprehensive project for the prevention of dust explosions, was developed and the revision undertaken under the auspices of the National Fire Protection Association and the United States Department of Agriculture.

Copies of the code are available for five cents each from the American Standards Association, 22 West 17th Street, New York City.

THE OBSERVER

What He Hears and Sees on His Rounds

Exports of Redwood lumber from Eureka in October totaled 1,000,000 feet, according to H. F. McGrath, deputy collector of customs at Eureka.

Seattle, Wash., city council has appointed committee to "study, determine and expedite all public improvements which can be done either by day labor or contract at this time to relieve unemployment in this community."

Carpenters Union No. 771 of Watsonville, has requested the city council to reconsider an award of contract to the A B C Painting Company of San Francisco to paint the municipal auditorium. The contract was awarded on a bid of \$487, the lowest submitted. Other bids ranged from \$525 to \$1623, the highest bidder being a local man.

A giant stride toward the millennium has been recorded in the office of the Secretary of State at Indianapolis. "The One-Trip Plumbers" have registered their trade-mark.

The corporation, with headquarters at Rock Island, Ill., accompanied its registration with photographs of its truck emblazoned with the words: "The One-Trip Plumbers."

Control of the comptroller of the currency over bankrupt national banks was increased by a decision of far-reaching importance handed down in the United States circuit court of appeals at Philadelphia, October 28. The decision revokes the appointment of an equity receiver by the United States District Court of New Jersey for the affairs of the Port Newark National bank of Newark and orders control of the bank returned to the comptroller, whose receiver was ousted to make way for the court receiver.

Plans for a \$185,000 advertising campaign in newspapers of New York's metropolitan area were discussed at a luncheon of the Electrical Association of New York last week. The purpose of the campaign will be to promote better wiring in homes of Greater New York.

The necessary funds have already been voted by the association, and J. A. Corcoran is in charge of the campaign. The advertisements will tell of the advantages of proper wiring in private homes and apartment houses.

Gilbert T. Hodges, president of the Advertising Federation of America, was one of the speakers at the luncheon.

Declaring the railroad companies are employing large numbers of aliens at Sparks, Las Vegas and other Nevada points, at lower wages than are paid to American labor, while hundreds of American railroad workers have recently been laid off, United States Senator Tasker L. Oddie of Nevada has telegraphed to President Hoover asking the unemployment commission to investigate employment conditions in these towns. He urged the commission recommend some system to the railroads under which they will readjust their employment schedule and give preference to the Americans, who, he says, are well trained and qualified.

Issuing 2908 permits, Los Angeles leads Pacific Coast cities in building permit expenditures for the month of October with \$5,309,181. San Francisco issuing 642 permits registered a total of \$2,292,210. Seattle followed next in order with 610 permits for improvements costing \$1,533,340 and Spokane fourth with 182 permits for project involving an expenditure of \$800,000. Portland issued 574 permits for improvements costing \$664,210 and Tacoma 221 permits for work costing \$205,675.

A plan to construct the State Industrial School at St. Anthony, Idaho, using student labor on the job has been protested by the Intermountain Branch of the Associated General Contractors as unfair to the contractors in the state who are paying taxes to support institutions such as the one in question. Mark Tuttle, executive secretary of the Intermountain Branch, has urged the contractors of Idaho to take steps to prevent this encroachment of government into business which deprives the general contractor of his livelihood.

The Intermountain Branch has only recently won a fight in Utah on just such a matter, which was the proposal to have state institution buildings constructed by inmates or convict labor and during the present season five large state buildings have either been contracted for or contracts will be let in the immediate future, Tuttle states. He urges the contractors of Idaho to join together to accomplish the same result in their state.

One hundred and one questions that should be considered before an industrial plant is built have just been compiled for distribution by the Austin Co., architects, engineers and builders of Cleveland. The preliminary demand for this booklet of questions indicates widespread interest among executives in obtaining complete information on locating and building plants before building plans are considered or contracts are awarded.

Typical points raised by Austin Engineers for executives include such questions as: "What factors should govern the location of your plant? How do local building codes affect cost of plant? How many contracts will you let? Will there be a bonus and penalty clause in your contract? Who will make your outlays? What are the relative advantages of various types of buildings — multi-story, single-story? How will you determine heating facilities? Ventilation? Lighting? Are you sure you know your floor load requirements? Do you know how to reduce fatigue among both office and plant employees?" There are scores of other vital questions.

State Highway Commission is making surveys to determine the location of the proposed Mendocino Pass Forest road with outlets to the Pacific and Redwood highways. This construction, to be completed within five years, will aggregate a cost of more than \$1,000,000.

TRADE NOTES

Pope & Talbot Lumber Company, pioneer lumber concern, has been purchased by the Charles R. McCormick Lumber Company.

David White Co., Inc., Milwaukee, Wis., has published a complete 100-page catalog describing transits, levels and other surveying instruments for engineers, contractors and builders.

W. P. Pedigo has been named manager of the Bass-Hueter Paint Company, Fresno branch of the National Lead Company, succeeding W. H. Sawtell who resigned after nine years in the position. Pedigo has been salesman for the company for the past two years.

J. C. Douglas, formerly of San Francisco, has taken over the management of the Sacramento Branch of the L. H. Bennett Company, Ltd., at 1212 K Street, distributors for the General Electric refrigerator. Douglas takes the place of William Rogers who will be transferred to San Francisco.

Lee F. Adams, commercial engineer of the General Electric Company at Schenectady, has been awarded the Manufacturers Medal and Purse for 1930, given under the James H. McGraw Award. This recognition is the result of "outstanding and unselfish service to the manufacturing branch of the electrical industry."

To maintain efficient service standards, R. W. Cramer & Co., distributors of Swiss precision instruments including Sauter Time Switches have moved to 67-69 Irving Place, New York City, where they will occupy the entire eighth floor. Increase area for offices and warehouse in the new location accommodates increased personnel and larger stocks to meet the growing demand for Sauter Time Switches.

Atlas Lime and Chemical Company, formed to mine, manufacture and sell limestone products, has been granted a permit by the State Corporation Department to offer 50,000 shares of \$100 par value stock to the public at par. In addition, the company was authorized to issue five shares of stock to individuals named in the application in payment for services, 11,913 shares in exchange for properties to be taken over, and 48,806 shares to E. W. Harker, president. The company has authorized capitalization of 200,000 shares of \$100 par value common stock.

Cemco Electric Manufacturing Co., recently opened new quarters at 323 Jefferson St., Oakland. The company is engaged in the manufacture of Cemco panel boards, claimed to greatly facilitate and improve electrical installation for industrial, commercial and residential purposes. J. M. Zarwell is general manager and owner of the concern.

David Selick of Los Angeles, an owner, fined \$100 or 20 days in jail, for failing to comply with a notice of the municipal plumbing department to have his plumbing connected to street sewer and to discontinue the use of a cesspool.

ALONG THE LINE

George A. Kneese, for the past 12 years county supervisor of San Mateo County, was defeated at the Nov. 4 election by Jas. S. James, former city engineer of Burlingame.

W. H. Talbot, 12, lumber magnate, died at his home in San Mateo last Wednesday. Talbot's lumber interests extended from San Francisco to Seattle, San Diego, Los Angeles and other cities. The Pope and Talbot Lumber Company, of which he was president, was sold a few days ago to the Charles L. McCormick Lumber Company.

Yoho & Dauger, general contractors, 3119 Fourth Ave., Sacramento, have been admitted to membership in the San Francisco Builders' Exchange.

Tracy R. Bousman has been appointed city engineer of South Gate, Calif., succeeding Edward M. Lynch.

L. H. Nishkian, San Francisco structural engineer, has developed jointly with D. B. Steinman of New York City a graphic method for the design of a continuous beam and frame.

J. S. Thomas and A. Welch have filed a notice of co-partnership with the San Francisco county clerk and will operate under the firm name of Pacific Engineering Company.

PLANS ARE ANNOUNCED FOR OIL BURNER SHOW

Preliminary plans for the eighth annual convention and oil burner show of The American Oil Burner Association in Philadelphia April 13 to 18 have been announced.

Convention headquarters will be in the Benjamin Franklin Hotel and all meetings will be held there. The annual oil burner show will be held across the street on the exhibit floor of the Gimbel Building. Space will soon go on sale to members and 129 booths each 10 feet by 10 feet will be available for exhibit purposes.

The show will open Monday, April 13, at 7 P. M. and thereafter until Saturday, April 18, it will be open daily from 1:30 P. M. to 11 P. M. Exhibitors, as usual, are restricted to manufacturer or associate members of the association. The annual show has become the occasion for introducing new burner models and equipment improvements and information reaching the Association headquarters indicates that many new and interesting developments will be revealed at the Philadelphia exposition. It will be the second consecutive show which will be open to the general public, this plan having been followed last year with outstanding success. More than 10,000 people were registered as visitors at the 1930 show in Chicago.

Business meetings and discussions of Association members will be held during the morning at the hotel to allow for attendance at the show in the afternoon and evening.

BRIDGE FIRMS MERGE

Consolidation of the Massillon Bridge & Structural Company of Massillon, and the Fort Pitt Bridge Company of Pittsburgh under the name of the Fort Pitt Bridge Works Company with assets aggregating \$4,000,000 is announced at Massillon, Ohio.

HERE — THERE — EVERYWHERE

Then, J. Sherwood of Los Angeles, an owner, having a toilet, bath and cesspool installed, without a permit was fined \$20 or two days in jail.

Stockton has been chosen as the 1931 convention city of the American Water Works Association to be held the latter part of October.

Merchants Plumbers Association of Bakersfield, is studying the best available plumbing codes of other communities in an effort to secure the passage of an ordinance embodying the best plumbing practice.

L. G. Scherer was installed as president of the Architects' League of Hollywood at a meeting of the League, October 22. Verner McClurg was installed at vice-president; J. A. Murrey secretary-treasurer, and Ralph Flewelling, M. L. Barker, James T. Handley, Donald Shugart and John Roth directors.

Chas. C. Hughes, city superintendent of schools at Sacramento, has submitted a report to the Board of Education, estimating that a bond issue of \$1,750,000 will be required to finance the erection of new schools and additions to the standing school buildings in the capital city.

Thomas Haverty Company, plumbing and heating contractors and general engineering contractors of Los Angeles, announce that their office and plant will be closed every Saturday in the future. The five-day week will also apply to contracting operations. This rule will continue, at least through the slack construction period, if it does not become permanent.

Establishment of the two-day week for nine unions of Waterloo, Iowa, affiliated with the Waterloo Building & Trades Assembly, is announced. The wage scale, it is said, will remain the same, the members taking four hours less pay each week, since the present week consists of five and one-half days.

Building Material Dealers' Association of Seattle, has elected Walter Galbraith president; Harry Abel, vice president; Charles Watts Secretary and Sam Hunter treasurer. Mr. Galbraith succeeded D. E. Fryer as president of the association.

Thirty-five members of the association were present and discussed problems confronting the building material industry. Those who spoke did not stress the scarcity of business as much as the fact that business was being handled with no adequate profit.

September shipments of steel-furniture stock goods, as reported to the U. S. Bureau of the Census by 34 manufacturers in the "business group," totaled \$1,879,151 as compared with \$1,935,473 in August, \$2,313,984 in September, 1929, \$2,754,135 in September, 1928, and \$2,218,502 in September, 1927. September shipments of shelving, compiled from reports of 16 companies, totaled \$496,253 as compared with \$554,041 in August, \$812,635 in September, 1929, \$678,422 in September, 1928, and \$531,154 in September, 1927.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684).

R-3335-S ENGINEER, preferably mechanical, 28-35 years old, for cost analysis and time study work. Experience should include both shop and outside construction estimating and preferably some time study work. Salary about \$200 month to start. Apply by letter. Location, Bay Region.

K-321-W-1875-C-S UNDERGROUND SURVEYORS, two, single. Must have had two years' experience. Salary \$150 a month and expenses. Apply only by letter. Location, Durango, Mexico.

R-3349-S SALESMAN, young man with car, for promotion work for dealers. Must have experience selling roofing to owners. Salary and expenses. Location, Northern California.

R-3374-S JUNIOR ENGINEER, technical graduate or equivalent, with 3 to 6 years' architectural or engineering experience. Opportunity to learn a branch of building contracting business. Must be able to handle men. Salary open. Location, Los Angeles, Hdqtrs., San Francisco.

R-3309-S ENGINEER, mechanical or electrical, not over 30 years, with 3 to 5 years' experience on hydro-electric plant operation for service and testing work. Must have mechanical skill, agreeable personality and be willing to travel. Salary about \$175 month and expenses in the field. Apply by letter. Headquarters, San Francisco.

R-3353-S CONSTRUCTION SUPERINTENDENT, preferably with experience in Latin America and capable of taking charge of hydro-electric construction project involving tunnels, dams, penstocks, power house, etc. Apply by letter with references and photo. Location, Colombia, South America. Headquarters, San Francisco.

CONTRACTOR MUST PROTECT PEDESTRIANS

No person is entitled to damages who carelessly contributes to an injury. Yet various courts have held that although a person knows of a dangerous condition of a street, it does not necessarily mean that he is guilty of negligence which would prevent recovery if he should attempt to cross the dangerous place.

In Highway Const. Co. v. Sorna, 171 N. E. 340, a pedestrian was injured when she stepped and fell into an excavation in the street. She sued the contractor for damages. The contractor argued that the woman was not entitled to a judgment because she negligently attempted to cross the street near the excavation. Since it was shown that the woman exercised due care to prevent the injury the court held the contractor liable, stating important law as follows:

"Negligence cannot be imputed to one who uses such carefulness as a man of ordinary prudence would exercise, but where there is danger, and the peril is known, whoever encounters it, voluntarily and unnecessarily, cannot be regarded as exercising ordinary prudence, and therefore does so at his own risk."

\$2,000,000 CRACKING PLANT FOR PITTSBURG

E. I. Badger and Sons Company of Boston, Mass., at approximately \$2,000,000 have been awarded a contract by the Associated Oil Company to construct a cracking plant at the Avon Refinery in Contra Costa County near Martinez. The plant is to be of the tube and bank type and will be the world's largest.

The construction of this unit is a part of Associated's proposed expansion program to take care of the increased demand for its products. The plant will be a complete unit, consisting of cracking furnaces and bubble towers, treating plant, re-run stills and power plant, embodying the latest developments in the cracking industry. The unit will convert more than 10,000 barrels daily of heavy fuel oil into gasoline and other products.

The cracking of fuel oil by this process yields the maximum quantity of marketable products from crude oil, it is stated.

Illinois Contractors Opposed To Low Wages

The Illinois Association of Highway and Municipal Contractors, a chapter of the Associated General Contractors of America, following a meeting in Chicago, took steps looking toward the remedying of low rates of pay for laborers which it feels are highly detrimental to the construction field in the state of Illinois, says The Constructor.

The association, in a resolution presented to Governor Emmet Bennett of Illinois, pointed out that through unregulated conditions in competition for contracts on highway construction, economic conditions have developed in the state which forces men to work on road building for as little as 17½ cents per hour for days ranging from fourteen to sixteen hours. The contractors state that they are unwilling to enter into further competition for contracts which can only result in further economic depression with still lower wages and declining standards of living for the workmen.

The contractors charge that through the policies of the Illinois Division of Highways, they are forced into competition with contractors who are not taxpayers, who have no community obligation and who transport non-resident or itinerant labor into communities already distressed by unemployment. Further, they state, the true facts concerning the conditions under which Illinois highways are being constructed at present have not been called to the attention of the public and governmental bodies nor opportunity afforded the leaders of the construction industry for a discussion of these state problems.

The contractors, therefore have urged that steps be taken to adopt construction policies which will eliminate the low pay and long hours on road construction and that the conditions surrounding the award of highway contracts in the state be changed before further economic depression and dissatisfaction among the large number of laborers now unemployed will be aroused.

Tractors have replaced horses in the logging woods of California and are now replacing the heavy steam donkey engines. They were first used in 1923 in this State and in 1929 sixty-two per cent of all timber logged in the pine regions of California was done by tractors. The U. S. Forest Service approves of their use as they are less liable to cause forest fires and, if rightly handled, will cause less destruction to the remaining trees than will some day form a forest.

ARCHITECT'S LAW VIOLATED; TWO DRAW SUSPENDED SENTENCES

"Thirty-day jail sentences, suspended, were handed down by William Mallagh, justice of the peace, on pleas of guilty by H. J. Hanak and T. J. Tasker, to charges of violation of the state act regulating the practice of architecture," according to the San Luis Obispo Daily Telegram.

"The charges were particularly on section 5, which requires that state licenses be secured on examination before one can do business as an architect.

"A. M. Edelman, secretary of the state board of architect examiners, and S. Bernard Wager of Los Angeles, attorney for the Southern California district for the board, attended the trial but did not participate, the cases being prosecuted by H. J. Dubin, district attorney, and A. V. Muller, assistant."

CONTRACTOR AND OWNER LIABLE FOR NEGLIGENCE

The law is well established that if any damage or injury is effected by a contractor resulting from negligence of an owner, the contractor and the owner are jointly liable, says The Constructor.

In Kaufman v. Tomich, 280 Pac. 130, a municipality and a contractor made a contract by the terms of which the former agreed to pay the contractor for public construction work performed according to plans prepared by the city's engineering department.

A dwelling adjoining the construction work under direction of a city engineer was damaged by a shifting of the soil upon which the retaining wall and the foundation of the house rested, and the property owner filed suit against the municipality and the contractor.

The counsel for the former attempted to avoid liability on the contention that a city is not liable for the negligent acts of its engineers and that a contractor is not liable for damages effected while performing work. The higher court held both the municipality and the contractor liable, saying:

"Wherever the injury complained of is the taking or damaging of private property for public use without compensation then under the guarantee of the federal constitution against such invasion of the private rights of property, neither the state itself nor any of its agencies or mandatories may claim exemption from liability."

REFERENCE BOOKS ON PIPE ARE ISSUED

Youngstown Sheet & Tube Company Youngstown, Ohio, has issued two valuable books of reference. The first of these, containing 72 pages, gives tabular data on pipe produced by the company, as well as descriptions of the process of manufacturing welded and seamless pipe. Suggestions for the care of oil pipe are also included. The second book, entitled "Standard Pipe Reference Book," includes tables and other data to assist in making pipe installations more uniform. It includes information on plumbing and heating practice compiled by Samuel E. Dibble, of the Carnegie Institute of Technology; standard symbols for plumbing, heating and power plant work; and tables giving the physical properties and weights of fittings and other standard items. Both books are bound in leather.

REALTY BROKER. NO STATE LICENSE. NET LOSS \$12.125

Failure to hold a realty brokers' license during negotiations for the sale of the \$250,000 Devonshire Hills tract at San Carlos, cost Harry F. Davis a commission of \$12,125, according to a ruling of the state supreme court. The tract was sold for the Joseph S. Phelps estate. Had the broker been in possession of a license, W. F. Chipman, trustee of the estate, would be obliged to pay Davis the commission under the terms of an option agreement, the court stated.

CLAY TILE SIMPLIFICATION IS ADOPTED

The revised simplified practice recommendation No. 61 on Clay Tiles for Floors and Walls (formerly entitled White Glazed Tile and Unglazed Ceramic Mosaic) has received sufficient signed acceptances from manufacturers, distributors and users to insure the general adoption of the program by the industry, and is to be considered as in effect from October 15, 1930, according to a recent statement of the Division of Simplified Practice of the Bureau of Standards, Department of commerce.

The outstanding changes appearing in this revised simplification program are, the enlarging of the scope of the recommendation to include all floor and wall tiles with the exception of falence, which necessitated a change in the name of the recommendation from "White Glazed Tile and Unglazed Ceramic Mosaic" to "Clay Tiles for Floors and Walls"; the reducing of the grades of tile from three to two whereby the committee discarded the terms "Selected" and "Commercial" and recommended the adoption of "Standards" and "Seconds" as the only two grades of tile to be produced and marketed; and the elimination of package grade certificates because it was felt that the master grade certificates would serve the purpose for identification and grading. New minimum grade specifications for colored glazed tile, as well as tentative revised minimum grade specifications for ceramic mosaic are also a part of this simplification.

FINNISH PLYWOOD DOORS MAY BE EXPORTED

The Board of Directors of the Architects Association in Finland is considering a plan for standardization of the size of flush plywood doors, states a report from C. Roderick Matheson, Acting Commercial Attache at Helsinki, to the Lumber Division of the Department of Commerce.

It is believed that in addition to facilitating the work of local architects, the production costs at the factories could be lowered to such an extent as to enable them to produce quantities at competitive prices for export.

It is reported that a new veneer plant will commence production early in 1931. A building has been bought in Sairio and the mill will employ about 120 hands, according to local press reports.

OPENS BRANCH OFFICES

Pacific Wire Products Co. with headquarters in Los Angeles, has opened a branch office and warehouse at 383 Brannan street, to serve the Northern and Central California sections. The company manufactures bronze, dull and bright galvanized, and painted screen cloth.

BARGAIN PRICES OF BUILDING MATERIALS WILL NOT CONTINUE

"Economists are pointing out that the present bargain prices in construction material will not last long. For this reason it will be both good business and provident for cities to plan and execute public improvement projects as quickly as possible," says Frank J. Barrett, Seattle district manager here from the Portland Cement Association.

During the last decade there has been a steady population trek from rural communities to cities. Consequently with factories and business houses forced to curtail activities, unemployment has struck many population centers with particular vigor.

"Economists and practical business men regard public construction as a balance wheel which can well be utilized in periods of business lulls. Business depressions are always characterized by lower prices, better values and efficient labor. Cities, therefore, who push public construction projects are not only taking the proper step to relieve unemployment and restore business to normalcy, but they also give their citizens bargains in public improvements.

"A remarkable instance of what a city can do in the way of providing employment and at the same time acquire needed public improvements is shown in a recent step taken in Chicago. Money was transferred by the city from the Chicago avenue tunnel construction fund to the fund of the water-pipe extension department. Immediately 200 men began working on water mains on two avenues—shortly their work will enable an additional 800 men in the employ of paving and allied contractors to start widening the pavements on these two thoroughfares. It is expected that four miles will be widened before weather conditions prevent further work.

"Recent reviews of street building activities throughout the nation show that fewer streets are being improved this year than last. On the other hand, rural highway building is having its best year. As dire a need exists for street improvement as for rural road extension, but clearly cities have neglected to sever red tape with the same dispatch as have state highway departments, counties and townships."

CANADIAN PROVINCES CURTAILING LUMBER PRODUCTION

Logging operations in Ontario are reported to have been greatly curtailed, despite the encouragement given lumbermen by the recent privilege to defer stumpage royalties payments, states a telegram from Lynn W. Meekins, Commercial Attache at Ottawa to the Lumber Division of the Department of Commerce. The trade reports excessive stocks of lumber on hand at the mills, with movements restricted due to market conditions. The saw log and lumber cut this winter are expected to be far below normal.

Logging cuts in British Columbia are reported to be operating at 25 per cent of capacity and this winter's saw-log and lumber cut are expected to be by the trade to be far below normal, states a telegram from E. G. Babbitt, Trade Commissioner at Vancouver to the Lumber Division of the Department of Commerce. Lumber prices are reported to be holding firm and lumber stocks at the mills are decreasing.

OAKLAND AMENDS PLUMBING ORDINANCE

An amendment to the present city plumbing ordinance approved by the Oakland city council gives plumbing firms the choice of either depositing \$100 with the plumbing department from which fees are taken as required or paying the fee on each job. Heretofore it has been necessary for plumbers to deposit \$100. Many complained that this method tied up their money.

The amended ordinance reads as follows:

Section 21—Every master plumber may deposit with the Bureau of Permits and Licenses the sum of \$100 in cash, as a guarantee for the payment of all fees for permits and inspections that may become due and be owed by said person to the city of Oakland.

Where no deposit is made, the fee must be paid as provided in Section 16 of this ordinance—(4017 N. S.)

Section 21, before amending, read as follows:

"Every master plumber, obtaining a license hereunder, shall deposit and shall maintain on deposit with the Bureau of Permits and Licenses, subject to the provisions hereinafter contained, the sum of \$100 in cash, as a guarantee for payment of all fees for permits and inspections that may become due and be owed by said person to the city of Oakland, and as a further guarantee that all plumbing work done under the authority of said license will be done in compliance with all the provisions and requirements of this ordinance, and of the rules and regulations herein established."

CROSS ARMS TO BE MADE IN AUSTRALIA

For the first time, Australia mountain ash is to be used for cross-arms, states a communication from Trade Commissioner James E. Peebles, Sydney to the Lumber Division of the Department of Commerce. It is stated that a twelve months' contract has been placed with a firm at Wagga, New South Wales, to supply the Postal Department with cross-arms, to be manufactured from native mountain ash, a species of Eucalyptus.

A member of the firm states that mountain ash will produce cross-arms of the required length and width and free from knots. The firm also anticipates using substantial quantities of the wood for the manufacture of ash and door material.

BETTER HOMES BOOKLET

Paraffine Companies, Inc., 475 Brannan St., San Francisco, has issued a Home Building Handbook called "Better Home Construction in the West," designed for the use of home builders, contractors and architects. The book is based upon interviews with home owners, and deals with the dangers to be encountered in use of inferior materials and irresponsible contractors.

Purchase by the State of the last privately owned toll bridge in Arkansas is announced by the state highway commission. The bridge crosses White River at DeWalls Bluff and was owned by the White River Bridge Co. The toll charge has been 75c for each automobile, but the state will reduce this to 50c until the purchase price, \$463,000, has been amortized, when the bridge will be made free.

SPEEDMATIC SAW NOW BEING MARKETED

The Porter-Cable-Hutchinson Corp., Syracuse, N. Y., has placed on the market a new hand power saw known as "Speedmatic Saw," Type No. 9. This is in addition to its Type K-8 of the same name. Although similar in general appearance to the latter, the Type K-9 is nevertheless mechanically different, being of the gear driven type. The motor is 1 1/4 H. P. and is geared to the drive arbor through hardened spiral gears having a reduction ratio of 2-1/7 to 1. This drives the 9" saw blade at an unusually high speed for this type of saw, running at 5000 R. P. M. free speed, and about 4000 R. P. M. under the average cutting load. At this high speed it is possible to rip a 3 inch plank 12 feet long in one minute; cross cut 3x6 in two seconds; cross cut a 2x12 in four seconds. Type K-9 will cut a maximum depth of 3-1/8". Both depth and angle adjustments are easily made by turning a thumbscrew. The former has a 1-3/8" travel and any angle up to 45° can be secured, the scale being graduated in 5°. Dadoes 6" in diameter, 1/2" wide maximum can be used. This dado will cut a maximum depth of 1-5/8". The motor is cooled by a large turbine fan which draws the air in through the commutator and expels it through the saw housing and also a special opening to blow the dust away from the cutting line. Four S.K.F. precision ball bearings are used, eliminating wear at vital points. A swing guard completely covers the blade at any angle, opening easily when cutting and snapping immediately into place when finished.

Speed of saw is correct for using thin emery wheels for cutting marble, tile, stone, soft metals, etc.

Due to the compact and well-balanced construction, this "Speedmatic Saw" can be easily operated with one hand. However, an auxiliary knob on front can be used for guiding if required. This same knob also controls the angle adjustment.

Weight, 23 lbs.; overall length, 12 1/2"; width, 9 3/4"; height, 11 1/4". Rip guide, combination wrench and screw driver, 15 ft. #14 rubber cord, switch in handle, combination blade and carrying case are furnished.

OREGON STATE BUILDING CODE LIMITS EXEMPTIONS

Greater restrictions on buildings than are required under the state building code may be imposed by cities of Oregon, but they cannot cut the requirements below the state minimum requirements, points out H. E. Plummer, chief of the building bureau at Portland.

Plummer states that if the next legislature passes the state code which has been prepared for the League of Oregon Cities by Chris Schuembel of Oregon City, and Fred Williams of Salem, for its consideration before submission to the legislature, Portland will be limited in the exemptions it may grant.

Exemptions from the city's building code have been very frequent in the past, Plummer pointed out.

Twenty-two who washed trout cost Albert Bannister of Santa Cruz a suspended fine of \$200 in justice court at Santa Cruz. Bannister, a plasterer, washed his tools and a tub or two in a brook which flows through the western part of the city. The 22 trout were found by Deputy Fish and Game Commissioner Forrest J. McDermott. Bannister pleaded guilty but argued he caused the death of the trout inadvertently.

Building News Section

APARTMENTS

Contract Awarded.

APARTMENTS Cont. price, \$7800
RICHMOND, Contra Costa Co., Calif.
 Twenty-third St. bet. Clinton and
 Grant Avenues.

Two-story frame and concrete flats
 and stores.

Owner—John Ambrosio, % architect.
 Architect—Jas. Narbett, 474 31st St.,
 Richmond.

Contractor—Valine & Lawrence, Ro-
 deo, Calif.

Plans Being Figured.

ADDITION Cost, \$22,000
WATSONVILLE, Santa Cruz Co., Cal.
 Three-story frame and stucco addi-
 tion to apts. (4 apts.)

Owner—Stewart Thompson, 19 Mad-
 ison St., Watsonville.

Architect—Wolfe and Higgins, Realty
 Bldg., San Jose.

Garage to care for 10 cars, steam
 heating plant, etc.

Owner Taking Bids.

APARTMENTS Cost approx. \$18,000
OAKLAND, Alameda Co., Calif. Park
 Boulevard.

Two-story and basement frame and
 stucco apartments.

Owner—H. E. Lansing, 2316 14th Ave.,
 Oakland.

Architect—F. H. Slocombe, 62 York
 Drive, Piedmont.

Bids are being received by owner
 on a general contract and also segre-
 gated bids.

Carpentry Finish Labor Bids Wanted.
APARTMENTS Cost, \$650,000
SAN FRANCISCO, California St. and
 Joice Street.

Eight-story Class A steel frame and
 reinforced concrete apartments
 (300 rooms).

Owner and Builder — Marian Realty
 Co., 110 Sutter St., San Francisco

Architect—H. C. Baumann, 251 Kear-
 ny St., San Francisco.

As previously reported, Incinerator
 awarded to Kerner Incinerator Co.,
 450 Clementina St., S. F.; electrical
 work to Alta Electric Co., 938 How-
 ard St.; elevators to Atlas Elevator
 Co., 34 Harriet St., S. F.; concrete and
 carpentry to Mission Concrete Co., 270
 Turk St., S. F.

Plans Being Completed.

APARTMENTS Cost, \$80,000
SAN FRANCISCO, Cervantes and
 Prado Streets.

Three-story and basement frame and
 stucco apartments (18 3- and 4-
 room apts.)

Owner and Builder — Ben. Liebman,
 1555 Francisco St.

Plans by Lawrence Ebbs, 320 Ful-
 ton Street.

Plans Being Prepared.

APARTMENTS Cost each, \$60,000
SAN FRANCISCO, Marina District.

Two 3-story and basement frame and
 stucco apartments (18 apts. each)

Plans by Lawrence Ebbs, 320 Ful-
 ton Street.

Owner—Witheld.

Will have composition roof, steam
 heating systems.

Sub-Bids Being Taken.

APARTMENTS Cost, \$175,000
SAN FRANCISCO, Green Street near
 Octavia Street.

Six-story class A steel frame and
 concrete apartments (112 rooms).

Owner and Builder—F. L. Hansen, 282
 Seventh St.

Engineer—John C. Little & Co., 251
 Kearny St.

BONDS

FRESNO, Fresno Co., Cal.—Election
 will be held in November 21 in Bul-
 lard School District to vote bonds of
 \$34,000 to finance erection of a new
 school building. Trustees of the dis-
 trict are: F. L. Alcorn, H. D. Bartlett
 and W. G. Milholland.

CHURCHES

Plans Being Completed.

SACRAMENTO, Sacramento Co., Cal.
 SW 39th and J Sts. (106x324-ft.).

Two-story brick and concrete church.
 Owner—Roman Catholic Bishop (Rev.
 M. L. Lyons, pastor).

Architect—Harry Devine, California
 State Life Bldg., Sacramento.

Bids will be taken in about 2 weeks.

Preparing Working Drawings.

CHURCH Cost, \$6500
WILLOWS, Glenn Co., Cal.

One-story frame and stucco church.
 Owner—First Church Christ Scientist,
 Willows.

Architect—Otto Deichmann, 110 Sutter
 St., San Francisco.

Bids will be taken in two weeks.

Sub-Contracts Awarded.

GUILD HOUSE Cost, \$6500
SAN FRANCISCO, Ocean Ave. near
 San Fernando Street.

One-story frame and stucco guild
 house.

Owner—St. Francis Community Church
 Architect—Coxhead and Coxhead,
 Hearst Bldg.

Contractor—Henry Papenhausen, 595
 Victoria Street.

Mill Work—Empire Planing Mill, 750
 Bryant Street.

Plumbing—Higgins & Kraus, 730 Te-
 hama Street.

Lumber—Mission Lumber Yard, 1307
 Valencia St.

Plastering—Johnson & Campbell, 3443
 17th Street.

Electric Wiring—Galvin Brothers.
Brick Work—Wm. Heldenselch, 129
 Shotwell Street.

Painting—Reliable Painting Co., 3247
 19th Street.

A Demonstration of the SKILSAW PORTABLE ELEC- TRIC HAND SAW

Will solve your cutting problems.
 (Four Models, 1/8 to 1 h. p.)

ELECTRIC HAMMERS ELECTRIC DRILLS GRINDERS, BUFFERS

PETER H. NELSON

Labor Saving Portable Electric
 Tools.

 San Francisco

Underhill
 7662

Plans Being Completed.

CHURCH Cost, \$250,000
SAN FRANCISCO, Funston Ave. and
 Judah St. (120x245-ft.)

Class A reinforced concrete church
 (2000 seating capacity).

Owner—Roman Catholic Archbishop
 of San Francisco, 1100 Franklin
 Street.

Architect—Shea and Shea, 454 Mont-
 gomery Street.

Bids will be taken in about 30 days.

Contract Awarded.

BLDGs. Cost approx. \$500,000
CARMEL, Monterey Co., Cal.
 Group of fireproof buildings.

Owner—Carmelite Monastery, Santa
 Clara.

Architect—Maginnis & Walsh, Boston,
 Mass.

Contractor—Thos. M. Jones, 643 29th
 Ave., San Francisco.

Contract Awarded.

CHURCH Cost, \$18,000
PALO ALTO, Santa Clara Co., Cal.
 Addison St. near Middlefield Rd.

One-story frame and stucco church.
 Owner—Church of Latter Day Saints.

Plans by Owner, Salt Lake City, Utah
 Contractor—The Minton Co., Mt. View

Contract Awarded.

CHURCH Cont. price, \$29,500
NORTH OAKLAND, Alameda Co.,
 Calif.

Two-story frame and brick veneer
 church (auditorium to seat 570).

Owner—Colored Baptist Church.
 Architect—Charles W. McCall, 1404
 Franklin St., Oakland.

Contractor—George Martin, 1812 Jef-
 ferson St., Oakland.

Previously reported as being award-
 ed to C. H. Lawrence, of Oakland.

FACTORIES AND WARE- HOUSES

Plans To Be Prepared.

FACTORY Cost, \$—
OAKLAND, Alameda Co., Cal. Foot-
 hill Blvd. and 163rd Ave.

Factory and Home (height and type
 of structure not determined).

Owner—Wurm Wover Hosiery Mills,
 J. W. Tilley, Mgr., 414 13th St.,
 Oakland.

Architect—Not Selected.

Contract Awarded.

STORAGE BLDGS. Cost, \$12,000
OAKLAND, Alameda Co., Cal. Elm-
 wood Ave., bet. 29th and Fruitvale
 Avenues.

Two one-story concrete storage bldgs
 Owner—Morris Draying Co., 101 Web-
 ster St., Oakland.

Architect—R. C. Schuppert, 4637 Park
 Blvd., Oakland.

Contractor—Dyer Constr. Co., Ray
 Bldg., Oakland.

Construction will start immediately.

Plans Being Figured—Bids Close, Nov.
 15th, 12 Noon.

SERVICE BLDGS. Cost, \$45,000
REDWOOD CITY, San Mateo Co., Cal.
 Group of service bldgs. (wood frame
 and tile walls).

Owner—Pacific Gas & Electric Co., 245
 Market St., San Francisco.

Plans by Eng. Dept. of Owner.

Group includes warehouse, garage,
 service departments, superintendent's
 offices, etc.

Bids Opened.

WAREHOUSE Cost, \$—
SAN FRANCISCO, Fifteenth and Harrison Streets.

First unit of 2-story reinforced concrete central storage warehouse (flat slab construction).

Owner—City and County of San Francisco.

Architect—Dodge Riedy, Pacific Bldg.
 Following is a complete list of bids:

General Work	
Mahony Bros., Flood Bldg.	\$73,450
Mission Concrete Co.	74,326
MacDonald & Kahn.	74,690

GOVERNMENT WORK AND SUPPLIES

HAWTHORNE, Nevada—Bureau of Yards and Docks, Navy Department, Washington, D. C., will ask bids the latter part of December for the construction of a water reservoir at the Naval Ammunition Depot at Hawthorne; estimated cost \$150,000.

MARE ISLAND, Cal.—Until December 3, 11 a. m., under Specification No. 6325, bids will be received by Public Works Officer, Mare Island Navy Yard, for painting two buildings and coating the roofing of fourteen buildings at the Mare Island Navy Yard Hospital. Surfaces to be painted and coated involve approximately 15,000 and 84,000 square feet, respectively. The Government will furnish material for roof coating. Specification No. 6325 may be obtained on application to the Commandant, Navy Yard, Mare Island, Cal. Deposit of a check or postal money order for \$5, payable to the Chief of the Bureau of Yards and Docks, is required as security for return of the specification.

PALO ALTO, Santa Clara Co., Cal.—Geo. B. Moore, 531 Stanford, Palo Alto, at \$11,970 awarded contract by Supervising Superintendent of Construction, U. S. Veterans' Hospital, Palo Alto, for four additions to the Buildings Nos. 101, 102, 103, 111 and 113 at the Veterans' Hospital, Palo Alto. This work will include excavating and backfilling, re-seeding lawns, mass and reinforced concrete, reinforcing steel, cast iron vents, W. I. railings, woven wire grilles, built-up roofing, sheet metal work, cement plaster and stucco, carpentry and mill work, painting, glazing, hardware, electrical work.

BOULDER CANYON DAM—See "Reservoirs and Dams" this issue. Bids to be asked about December 1, to be opened about March 1, to construct the Boulder (Hoover) Dam.

Plans Being Completed.

PLANT Cost, \$285,000
HAWTHORNE, Nev. Naval Ammunition Depot.
Mine Filling Plant.
Owner—U. S. Government.
Plans by Bureau of Yards & Docks, Navy Dept., Washington, D. C.

It is expected that bids will be asked the latter part of December.

PALO ALTO, Santa Clara Co., Cal.—Geo. B. Moore, 531 Stanford, Palo Alto, at \$824, submitted lowest bid to Supervising Superintendent of Construction, U. S. Veterans' Hospital, Palo Alto, to construct and finish complete rest room addition to Laundry Building No. 219 at Veterans'

Hospital, Palo Alto. The only other bids was submitted by A. Frederick Anderson, of Oakland, at \$855.

Bids referred to Washington for award.

SACRAMENTO, Cal.—Until November 13, 3 p. m., under Proposal No. 31-133, Specifications No. 2599, bids will be received by U. S. Engineer Office, California Fruit Building, for drilling nine test holes at the site of the proposed Table Mountain Dam, located approximately 13 miles north of the town of Red Bluff, Tehama County. Specifications obtainable from above.

SACRAMENTO, Cal.—Until November 13, 3 p. m., under Order No. 2598-1719, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver Rio Vista, Solano County:

Lapwelded steel pipe, made of ½-in. thick steel plate, 21 in. O. D. x 8 ft. 7 in. long.

Lapwelded steel pipe, made of ½-in. thick steel plate, 21 in. O. D. x 14 ft. 6 in. long.

Pipes shall be made from special refined open hearth welding steel plates with a tensile strength of 48,000 pounds to 58,000 pounds per square inch. Each pipe shall be made of one piece of this steel plate and lapwelded by the forge welding process by the best approved practice commonly used by the National Tube Co., the American Spiral Pipe Co., and others. After welding, each length of pipe shall be thoroughly annealed in order that strains may be removed.

AMERICAN LAKE, Wash.—Thomas Holmberg, 1752 S 54th St., Tacoma, Wash., at \$25,123 awarded contract by Supervising Superintendent of Construction, U. S. Veterans' Hospital, Palo Alto, Calif., to construct addition to Recreation Building at Veterans' Hospital, American Lake. This work will include, under general construction, excavating, finish grading, mass and reinforced concrete construction, miscellaneous iron work, steel stairs, sheet metal work, including ventilators, metal lathing, plastering, carpentry, insect screens, painting, glazing, hardware, plumbing, heating, electrical work, and outside service connections to services in place.

SAN FRANCISCO—Until November 21, 11 a. m., bids will be received by Constructing Quartermaster, Fort Mason, to furnish and install water softener at power plant of Letterman General Hospital. Date for opening bids was originally set for November 7, but this has been extended to November 21. Plans obtainable from Constructing Quartermaster at Fort Mason.

WASHINGTON, D. C.—Until Nov. 24, 10:30 A. M., under Schedule 2602, bids will be received by Purchasing Officer, Panama Canal, to furnish elevated steel tank. Specifications obtainable from above office and from Assistant Purchasing Officer, Ft. Mason, San Francisco.

HAWTHORNE, Nev.—As previously reported, Schuler & McDonald, Inc. 1723 Webster St., Oakland, at \$80,344 submitted low bid to Bureau of Yards and Docks, Navy Department, Oct. 29, under Specification No. 6319, to erect greenhouse at Naval Ammunition Depot at Hawthorne, Nev. The work will involve furnishing and erecting a structure, 18 by 75 ft. and includes concrete foundations, plant and work benches, plumbing, heating and lighting. A complete list of bids follows:

OAKLAND, Cal.—Until Nov. 13, 12
noon, bids will be received by Frank
C. Merritt, city clerk, to furnish and
install conduit for traffic signal cable.
Specifications on file in office of clerk.
Walter N. Frickstad, city engineer.

VERNON, Los Angeles Co., Cal.—
The city of Vernon will retain an
architect within a short time to de-

when a building to house the new Vernon municipal power plant, for which bonds in the sum of \$3,900,000 were voted on September 10. It is expected that the bonds will be sold and construction started within sixty days. It will be a Diesel engine plant with a generating capacity of 47,000 horsepower. A distributing system will also be constructed. All plant equipment will be purchased by and installed under the supervision of the Vernon city engineer.

BURBANK, Los Angeles Co., Cal.—John A. Roebeling Sons Co. was awarded contract by the city council October 28 at \$1287.50 for furnishing approximately 10,000 lbs. of copper wire.

ATASCADERO, San Luis Obispo Co., Cal.—San Joaquin Light & Power Co., Power Bldg., Fresno, will commence construction shortly on a \$300,000, 35-mile extension of the power lines east of Atascadero.

VALLEJO, Solano Co., Cal.—Pacific Tel. & Tel. Co. will expend \$40,000 in the Vallejo district involving the placing of 624 ft. of main conduit; 4069 ft. underground and 29,669 ft. aerial cable throughout the city.

LOS ANGELES, Cal.—City defeats proposal to issue bonds of \$13,300,000 to provide for construction of (1) aqueduct power plant, (2) power development in Big Pine Creek, Owens Valley, (3) central receiving station and connecting lines, (4) Boulder Canyon power rights of way, (5) local distributing station, and (6) overhead and underground distribution systems.

PUBLIC BUILDINGS, FIRE HOUSES AND JAILS

SAN DIEGO, Cal.—W. E. Harper, state senator-elect, announces that he is planning to introduce a bill at the coming session of the California legislature authorizing the expenditure of approximately \$100,000 for the construction of a armory on the San Diego civic center site.

SANTA CRUZ, Santa Cruz Co., Cal.—H. R. Lord, Santa Cruz, awarded contract by Garfield Park Improvement Club to install sprinkler system on grounds of the Garfield Park Library. The work will be financed by the club.

SALINAS, Monterey Co., Cal.—City council has approved plans for an addition to the city jail to house "bull-pen," three-cell quarters; the addition will be 56 by 17 ft. and will cost approximately \$7000. M. R. Keef is city clerk.

PLACER COUNTY, Calif.—State Highway Commission seeks authorization of Railroad Commission to

construct upgrade crossing under Southern Pacific tracks at New England Mills. Estimated cost, \$45,296. Will be 100 feet south of the existing crossing.

SACRAMENTO, Cal.—M. A. Jenkins, 3560 Y St., Sacramento, at \$1537 awarded contract by county supervisors to reconstruct East fender of Walnut Grove bridge.

SAN FRANCISCO—Golden Gate Bridge and Highway District votes bonds of \$35,000,000 to finance construction of bridge over Golden Gate Strait together with connecting roads and appurtenances. The district embraces a portion of the counties of Mendocino and Napa and all of the counties of Del Norte, Sonoma, Marin and San Francisco. Directors of the district and the counties represented by each are: Henry Westbrook, Jr., Del Norte county; H. H. Trumbull, Marin county; A. R. O'Brien, Mendocino county; Thomas Maxwell, Napa county; C. A. Henry, Warren Shannon, W. P. Stanton, Francis V. Keesling, R. J. Welsh, all of San Francisco county; Frank P. Doyle and Joseph A. McMin, Sonoma county.

Officers of the district are: Wm. P. Filmer, San Francisco, president; Alan MacDonald, San Francisco, general manager; George F. Harlan, Sausalito, attorney; John R. Ruckstell, San Francisco, auditor, and W. W. Felt, Jr., San Francisco, secretary.

Joseph B. Strauss is chief engineer of the district and chairman of the engineering board. Other members of the engineering board are: O. H. Ammann, bridge engineer, consultant; Chas. Derleth, Jr., bridge engineer, consultant; Leon S. Moisseiff, bridge engineer, consultant; Sydney W. Taylor, Jr., consultant on traffic; Andrew C. Lawson, consulting geologist. Offices of the Golden Gate Bridge and Highway District are located at 690-A Market St., San Francisco.

LOS ANGELES, Cal.—Byerts and Dunn, 7908 Santa Monica Blvd., at \$19,970 awarded contract by county supervisors to construct reinforced concrete bridge in Pomona Blvd. over Alhambra Wash.

SANTA BARBARA, Cal.—Roy L. Richardson, Santa Barbara, at \$3345 awarded contract by county supervisors to construct reinforced concrete bridge over San Pedro Creek in Third Road District on Stow Canyon Road.

DREDGING, HARBOR WORKS & EXCAVATIONS

LOS ANGELES, Cal.—Until 3 P. M. Dec. 3, bids will be received by the office of the U. S. Engineer, 751 South Figueroa St., Los Angeles (R.A. 2884) for repairing the breakwater at Long Beach Harbor, in accordance with plans and specifications which may be obtained at the office of W. H. Lanagan, Major, Corps of Engineers, Dist. Engineer.

SAN FRANCISCO.—See "Wharves and Docks," this issue. Bonds of \$10,-

000,000 voted by State of California for improvements to San Francisco harbor.

LOS ANGELES, Cal.—County Flood Control Engineer E. C. Eaton is completing plans and bids will be asked in about 30 days for straightening lower channel of the San Gabriel River at its outlet into Alamitos Bay.

WATSONVILLE, Santa Cruz Co., Cal.—Karstedt Brothers, Watsonville, awarded contract by State Division of Flood Control to clear Pajaro river of willow growth and other debris in the river bed. Santa Cruz county will pay \$750 of total cost; \$750 additional from public subscription and \$1500 by the state.

SACRAMENTO, Cal.—J. R. Reeves, 12th St. and the American River, at \$10 cu. yd. submitted low bid to city council to excavate continuous drainage canal at Sacramento Municipal Airport, involving 20,000 cu. yds. Complete list of bids, all taken under advisement, follows:

J. R. Reeves.....	\$10
M. J. Treaster.....	125
A. Teichert.....	1225
Harry Gould.....	13
Lilly, Willard & Biasotti.....	14
Paris Bros.....	154
Finnell Co.....	20
Weston & Kimmar.....	21

Referred to City Engineer Fred J. Klaus for recommendation of award.

SACRAMENTO, Cal.—Until November 19, 3 P. M., under Circular Proposal No. 31-122, Specifications No. 2507, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, for raising existing levee along the west side of the Yolo By-Pass beginning at a point near the pump house at the southeast corner of Reclamation District No. 2068, about 6 miles southerly of Lolano Station on the Sacramento Northern Railroad and extending south for a distance of about 1 mile to the north levee of Liberty Island Reclamation District. The levee is along the easterly boundary of the lands of Sullivan, Sullivan & Roche. The quantity of material to be removed is approximately 157,000 cubic yards. Specifications obtainable from above.

SACRAMENTO, Cal.—D. A. Foley Construction Co., 716 Grant Bldg., Los Angeles, at \$23,341.50 (9.45c cu. yd.) submitted low bid to U. S. Engineer Office, Sacramento, under Circular Proposal No. 31-97, Specifications No. 2470, for raising existing levee along the westerly side of Yolo By-Pass, beginning at a point about 0.9 mile southeasterly of "Yolano" station on the Sacramento Northern Railroad, and extending to the Pump House at the southeast corner of Reclamation District No. 2068. Project involves 247,000 cu. yds. embankment. Taken under advisement.

SANTA MONICA, Los Angeles Co., Cal.—Taggart Aston, consulting engineer, 733 Rives-Strong Bldg., Los Angeles, preparing plans for pontoons to be used in constructing the cribs for the proposed 2000-ft. breakwater at Santa Monica which is being built by

the Santa Monica Harbor Co., Ltd. Bids will be taken within a week. Construction will probably occupy three weeks after which the company will be ready to advertise for bids for the moulding and placing of the cribs. The franchise awarded some time ago, calls for a breakwater about 2000 ft. from the shore, 15 ft. wide at the top and 30 ft. at the base. In an approximate water depth of 30 ft., the wall will rise 8 ft. above sea level on one side and 14 ft. on the other. The specified length is 2000 ft., the builders having an option to build a first unit of 1000 ft. at once and adding the second 1000 ft. within five years. The end of the breakwater is to be 350 ft. out from the southwest corner of the municipal pier, a pedestrian extension of the pier to be carried out within 120 ft. of the breakwater. A suspension bridge will connect the two, contract for the extension and bridge having been awarded to W. G. Murdoch as previously noted. The franchise also specifies landing piers and other mooring structures for the accommodation of small pleasure craft. Aston's plans call for construction by hoist of combed boxes of reinforced concrete 100 ft. in length, to be moulded at Los Angeles harbor and towed to their position in Santa Monica Bay. They will be sunk in approximately 25 ft. of water by pumping sand into the hollow concrete units. Each box will weigh 5500 tons and will stand 24 ft. above the water line. The top is designed with concrete steps, or seats, to accommodate spectators at regattas. Ornamental lighting and other features are included.

IRRIGATION PROJECTS

EL NIDO, Merced Co., Cal.—Election will be held November 17 in El Nido Irrigation District to vote bonds of \$135,000 to finance construction of irrigation works, involving:

- (1) 12 miles of main canal, involving 150,000 cu. yds. canal excav., 65,000 sq. ft. 2-in. concr. lining;
- (2) 15 miles of lateral canals, involving 120,000 cu. yds. canal excavation;
- (3) construction of 24-in. to 48-in. syphons with headwalls, bridges, drops, stop-gates and side-gates, etc.

A. Blakesley of the Merced Irrigation District is engineer for the district. W. A. Wright, secretary of the district.

STREET LIGHTING SYSTEMS

VISALIA, Tulare Co., Calif.—Until November 17, 7:30 P. M., bids will be received by Ida Markham, city clerk (137-C) to install ornamental electrolier system with 51 two-light standards, together with underground system in portions of North and South Locust St.; North and South Cook St., etc. Standards of Union Metal Mfg. Company's Design No. 2281. 1911 Act. Bond Act 1915. Cert. check 10% payable to city required with bid. Plans on file in office of clerk.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—City Engineer George A. Kneese instructed to complete specifications for the installation of an electrolier lighting system in Grand Ave. Two light standards will be installed.

MACHINERY AND EQUIPMENT

HOLLISTER, San Benito Co., Cal.—City trustees contemplate purchase of a new motor truck with dump body, an allowance to be made for

the truck on hand and no longer required by the city.

DENVER, Colo.—Until 2 P. M., Nov. 17, bids will be received by the Chief Engineer of the Bureau of Reclamation, 1441 Welton St., Denver, for furnishing and delivering f.o.b. cars (at point to be stated) 1 traveling crane, capacity 20 tons, with motor-operated hoist and hand operated bridge and trolley, complete. Proposal guaranty, 10%.

EL SEGUNDO, Los Angeles Co., Cal.—Until 7:15 P. M., Nov. 26, bids will be received by the city council for the purchase of a 12-ton, 3-wheel, Buffalo-Springfield gasoline roller, No. 3484, with pressure scarifier attached, which is no longer needed by the city. Certified check or bond, 10%. Victor D. McCarthy, city clerk.

MARE ISLAND, Calif.—Until November 26, under Specification No. 6310, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., to furnish 40-ton electric gantry crane and runway at Mare Island Navy Yard. Specifications obtainable from above office and from Commandant at the Mare Island Navy Yard.

INDIO, Riverside Co., Cal.—Until 8 P. M., Nov. 17, bids will be received by the city council of Indio, at the office of the city clerk, Iona T. MacKenzie, for furnishing a motor grader and scarifier, attachment and cab, with ten foot blade. Weight not less than 12,800 pounds. Certified check for 10% must accompany each bid.

WASHINGTON, D. C.—See "Government Work and Supplies," this issue. Bids wanted for miscellaneous machinery and equipment by the Bureau of Supplies and Accounts, Navy Department.

DENVER, Colo.—Until 2 P. M., Nov. 17, bids will be received by the Chief Engineer, Bureau of Reclamation, Denver, for furnishing one dragline excavator, capacity $\frac{3}{4}$ -yd., gasoline extension, 24-in. caterpillar treads, with one Pace class C bucket, complete, f.o.b. cars at factory shipping point. Bids to state price per day for services of an erecting engineer. Time of delivery is set for 35 calendar days after receipt by contractor of notice of award. Where time of delivery specified by bidder is greater than that time, each calendar day in excess thereof will be evaluated at \$20 and bids will be considered for award of contract on this basis. Proposal guaranty 10%.

EL SEGUNDO, Los Angeles Co., Cal.—Until 7 P. M., Nov. 12, bids will

be received by the city council for the following equipment:

- (1) one 1½-ton capacity, closed cab, automobile truck with dual rear wheels and two yard garbage dump body, equipped with hand-hoist;
 - (2) one 1½-ton capacity, closed cab, automobile truck with dual rear wheels and one and one-half yard dump body equipped with hand-hoist.
- All equipment shall be f. o. b. El Segunado, Calif., and bidders shall state within what time delivery can be made. Certified check or bond, 10% Victor D. McCarthy, city clerk. R. T. Hutchins, city engineer.

RAILROADS

YOLO-SOLANO COUNTIES, Cal.—Sacramento Northern Railway, a subsidiary of the Western Pacific, has filed with the Interstate Commerce Commission a brief in support of its application for authority to construct an extension of the Holland line to serve the contiguous agricultural territory in Yolo and Solano counties. The extension will cost \$735,000, according to tentative estimates.

SAN FRANCISCO—See "Wharves and Docks," this issue. Bonds of \$100,000,000 voted by State of California for improvements to San Francisco harbor.

OAKLAND, Cal.—Until November 10 4:30 p. m. (time extended from November 3), bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Bldg., for laying railroad tracks east of the 348 feet extension to the municipal wharf. Certified check 10% required with bid. Specifications obtainable from secretary on deposit of \$5, returnable.

FIRE ALARM SYSTEMS

OAKLAND, Cal.—Until Nov. 13, 12 noon, bids will be received by C. Merritt, city clerk, to furnish and install conduit for traffic signal cable. Specifications on file in office of clerk. Walter N. Frickstad, city engineer.

SALINAS, Monterey Co., Cal.—City council will ask bids at once to install fire signals in connection with the present automatic traffic signal system. The city has provided \$1000 in the budget to cover the cost of the work. M. R. Keef is city clerk.

SACRAMENTO, Cal.—Gamewell Co. has submitted an estimate of \$232,000 to City Manager James Dean for the installation of a first class fire and police alarm system. The cost of the 125 new alarm boxes and the wiring, much of it in underground conduits, would amount to about

\$200,000, according to the estimate, while a central alarm station could be built for \$12,000. The remaining \$20,000 would be used to put police signals in shape.

FIRE EQUIPMENT

UKIAH, Mendocino Co., Cal.—City trustees have authorized the purchase of 250 ft. 2½-in. and 100 ft. 1½-in. fire hose.

RED BLUFF, Tehama Co., Cal.—City Clerk Enville Spaulding has been instructed by the city council to secure prices on various sizes of hose for the fire department with a view to making a purchase.

RESERVOIRS AND DAMS

PUEBLO, Los Angeles Co., Cal.—Engineers of the Metropolitan Water District, under the direction of J. B. Bond, field engineer, are conducting tests of soil and rock in Brea Canyon east of Pueblo, as a site for proposed Colorado Aqueduct reservoir. A crew of 20 drillers and helpers are working in three 8-hour shifts. Drillings run from 40 to 300 ft.

PASADENA, Cal.—Geological surveys of Pine Canyon, the proposed site of the new \$10,000,000 dam which Pasadena will build, are being made by engineers and geologists headed by George W. Hawley, deputy state engineer in charge of dams. The party of engineers, which is quartered at the Aztec hotel, Monrovia, includes Chas. P. Berkey, Columbia University; Geo. D. Louderback, University of California; Ira A. Williams, Portland, Ore.; J. L. Savage, United States Bureau of Reclamation; George A. Elliott, San Francisco and M. C. Hillender, state engineer of Colorado.

FRESNO, Contra Costa Co., Calif.—City Engineer Leo O'Hara is preparing plans for spillway at municipal water reservoir. Will be cut through solid rock formation, involving removal of approximately 1,000 cu. ft. of rock.

ORANGE, Orange Co., Calif.—Bids will be called soon after January 1 for the construction of a dam in Santiago Canyon, Orange County, as a joint project of the Irvine Co. Irvine, The Carpenter Water Co., El Modena, and the Serrano Irrigation Dist. The Irvine Co. will pay one-half, and the others one-quarter each, of the total cost which is estimated at \$750,000 to \$800,000. Bonds have been voted by the districts and the issues \$200,000 each, have been sold to the First National Bank of Orange and the First National Bank of Santa Ana. A. Kempkey, Hobart Bldg., San Francisco, consulting engineering, is preparing the plans for the structure, which is to be an earth fill dam 125 ft. in height, with concrete spillway, etc., providing a 25,000-acre ft. storage reservoir. Financial details will be handled by Willard Smith, First National Bank of Orange (Orange 981).

BOULDER CANYON DAM—Bids for the construction of the "Hoover Dam" at the Boulder Canyon site will be asked about December 1 and opened about March 1, according to an announcement of the Secretary of the Interior. The latest information is that bids will be asked on the complete project after consultation with contractors of the country who are in a position financially to bid on such a project. The proposed work will involve driving of four tunnels on each side of the canyon through solid volcanic rock, each tun-

nel to be 50 ft. in diameter and approximately one mile long. These tunnels, together with coffer dams 80 ft. high above and below the stream, will divert the water during construction. Clearing of the site will involve removal of boulders and debris to a depth of about 100 ft. The dam, starting at bedrock, will be a concrete structure 650 ft. long at the base, sloping to a width of 45 ft. at the top, its ultimate heights to be 727 ft. At the highest point it will provide a 650-ft. span between the canyon walls, over which the transcontinental highway will pass. The tunnels will cost probably \$15,000,000 and the complete project between \$60,000,000 and \$70,000,000.

HAWTHORNE, Nevada—Bureau of Yards and Docks, Navy Department, Washington, D. C., will ask bids the latter part of December for the construction of a water reservoir at the Naval Ammunition Depot at Hawthorne; estimated cost \$150,000.

SACRAMENTO, Cal.—Until November 13, 3 p. m., under Proposal No. 31-133, Specifications No. 2539, bids will be received by U. S. Engineer Office, California Fruit Building, for drilling nine test holes at the site of the proposed Table Mountain Dam, located approximately 13 miles north of the town of Red Bluff, Tehama County. Specifications obtainable from above.

PIPE LINES, WELLS, ETC.

FRESNO, Fresno Co., Cal.—San Joaquin Light & Power Co., Power Bldg., Fresno, plans immediate construction of a natural gas pipe line from the Kettleman Hills to Fresno; estimated cost \$1,370,000.

SAN FRANCISCO.—Western Pipe & Steel Co., 444 Market St., at \$648,867, bidding on welded pipe, awarded contract by Board of Public Works to construct the Newark-San Lorenzo Pipe Line under Contract No. 122, Hetch Hetchy Project, involving 12.7 miles of pipe. Complete list of unit bids previously published.

COALINGA, Fresno Co., Cal.—City Clerk E. J. McCroskey instructed to ask bids to furnish 5000 ft. of 3-in. gas mains. Further mention will be made of this work.

VENTURA, Ventura Co., Cal.—Bids will be taken about Dec. 1 for the sale of a 50-year franchise for an 8-in. oil pipe line to be laid from the Ventura Ave. oil field through the city of Ventura to an anchorage in the harbor about 3800 ft. from shore. The application was made by the Associated Oil Co., which plans to expend about \$31,000. Work will start as soon as the franchise is granted.

LOS ANGELES, Cal.—Western Pipe & Steel Co., Los Angeles, was awarded contract by the city purchasing agent Oct. 30, at \$110,191.20 for welded steel pipe under Spec. 2213 in accordance with proposal 2, involving 6720 ft. 54-in. (41/32-in.), 1176 ft. 54-in. (5/16-in.), and 10,584 ft. 40-in., dipped in McEverlast, Inc., steel pipe coating.

LOS ANGELES, Cal.—Santa Fe Pipe & Steel Co. was awarded contract by the city purchasing agent Oct. 30 at prices shown below for wrought steel pipe under Spec. 2202. The items were:

- (1) One carload galv. wrought steel pipe, to be delivered at Los Angeles, approx. Jan. 1, as follows:
 - (a) 9000 ft. ¾-in. std. pipe, T. & C.;
 - (b) 3000 ft. 1-in. std. pipe, T. & C.;
 - (c) 1000 ft. 1¼-in. std. pipe, T. & C.;
 - (d) 500 ft. 1½-in. std. pipe, T. & C.;
 - (e) 1000 ft. 2-in. std. pipe, T. & C.;
 - (f) 200 ft. 3-in. std. pipe, T. & C.;
 - (g) 3500 ft. ¾-in. extra heavy pipe, with plain ends;
 - (h) 10,000 ft. 1-in. extra heavy pipe, with plain ends;
 - (i) 500 ft. 1½-in. extra heavy, T. & C.;
 - (j) 1000 ft. 2-in. extra heavy, T. & C.;
- (2) One carload galv. wrt. steel pipe, to be delivered at Los Angeles, approx. Feb. 1, 1931. Same quantities etc., as in item (1).
- (3) One carload galv. wrt. steel pipe, to be delivered at Los Angeles, approx. March 1. Same quantities, etc., as in item (1).
- (4) One carload galv. wrt. steel pipe, to be delivered at Los Angeles, approx. April 1. Same quantities, etc., as in item (1).
- (5) One carload galv. wrt. steel pipe, to be delivered at Los Angeles, approx. May 1. Same quantities, etc., as in item (1).
- (6) One carload galv. wrt. steel pipe, to be delivered at Los Angeles, approx. June 1. Same quantities, etc., as in item (1).

The unit prices of the successful bidder were:

Santa Fe Pipe & Supply Co. bid (1) \$6.04; (2) \$8.61; (3) \$11.66; (4) \$13.94; (5) \$18.75; (6) \$38.78; (7) \$5.03; (8) \$11.15; (9) \$19.77; (10) \$26.90.

SEWERS AND SEWAGE DISPOSAL PLANTS

BRAWLEY, Imperial Co., Cal.—Burns-McDonnell-Smith Engineering Corp., 422 Western Pacific Bldg., Los Angeles, has been retained by the city of Brawley to make a survey of the water system and sewage problem in order to prepare a report for the city council. It is probable that the \$180,000 bond issue will be re-submitted to the voters.

SAN DIEGO, Cal.—City council has authorized the city attorney to prepare resolution ordering plans for a sewage reclamation plant to be built in the eastern section of the city. The proposed plant is to be designed to handle 3,900,000 or more gallons of sewage per day.

BAKERSFIELD, Kern Co., Cal.—City council declares intention (609) to construct 6-inch cement concrete sanitary sewers in Public Imp. Dist. No. 609, including manholes and lamp-holes. 1911 Act. Hearing November 17. V. Van Riper, city clerk.

BERKELEY, Alameda Co., Calif.—Until Nov. 12, 10 A. M., bids will be received by Florence E. Turner, city clerk, to construct sewer in Indian

Rock Ave. from The Circle northerly to San Diego Road. Certified check 10% payable to city required with bid. Plans obtainable from city engineer on deposit of \$10, returnable.

LOS ANGELES, Calif.—John Artukovich, 4928 West Blvd., Los Angeles, at \$63,335 submitted low bid to Board of Public Works to construct sanitary sewer in 109th St. and McKinley Ave. Sewer District.

RICHMOND, Contra Costa Co., Cal.—A. W. Kitchen, 110 Market St., San Francisco, at \$16,730 submitted low bid to Berkeley Waterfront Co. to construct concrete storm sewer at Richmond Inner Harbor. Ralph Beebe, engineer, 1 Montgomery St., San Francisco. Healy-Thibbitts Construction Co., \$25,510; C. DeVelbiss, \$29,800 are other bidders. Taken under advisement.

SAN FRANCISCO.—Louis J. Cohn, 1 De Haro St., at \$11,961 awarded contract by Board of Public Works to construct Army Street sewer between Pennsylvania Ave. and Mississippi St. Complete list of bids, together with quantity of materials involved published in issue of Oct. 31.

MONTEREY, Monterey Co., Cal.—City council declares intention (3042) to construct 6-in. vitrified sewers in portions of Fillmore St., Grace St., Terry St., Parcel St., etc., together with 31 manholes, 4 inspection holes and 570 wye branches. 1911 Act. Bond Act 1915. Hearing Nov. 18. Clyde A. Dorsey, city clerk.

MISCELLANEOUS CONSTRUCTION

SAN FRANCISCO.—City rejects proposal to issue bonds of \$4,000,000 to finance purchase of additional lands and improvement of the Municipal Airport.

WATER WORKS

WASHINGTON, D. C.—Until Nov. 24, 10:30 A. M., under Schedule 2602, bids will be received by Purchasing Officer, Panama Canal, to furnish elevated steel tank. Specifications obtainable from above office and from Assistant Purchasing Officer, Ft. Mason, San Francisco.

GRANTS PASS, Ore.—George French Jr., P. O. Box 675, Stockton, Calif., at \$25,518 awarded contract by city council to construct Section No. 2 of water distributing system, materials to be furnished by city. Project involves: 10,000 cu. yds. excavation and backfill; 1500 lin. ft. 16-in. 10,000 lin. ft. 12-in., 1200 lin. ft. 10-in. 13,000 lin. ft. 8-in. and 24,000 lin. ft. 6-in. pipe; set 110 gate valves; set 93 hydrants; install 70,000 lbs. cast iron fittings.

Calvert, Schroeder & Lium, Grants Pass, Ore., at \$24,709.25 awarded contract for concrete lining the reservoir, under Section No. 3, involving concrete (175 barrels) 600 cu. yds.; reinforcing steel, 38,000 lbs.; two truss roofs, 66 ft. by 103 ft.

Baar & Cunningham, engineers, Spalding Bldg., Portland, Ore.

BRAWLEY, Imperial Co., Cal.—Burns-McDonnell-Smith Engineering Corp., 422 Western Pacific Bldg., Los Angeles, has been retained by the city of Brawley to make a survey of the water system and sewage problem in order to prepare a report for the city council. It is probable that the \$150,000 bond issue will be re-submitted to the voters.

SANTA CRUZ, Santa Cruz Co., Cal.—Until November 17, 2:45 p. m. (to be opened 3 p. m.), bids will be received by S. A. Evans, city clerk, to furnish and deliver between 8000 ft. and 10,000 ft. welded steel water pipe with minimum tensile strength of 50,000 lbs. per square inch, 20 ft to 40 ft. per section, and as more fully described in official proposal. Certified check 10% payable to city required with bid. Specifications obtainable from Roy Fowler, city engineer.

BREMERTON, Wash.—Beall Tank and Pipe Corp., C. A. Lagerstrom, Seattle representative, awarded contract by city council to furnish 2000 lin. ft. 24-in. and 100 ft. 16-in. welded steel pipe for water department.

OAKLAND, Cal.—Steel Tank and Pipe Co., Berkeley, at \$37.79 ft. (\$37,142) submitted low bid to East Bay Municipal Utility District to furnish 3500 lineal feet of ¾-inch thickness, 24-inch diameter electric welded sheet steel pipe for distributing system. Montague Pipe and Steel Co., San Francisco, at \$48.18 ft. (\$40,964) only other bidder. Taken under advisement.

HAYWARD, Alameda Co., Cal.—Castro Valley Water District votes bonds of \$150,000 to finance construction of a domestic water system to be served by the East Bay Municipal Utility District.

LOS ANGELES, Cal.—F. G. Cannon, 4271 Lincoln Ave., Culver City, at \$10,402.50 awarded contract by county supervisors for drilling 23 diamond drill holes at site of San Gabriel Dam No. 1.

SAN FRANCISCO.—Until November 21, 11 a. m., bids will be received by Constructing Quartermaster, Fort Mason, to furnish and install water softener at power plant of Letterman General Hospital. Date for opening bids was originally set for November 7, but this has been extended to November 21. Plans obtainable from Constructing Quartermaster at Fort Mason.

FRESNO, Fresno Co., Cal.—City votes bonds of \$2,500,000 to finance purchase of privately owned water system to operate as a municipal project.

LOS ANGELES, Cal.—Maguire & Yeung, 1909 Central Bldg., at \$3620 awarded contract by county for exploration tunnels for San Gabriel Dam No. 1.

COALINGA, Fresno Co., Cal.—Walles-Dove Corp., Los Angeles, at \$750 awarded contract by city council to clean entire interior surfaces of municipal hard water storage tank, by scraping, wire brushing and chipping where necessary, so that surfaces of tank, standpipe and underside of cover are ready for painting. After interior surfaces have been cleaned, contractor to apply one coat of Bitumastic Solution to the interior surfaces of tank and standpipe, and two coats of Bitumastic Solution to the underside of cover. After the interior surfaces have been coated, contractor to apply one hot coat of Bitumastic Enamel to the surfaces of tank and standpipe, furnishing all labor and material. General Paint Corp. only other bidder at \$1217.

SANTA ROSA, Sonoma Co., Cal.—Dixon Hardware Co., Santa Rosa, at \$1365.65 awarded contract by Santa Rosa City School District to install pumping plant at high school; capacity 4000-gals. per hour.

STREETS AND HIGHWAYS

LOS ANGELES, Cal.—A. D. Chalmers, 305 Cooldge Ave., Los Angeles, at \$109,645 submitted low bid to Board of Public Works to improve streets in Sunshine Terrace and Blue Canyon Drive Improvement District, involving in the main, grading, 110,200; 253,000 sq. ft. 6-in. concrete pavement, \$215; storm drain, \$2400; sanitary sewer, \$18,800.

Geo. R. Curtis Paving Co., 2440 E-26th St., Los Angeles, at \$44,610 submitted low bid to improve Westwood Blvd. from Santa Monica Blvd. to Pico Blvd., involving in the main, grading, \$3000; 196,515 sq. ft. 6-in. National asphalt conc. pave., \$168; curbs, walks, etc.

SAN FRANCISCO.—J. Verano, 1648 Grant Ave., at \$21,863 awarded contract by Board of Public Works to improve Section C of the Alenany Blvd. Complete list of bids, together with quantity of materials involved published in issue of Oct. 31.

SAN FRANCISCO.—Until Nov. 5, 2 P. M., informal bids will be received by Frank G. White, chief engineer, State Harbor Commission, Ferry Bldg. for laying basalt block roadway between Pier 50 and Pier 54, involving approximately 34,600 sq. ft., divided into two contracts:

- (a) for northerly 17,300 sq. ft.
 - (b) for southerly 17,300 sq. ft.
- Plans obtainable from engineer.

MILL VALLEY, Marin Co., Cal.—Town trustees declare intention (774) to improve portions of Elthedale Ave. involving grading, hyd. conc. concrete paving, hyd. conc. curbs, walks, 1911 Act. Bond Act 1915. Hearing Nov. 13. Will Falley, town clerk.

SAN DIEGO, Cal.—Bids will be taken probably within the next 30 days for the construction of a joint highway project of San Diego County and Imperial County, known as the Kane Springs-Jullian Road. The total length is 25.41 miles, of which 13.17 miles is located in Imperial County and 12.24 miles in San Diego County. The former section will cost \$164,136.58 and the latter \$124,405.60, or a total of \$288,542.18 for this contract. The state will pay one-third and the counties each one-third. The starting point is located in San Diego County about one-half mile east of The Narrows and the Imperial County terminus is located one-half mile north of the Kane Springs oil station. The proposed work will consist of grading to a width of 32 ft. and oiling to a width of 20 ft., with construction of over-flow sections and drainage structures. That the entire section will be oiled at this time, has not been definitely settled. A permanent pavement is planned as a later improvement. A reorganization of the present district will probably be effected this week when new directors and officers will be elected. Bids will go to the state highway department (C. H. Purcell, engineer) for approval, after which bids will be asked, about Dec. 1. E. R. Childs, San Diego County Surveyor, is the engineer in charge.

SACRAMENTO, Calif.—McGillivray Construction Co., P. O. Box 927, Sacramento, at \$1,173 awarded contract by county supervisors to construct asphalt macadam pavement or asphalt concrete pavement in 65th St.

OAKLAND, Cal.—Granfield, Farrar & Carlin, 67 Hoff Ave., San Francisco, at \$28,125 awarded contract by county supervisors to improve portion of the Haywood-Redwood Canyon Road (County Road No. 7355) from a point approximately 5 miles from Pinehurst Road for a distance of 2 miles, involving:

- (a) 80,000 cu. yds. grading;
- (b) 570 ft. 12-in. corr. culvert;
- (c) 700 ft. 15-in. corr. culvert;
- (d) 800 ft. 18-in. corr. culvert;
- (e) 70,000 cu. yds. overhaul.

A complete list of bids follows:

Granfield, Farrar & Carlin, (a) \$0.27; (b) \$2.20; (c) \$2.53; (d) \$3.50; (e) \$0.01. Total \$28,125.

J. L. Conner, P. O. Box 86, Monterey, (a) \$.29; (b) \$.12; (c) \$.245; (d) \$.282; (e) \$.01. Total \$29,079.

W. C. Colley, Berkeley, (a) \$.3250; (b) \$.190; (c) \$.22; (d) \$.265; (e) \$.08. Total \$31,338.

Larsen Bros., Galt, Calif., (a) \$.32; (b) \$.235; (c) \$.275; (d) \$.320; (e) \$.01. Total \$32,124.50.

M. J. Bevan, Elks Bldg., Stockton, (a) \$.32; (b) \$.2; (c) \$.250; (d) \$.3; (e) \$.02. Total \$32,290.

Paris Bros., Berkeley, (a) \$.33; (b) \$.230; (c) \$.280; (d) \$.325; (e) \$.01. Total \$32,971.

Ariss Knapp Co., Oakland, (a) \$.33; (b) \$.225; (c) \$.255; (d) \$.315; (e) \$.02. Total \$33,387.50.

Earl W. Hepple, 494 Delmas St., San Jose, (a) \$.34; (b) \$.220; (c) \$.260; (d) \$.3; (e) \$.02. Total \$34,074.

Frank C. Cuffe, Box 441, San Rafael, (a) \$.36; (b) \$.235; (c) \$.268; (d) \$.306; (e) \$.01. Total \$35,163.50.

R. G. LeTourneau, 125 55th Ave., Stockton, (a) \$.35; (b) \$.27; (c) \$.311; (d) \$.350; (e) \$.02. Total \$35,955.90.

Lilly, Willard & Biasotti, 40 West Clay St., Stockton, (a) \$.38; (b) \$.202; (c) \$.235; (d) \$.272; (e) \$.01. Total \$36,072.40.

Healy-Tibbitts Construction Co., San Francisco, (a) \$.384; (b) \$.267; (c) \$.317; (d) \$.360; (e) \$.01. Total \$38,040.90.

E. C. Coats, Sacramento, (a) \$.40; (b) \$.270; (c) \$.3; (d) \$.340; (e) \$.055. Total \$38,709.

G. H. Palmer, Box 866, Livermore, (a) \$.42; (b) \$.210; (c) \$.240; (d) \$.260; (e) \$.02. Total \$39,952.

Guerin Bros., 2940 San Jose Ave., San Francisco, (a) \$.45; (b) \$.225; (c) \$.265; (d) \$.320; (e) \$.01. Total \$42,397.50.

SAN FRANCISCO.—C. B. Eaton, 715 Ocean Ave., at \$4,320 submitted low bid to Board of Public Works to improve Alameda St. bet. Potrero Ave. and York St. and west line of York St. including intersections of Hampshire St., involving grading.

Complete list of bids follows:

C. B. Eaton \$4,320
Pionbo Brothers 5,088
L. Johnson 5,280
Granfield, Farrar & Carlin 5,664
Meyer Rosenberg 5,644
J. P. Holland 6,000
Municipal Const. Co. 7,968

SANTA CLARA COUNTY, Cal.—Until November 26, 2 P. M., bids will be received by State Highway Commission to grade and pave with bituminous macadam 10.7 miles between San Felipe and one mile east of Bells Station.

See call for bids under official proposal section in this issue.

IMPERIAL COUNTY, Calif.—Until November 26, 2 P. M., bids will be received by State Highway Commission to grade and pave with asphalt concrete, 6.0 miles between Araz and Yuma.

See call for bids under official proposal section in this issue.

SAN FRANCISCO.—E. J. Treacy, Call Bldg., at \$1,360 submitted low bid to Board of Public Works to improve crossing of Delano Ave. and Mount Vernon Ave. involving armored concrete, 2-course cement concrete sidewalks, 8-in. and 12-in. vit. clay pipe sewers, brick manholes, brick catch-basins, 2-in. asphalt conc. pave. on 6-in. class F conc. base.

Complete list of bids follows:

E. J. Treacy \$1,360
C. B. Eaton 1,526
C. L. Harney 1,542
Municipal Const. Co. 1,629
Pacific States Const. Co. 1,750
Meyer Rosenberg 1,933

HUNTINGTON BEACH, Orange Co., Cal.—Until Nov. 17, 7:30 P. M., bids will be received by city council to improve portions of Indianapolis, Wesley Sts., etc., approx. 2 miles in length, involving paving and some curbing. Alternate bids will be taken on 3-in. to 5½-in. rock and oil and on 3-in. to 5½-in. emulsified asphalt. Cash payment. Plans obtainable from Merwin Rosson, city engineer, on deposit of \$10.

SACRAMENTO, Calif.—McGillivray Construction Co., P. O. Box 927, Sacramento, at \$8,500 awarded contract by county supervisors to construct asphalt concrete shoulders of Fair Oaks Blvd. from a point near Sierra Oaks easterly.

MONTEREY, Monterey Co., Cal.—Until November 12, bids will be received by Clyde A. Dorsey, city clerk, (3020) to construct 4-inch cement concrete sidewalks in Lighthouse Ave., between north line of U. S. Military Reservation and common boundary line between the city of Pacific Grove and the city of Monterey. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

MONTEREY, Monterey Co., Cal.—Until November 12, bids will be received by Clyde A. Dorsey, city clerk, (3023) to construct cement concrete sidewalks in portions of Pacific St., between Martin and Deatur Sts. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

SACRAMENTO, Cal.—Bids will be asked by city council to grade runways at Municipal Airport; estimated cost \$14,500. Fred J. Klaus is city engineer.

SAN FRANCISCO.—C. Douglas, 840 Bosworth St., at \$65 submitted low bid to Board of Public Works to improve north half of Green St. from point 62 ft. 6 in. from east line of Polk St. to point 87 ft. 6 in. east of Polk St., involving removal of sand from roadway and sidewalk and construction of bulkhead. D. C. McCabe only other bidder at \$75.

SAN FRANCISCO.—G. A. Love and Son, 395 Collingwood St., at \$700 submitted low bid to Board of Public Works to construct artificial stone sidewalks in portions of Saturn St., 15th St., Ord St., etc. Complete list of bids follows:

G. A. Love & Sons \$700
M. Bertolino 875
D. C. McCabe 900
M. J. Lynch 900

SAN FRANCISCO.—Municipal Construction Co., Call Bldg., at \$2250 submitted low bid to Board of Public Works to improve 44th Ave. between Moraga and Noriega Sts. (where not) involving armored concrete curbs, vit. clay pipe sewers, 2-in. asphalt concrete surface with 6-in. class F concrete base.

October 31, 1930

COMPLETE BID LISTING

SAN FRANCISCO.—As previously reported, C. B. Eaton, 715 Ocean Ave. at \$19,215 submitted low bid to Board of Public Works to improve Cayuga Ave. from Onedio Ave. to Seneca Ave. and Seneca Ave. from Oniego Ave. to Alenany Blvd., etc., involving grading, armored concrete curbs, 1-course concrete sidewalks, 8-in. and 12-in. vit. clay pipe sewers, side sewers, brick catchbasins, 2-in. asph. conc. surface pavement on 6-in. class F concrete base. Complete list of bids follows:

CIFIC BUILDER.—\$1.00 PER COPY.**

COALINGA, Fresno Co., Cal.—A. Segel, engineer, Griffith-McKenzie Bldg., Fresno, commissioned by city council to prepare specifications to resurface Elm St.

SAN FRANCISCO—Following bids received by State Harbor Commission November 5 for laying basalt block roadway between Pier 50 and Pier 54, involving approximately 34,600 sq. ft., divided into two contracts:

- (a) for northerly 17,300 sq. ft.
(b) for southerly 17,300 sq. ft.
Eaton & Smith, 715 Ocean Ave., (a) \$1,525; (b) \$1,625.
Fay Improvement Co., Phelan Bldg., (a) \$177; (b) \$195.
A. G. Ralsch, 46 Kearny St., (a) \$207; (b) \$207.
Taken under advisement.

YUBA CITY, Sutter Co., Cal.—Proceedings have been started by the city council to widen Plumas St., the main business thoroughfare, an additional 20 ft. Estimated cost \$14,000.

SANTA BARBARA, Cal.—Crook & Clark, Santa Barbara, at \$6070 awarded contract by county supervisors to improve Patterson Ave., involving grading, drainage and oil macadam paving and at \$3525 for grading and drained oil macadam road on the Old Turnpike road between the State highway and overhead crossing of the S. P. Railroad in the Third Road District.

SAN FRANCISCO—Until November 12, 2:30 p. m., bids will be received by S. J. Hester, secretary, Board of Public Works, for paving at Mills Field Municipal Airport; estimated cost \$9500. Project involves:

- 52,000 sq. ft. 2-in. asph. conc. wearing surface;
35,200 sq. ft. ¾-in. emulsified asphalt wearing surface;
15 tons asphaltic concrete repairs;
2,600 sq. ft. concrete sidewalks;
165 lineal feet armored concrete curb;
435 lineal feet armored concrete curb and gutter;
1 concrete inlet;
Miscellaneous work; manhole readjustment; gate relocation; water pipe installation.

Certified check 10% payable to clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on November 26, 1930, at which time they will be publicly opened and read, for construction in accordance with specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Marin County, a bridge across Richardson Bay and over the tracks of the Northwestern Pacific Railroad at Manzanita (IV-Mrn-1-C), consisting of one 56'-0" plate girder lift span on concrete piers with pile foundations, one 45'-0" steel stringer span on concrete bents with pile foundations, and approximately 2340 feet of timber trestle on pile and frame bents.

Santa Clara County, between San

WELDED STEEL PIPE BIDS OPENED

LOS ANGELES, Cal.—Seven bids were submitted to the city purchasing agent for welded steel coated water pipe under Spec. 2213. Referring to the tabulation printed below, the items are:

- PROPOSAL NO. 1.
(1) 6720 ft. 54-in. welded steel pipe (11/32-in.);
(2) 1176 ft. 54-in. welded steel pipe (5/16-in.);
(3) 10,584 ft. 40-in. welded steel pipe; (Slip joint for Field Welding and double dipped in Walles Dove Hermiston Corp's Hermastic pipe coating).
PROPOSAL NO. 2.
(1), (2), (3) Items as in Proposal No. 1, except that pipe is to be dipped in McEverlast, Inc. steel pipe coating.
PROPOSAL NO. 3.
(1), (2), (3) Items as in Proposal No. 1, except pipe to alternate inside and outside diameter sections punched for field riveting;
PROPOSAL NO. 4.
(1), (2), (3) Items as in Proposal No. 3, except dipping shall comply with Proposal No. 2.
PROPOSAL NO. 5.
(1) 4662 ft. 51-in. welded steep pipe (11/32-in.);
(2) 3240 ft. 51-in. welded steel pipe (5/16-in.);
(3) 10,584 ft. 38-in. welded steel pipe. (Items are for pipe that is concrete lined, with reinf. bell on one end, with outside double dipped in Walles-Dove - Hermiston Corp's Hermastic pipe coating).
PROPOSAL NO. 6.
(1), (2), (3) Items as in Proposal No. 5, except that outside of pipe is to be double dipped in McEverlast, Inc., steel water pipe coating.

The bidders were:

- (A) Southwest Welding Works.
(B) Western Pipe & Steel Co.
(C) Lacy Manufacturing Co.

UNIT BID LISTING ON HETCH HETCHY PIPE LINE

SAN FRANCISCO — As previously reported, Western Pipe & Steel Co. of California, 444 Market St., at \$648,867 for welded pipe and \$671,507 for lockbar pipe submitted only regular bid to the Board of Public Works to construct the Newark-San Lorenzo Pipe Line, under Contract No. 122. Hetch Hetchy Project, involving 12.7 miles of pipe line. Montague Pipe & Steel Co., San Francisco, submitted the only other bid, which was rejected due to the fact that the company asked certain regulation with regard to the time limit and bonus conditions. Unit bid of the Western Pipe & Steel Company follows:

Lockbar Pipe—Group "L"	
Furnish	
35,000 ft. 44-in.	\$7.87
22,000 ft. 36-in.	5.73

Bids taken under advisement

Felipe and one mile east of Bella Station (IV-SCI-32-B,C), about ten and seven-tenths (10.7) miles in length, to be graded and paved with bituminous macadam.

Imperial County, between Arax and Yuma (VIII-Imp-27-B), about six (6.9) miles in length, to be graded and paved with asphalt concrete.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the office of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full

directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer.

Dated October 29, 1930.

**ALEXANDRIA LUMBER MARKET
SHOWS GREATER ACTIVITY**

The Alexandria lumber market shows greater activity with increased sales in the interior, states a report from Charles E. Dickerson, Commercial Attache at Cairo to the Lumber Division of the Department of Commerce.

Arrivals of American pitch pine during August totaled 150,000 board feet as compared with none during July and June, with demand for this wood being normal. American hardwood arrivals totaled 600,000 board feet during August as compared with none during July and June. There have been no important calls for red gum. Prices of American woods remain firm. Sizeable quantities of lumber arrived from Rumania, Sweden and Finland, partially due to the approach of seasonal closing of navigation, especially in the latter two countries. Arrivals from Rumania and Sweden during August totaled 21,176,000 board

feet as compared with 6,930,000 during July. The demand for European woods has been normal.

It is stated in the Egyptian lumber trade that arrivals from either North Russia or the Black Sea are expected to be regular in the future with monthly arrivals estimated by the trade at about 4,000,000 board feet. August arrivals from Russia amounted to 3,950,000 board feet and the quality was reported satisfactory.

Tight credit conditions still prevail on the Egyptian lumber market with no signs of amelioration in the early future. Carloads of lumber from Alexandria to Cairo and other interior points during August totaled 2,587 as compared with 1,660 during July, 3,166 during June and 2,036 during May.

**RAILROADS ATTACK 8-HOUR DAY
ON GRADE ELIMINATION
WORK**

Constitutionality of the New York State law compelling railroads to pay the prevailing rate of wages and observe an eight-hour day on grade-crossing elimination work was argued before Justice Staley in the state supreme court on Oct. 18. Decision was reserved.

Whatever the decision, it is expected that the case will be carried to the highest court, and until it is finally decided no new projects for grade-crossing elimination work will be undertaken. This will automatically hold up the elimination of the West Side tracks in New York City, the \$32,000,000 elimination project in Syracuse, the \$5,000,000 program in Elmira and completion of the work in Buffalo.

E. B. McMaster, secretary of the Architectural Institute of British Columbia, has notified members of the organization that they are prohibited from taking any part in the competition for a civic center and grandstand for the City of Nelson, B. C., for which invitations to compete have been sent out.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic"
Storage Systems and "Lyon" Tank Water Heaters.

Send For a Sample Copy
Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

Send for free sample copy today.

HARDWARE MEN FIND SMALL ORDERS COSTLY

X-Raying various lines of products, analyzing functions in distribution, the National Hardware Association's Atlantic City convention declared war on waste, says The Business Week. Seven typical wholesalers were found to average 19,000 items in stock purchased from 1000 manufacturers; 40% of sales totaled less than \$10, cost of handling a ten-item \$20 order nearly \$1. Even in 1929, the boom year, average value per order was but \$20. Annual purchase of one-third the customers were less than \$100, and accounted for 2½% of total volume.

Of orders from retail customers, 23% amounted to less than \$5, contained 7.1 items each, and accounted for only 2.5% of total sales. Orders over \$50 carried 45.5 items and brought 54.4% of sales, the most desirable retail order amounting to \$10-\$15, carrying but 5.5 items and constituting 5% of total sales.

To determine the value of brands, 12 separate lines of hardware merchandise involving 273 brands and sizes were studied, 48% of the total accounting for 66% of inventory and 90% of total sales.

Items of stock turning but once a year ranged up to 25%. Salesmen brought in 70% of the business, and 80% of all sales were made on 50% of the items.

Studying lines were recommended to manufacturers and distributors, as means of waste elimination, building greater profits. One manufacturer reported profitable elimination of 304 items from a 665-item line. Another found but 370 actively sold, although 730 were carried. Several competing manufacturers divided slow-moving numbers, each eliminating many.

TIMBER REDUCED IN QUEBEC

A reduction of 50 per cent in stumpage dues on all burned timber in the Province of Quebec cut before March 31, 1931, for been announced by Premier Taschereau in order to decrease unemployment in woods operations, states a report from E. G. Sabine, Trade Commissioner at Montreal to the Lumber Division of the Department of Commerce.

It is understood that the Government of the Province of New Brunswick will also reduce stumpage rates on saw logs from \$3 to \$2 per thousand and board feet; and on other classes of timber by one third of the present rate, providing the Federal Government will assist in bearing resultant loss of revenue.

According to a report by the U. S. Forest Service, the manufacture of boxes requires more than 14 per cent of the lumber cut each year in the United States. Fiber containers take 7 per cent of all the wood pulp used in this country.

Basic Principles of "Concrete Making Coordinated" By Kitts

The first of a series of articles on "Basic Principles of Concrete Making Coordinated," prepared exclusively for publication in Building and Engineering News, by Mr. Jos. A. Kitts of San Francisco will appear in the next issue. Others will follow from time to time.

The series will comprise articles covering some fourteen new developments in proportioning and technical control of production.

With some thirty years practice in the proportioning, production and use of concrete and an exhaustive analysis of the record of concrete research, Mr. Kitts has solved many of the very abstruse questions of that research and advanced the scientific and practical knowledge of the physics and technology of concrete mixes by discovery of complementary principles discovered by past and contemporary workers in concrete.

MILLER HEADS SAN JOSE INDUSTRIES BODY

J. Lester Miller, attorney and assistant secretary of the Nucleus Building & Loan Association of San Jose was named president of the Building Industries Association at its formal organization meeting last Wednesday. John T. Maluvius of the Central Supply Company was elected vice-president, and L. C. Rossi, secretary-manager.

Directors are: A. L. Hubbard, lumberman; T. M. Wright, building and loan association officer; R. H. Borchers, building material dealer; Warren Holmes, hardware dealer; Fred Doerr, electrical dealer and contractor; William Serpa, plumbing contractor; R. O. Summers, general contractor, and Charles Hayward, lumber dealer.

Talks were given by Hilmar Peterson, San Francisco, and William A. Baylor, secretary of the San Jose Merchants' Association. By-laws were adopted and the code of ethics approved. The organization will have as its purpose the removal of elements detrimental to the best interests of the building industry.

Total income of the United States Steel Corporation for the quarter ended September 30 was \$37,995,339, against \$17,061,304 in the preceding quarter, and \$72,099,666 in the same quarter of 1929, the corporation announces. Directors of the corporation voted the regular quarterly dividends of \$1.75 each on the common and preferred shares, the common payable December 30 to stock of record December 1, and the preferred November 29, to stock of record November 3

PLUMBING RACKET EXPOSED IN DETROIT

The county grand jury at Detroit has turned its attention to a gang of alleged racketeers accused of having "Muscle in," on the Detroit plumbing business, set up a virtual reign of terror and extorted at least \$100,000 from their victims.

The first indication of the trend of the jury's newest line of investigation came when a detail of state and city police, acting under orders from the jury, raided the offices of the United Master Steam fitters and Plumbers Association and seized a carload of records. Two men and a young woman found in the offices were subpoenaed and taken before the jury immediately.

Louis J. Flint, executive vice president of the citizens committee of Detroit, and Pierce E. Wright of Detroit, secretary of the Associated Building Employes of Detroit, were credited with making the initial revelations. According to statements made by these men, the racketeers set up an organization whereby they were able to manipulate prices, contracts and credit under pain of violence.

WESTEEL PRODUCTS CHANGES FIRM NAME

The Westeel Products Company with offices in the Rialto Building, San Francisco, announces its name being changed to the Westates Products Company on account of two other firms claiming prior use of the name Westeel.

The Westates Products Company is the western factory branch for the following eastern manufacturers, namely: Knapp Bros. Manufacturing Company of Chicago, makers of Sanitary Metal Trim; the Reelvalador Co. of Grand Rapids, makers of the "Automatic Servant"; and the North Western Steel Products Company of Chicago, manufacturers of the well known Nemo expanded steel waste paper basket.

Arthur J. Swanson, manager of Westates Company, was formerly general sales manager for the North Western Expanded Metal Company of Chicago until their acquisition on April 1 last by the United States Gypsum Company. This prompted Mr. Swanson to establish his own company to represent the above named manufacturers as their exclusive western factory branch. The Westates Products Company is represented by dealers and selling agents in the principal cities throughout the eleven western states.

Cuba rail workers have notified their employers that no further reductions in wages will be considered or accepted. Further cuts will, they aver, result in a national strike.

INVESTORS SHY AT PUTTING FUNDS IN BUILDING CONSTRUCTION

With business revival dependent in large part upon pickup in construction, the difficulties confronting building finance command increasing attention. Though funds are pressing for investment in mortgages and a considerable demand exists for such funds, supply and demand are not, in many cases, meeting under conditions that lead to a "deal," says The Business Week.

Investment in building and real estate is under a shadow which affects many investors. Past malpractices and a hang-over of serious difficulties have hindered development. A brief review of some of the past abuses now coming to light is essential to an understanding of present difficulties.

Three methods of real estate finance are followed: (1) The mortgage may be purchased by a single investor—individual or institutional; (2) it may be handled through guaranteed mortgage securities, in which case an institution specializing in mortgage security origination guarantees securities issued against the mortgage; (3) a mortgage bond, or the so-called "split mortgage," may be used, wherein bonds are issued against the mortgage. Each method, in the order given, tends to lend more than the preceding one and to yield more to the investor. Competition results. The obvious tendency is for institutions engaged in these different types of financing to bid against each other in the amount to be lent. Though this tendency is accentuated by the desire for business in the present dull period, it is being well restrained. Here arises the more or less justifiable charge of unusual stringency in requirements for loans.

The difficulties in the third field form the greatest problem in the business and have cast a shadow over the virtue of all investments in real estate which has affected many investors. Of \$18 billions of such securities outstanding, about \$4 billions are in default. Investigation of these defaulted issues has revealed startling facts.

The Old Appraisal Game

Over-appraisal of property to be mortgaged has been perhaps the worst evil. In many states in which almost no restrictions exist to prevent overvaluation, the popularity of real estate bonds and the desire for business by originators of such securities have often led to creation of issues against property much larger than could be supported by the income. Cases have been revealed where the amount required for interest charges on the mortgage bonds exceeded by a large margin the income that could be expected to be derived from the property under the most favorable conditions.

Accompanying these defaults have come bondholders' protective committees formed to look after bondholders' interests. "Many have done praiseworthy work," one well-informed individual told The Business Week, "but too many have put their own interests far ahead of the bondholders they were supposed to represent. Had trustees always been alert to the interests of the bondholders many of the evils could have been avoided."

Lack of records and inadequate designation of securities has made difficult orderly organization in this field. Issuance of mortgage securities has been a mushroom growth

since the war, with almost no organization.

No Splits Wanted

The effect of all these practices upon current real estate financing has been decidedly unfavorable. Many investors distrust the split mortgage, or real estate bond. Chief among these are the institutional investors. With few exceptions, savings banks and life insurance companies want few or none of the bonds. Such mortgages as they cannot take in full they let alone.

There are still other difficulties. Very few properties upon which bonds are issued give investors any earnings' statements, leave them in the dark regarding financial progress.

Serious lack of marketability greatly hinders real estate securities. Sales are almost entirely "over the counter" with no very centralized counter. Forced sale may necessitate acceptance of a large discount. This lack of marketability limits the value of the security as collateral, since that is a primary requirement of the banks.

Mounting property taxes constitute a nether millstone. Taxes must be paid before income is available for interest payments, and steadily the amounts levied against real property by states, counties, municipalities, other taxing bodies increase.

Finally, the unstable value of the dollar is of great concern to investors in long-term securities. The lender may find after a few years that his loan in a stated number of dollars has lost all relationship with the value of the property expressed in dollars which fluctuated in value.

Three Ways Out

Three movements now under way may help real estate financing out of its troubles:

(1) The field of the guaranteed mortgage is expanding. Though the reputation of these securities is high, their issuance has, until recently, been largely confined to New York. Now it is spreading. Guaranteeing forces conservatism on the security originator, giving the securities a better base. Institutions doing business in this manner are experiencing a good demand.

(2) Marketability is being sought for real estate securities by organization of the Real Estate Securities Exchange in New York and by a similar group on the Curb Exchange in Chicago. Both have been formed this year and still are in the stages of very humble beginnings. Realization of their program, however, would aid greatly. They aim primarily at marketability, also at organization of records on real estate securities and better designation. They are trying to obtain earnings' statements from properties against which securities are outstanding.

(3) Determined efforts are being made to curb further increases in taxation on real estate. Chief among the protestants are the National Association of Real Estate Boards, the building and loan associations, the security exchanges, home owners' associations. Organized efforts to prevent increases are now being made in many cities.

gineers and land surveyors was given by the National Council of State Boards of Engineering Examiners at the eleventh annual convention, held in Richmond, Va., Oct. 20-21. This law is that compiled by a committee of the American Society of Civil Engineers in collaboration with committees from a number of other organizations, including all founder societies: the American Engineering Council and the American Association of Engineers.

A total of 30 delegates were present, representing 16 states, the American Society of Civil Engineers, the American Assn. of Engineers, and the American Engineering Council. Other topics considered at the meeting were: "The Status of Landscape Architects in Connection with Registration of Engineers," the codification of registration laws, and the reports of several committees. Two important committees were appointed, one to draft a suggested system of reciprocity in connection with the registration of engineers, headed by L. M. Martin, of Iowa; the other to investigate and compile suggested uniform examinations to be used by the various state boards for the registration of engineers. D. E. Steinman, New York City, is chairman. Both committees will report at the next annual convention, to be held in Detroit, Mich.

Officers elected at the convention were as follows: President, T. Keith Legare, Columbia, S. C.; vice-president, D. E. Steinman, New York City; secretary-treasurer, Dean P. H. Daggett, Rutgers University.

CO-EMPLOYEE NOT LIABLE FOR INJURY

Although an employee can recover compensation under the workmen's compensation laws for an injury sustained in the course of his employment, he cannot recover damages under the ordinary common law for injuries inflicted by negligence of a co-employee, says The Constructor.

In *Thompson v. Kleister*, 283 Pac. 1018, an employee was employed by a contracting company having a contract to perform construction work. While the employee was attending to his regular duties he was injured by negligence of another firm which had contracted to perform work for the owner. The employee, under the common law, sued the contracting company which caused the injury, but the higher court held the employee not entitled to damages saying:

"The relationship of master and servant exists where the employer retains the right to direct, not only what shall be done, but how it shall be done. . . . The purpose of the workmen's compensation laws is to make the industry prosecuted, if hazardous, bear the burden of human wreckage incident to its operation.

If they are engaged in the same general business and for the same general employers, they are in the same employ. We think under our statute that an injured employee cannot collect compensation from his co-employee, but in such a case the Industrial Commission has exclusive jurisdiction."

Engineering Examiners Favor Registration Law

Official endorsement of the uniform registration law for professional en-

TWENTY-FIVE CITIES REPORTING LARGEST VOLUME OF PERMITS FOR SEPTEMBER, 1930, WITH COMPARISONS*

	Sept., 1930	Sept., 1929	Sept., 1928	Aug., 1930
1. New York	\$ 29,282,503	\$ 31,674,925	\$ 57,649,387	\$28,371,352

MAIL ORDER HOUSE WILL FINANCE HOME MODERNIZATION

Development of a considerable volume of small-home construction and repair work is expected to follow the announcement by Sears, Roebuck & Co. of an unusually liberal home modernization financing plan, says The Business Week. Sears, Roebuck will finance any repairs, alterations, or improvements minimum cost \$100 for both materials and labor, for 10% cash and the balance in monthly payments extending as long as 24 months.

Experimentally the plan will be limited to a 50-mile radius from New York. Special home modernizing, architectural, and job-fitting branches will be opened in White Plains, New Rochelle, and Jamaica, N. Y., and in Newark, Hackensack, and Paterson, N. J. If successful the plan will be extended to other large cities throughout the country.

During 1929, in the New York area, Sears, Roebuck started to supply materials and labor and occasional financing for 4 major classes of house repair—heating, plumbing, roofing, and garages. Now the plan includes every type of modernization work: built-in improvements from oil burners to ironing boards; new plaster walls, new wall paper, new floors or floor covering; exterior improvements such as storm sash, sun rooms, new roofs, side walls. Sears, Roebuck will act as general contractor and will supply all architectural service, financing, and materials. Local labor will be used exclusively.

Similar plans, but on a more limited scale, have been successfully offered recently by several suppliers of home equipment. Most noteworthy have been those of American Radiator & Standard Sanitary Mfg. Co. and of Certain-Teed Products Corp. These plans have been confined chiefly to work calling for products supplied by the companies, such as heating, plumbing, re-roofing, and painting, and generally have required a minimum expenditure of \$500 on repair work.

This latest Sears-Roebuck development is a logical outcome of its new home building and financing plan announced last January. This has been so successful that, despite the continued and unprecedented lag in residential construction generally, Sears, Roebuck reports that its operations under the new plan have surpassed in number of homes built and volume of material sold all previous records during the 18 years the company has been supplying ready-cut homes and building materials.

Additional evidence of the popularity of this type of financing, by which usual difficulties in obtaining funds for modernization are lessened, is the report that during the first half of 1930, American Radiator Co. did about \$3,000,000 worth of heat-remodeling business alone on jobs averaging about \$600 each. Its plumbing remodeling jobs are reported to be about \$300 each.

AVOID COURT AND SEEK ARBITRATORS

Daily Pacific Builder, issue of October 20, under caption, "Who Knows?" asked solution of the General Contractor in the following position:

A sub-contractor signs an agreement with a contractor whereby he agrees to fulfill his work according to plans and specifications together with approved shop drawings, an on completion of work signs with general contractor, for the owner, a guarantee giving owner right to charge and collect for any defects in material and workmanship occurring within the 1-year period.

Owner claims that sub-contractor deviated from approved shop drawings and is demanding reparation for alterations from contractor.

Sub-contractor claims all his work was done with the approval of the inspector and disclaims all responsibility concerning alterations and repairs.

Can general contractor, should he have to make repairs, collect from the sub-contractor?

E. T. Thurston, San Francisco consulting engineer, furnishes the following comment:

The General Contractor is responsible to the Owner for all work embraced in his contract, whether sublet or not. Insofar as the work of the Sub-Contractor has the formal approval of the General Contractor or his authorized representative, he is legally in the clear, regardless of representations of the Owner. If, however, the Sub-Contractor neglects to obtain formal approval of Contractor, it may easily be just too bad for him, also regardless of the attitude of the Owner. There should be no direct dealings between the Owner and the Sub-Contractor except with the knowledge and consent of the General Contractor. The Owner is responsible for the decisions and orders of his inspector; responsible to the Contractor but not to the Sub-Contractor. The answer to your question would therefore be that the Contractor may legally collect from the Sub-Contractor for repairs or replacements due to material or workmanship unsatisfactory to the Owner only to the extent that the Sub-Contractor is at fault for not complying with the terms of his contract with the Contractor.

Theoretically the matter is simple but practically the business of building is very complicated and replete with technical pitfalls for all parties concerned. Such cases should be submitted for adjudication by a board of arbitrators composed of men experienced in the technique of building. By all means avoid if possible going to court about it.

PRODUCTION OF METAL DOORS SHOWS INCREASE

An increase of 2.7 per cent in the value of metal doors, sashes and window sash and frames in 1929 over 1927 is reported by the Census of Manufacturers following a preliminary tabulation of the data collected to date in the 1930 census. The figures show that the value amounted to \$87,-044,275 in 1929 as compared with \$85,-275,973 for 1927, the last preceding census year. The number of establishments included in the census is 134 with \$,747 wage earners receiving \$15,739,918, the percentage of increase over 1927 being respectively, 14.5, 8.7 and 1.1.

THE OBSERVER

What He Hears and Sees on His Rounds

The four-point program to promote conservation of lumber has been presented to President Hoover by the National Lumber Manufacturers' Association. The program, offered by A. C. Dixon, president of the association, and Wilson Compton, executive secretary, included: A request that Attorney General Mitchell define the anti-trust laws so manufacturers would know what agreements can be made legally. Establishment of a labor conservation board. Application of the convict labor provisions against Russia importations. Close contact with the national forestry service.

Development expenditures of the Pacific Gas and Electric Company have exceeded by more than \$500,000 a month the amount pledged to President Hoover in his program for unemployment relief, according to a report by A. F. Hockenbeamer, president. The amount pledged was \$35,000,000, whereas actual expenditures will reach nearly \$40,000,000.

The American Institute of Steel Construction will take steps at once to encourage architects to design residences in steel. The Institute will feature annual architectural competition to further such construction. This was voted at the recent annual convention of the Institute with the passage of the following resolution:

Whereas, the steel construction industry is keenly alive to the advantages of building residences of steel, and

Whereas, technological problems have so far prevented most of the fabricating plants from engaging in this kind of work, and it is probable that steel framing and other requirements for residence work when once established will bring almost a new industry into being; it is, however, decidedly to the best interests of the steel construction industry that full encouragement be given the steel residence.

Several hundred residences have been built during the past year or so with steel framing. Some excellent pioneering work has been accomplished. Much more can and should be done. The field of national pioneering for the steel residence is one which only the American Institute of Steel Construction can with propriety engage in, therefore be it

RESOLVED, That the American Institute of Steel Construction take such steps immediately as the Board of Directors deem expedient to encourage architects and builders to design residences in steel, by means of annual architectural competitions, the publication of approved designs for steel residences, and the general dissemination of literature on the problems of steel house design and erection.

Civic bodies of Stockton are urging the appointment of a port manager for Stockton's \$6,000,000 deep water project. Several prospective managers have been recommended to the city council and it is understood that Col. B. C. Allin, director of the port

of Houston, is preferred, if he will consent to accept the position. This is indicated by the recent action of the city council in appointing Allin consulting engineer in connection with the development at a salary of \$100 a month.

Unfilled orders of the United States Steel Corporation increased 57,425 tons in October to a total of 3,481,763. In September a decrease of 155,866 tons was shown. The backlog of September 30 was 3,424,338 tons. On August 31 unfilled orders aggregated 3,580,204 tons. On July 31 the total unfilled tonnage was 4,022,055, and on October 31, 1929, unfilled orders amounted to 4,086,562 tons.

To the eight thousand or so employees on the payroll of his construction company, Irwin S. Chanin, New York builder, said:

"You, like other wage earners, have been saving your money for a rainy day instead of buying things you need, because you have been afraid you might lose your jobs. That rainy day hasn't come and we believe it will not.

"In return for our assurance that your job looks safe, buy that new clothing, that household furniture or whatever you would be buying if times were normal. Buy now because prices in most lines are at rock bottom and because your buying, with that of other wage earners, will bring us all back to prosperity.

"Think and work with enthusiasm and without worrying about the depression."

Fear of unemployment by persons now employed is largely unfounded. Mr. Chanin said, since most of those who still have jobs will keep them.

Opposition to the plan of the Chico High School Vocational Education Department in allowing students to build homes as a part of their training in the woodwork, was expressed at a meeting of the Board of Education by H. T. Brooks, contractor. The loss of work because of student building homes has been keenly felt this year, Brooks told the Board. He criticized the brand of work turned out.

Substantial increases in October building permits in several Pacific Coast cities were shown in figures compiled by S. W. Straus & Co. Permits issued during October of this year were larger than either the previous month or the corresponding month of last year in Seattle, Spokane, Long Beach, Beverly Hills, Monterey, Santa Barbara, Ontario, Ventura, Redlands, Pomona, Santa Rosa, Bellingham, Washington and Logan, Utah.

San Francisco, whose permits totaled \$2,295,216, showed an increase over the previous month's total of \$1,950,830, but was slightly behind the same month last year, when permits reached \$2,444,543.

Increases over the previous month, although not as large as October 1929, were also registered by Fresno, Glendale, Santa Monica, Stockton, San Mateo and Reno. Long View, one of the cities of Eureka and Santa Ana both exceeded October of last year, although their totals were not com-

parable with the previous month.

Spokane, with permits of \$800,000 in October 1930, compared with \$183,589 in September and \$559,427 in October, 1929, was outstanding among the larger cities in proportionate growth. Seattle, too, reported permits of \$1,533,340 compared with \$1,428,990 in September and \$1,228,645 in the same month of last year.

Long Beach permits of \$1,964,630 were slightly larger than the previous month and substantially ahead of October 1929, which totaled \$1,367,545.

In other important cities, however, figures reveal declines from preceding reports. Los Angeles, whose permits amounted to \$8,189,199 in October of last year, and \$6,662,761 in September this year, showed a total of \$5,309,181 last month. Oakland, with \$495,317, was slightly behind the previous month of \$532,586 and compared unfavorably with the same month last year, which totaled \$1,470,810.

Portland, which had on the previous month registered a sharp increase to \$2,781,410, reported permits of \$604,216 in October this year, which compared with \$1,614,553 in the corresponding month last year.

WOLVERINE CABINET NOW BEING MARKETED

Among recent developments of the Wolverine Tube Company, of Detroit, is a Cabinet Unit Heater, which provides an intake through the wall of the building as an alternate source of air. A straight, square damper permits either one or both air inlets to be used at the same time. Summer ventilation with outside air is therefore possible as well as winter ventilation with inside air.

Immediately above the air inlets is a steel wood air filter. This is readily removable for cleaning. Flying dust which has been counted as a disadvantage of forced circulation is thereby eliminated. Likewise the air filter is of great utility in commercial and industrial sections when outside air is desired. The capacity of the vertical flue or cabinet is sufficiently great so that the full action of the Unit Heater mounted at the top, is not interfered with.

A standard Wolverine Unit Heater is used. It has aeroplane-type fan, individually adjustable louvers, a handy off and on switch. The cabinet has a flush, panel door through which the motor of the heater may be reached. The heating effectiveness of the Wolverine Unit Heater depends on several features which are unique. Seamless copper tubing with generous copper fins runs in single lengths from multiple bronze inlets to multiple bronze outlets. There are no joints except the end connections and these are silver soldered. The tubing is arranged horizontally in non-abrasive saddles and at such an angle as to be completely self-draining. These full floating coils automatically take care of expansion and contraction. The Unit is designed for hot water, vapor or steam and is considered serviceable even on high pressure lines. A maximum transfer of heat to a maximum volume of high velocity air gives this Wolverine Unit Heater a high rating of heating effect and assures an unusually uniform distribution in the area to be heated.

Various sizes of the complete Wolverine Cabinet Heater are already available to the trade.

The manufacturer recommends the use of this triplet combination unit even in offices, since it is very quiet in operation and may be finished to match the scheme of interior decoration. The net cost per square foot of radiation is estimated to be considerably less than one dollar, according to Wolverine officials.

TRADE NOTES

Keystone Construction Co., of Oakland, capitalized for \$100,000, has been incorporated. Directors are: Chas. K. Harper, San Francisco; Gay Lombard, San Francisco, and Leo Berche, Oakland.

Through the establishment of branch offices of their San Francisco factory branch office, the Reading Chain & Block Corporation of Reading, Pennsylvania, are now represented in Los Angeles. H. H. Knowles, who established the Pacific Office here, which is headquarters for the Western States, will supervise the new office and warehouse located at 2144 East 7th St., Angeles, for which A. A. Grant has been appointed his assistant. The San Francisco headquarters and warehouse is located at 625 Third St.

International Pole Co., Ltd., authorized to capitalize for \$1,500,000 to buy timber and market it from San Francisco for poles and piles, has filed articles of incorporation with the Secretary of State at Sacramento. Directors are Leander L. James, J. N. Flowerman, Charles Wall and Scott Hendricks of San Francisco and M. G. Thomb of Vancouver, B. C.

Spencer Turbine Company of Hartford, Conn., has opened a direct factory branch office at 656 South Los Angeles Street, Los Angeles. The company manufactures the heavy duty Spencer Central Vacuum Cleaning System and Portable truck systems as well as Turbo Compressors for industrial use and organ blowers for pipe organs. The Los Angeles office will have charge of all business on the Pacific Coast. H. M. Grossman is Pacific Coast manager.

Sierra Equipment Corp., exclusive distributor of the products of the Oliver Iron & Steel Corporation, Pittsburg, Pa., now carries large stocks of Oliver pole line construction materials in warehouses at San Francisco, Los Angeles, and Seattle, according to L. Q. Trumbull, secretary-treasurer of the corporation. These stocks include a line of copper ground rods recently placed on the market.

Merger of the Carrier Engineering Corporation of Newark, N. J., the Brunswick-Kroeschell Company of New Brunswick, N. J., and Chicago, and the York & Ventilating Corporation of Philadelphia, each one of the largest concerns respectively in the air conditioning, refrigerating, and unit heating and ventilating industries has just been announced. Including subsidiary and affiliated concerns, the merger will unite fifteen companies, five of them foreign, with total assets of approximately \$15,000,000.

The Hoffman Specialty Company of California, Ltd., has been formed to take over the electric heater manufacturing business of the Hoffman Specialty Company of Waterbury, Conn. Headquarters for the new company will be in Los Angeles at 612 Architects Building, although a new factory has been opened in San Francisco. The Eastern company will continue to manufacture steam heating specialties. Officers of the new company are George D. Hoffman, president; Harry H. Daley, vice-president and sales manager, and Potter Bowles, treasurer.

HERE — THERE — EVERYWHERE

Albert Coons of Los Angeles filed \$10 or two days in jail for installing plumbing without having a certificate of qualification as a plumber.

Berkeley Electrical Dealers' Association will shortly appoint a new secretary. It is announced by Al Smith of the Smith-Erickson Electric Co. of Berkeley, president of the association.

Various changes in the uniform building code, recommended for adoption by Ernest H. Rogers, city building inspector, and pertaining chiefly to apartments house construction, have received the approval of the city council.

Fred G. Stevenot, director of natural resources, reports that the amount of lumber cut in California in 1929 increased 5.6 per cent over 1928. In the pine region the cut was nearly 1,500,000,000 board feet and in the redwood region nearly 600,000,000 board feet.

At the Seventh Annual Convention of the Southwestern Section, International Association of Electrical Inspectors, held in Pasadena last month, co-operation was urged with the Pacific Coast Building Officials' Conference on unity of rulings governing the construction of moving picture booths and film storage rooms.

Erwin M. Lurie, civil engineer, and for the past nine years assistant to the commissioner, has been promoted to the position of Acting Commissioner of the Associated Metal Lath Manufacturers with headquarters at Chicago. Mr. Lurie has had a wide experience in the construction industry.

City council of Roseville, Placer County, contemplates adoption of a new electric wiring ordinance, one section of which will establish a license fee of \$50 a year for electrical contractors and make it compulsory for such contractors to pass an examination as to qualifications to engage in such business.

The Denver Electrical Contractors Association recently established a quantity survey bureau for the benefit of its members in an attempt to stabilize competitive bidding and to avoid mistakes in estimating. Lee Matton has been engaged as estimator in charge of the bureau. Quantities of materials and unit hours of labor are estimated, but no pricing whatever is done by the bureau.

"Industrial, Technical and Architectural Finishes," a 26-page booklet issued by the Norfolk Paint & Varnish Co., Norfolk Downs, Mass., contains information valuable in the solution of painting problems relating to the maintenance of interior and exterior surfaces in industrial plants, railroads, public buildings and homes.

Structural advantages of Naylor spiral-weld Tufcon iron pipe, as demonstrated by laboratory tests are indicated in a 44-page illustrated bulletin 30-2 published by the Naylor Pipe Co., 1230 E 92nd St., Chicago, Ill. Illustrations show many installations of this pipe under widely varying conditions.

ALONG THE LINE

W. C. Heli of the Columbia Lumber Company of Seattle, Wash., was a visitor on the floor of the San Francisco Builders' Exchange last Monday.

Henry Bosch Jr., formerly chief draftsman in the engineering department of the Pacific Gas & Electric Company, San Francisco, has been appointed chief of drafting and reproduction of that department.

Earl O. Mills, a member of the firm of Bartholomew and Associates, employed to prepare a planning ordinance for Stockton, is in that city and will present a tentative draft of the ordinance to the City Planning Commission shortly.

C. E. Strickland, deputy state engineer of Oregon, has been appointed acting state engineer, due to the resignation of Rhea Luperc. Mr. Luperc resigned when criticism was directed to the business affairs of his office. He became Oregon state engineer in 1923.

Hoskins Manufacturing Co. of Detroit, Mich., manufacturers of resistance wire, electric furnaces and pyrometers, has appointed E. A. Wilcox its California representative. Wilcox will maintain headquarters at 273 Seventh St., San Francisco.

Harry Lutgens, publisher of the San Rafael Independent, has been appointed as Marin County's second director of the Golden Gate Bridge and Highway District. Lutgens' appointment was the result of a district provision that any county with more than 40,000 population is entitled to two directors. Marin passed the 40,000 mark in the recent census.

Earl S. Casey, construction engineer residing at Escondido, has filed application with the Oakland city council seeking appointment to the position of city manager. Casey tells of his engineering experiences in the United States and in Canada, and recommends that he be appointed as it is best to have a man as city manager who has not lived in Oakland. The reason, he sets forth, is because he would not be biased by local influences and opinions.

Charles F. W. Herrmann, 84, Santa Clara County engineer for three years and one of the pioneers of the Santa Clara Valley District, died at his home in Saratoga November 11 after an illness of several months.

Herrmann came to California in the spring of 1869 by way of the Isthmus of Panama. He and his brother, A. T. Herrmann, since dead, founded the firm of Herrmann Brothers, surveyors and civil engineers. Later he was in the employ of the Southern Pacific at Sacramento, and on returning to San Jose devoted all his time to the interest of Herrmann Brothers.

C. L. Mullen, 37, former assistant manager of the Sugar Pine Lumber Company at Pinedale, Fresno County, died in a Portland, Ore., hospital Nov. 8, following an operation. Mullen was assistant manager at the Pinedale mill for three years and was well known in lumbering circles along the Pacific Coast. He is survived by his widow, his mother and a brother.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone 8Utter 1684).

R-3309-S ENGINEER, mechanical or electrical, not over 30 years, with 3 to 5 years' experience on hydro-electric plant operation for service and testing work. Must have mechanical skill, agreeable personality and be willing to travel. Salary about \$175 month and expenses in the field. Apply by letter. Headquarters, San Francisco.

R-3333-S CHEMICAL ENGINEER, graduate, with 1 to 3 years' experience, for research work on development of plant equipment. Excellent opportunity for man with thorough chemical engineering training and with more than average ability. Salary \$150-175 month to start. Apply by letter.

R-3389-S CONSTRUCTION FOREMAN, experienced on high-head hydro-electric plant construction and capable of handling native labor. Must have experience with ferrum pipe installations. Salary about \$400 a month and expenses. Apply by letter. Loc., South America. Headquarters, San Francisco.

R-3335-S ENGINEER, preferably mechanical, 25-35 years old, for cost analysis and time study work. Experience should include both shop and outside estimating and preferably some time study work. Salary about \$200 month to start. Apply by letter. Location, Bay Region.

R-3388-S CONSTRUCTION SUPERINTENDENT, preferably with experience in Latin America and capable of taking charge of a hydro-electric construction project involving tunnels, dams, penstocks, power house, etc. Apply by letter with references and photo. Location, Colombia, South America. Headquarters, San Francisco.

CONNECTICUT TELEPHONE CORP. CLAIMS PATENT INFRINGEMENT

A complaint claiming patent infringements, of interest to architects, builders, electrical contractors, jobbers of electrical equipment, medical authorities and others concerned particularly in the construction and operation of hospitals, has been filed in the United States District Court by the Connecticut Telephone & Electric Corp. of Meriden, Conn., against the Standard Electric Time Co. of Springfield, Mass., and E. L. Pierce, contractor, of Bridgeport, Conn.

The Connecticut corporation is the owner of a large number of patents on electric signaling and lighting equipment, and the charge is made that the Standard Company, a newcomer in the hospital signal equipment field, is infringing six of these patents. Mr. Pierce furnished the Standard Company's signaling equipment for the Laurel Heights Sanatorium at Shelton, Conn.

A new cable suspension railway has been opened in Germany between Freiberg and an observation point called "Schaunsland." The length of the cable is 2.23 miles and the cars ascend a height of 0.8 mile. This distance is traversed in eighteen minutes and the cars carry 25 persons. The railway was built principally to serve the needs of winter sports.

"CRAFT UNIONISM" SOUGHT BY CONTRACTORS OF FRESNO

Until adjustments "come from within your own ranks" no change in the present status of the General Contractors' Association concerning the employment of nonunion labor thru-out the district is contemplated.

This is indicated in a letter signed by R. E. Jolly, secretary of the contractors, and addressed to the Fresno Building Trades Council, of which Fred C. Huss is business manager.

The letter was sent following a meeting of the general contractors, presided over by W. T. Harris, president.

The policy of the contractors is not to seriously disrupt local conditions and establish an "open shop," but indicated in the communication that craft unionism would be desired. Craft unionism is now practiced all over the state, except in Santa Barbara, according to Jolly.

In a letter sent to the contractors by the trades council on October 28 a conference between committees of both sides was requested. The request from the council stated that "we feel that considerable more constructive benefits can be brought about for all concerned than by present plans outlined in the resolution as adopted by your association."

The Association recently withdrew its active support from the council in a resolution signed by 22 contractors.

The letter adopted last evening follows:

"Fresno Building Trades Council, Fresno, Calif.

"Gentlemen: With reference to your communication of October 28, 1930, we advise as follows:

"The policy of this association will not be to seriously disrupt local conditions and established a so-called 'open shop,' but we do desire craft unionism.

"The so-called adjustments that you mention we feel should come from within your own ranks, for you must admit our attitude of cooperation has always been apparent for many years past.

"We are confronted by ever changing economic conditions, and set rules laid down many years ago must be modernized to conform with the ever-changing progress of the construction industry.

"Building will be continued on a union basis as far as possible, and, if, owing to competitive conditions this is not possible, as high a percentage of union craftsmen as consistent will always be employed.

"The interest of the building public must be kept in mind, and in keeping with the present stimulation of building all over the country, when the occasion demands we must be ready to give the best that we have both in workmanship and materials and satisfactory costs. Cordially yours,

"General Contractors' Assn.
"R. E. Jolly, Secretary."

ARC WELDED STEEL TRUSS IS GIVEN OFFICIAL TEST

A large group of local engineers and builders witnessed a test of a steel truss with arc welded joints through the courtesy of the Soule Steel Company last week.

The truss tested was one of those forming an addition to the San Francisco plant of the Soule Steel Company at 1700 Army Street. The building has a complete structural steel frame with all joints and connections arc welded and is covered by corrugated iron.

As the present San Francisco Building Ordinance does not recognize arc welded connections, it was necessary for the Soule Steel Company to make a special request to the Building Department for permission to use arc welding instead of riveting.

In accordance with the custom of the Bureau of Building Inspection for special cases, the matter was referred to the Advisory Committee of the Bureau of Building Inspection consisting of Messrs. Frederick H.

Meyer, Architect, Walter L. Huber, Consulting Engineer, and A. H. Wilhelm, General Contractor.

The Advisory Committee decided that arc welding would be allowed for this building provided that the Soule Steel company would make a special test of one of the trusses after it had been erected. The particular requirements set done by the Building Department for such test, acting under the advice of the Advisory Committee, were that the truss to be tested should be loaded to the extent that the unit stresses in the members under loading described by the San Francisco Building Ordinance should be increased 50%. Further, in order that some knowledge might be had as to the ability of the connections to withstand impact stresses and the stresses due to lateral forces, the Building Department requested that the truss while loaded with the vertical test loads be subjected to a load applied suddenly at the top of

the columns.

The conditions described above were made those of the test by the Soule Steel Company. The truss tested had a span of approximately 66 feet and a spacing of about 22 feet. At the time of the test the roof purlins, which are of timber, were in place. A test load of 5000 lbs. of steel bars was hung from each panel point, giving a total load supported by the truss of approximately 75,000 pounds. While these loads were on the truss, a load of 2000 lbs. was allowed to suddenly drop 8 inches and rigging was so arranged that this drop produced a sudden horizontal pull of slightly over 2000 lbs. on the column at its connection with the lower chord.

The deflection of the truss under these quite severe test loads was very moderate and the effect of the suddenly applied load was almost unnoticeable.

After the test had been made those present were taken through the factory and warehouse of the Soule Steel Company where they observed the operations of this plant. In particular, they were allowed to witness the actual welding operations, special shields being provided in order to enable them to watch the welding at close range. The Soule Steel Company arranged a particularly interesting exhibit to indicate the strength of arc welding. Two steel angles about 3 feet long were arc welded in the presence of the visitors to a third short member to produce a joint resembling a panel point of a Warren truss. After this joint had been fabricated, a workman with a heavy sledge pounded these members until they were bent and twisted in several directions and finally were ruptured. The welded joints withstood this punishment without failure.

Another interesting exhibit was a massive steel arc welded plate shears which was seen in operation.

The structural design of the building was checked and the details of tests arranged and supervised by Henry D. Dewell, consulting Engineer.

VETS' BONDS TO STIMULATE HOME BUILDING

Home building throughout California will be stimulated and unemployment relieved at once by the passage of the \$20,000,000 veterans' bond issue, it is announced by George M. Stout, secretary of the state veterans' welfare board.

"The act will become effective just as soon as the ballots are officially canvassed," said Stout. "As soon as possible thereafter, the veterans' board will begin the creation and advertisement of the bonds, which will be sold by the state treasurer soon after January 1, 1931.

"Preliminary work of purchasing for qualified and eligible veterans farms and homes will get under way at once.

"This means that, beginning with the new year, there will be invested in California more than \$20,000,000 in veterans' farms and homes. It will mean added California prosperity by the sale of more than 4000 lots, costing not over \$5,000,000, and the building of 4000 homes costing in excess of \$15,000,000."

"Asphalt for Highways and Airports" is the title of a 32-page illustrated bulletin published by the Asphalt Institute, 801 2nd Ave., New York City, which gives a summary of American design and construction methods and developments in paving, surfacing and sub-grade stabilization.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone SUtter 1684).

R-3309-S ENGINEER, mechanical or electrical, not over 30 years, with 3 to 5 years' experience on hydro-electric plant operation for service and testing work. Must have mechanical skill, agreeable personality and be willing to travel. Salary about \$175 month and expenses in the field. Apply by letter. Headquarters, San Francisco.

R-3333-S CHEMICAL ENGINEER, graduate, with 1 to 3 years' experience, for research work on development of plant equipment. Excellent opportunity for man with thorough chemical engineering training and with more than average ability. Salary \$150-175 month to start. Apply by letter.

R-3389-S CONSTRUCTION FOREMAN, experienced on high-head hydro-electric plant construction and capable of handling native labor. Must have experience with ferrum pipe installations. Salary about \$400 a month and expenses. Apply by letter. Loc., South America. Headquarters, San Francisco.

R-3335-S ENGINEER, preferably mechanical, 28-35 years old, for cost analysis and time study work. Experience should include both shop and outside estimating and preferably some time study work. Salary about \$200 month to start. Apply by letter. Location, Bay Region.

R-3388-S CONSTRUCTION SUPER-INTENDENT, preferably with experience in Latin America and capable of taking charge of a hydro-electric construction project involving tunnels, dams, penstocks, power house, etc. Apply by letter with references and photo. Location, Colombia, South America. Headquarters, San Francisco.

CONNECTICUT TELEPHONE CORP. CLAIMS PATENT INFRINGEMENT

A complaint claiming patent infringements, of interest to architects, builders, electrical contractors, jobbers of electrical equipment, medical authorities and others concerned particularly in the construction and operation of hospitals, has been filed in the United States District Court by the Connecticut Telephone & Electric Corp. of Meriden, Conn., against the Standard Electric Time Co. of Springfield, Mass., and E. L. Pierce, contractor, of Bridgeport, Conn.

The Connecticut corporation is the owner of a large number of patents on electric signaling and lighting equipment, and the charge is made that the Standard Company, a newcomer in the hospital signal equipment field, is infringing six of these patents. Mr. Pierce furnished the Standard Company's signaling equipment for the Laurel Heights Sanatorium at Shelton, Conn.

A new cable suspension railway has been opened in Germany between Freiburg and an observation point called "Schaunslund." The length of the cable is 2.23 miles and the cars ascend a height of 0.8 mile. This distance is traversed in eighteen minutes and the cars carry 25 persons. The railway was built principally to serve the needs of winter sports.

"CRAFT UNIONISM" SOUGHT BY CONTRACTORS OF FRESNO

Until adjustments "come from within your own ranks" no change in the present status of the General Contractors' Association concerning the employment of nonunion labor thru-out the district is contemplated.

This is indicated in a letter signed by R. E. Jolly, secretary of the contractors, and addressed to the Fresno Building Trades Council, of which Fred C. Huss is business manager. The letter was sent following a meeting of the general contractors, presided over by W. T. Harris, president.

The policy of the contractors is not to seriously disrupt local conditions and establish an "open shop," but indicated in the communication that craft unionism would be desired. Craft unionism is now practiced all over the state, except in Santa Barbara, according to Jolly.

In a letter sent to the contractors by the trades council on October 28 a conference between committees of both sides was requested. The request was sent following a statement that "we feel that considerable more constructive benefits can be brought about for all concerned than by present plans outlined in the resolution as adopted by your association."

The Association recently withdrew its active support from the council in a resolution signed by 22 contractors.

The letter adopted last evening follows:

"Fresno Building Trades Council, Fresno, Calif.

"Gentlemen: With reference to your communication of October 28, 1930, we advise as follows:

"The policy of this association will not be to seriously disrupt local conditions and established a so-called 'open shop,' but we do desire craft unionism.

"The so-called adjustments that you mention we feel should come from within your own ranks, for you must admit our attitude of cooperation has always been apparent for many years past.

"We are confronted by ever changing economic conditions, and set rules laid down many years ago must be modernized to conform with the ever-changing progress of the construction industry.

"Building will be continued on a union basis as far as possible, and if, owing to competitive conditions this is not possible, as high a percentage of union craftsmen as consistent will always be employed.

"The interest of the building public must be kept in mind, and in keeping with the present stimulation of building all over the country, when the occasion demands we must be ready to give the best that we have both in workmanship and materials and satisfactory costs. Cordially yours,

"General Contractors Assn.
"R. E. Jolly, Secretary."

ARC WELDED STEEL TRUSS IS GIVEN OFFICIAL TEST

A large group of local engineers and builders witnessed a test of a steel truss with arc welded joints through the courtesy of the Soule Steel Company last week.

The truss tested was one of those forming an addition to the San Francisco plant of the Soule Steel Company at 1700 Army Street. The building has a complete structural steel frame with all joints and connections are welded and is covered by corrugated iron.

As the present San Francisco Building Ordinance does not recognize arc welded connections, it was necessary for the Soule Steel Company to make a special request to the Building Department for permission to use arc welding instead of riveting.

In accordance with the custom of the Bureau of Building Inspection for special cases, the matter was referred to the Advisory Committee of the Bureau of Building Inspection consisting of Messrs. Frederick H.

Meyer, Architect, Walter L. Huber, Consulting Engineer, and A. H. Wilhelm, General Contractor.

The Advisory Committee decided that arc welding would be allowed for this building provided that the Soule Steel company would make a special test of one of the trusses after it had been erected. The particular requirements set done by the Building Department for such test, acting under the advice of the Advisory Committee, were that the truss to be tested should be loaded to the extent that the unit stresses in the members under loading described by the San Francisco Building Ordinance should be increased 50%. Further, in order that some knowledge might be had as to the ability of the connections to withstand impact stresses and the stresses due to lateral forces, the Building Department requested that the truss while loaded with the vertical test loads be subjected to a load applied suddenly at the top of

the columns.

The conditions described above were made those of the test by the Soule Steel Company. The truss tested had a span of approximately 66 feet and a spacing of about 22 feet. At the time of the test the roof purlins, which are of timber, were in place. A test load of 5000 lbs. of steel bars was hung from each panel point, giving a total load supported by the truss of approximately 75,000 pounds. While these loads were on the truss, a load of 2000 lbs. was allowed to suddenly drop 8 inches and rigging was so arranged that this drop produced a sudden horizontal pull of slightly over 2000 lbs. on the column at its connection with the lower chord.

The deflection of the truss under these quite severe test loads was very moderate and the effect of the suddenly applied load was almost negligible.

After the test had been made those present were taken through the factory and warehouse of the Soule Steel Company where they observed the operations of this plant. In particular, they were allowed to witness the actual welding operations, special shields being provided in order to enable them to watch the welding at close range. The Soule Steel Company arranged a particularly interesting exhibit to indicate the strength of arc welding. Two steel angles about 3 feet long were arc welded in the presence of the visitors to a third short number to produce a joint resembling a panel point of a Warren truss. After this joint had been fabricated, a workman with a heavy sledge pounded these members until they were bent and twisted in several directions and finally were ruptured. The welded joints withstood this punishment without failure.

Another interesting exhibit was a massive steel arc welded plate shears which was seen in operation.

The structural design of the building was checked and the details of tests arranged and supervised by Henry D. Dewell, consulting Engineer.

VETS' BONDS TO STIMULATE HOME BUILDING

Home building throughout California will be stimulated and unemployment relieved at once by the passage of the \$20,000,000 veterans' bond issue, it is announced by George M. Stout, secretary of the state veterans' welfare board.

"The act will become effective just as soon as the ballots are officially canvassed," said Stout. "As soon as possible thereafter the veterans' board will begin the creation and advertisement of the bonds, which will be sold by the state treasurer soon after January 1, 1931.

"Preliminary work of purchasing for qualified and eligible veterans farms and homes will get under way at once.

"This means that, beginning with the new year, there will be invested in California more than \$20,000,000 in veterans' farms and homes. It will mean added California prosperity by the sale of more than 4000 lots, costing not over \$5,000,000, and the building of 4000 homes costing in excess of \$15,000,000."

"Asphalt for Highways" and "Altpoints" is the title of a 32-page illustrated bulletin published by the Asphalt Institute, 801 2nd Ave., New York City, which gives a summary of American design and construction methods and developments in paving, surfacing and sub-grade stabilization.

A. S. T. M. REORGANIZED— OUTLINES FUTURE PROGRAM

At a meeting in Washington last month, Committee C-1 on Cement of the American Society for Testing Materials effected a reorganization and prepared a preliminary program of work for the coming two years.

During the past year the Committee submitted to the Society a tentative specification for High Early Strength Portland Cement and an upward revision of the standards for Portland Cement. Both of these have been adopted by the Society and are now in effect.

With this new tentative standard and the revised standard in force, the committee believes that the opportunity is ripe for rather more fundamental and detailed studies of these two most widely used hydraulic cements, and of the masonry or plastic cements, whose use is growing so rapidly, than was possible with the organization under which the committee had functioned for so many years. A letter ballot almost unanimously approved a reorganization along certain suggested lines. The meeting referred to was to carry into effect these approved suggestions.

The outstanding feature of the new plan of committee operation, places the investigations of each type of cement and the preparation of a standard under a separate sub-committee. For the present, therefore, there will be a sub-committee on Standard Portland Cement, one on Masonry Cement, and one on all High Early Strength Cements—both of the Portland and High Alumina Type. Another sub-committee will have the duty of preparing the standards for methods of test. This is essential, since the Society will issue the methods of test as separate publications from the physical and chemical requirements for all hydraulic cements. This sub-committee will not indicate to the other sub-committees what methods they should use, but rather will help the other sub-committees develop and refine the methods they sired requirements, and further make as uniform and co-ordinated as possible think are needed to indicate the de-

sible the testing methods for all hydraulic cements.

In planning future work, the committee believed it desirable to throw off the shackles of precedent and past history. With two new standards just in effect, there is time at hand to make extensive studies of the sometimes considered radical new test methods suggested by progressive users and producers. It was not believed desirable to study any method or requirement simply because it was one of long-standing. Rather studies should be made of those requirements which are believed to be indicative of a needed property in the cement. Further, a needed property would be considered one which would indicate to the dependment of the cement in use over a long period of time or under possible adverse conditions rather than that one which would indicate laboratory differences in cements.

The total membership of the committee is limited to seventy-five, in order to lessen the danger of its becoming slow, unwieldy, and inefficient, but it will welcome at all times, and especially now when the sub-committees are developing new programs of investigational work, suggestions from all those interested in the testing and using of cement. The committee would be very glad to have comments as to the types of tests which should be studied, data indicating the adequacy or inadequacy of present methods, suggestions as to specific requirements, and in fact anything that an interested party would consider of value to the committee.

To complete the reorganization required by the new by-laws, the election of the officers made at the June meeting was confirmed. The committee will continue under the chairmanship of P. H. Bates, Bureau of Standards, Washington, D. C.; secretary, F. H. Jackson, U. S. Bureau of Public Roads, Washington, D. C.; and A. C. Tagge, Canada Cement Co., Ltd., Montreal and R. B. Young, Hydro-Electric Power Commission of Ontario, Toronto, as vice-chairman.

between the spring wood and summer wood in a single board than there is between average boards of different woods.

"The density, or weight per unit volume, of a softwood board measures roughly its ability to hold paint coatings, because boards are heavy or light according as they contain much or little summer wood. However, if a board has many annual growth rings per inch, it may have the summer wood confined to narrow bands and yet be moderately heavy. Such boards hold paint far better than boards of equal weight cut from more rapidly grown trees, in which the summer wood is present necessarily in wide bands. Fairly probably, therefore, depend chiefly upon density and texture considered together. Light boards and boards of fine texture hold paint better than heavy boards and boards of coarse texture."

It thus appears that until more permanent bonding agents between pigment and summer wood can be developed, a shorter life for paint on surfaces of coarser texture must be allowed for.

Other Durability Factors

On the same principle of texture it is shown that edge-grained boards hold paint better than flat-sawn boards, particularly in material of strongly contrasting grain. Evidence is adduced that the extractives in certain woods are favorable to long paint life, and those in other woods unfavorable, particularly for certain kinds of paints. Select grades of lumber, because of absence of knots, etc., are more satisfactory to paint than common grades. Boards painted on the "pith" side (surface grown nearer heart of tree) sometimes tend to break up the paint coating by "shelling out" of the grain, but boards painted on the "bark" side rarely do so.

Suggestions are offered in the leaflet for the selection of lumber and its placement in the structure in keeping with painting characteristics. While the supply lasts, copies of Leaflet 62-L, Why Some Wood Surfaces Hold Paint Longer Than Others, may be obtained without charge from the Office of Information, U. S. Department of Agriculture, Washington, D. C.

"VESICUL LITE" IS NEW CLAY PRODUCT

"Vesicul lite" is the name and trade mark of an interesting new inflated light burnt clay product that seem destined to play a star part—at least in Southern California clay industries in the vicinity of Hollywood—"Vesicul lite" is in the form of cellular hollow inflated clay balls of aggregate size—with a hard solid outer shell of fire clay as tough as paving brick, it can be made four to seven times lighter than ordinary brick, and 60% to 70% used with clay to make brick as light as necessary.

The various features of the process and product are the sole invention of Dr. Knox Harding, a veteran ceramic engineer of Chicago, Ohio and New Jersey, who has been in California (542 S. Fremont Ave., Los Angeles), adapting his inventions to local clays during the last two years.

All of the features are covered by hundreds of U. S. Patent claims, many of the most important of which have been allowed and others of which are still pending.

The largest rotary ceramic kiln in the world, firing a million a minute of the finished units, has been in operation intermittently since last Thanksgiving day at the Alhambra Plant of the Harding Licensee—and four more kilns are understood to be under construction.

LABORATORY STUDY ON WOOD PAINTING RESULTS PUBLISHED

Conclusions of the Forest Products Laboratory's 5-year study of the painting of softwoods are briefed by Dr. F. L. Browne, chemist in charge of the investigation, in U. S. Department of Agriculture Leaflet 62-L, just published.

Under otherwise comparable conditions, paint coatings were found to last nearly twice as long on some kinds of wood surfaces as on others. This variability in behavior can not be overcome or even materially reduced by adjusting the proportions of paint, oil, and thinner in the priming-coat mixture for different woods, the experiments indicate.

Summer Wood vs. Spring Wood

The difference in paint behavior on different woods is largely a matter of the proportion of summer wood and spring wood and in the problem is explained as follows:

"The painting characteristics of a board depend primarily upon the amount and distribution of summer

wood in it. Summer wood is the dense, horny, dark-colored portion of the annual growth ring, formed in the tree late in the growing season. It is made up of wood cells with very thick walls and small cavities and is in this sense much less porous than the spring wood, which is composed of cells with thin walls and correspondingly large cavities. Although liquids move more readily through the dense summer wood and paint oils are found to penetrate more deeply there, paint coatings do not seem to secure so firm an anchorage on summer wood as on spring wood; as a result, coatings exposed to normal conditions of weathering flake from the summer wood, leaving it bare, while the spring wood still remains well covered. All native softwoods contain both summer wood and spring wood, but the proportions vary in different woods and in different boards of the same wood. There is, in fact, a greater variation in painting characteristics

PROBLEMS HAMPERING INDUSTRY BEING WORKED OUT BY A. G. C.

Transformation of the construction industry from one of haphazard and "Topsy" growth to a key industry functioning on sound and carefully worked out economic principles is rapidly being accomplished. Edward J. Harding, managing director of the Associated General Contractors of America, announced upon his return from the association's fall executive board meeting October 6, 7 and 8, at Rye, New York.

"Reports submitted at our fall board meeting show without doubt," Mr. Harding said, "that solutions to the majority of the problems that have plagued and hampered the construction industry for years are now being definitely worked out and successfully applied, and that from now on increasing benefits to the building public and to business in general may be confidently anticipated."

The board found, Mr. Harding said, that definite progress has been made in securing national recognition of the economic importance of the function of general contracting not only in the construction industry, but also as a factor affecting national economy in all its phases, and that the three major programs for assuring to the public skill, integrity and responsibility in construction operations have been greatly advanced during the past year.

Officers Nominated

The progress has been so marked, he said, that the executive board broke all precedent at its Rye meeting by unanimously nominating Anton E. Horst, of Philadelphia, Pa., and Rock Island, Ill., and James E. Cashman, of Burlington, Vt., to succeed themselves as president and vice president, respectively, of the national organization for 1931 in order that they may carry on to completion the work which they have so successfully advanced.

The nominations will be voted upon at the association's twelfth annual convention to be held during the week of January 25, in San Francisco.

The three phases in which striking progress has been made, Mr. Harding said, are those dealing with the prequalification of bidders on public work to insure a procedure whereby unqualified contractors may not inflict thereby their work on the public; the establishment of an impartial fact-finding Bureau of Contract Information to provide accurate data on the past performance records of all contractors proposing to do either private or public construction; and the establishment of a sound credit structure whereby the operations of contractors may be checked up with regard to the manner in which credit

operations are being currently met.

Prequalification

It was reported that a total of 14 States, in addition to many municipalities, have adopted the principle of prequalifying bidders and that a standard enabling act providing for prequalification is to be pushed at forthcoming legislative sessions in other States. The development of the Bureau of Contract Information was extensively analyzed as marking the definite advancement of the program to enable those responsible for the awarding of contracts, the granting of credit or the writing of surety bonds to determine the past performance of all contractors so that irresponsibility and cut-throat competitive practices may be curtailed.

Definite strides also were reported on the program for establishing a standardized method of stabilizing credit throughout the country. The board was told that a series of conferences held with other national organizations in the construction field during the past few months has resulted in the formation of a co-operative organization, the Allied Construction Industries of America, for the sole purpose of developing credit stabilization. Although many details of this organization are yet to be worked out, it was reported that the objectives and fundamentals have been approved by all leading national associations of those agencies connected with the construction industry, and that the exertion of its influence will be felt in the near future.

In three fields of endeavor reports made to the Executive Board indicated, Mr. Harding said, that progress had been retarded due to difficult obstacles or to circumstances as yet beyond the control of organized general contractors. These are the establishment of a sound merchandising structure; a constructive solution to the menace of prison labor in construction; and construction acceleration.

"The program of the Associated General Contractors for the acceleration of construction," Mr. Harding stated, "has not yet received the consideration and support it is entitled to by all the other factors involved, and recent events in connection with the formation of Secretary of Commerce Lamont's Permanent Conference on Construction and President Hoover's planning committee on Home Building and Home Ownership give promise of an early acceptance of this program which the association believes will be the key to increasing business volume, but in insuring that increased volume will be performed on a sound contract basis."

be amended to say "Sole owners of property building structures thereon for their own use; provided, however, that persons, etc. who build structures for speculation or for sale and not solely for their personal occupation, shall be deemed contractors under the terms of this Act."

3. Section 2, subdivision (f), eliminate. (The \$200 exemption clause).

4. Section 4. Provide some method for the issuance of a list of licenses, at least annually, within a specified period, and for the issuance of supplements thereto weekly, to be placed in specified localities. If this adds materially to the cost of the Department's operation, the license should be increased to cover it. The supplements should contain notations of cancellation, revocation, suspensions and other changes in status of licenses.

5. Section 5. The fees collected by the Department should remain under the control of the Department for future operation, subject only to the control of the Legislature.

6. Section 9. There should be added to the cause of discipline at least one other, to-wit: Section "(5) Failure to keep true books of account."

This is a fundamental rule of bankruptcy practice and it seems to me incredible that this provision was stricken out of the first draft of the Act which I made. No person has any business in organized business society dealing with the public as a contractor, unless he keeps a record of his business transactions.

7. I would suggest another change in Section 9, to-wit: that the registrar should not even suspend a license without issuing an order to show cause, permitting the licensee to appear and make at least a perfunctory showing on his own behalf. I am afraid that without a change in the structure of Section 9 that it might eventually be declared unconstitutional if the question is squarely presented, as depriving a person of a property right, without due process of law.

8. Section 12 could be very much strengthened if a thought expressed about as follows could be added to it:

"Subdivision (1) Any person, firm, corporation, etc., acting in the capacity of a contractor, or conspiring, aiding, abetting, conniving, participating or assisting another person, firm, etc., in any violation of any provision of this Act, or knowingly violating the proceeds of the violation of any portion of the Act, shall be guilty."

If some changes along this theory could be made in Section 12, it would have a profound effect in reaching, on the theory of conspiracy, cheap finance companies and unethical so-called realtors, who in the first and second and third grade contractors to do their dirty work, letting the contractor take his punishment if needs be, but sitting by and enjoying all sorts of commissions and usurious and irregular profit from various financial schemes. It would also reach owners, naturally, who used irregular contractors with the same idea. I commend this last thought to you as being of special importance.

Any large increase of building activity in the coming year is going to new difficulties, unless this Act is strengthened.

Timber in California was first commercially used for lumber in 1813 by the Russians, who emigrated from Alaska to Fort Ross. The first regular wharf saw set up for manufacturing lumber was at Bodega in 1835. Today the lumber mills of California manufacture annually two billion board feet of lumber, of which 400 million board feet is cut on the national forests of the State.

SUGGESTED CHANGES IN STATE LICENSE LAW FOR CONTRACTORS SUBMITTED

J. W. Morin, Pasadena attorney. In a personal letter to James F. Collins, director of the State Department of Professional and Vocational Standards, suggests certain changes in the Contractors' License Law. These suggestions, as published in the current issue of the Pasadena Builders' Exchange Bulletin, are published herewith.

We are frequently finding in practice that unlicensed persons or persons whose licenses have expired, make bids upon work and get their licenses afterwards. Close questions have arisen, particularly in school contract jobs, and under the language of the Act, it now permits persons to offer bids, even though not contractors, so long as they have a license by the time they execute an agreement to build. Most related laws licensing other classes, like lawyers, realtors, etc., prohibit one to represent themselves as such a person as holds a license, without actually holding the license.

2. Section 2, subdivision (e), might

1. Amend Section 1 so as to make it unlawful for any person, etc., either to engage in business "or to hold themselfs out to be a contractor," etc.

Building News Section

APARTMENTS

Sub-Contracts Awarded.
APARTMENTS Cost, \$150,000
SAN FRANCISCO. Pacific Ave. and
Baker Street.

Three-story steel frame and concrete
semi-fireproof apartments (six 6-
room apts.)

Owner and Builder—W. R. Voorhies,
Inc., 369 Pine Street.

Plans by A. D. Jaussen, 369 Pine St.
Plumbing—Scott Co., 243 Minna St.
Brick—Wm. Rainey, 323 Clementina.
Ornamental Iron—F. Kern & Sons,
517 6th St.

As previously reported mill work
awarded to Sunset Lumber Co., 400
High St., Oakland; structural steel to
McClintic-Marshall Co., 2050 Bryant
St.; reinforcing steel to Concrete En-
gineering Co., 1280 Indiana St.

Contract Awarded.
APARTMENTS Cost, \$50,000
SAN FRANCISCO. SE Pierce and Un-
ion Streets.

Three-story and basement frame and
stucco apartment with tile roof (5
5-room apts.) and 11-room resi-
dence with 3 baths (70x70-ft.)

Owner—W. J. Raffetto, 401 Columbus
Avenue.

Architect—Albert Schroeffer, 681 Mar-
ket Street.

Contractor—Fraccia & Truffelli, 2450
Chestnut Street.

There will be two separate entrances
to the building. Steam vapor heating
system and all modern conveniences.

Structural Steel Contract Awarded.
APARTMENTS Cost, \$175,000
SAN FRANCISCO. Green Street near
Octavia Street.

roof and elevator.

BONDS

SAN DIEGO, Cal.—Election of San
Diego County defeated the \$1,000,000
county and city office building bond
issue on Nov. 4. Architects T. C.
Kistner & Co. and Quayle Bros. pre-
pared sketches for the structure.

PORTERVILLE, Tulare Co., Cal.—
Lions Club has started movement for
a new firehouse and city hall building
in connection with the civic center
project. Preliminary plans for the
structures are being prepared by a
Fresno architect and will be submit-
ted for approval shortly. A bond
issue will probably be floated to
finance the construction.

FRESNO, Fresno Co., Cal.—Second
election is contemplated by the county
supervisors to vote bonds of \$500,000
to finance erection of a Class A annex
to the county courthouse, the previous
election failing to carry by a slight
majority. Preliminary plans for the
proposed annex have been prepared
by Architect W. D. Coates, Jr., Rowell
Bldg., Fresno.

CHURCHES

Plans Approved.

C. H. Foster, 1335 Broadway, Denver, Colo., wishes to represent San Francisco firm to introduce new and introduced articles and securities, in the Middle West territory.

Texas Cement Plant Has Phantom Railway

The Trinity Portland Cement Plant at Dallas, Texas, has a railway on which cars transfer cement rock from the excavating pit to the crusher apparently without the direction of human beings. Nobody rides on the cars which move from place to place, starting and stopping here and there, as if possessed of an intelligence of their own.

This unique railway operates by means of special electric equipment manufactured by the General Electric Company, and is known as the "riderless larry car" system, a method of remote control devised by that company. Each car is equipped with two 50-horsepower, squirrel-cage motors with electric solenoid brakes and no other control devices of any kind. Power is collected from the track system. Two operators, located where they can view the loading and unloading of the cars and their movements, govern the principal car movements.

Cement rock, from which the cement is made, is excavated at this plant over a mile from the crusher. An inexpensive haulage system was needed and General Electric engineers were called upon to solve the problem. The "riderless larry car" system, previously applied by General

Electric to another installation of a different type, was adapted for the purpose.

The track on which the cars run is divided into a number of sections insulated from each other. The motor-driven cars collect their energy from an extra rail system. Switches on control desks in front of the two operators control the delivery of energy to each section of track. By energizing all the sections, a car runs from one end of the track to the other. By energizing one section only, the car runs through that section to the next whereupon, the energy supply being cut off, the brakes automatically set and stop the car. Cars can be "inched" along, a short distance at a time, by applying energy to the section momentarily. Cars will not coast indefinitely on a dead track section because of the automatic action of the brakes. The direction of travel can be changed as simply as the current can be turned on or off—merely by throwing a switch.

Another interesting feature of the installation is the conservation of power made possible by the use of the squirrel-cage induction motors. An inherent characteristic of such motors is that they tend to maintain constant speed under all circumstances. On down grades gravity will not materially over-speed the cars but will be automatically converted into electricity, for the motors will then act as generators. The power thus generated will be fed back into the power system, helping to operate other cars on other sections of track.

The use of induction motors is new for such applications, direct-current motors usually being employed. The dump cars to which the electric drive is applied were built by the Atlas Car & Manufacturing Company.

H. H. Boomer, contractor, has filed suit in the Superior Court, San Francisco, asking \$586,059.90 from five surety companies that bonded the Robert C. Storrie & Co. contractors. He charges that he contracted to do the work with Storrie in the construction of the Buck's Creek power plant in Plumas county and that the extra work demanded by the company entitles him to the amount asked for.

BUTTE COUNTY, Cal.—Until Dec. 3, 2 P. M., bids will be received by State Highway Commission to construct steel bridge with concrete deck over the tracks of the Western Pacific Railroad and across north fork of Feather river at Pulga, composed of one 349.95 ft. steel arch span, one 82-14 ft. plate girder span, one 79.06 ft. plate girder span, two 62.51 ft. plate girder spans and one 44.02 ft. plate girder span.

PLACERVILLE, El Dorado Co., Cal.—Hector Williamson, Placerville, at \$2800 awarded contract by county supervisors to construct reinforced concrete girder bridge over Travers Creek, near Spanish Flat. J. W. Halterman, Willows, only other bidder at \$2748. Henry Lahiff, county surveyor.

PLACERVILLE, El Dorado Co., Cal.—Hector Williamson, Placerville, at \$900 awarded contract by county supervisors to construct reinforced concrete culvert over Brandon Creek near Latrobe. J. W. Halterman, Willows, only other bidder at \$1777. Henry Lahiff, county surveyor.

BERKELEY, Alameda Co., Cal.—Until November 18, 10 A. M., bids will be received by Florence E. Turner, city clerk, to construct culvert extension west of Euclid Ave. at Codornices Creek. Certified check 10% payable to city required with bid. Plans obtainable from city engineer on deposit of \$10, returnable.

BUTTE COUNTY, Calif.—As previously reported, bids will be received Dec. 3, 2 P. M., by State Highway Commission to construct steel bridge with concrete deck over the tracks of the Western Pacific Railroad and across north fork of Feather River at Pulga, composed of one 349.95 ft. steel arch span, one 32.14 ft. plate girder span, one 79.06 ft. plate girder span, two 62.51 ft. plate girder spans and one 44.02 ft. plate girder span. Project involves: 590 cu. yds. class A Portland cem. conc.; 92,000 lbs. reinf. steel; 1,540,000 lbs. struc. steel including erection steel; 35,000 lbs. cast steel 59,000 lbs. struc. in railing; 34,000 lbs. cast iron in railing; 1000 lbs. bronze expansion plates; 1 lot misc. items of work.

MERCED, Merced Co., Cal.—G. B. Cameron & Son, Merced, at \$2393 awarded contract by Merced Irrigation District to construct 50-ft. concrete bridge over Main Canal in district about 1½ mile northeast of the Six-Mile House.

STOCKTON, San Joaquin Co., Cal.—Until November 24, 11 A. M., bids will be received by Eugene D. Graham, county clerk, to construct bridge near the site of a former structure on the Waverly Road over Duck Creek. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from Julius Manthey, county surveyor.

SAN LUIS OBISPO COUNTY, Cal.—San Atlas Const. Co., Andrews Bldg. San Luis Obispo, submitted low bid to L. H. Gibson, district engineer, State Highway Commission, San Luis

Obispo, at \$9483.25 for constructing in San Luis Obispo County a timber bridge across San Carpelo Creek, about 11 miles north of San Simeon (V-SLO-56-A) to be repaired by constructing a timber truss span 75 ft. 10 in. long on concrete piers to replace some of the existing bents. The items are:

- (1) 350 cu. yds. struc. excav;
- (2) 110 cu. yds. class A conc. (struc.)
- (3) 85 cu. yds. class A conc. (placed by tremie);
- (4) 3800 lbs. reinf. steel;
- (5) 24,500 lbs. struc. metal;
- (6) 12 M. B. M. redwood timber (dense select all-heart struc.);
- (7) 25 cu. yds. conc. to be moved.

The bids were:
San Atlas Const. Co., (1) \$1.73; (2) \$19; (3) \$16; (4) 5.5c; (5) 12c; (6) \$180; (7) \$4.75; total \$9483.25.
Wm. Lane, (1) \$3.25; (2) \$19.70; (3) \$18; (4) 5.5c; (5) 9.35c; (6) \$253; (7) \$6.

COQUILLE, Ore.—Until Dec. 8, 10 A. M., bids will be received by W. A. Gilbert, Coos County Roadmaster, to construct bridge over the isthmus Slough on the Marshfield-Eastside County road near Marshfield. Alternate bids will be accepted as follows:

Alternate A—Will consist of 1435 lin. ft. of concrete viaduct, 113-ft. 4-in. steel deck truss and 165-ft. double leaf steel bascule involving:

- 5,400 cu. yds. excavation;
- 63,500 lin. ft. piling;
- 6,530 cu. yds. concrete;
- 800,000 lbs. metal reinforcement;
- 120,000 lbs. steel rail reinforcement;
- 542,000 lbs. structural steel;
- 150 sq. yds. asphalt plank;
- 63,000 lbs. machinery;
- 42 M.F.B.M. Port Oxford cedar lumber;
- Electrical equipment, concrete handrail, etc.

Alternate B—Will consist of 12,010 lin. ft. viaduct; 113-ft. 4-in. steel deck truss span; 165-ft. double leaf bascule and 225-ft. wood trestle involving:

- 5,700 cu. yds. excavation;
- 63,500 lin. ft. piling;
- 6,270 cu. yds. concrete;
- 120,000 lbs. steel rail reinforcement;
- 707,000 lbs. metal reinforcement;
- 452,000 lbs. structural steel;
- 150 sq. yds. asphalt plank;
- 63,000 lbs. machinery;
- 73 M.F.B.M. Port Oxford Cedar lumber;
- 225 lin. ft. trestle superstructure;
- Electrical equipment, concrete handrail, etc.

Alternate C—Will consist of 1,425 lin. ft. wood trestle; 113-ft. 4-in. steel deck truss 165-ft. double leaf steel bascule and 60-ft. concrete span, involving:

- 6,500 cu. yds. excavation;
- 60,500 lin. ft. piling;
- 4,626 cu. yds. concrete;
- 120,000 lbs. steel rail reinforcement;
- 182,000 lbs. metal reinforcement;
- 452,000 lbs. structural steel;
- 150 sq. yds. asphalt plank;
- 63,000 lbs. machinery;
- 210 M.F. B. M. Port Oxford Cedar lumber;
- 1,425 lin. ft. trestle superstructure;
- Electrical equipment, concrete handrail, etc.

Certified check or bidder's bond 5% required with bid. Plans on file in office of Associated General Contractors, 206 Sansome St., San Francisco, and Portland, Ore., and Spokane, Wash., and obtainable from County Roadmaster on deposit of \$5.

KERN COUNTY, Cal.—M. H. Slocombe, Los Angeles, at \$25,118 submitted low bid to State Highway Commission Nov. 12 to construct four timber bridges from 17 to 21 miles west of Wasco, one composed of twelve 19-ft. spans, one composed of four 19-ft. spans and two composed of two 19-ft. spans each, all on frame bents with concrete footings. Complete list of bids follow:

M. H. Slocombe, Los Angeles.....	\$25,118
G. A. Graham, Bakersfield.....	25,682
D. R. Dennis Constr. Co., San Diego	25,725
G. J. Ulrich Constr. Co., Modesto	26,714
Gist & Bell, Arcadia	29,735
J. F. Metzger & Son, L. A.	30,458
Fennel Constr., Inc., Sacto	31,872

Bids held under advisement.

MERCED, Merced Co., Cal.—T. A. Wayne, Atwater, at \$5,567 submitted low bid to county supervisors to construct six concrete bridges in Road District No. 3, over various canals.

MERCED, Merced Co., Cal.—E. K. Angle, Dos Palos, at \$8,200 submitted low bid to county supervisors to construct timber pile bridge on the Fremont Road in Road District No. 4. Taken under advisement.

BAKERSFIELD, Kern Co., Calif.—J. R. Thornton, county surveyor, preparing plans for a county bridge 140 ft. long, of timber construction.

SAN FRANCISCO.—California Toll Bridge Authority, headed by Governor C. C. Young, has approved preliminary data for the proposed San Francisco to Alameda County bay bridge and has directed the State Department of Public Works to file an application with the War Department seeking authority to construct the bridge.

DREDGING, HARBOR WORKS & EXCAVATIONS

SACRAMENTO, Cal.—M. J. Reeves, Sacramento, at \$10 cu. yd. awarded contract by city council to construct ditch at municipal airport and at 5.9c cu. yd. for grading runways.

HONOLULU, T. H.—Until Dec. 16, under Circular No. 19, bids will be received by U. S. Engineer Office, Honolulu, for dredging approximately 1,255,000 cu. yds. of material in the reserved channel, Honolulu Harbor. Specifications obtainable from above office on deposit of \$5.

MARYSVILLE, Yuba Co., Cal.—Until November 18, 3 P. M., under Circular Proposal No. 31-143, Specifications No. 2609, bids will be received by U. S. Engineer Office, California Fruit Bldg., for raising and enlarging levee near Alicia Station of the Sacramento Northern Railway, along the Feather river, approximately 2 miles south and downstream from the town of Marysville. Specifications obtainable from above office.

IRRIGATION PROJECTS

PARADISE, Butte Co., Cal.—J. E. Ely and Rufus J. Bean, 1211 Robinson St., Oroville, at \$2,353.94 awarded contract by Paradise Irrigation District

for the following improvements:

Furnishing:

- 50 ft. 30-in. 10-gauge riveted steel slip-joint pipe;
 - 40 bbls. Portland cement;
 - 20 cu. yds. sand, 40 cu. yds. gravel;
 - 20 ft. 4-inch standard screw-joint pipe;
 - 1 30-inch L. P. Heavy-Duty Gate, Calco model or similar, pedestal lift rod;
 - 5,000 ft. h.m. dimension lumber;
 - haul all materials from Magallana station to the job;
 - damming water from tunnel, installing 30-in. pipe welding 30-in. gate to pipe, filling tunnel and balance with loose rock, construct bulkhead, intake and screen support, etc.
 - building operating trestle and installing pedestal lift.
- F. H. Neilson, Orland, only other bidder at \$3305.

22

CALIFORNIA.—Following applications for permits to appropriate water were filed during the month of October with the State Department of Public Works, Division of Water Resources, Sacramento, it is reported by Edward Hyatt, state engineer:

Application 6810, (Stanislaus Co.) Turlock Irrigation Dist., care R. V. Meikle, Chief Eng., Turlock, 800 c.f.s. from Tuloume River, tributary to San Joaquin River, for power purposes.

Application 6811, (Stanislaus Co.) Turlock Irrigation Dist., care R. V. Meikle, Chief Eng., Turlock, 800 c.f.s. from Tuloume River, tributary to San Joaquin River, for domestic purposes. Est. cost \$50,000.

App. 6812 (Tulare Co.) A. E. Stegeman, Posey, Calif., for .022 c.f.s. from an unnamed spring tributary to Bull Run Creek for recreational purposes. Est. cost \$200.

App. 6813 (Santa Cruz Co.) Theo. J. Hoover, Swanton, Calif., for 5 c.f.s. from Waddell Creek tributary to the Pacific Ocean for irrigation purposes. Est. cost \$2500.

App. 6814, (San Bernardino Co.) Metropolitan Water District of Southern California, 222 South Hill Street, Los Angeles, 15,000 and 717,000 a.f. from Colorado River tributary to the Pacific Ocean for power purposes. Est. cost \$20,000,000.

App. 6815 (Riverside Co.) Chas. A. Buck, P. O. Box 111, Banning, Calif., for 0.25 m.i. from an unnamed spring tributary to Whitewater River watershed for irrigation and domestic purposes. Est. cost \$175.

App. 6816 (Humboldt Co.) Geo. H. Bergin, Weaverville, Calif., for 150 c.f.s. from Cedar Creek and Horse Linto Creek tributaries to Trinity River for mining purposes. Est. cost \$150,000.

App. 6817 (El Dorado Co.) H. A. Linthicum and W. D. Meyers, 137 Carmel Ave., Roseville, for 400 g.p.d. from an unnamed stream tributary to South Fork of American River, for domestic purposes. Est. cost \$200.

App. 6818 (Plumas Co.) Victor Challen care Cooper Challen Realty Co., Inc., 7 West Santa Clara St., San Jose, for 1 c.f.s. from Clear Creek tributary to El Creek, thence North Fork Feather River, for mining and domestic purposes. Est. cost \$100.

App. 6819 (El Dorado Co.) H. L. Fowler, Georgetown, Calif., for 12 c.f.s. from Pilot Creek tributary to Rubicon River, thence Middle Fork American River for irrigation purposes.

App. 6820 (Siskiyou Co.) Mrs. Ella E. George, Cecilville, Calif., for 30 c.f.s. from East Fork of Six Mile Creek tributary to East Fork of South Fork of Salmon River, for mining purposes. Est. cost \$5000.

App. 6821 (Los Angeles Co.) Gus Wissendorf, Sacramento, Calif., for 14 c.f.s. from Mine Gulch tributary to

Prairie Fork, thence San Gabriel River, for mining and domestic purposes. App. 6822 (Modoc Co.) Bidwell Elec. Co., care C. H. Aldridge, owner, Ft. Bidwell, Calif., for 1 c.f.s. from Harpers Creek tributary to Mokelumne River for power purposes. Est. cost \$1000.

App. 6823 (Amador Co.) Frank Du Bois, 2551 1st Ave., Sacramento, for 0.04 c.f.s. from "Crystal Spring" (formerly Twin Spring) tributary to North Fork of Mokelumne River, for mining and domestic purposes. Est. cost \$1,000.

CALIFORNIA.—Following permits to appropriate water were granted by the State Department of Public Works, Division of Water Resources, Sacramento, during the month of October, it is reported by Edward Hyatt, state engineer:

Permit 3579, Application 6727 (El Dorado Co.) Issued to Ira W. Kibby, Sacramento, for .01 c.f.s. from an unnamed spring for domestic use.

Per. 3580, App. 6686 (Mono Co.) C. E. Brodie, Los Angeles, for .01 c.f.s. from Rock Creek for domestic use. Est. cost \$175.

Per. 3581, App. 6603 (Merced Co.) J. L. Pirpo and J. Caraglio, Cressey, for 4 c.f.s. from Merced River, for irrigation on 329.7 acres. Est. cost \$2,200.

Per. 3582, App. 6479 (Merced Co.) C. L. Schmidt, Gustine, for .31 c.f.s. from Dry Creek, for irrigation on 25 acres. Est. cost \$500.

Per. 3583, App. 6695 (San Bernardino Co.) R. S. Irwin, Lucerne Valley, for 5 c.f.s. from two unnamed springs for irrigation and domestic use on 40 acres. Est. cost \$3,000.

Per. 3584, App. 6629 (Riverside Co.) O. J. McLaughan, Idyllwild, for 0.02 c.f.s. from an unnamed stream for irrigation and domestic use on ten acres. Est. cost \$2,000.

Per. 3585, App. 6730 (El Dorado Co.) Mrs. Ida Raught, et al, Kyburz, for .002 c.f.s. from an unnamed spring for domestic purposes. Est. cost \$200.

Per. 3586, App. 6547 (Mono Co.) Gladys Koebig, Los Angeles, for 200 g.p.d. from small unnamed stream for domestic use. Est. cost \$90.

Per. 3587, App. 6123 (Amador, Calaveras Counties) East Bay Municipal Utility Dist., Oakland, for 375 c.f.s. and 50,000 a.f. from Mokelumne river for power use.

Per. 3588, App. 6672 (Colusa Co.) Colusa Development Co. of Colusa, for 9.87 c.f.s. from Sacramento River for irrigation on 789.7 acres. Est. cost, \$20,000.

Per. 3589, App. 6696 (Colusa Co.) J. W. Browning, Grimes, Calif., Oct. 21, 1930, for 5.95 c.f.s. from Sacramento river for use for irrigation on 476.2 acres. Est. cost \$6690.

Per. 3590, App. 6574 (Stanislaus Co.) J. M. de Souza, Modesto, for 0.41 c.f.s. from Tuloume River, for irrigation on 33 acres. Est. cost \$1500.

Per. 3591, App. 5876 (Nevada Co.) Spanish Mining Co., San Francisco, for 15 c.f.s. from Poorman's Creek for use for power. Est. cost, \$11,000.

Per. 3592, App. 5812 (Lassen Co.) G. L. Kramer, Bieber, Calif., for 6.75 c.f.s. from Widow Valley Creek for irrigation and stock watering on 540 acres. Est. cost, \$3000.

Per. 3593, App. 4807 (San Bernardino Co.) Water Conservation Association of Riverside, for 250,000 ac. ft. per annum storage from Santa Ana River for irrigation and domestic use on 52,640 acres. Est. cost \$10,000.

Per. 3594, App. 6760 (Colusa Co.) M. E. Hastings, Maxwell, 1 c.f.s. from Stone Corral Creek for Irrigation on 81 acres.

Per. 3595, App. 6724 (Inyo Co.) Burnham Chemical Co., Westend, Cal. for .007 c.f.s. from Furness and Barnes canyons for industrial and domestic purposes. Est. cost \$10,000.

Per. 3596, App. 6736 (San Bernardino Co.) R. M. Hart of Pine Knot, Cal. for 0.014 c.f.s. from an unnamed

spring for irrigation and domestic use and fox raising. Est. cost \$500.

Per. 3597, App. 6527 (Sutter Co.) J. T. Cummins Hatch Co. of Knights Landing, for 5.96 c.f.s. from Sacramento River for irrigation on 476.75 acres. Est. cost \$7,000.

Per. 3598, App. 6692 (Mono Co.) Henry Heyman, Long Beach, for 200 g.p.d. from Rock Creek for domestic use. Est. cost \$300.

Per. 3599, App. 6752 (Trinity Co.) C. R. Delaney, Forest Glen, Calif., for 2.5 c.f.s. from Little Shasta Creek for mining and domestic purposes. Est. cost \$100.

MODESTO, Stanislaus Co., Calif.—Pacific Const. Co., 2235 E 7th Street, Oakland, was awarded contract at \$3,000 by the Modesto Irrigation District for placing 200 cu. yds. of concrete in sidewalks, weir, etc., of the district's upper main canal. Contracts for concrete aggregate were let as follows: Porter Sand & Gravel Co., 1,500 cu. yds. at \$1.55; Chas. D. Warner, 1,500 cu. yds. at \$1.55.

STREET LIGHTING SYSTEMS

SAN FRANCISCO.—Until Nov. 24, 3 P. M., under Proposal No. 652, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver 600 metal and 300 concrete Boulevard Lighting Standards. Specifications obtainable from above.

MACHINERY AND EQUIPMENT

HANFORD, Kings Co., Cal.—D. C. Williams, city clerk, instructed to advertise for bids to furnish tractor and scraper for use of city street department.

SAN FRANCISCO.—Until Nov. 28, 10 A. M., under Schedule No. 328-31-120, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish one combined steam and hand driven Steering engine, 5-in. x 5 1/2-in., Hyde or equal. Further information obtainable from above.

REDWOOD CITY, San Mateo Co., Cal.—Rix Compressed Air & Drill Co., San Francisco, at \$1861.80 awarded contract by city council to furnish one portable compressor for use of the city street department.

PHOENIX, Ariz.—Until Nov. 28, new bids will be received by the state highway commission (W. W. Lane, State Engr.), Phoenix, for furnishing five four-wheel drive type trucks, five V-type snow ploughs, one large crawler type tractor, one medium size crawler type tractor and one rotary type snow plough for tractor. All bids received Oct. 30 were rejected. The items bids on were:

SCHEDULE NO. 1

- 5 trucks complete with bodies and snow ploughs, f. o. b. Ash Fork.
- Alternate No. 1—5 truck chasses, complete, f. o. b. Ash Fork.
- Alternate No. 2—5 hydraulic hoists and dump bodies, f. o. b. Ash Fork.
- Alternate No. 3—5 snow ploughs, complete, f. o. b. Ash Fork.

SCHEDULE NO. 2

- One crawler type tractor, complete, f. o. b. Ash Fork.

SCHEDULE NO. 3

- One crawler type tractor with snow plough, complete, f. o. b. Phoenix.
- Alternate No. 1—One crawler type tractor, complete, f. o. b. Phoenix.
- Alternate No. 2—One snow plough,

complete, f. o. b. Phoenix.

The bids follow:
Nell B. McGinnis, Phoenix—Coleman model D-40X—No. 7, \$6090 ea., alt. 1, \$5000; No. 3, Monarch No. 35, \$5702 each; alt. 1, \$2625 ea.; alt. 2, Snow King model 770, \$2077 ea.

Arizona Tractor and Equipment Co., Phoenix—No. 1, alt. No. 3, La Plant model K-78, \$23.40 ea.; No. 2, cat. "60," \$4768.30 ea.; No. 3, alt. 2, cat. "30," \$2772 ea., alt. 2, La Plant SV-30, \$1994 each.

Pratt-Gilbert Hardware Co.—No. 2, Bates "30," \$4975 ea.; No. 3, alt. 2, \$2750 ea., for Bates "35."

Four Wheel Drive Sales Co., Cliftonville, Wis.—No. 1 FWD Utility Six without snow ploughs, \$5639.15 ea.; alt. 1, \$5032; No. 2, alt. 3, Wausau model 200X, \$695 each.

Ronstadt Hardware & Machinery Co., Tucson—No. 2, alt. 3, Baker model 37, \$741 each.

L. D. Henman Motors, Phoenix—G. M. C. model T-90—No. 1, \$6816.95 ea.; alt. 1, \$5553.55 ea.; alt. 2, St. Paul GUB \$630 ea.; alt. 3, Good Roads model 29, \$768 each.

Mine and Smelter Equipment Co., Phoenix—No. 1, alt. 3, Rightway, \$523 and \$744; No. 3, alt. Rightway truck ploughs, \$2533 each.

Lindsay, Tulare Co., Cal.—City trustees contemplate bond election for approximately \$2500 to finance purchase of motor ambulance.

RAILROADS

MODESTO, Stanislaus Co., Cal.—Tidewater Southern Railroad plans to expend \$150,000 or more in the Stanislaus district including the construction of freight sheds, repairs to roadbeds, laying heavier rails and improvement of freight station facilities.

LODI, San Joaquin Co., Calif.—Chamber of Commerce has appointed a committee to confer with officials of the Southern Pacific Railroad with regard to erecting a new freight and passenger depot in Lodi.

SAN FRANCISCO—Following bids received by city purchasing agent to furnish and deliver rolled steel car wheels for Municipal Railway:

(1) 500 34-in. wheels; (2) 48 28-in. wheels.

American Steel Foundry, 525 Market St., (1) \$30; (2) \$27.

Pacific Coast Steel Co., (1) \$34.70; (2) \$27.70.

Columbia Steel Co., (1) \$35; (2) \$28.50.

Standard Steel Works Co., (1) \$38;

FIRE ALARM SYSTEMS

OAKLAND, Alameda Co., Cal.—Following bids received by City of Oakland to supply traffic signal timers, for the city of Oakland.

(1) furnish and deliver 20 signal timers; (2) to furnish and deliver 5 traffic signal secondary timers.

General Electric Co., Russ Bldg., San Francisco, (1) \$660; (2) \$990. Eagle Signal Service Corp., 939 Market St., San Francisco, (1) \$676; (2) \$800.

The Electrical Communication Co., 131 2nd St., San Francisco; the Crouse Hinds Co., Sheldon Bldg., San Francisco, and the Graybar Electric Co., 9th and Howard Sts., San Francisco, all submitted identical bids of (1) \$698; (2) \$840.

Bids held under advisement.

HANFORD, Kings Co., Calif.—City council plans purchase of new fire alarm whistle; estimated cost \$1,100. D. C. Williams, city clerk.

FIRE EQUIPMENT

PACIFIC GROVE, Monterey Co., Cal.—City votes bonds of \$15,000 to finance purchase of a motor fire truck

LINDSAY, Tulare Co., Cal.—City trustees contemplate calling an election to vote bonds of \$6000 to finance purchase of motor pumper for fire department.

RESERVOIRS AND DAMS

QUARRY HEIGHTS, C. Z.—Until November 29 bids will be received by Panama Canal Department, office of the Quartermaster, Quarry Heights, C. Z., for excavation for three 1,500,000-gal. concrete water reservoirs, the construction of reservoir No. 2 on Engineers Hill, Corozal, C. Z., and for the furnishing of all labor, material and equipment necessary to install a 16-in. cast iron water main from existing main at Corozal to proposed reservoir on Engineer Hill, including the 16 and 20-in. manifold at proposed reservoir to a point at Corundu river at station 96 plus 10, including all valves and fittings; deposit of \$25 required for plans, obtainable from above office.

PIPE LINES, WELLS, ETC.

TACOMA, Wash.—American Concrete Pipe Co., Tacoma, at \$50,712 submitted low bid to City Board of Contracts and Awards to furnish 11,459 lin. ft. 30-in. dia. concrete pipe and specials. Birchfield Boiler Co., Tacoma, low for electric welded pipe at \$46,628. Steel Tank and Pipe Co. second low for electric welded pipe at \$48,308, with an alternate bid of \$49,547. Taken under advisement.

SEWERS AND SEWAGE DISPOSAL PLANTS

PALO ALTO, Santa Clara Co., Cal.—Until November 17, 4 p. m., bids will be received by E. L. Beach, city clerk, to construct storm water sewers in Lytton Ave. between Waverly St. and Webster St. Certified check 10% required with bid. Plans obtainable from J. F. Byxbee, city engineer.

SEBASTOPOL, Sonoma Co., Cal.—City Engineer Mueller reports to city council the need for an auxiliary pump and other equipment in connection with the sewage disposal plant.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works completes specifications to sewer Detroit St. between Joost and Monterey Sts. Est. cost \$1,000, involving:

200 lin. ft. 12-in. V.C.P. sewer;
1 brick manhole;
4 12x6-in. Y or T branches.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works completes specifications to sewer Quint St. between Evans and Newcombe Aves. Est. cost, \$9300, involving:

258 lin. ft. 12-in. V.C.P. sewer;
2,386 lin. ft. 15-in. do;
96 lin. ft. 18-in. do;
96 lin. ft. 21-in. do;
32 lin. ft. 24-in. do;
10 brick manholes;
2 12x8 Y or T branches;
34 15x8-in. do.

BERKELEY, Alameda Co., Cal.—W. J. Tobin, 572 Balfour, Berkeley, at \$4,979 awarded contract by city council to construct sewer in Indian Rock Ave., from The Circle northerly to San Diego Road. Following is a complete list of the bids:
W. J. Tobin, Berkeley.....\$4,979
Robert McNair.....5,912
Oakland Sewer Const. Co.....7,677

NEWPORT BEACH, Orange Co., Cal.—Currie Engineering Co., 219 Anderson Bldg., San Bernardino, has completed and has presented to the city council plans for the new sewage disposal plant to be built at the mouth of the Santa Ana river. Estimated cost \$185,000.

MONTEREY, Monterey Co., Cal.—Until November 25 bids will be received by Quartermaster, Presidio of Monterey for extension of the water system and the construction of the drainage system at the Presidio of Monterey. Plans obtainable from Quartermaster on deposit of \$5.

SANTA BARBARA, Cal.—City declares intention (1124) to construct sewers in Mountain Ave., bet. Pedregosa St. and northwest line of Mountain View Terrace, involving vitrified sanitary sewer, appurtenances, and manhole; 191ft. Act. Protests, Dec. 4. E. B. Brown, city engineer. Geo. D. Geib, city clerk.

WATER WORKS

STRATFORD, Kings Co., Cal.—E. W. Redman, Fresno, at approximately \$20,500 awarded contract by Stratford Public Utility District to construct water distributing system involving 4-in. to 8-in. pipe; 30,000-gallon steel tank; hydrants, etc.

MONTEREY, Monterey Co., Cal.—Until November 25 bids will be received by Quartermaster, Presidio of Monterey, for extension of the water system and the construction of the drainage system at the Presidio of Monterey. Plans obtainable from Quartermaster on deposit of \$5.

PHOENIX, Ariz.—Until 10 A. M. Dec. 2, bids will be received by the city manager, Geo. H. Todd, for laying of pipe lines, together with appurtenances, from the Verde intake to and connections made with, the distribution system; also for a reinforced concrete lined reservoir and a water distribution system within the city of Phoenix. The system to be constructed consists of:

- (1) 31.5 miles supply line in sizes from 24-in. to 54-in. in dia.;
- (2) 8 miles of distribution system, 6-in., 8-in. and 12-in. in dia.;
- (3) one 20,000-gal. reservoir;
- (4) one detritor.

Bidder shall state in his bid the date he proposes to complete the contract. The award of contract or contracts shall be upon the basis of obtaining the maximum in efficient construction for the least expenditures. In comparing the bids, consideration will be given to the relative factors of safety, adaptability to the conditions, probable life, carrying capacity, and the cost of the various kinds of pipe or which proposals are submitted. Plans may be seen at the office of the city engineer, or copies may be secured by payment of \$10 for each of specifications and \$20 for each set of plans. Certified check for 5% of the bid must accompany each proposal. W. J. Jameson, city engineer. C. C. Kennedy, consulting engineer. Call Bldg., San Francisco.

QUARRY HEIGHTS, C. Z.—See "Reservoirs and Dams" this issue. Bids wanted for excavation for three 1,500,000-gallon concrete water reservoirs for reservoir construction and water main extensions.

SAN FRANCISCO—Until November 24, 3 P. M., under Proposal No. 657, bids will be received by Leonard S. Leach, city purchasing agent, 270 City Hall, to furnish underground brass fittings for the San Francisco Water Department. Specifications obtainable from above.

STREETS AND HIGHWAYS

SANTA CRUZ, Santa Cruz Co., Cal.—Until Nov. 24, 2 P. M., bids will be received by H. E. Miller, county clerk, to improve Palm Ave. from Lake Ave. to Watsonville city limits, including crossings, involving asphaltic macadam surface on 5-in. waterbound macadam base, cement concrete curbs and gutters. County Improvement Act 1921. Bond Act 1915. County will pay \$2,000 of cost from Pajaro Road Section 1 fund. Certified check 10% payable to county required with bid. Plans obtainable from County Surveyor Lloyd Bowman.

COCOONINO COUNTY, Ariz.—Until Dec. 2, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to grade 2.818 miles of Section C of Route 7, Oak Creek National Forest Highway, in Cocoonino National Forest, involving:

- 22 acres clearing;
- 149,000 cu. yds. excav., unclass.;
- 1,850 cu. yds. excav. for struc.;
- 143,600 sta. yds. overhaul;
- 2.818 miles finish earth graded roads
- 6,000 lin. ft. wood guard rail;
- 198 cu. yds. class A concrete;
- 156 cu. yds. class D concrete;
- 47,620 lbs. reinforcing steel;
- 920 cu. yds. cem. rubble masonry;
- 1,852 lin. ft. corrug. metal pipe;
- 147,000 lbs. structural steel;
- 940 cu. yds. hand laid rock embankment.

Plans obtainable from district engineer on deposit of \$10, checks for same to be made payable to the Federal Reserve Bank of San Francisco.

SAN FRANCISCO—Federal Const. Co., Call Bldg., at \$5,421 submitted low bid to Board of Public Works for paving at Municipal Airport. Complete list of bids follows:

Federal Const. Co.	\$5,421
C. B. Eaton	6,346
C. Harney	6,496
Fay Imp. Co.	6,989
A. G. Talsch	7,194
Meyer Rosenberg	7,581
J. P. Holland	8,050

TEHAMA COUNTY, Cal.—Nate Lovelace, 3433 N St., Sacramento, at \$99,765 awarded contract by U. S. Bureau of Public Roads, 461 Market St., San Francisco, to grade Section A, Route 21, Deer Creek National Forest Highway, in Lassen National Forest, Tehama County, 3408 miles, involving: 25.32 acres clearing; 137,500 cu. yds. excav. unclass.; 325 cu. yds. structure excav.; 14,045 sta. yds. overhaul; 3408 miles finishing; 140 sq. ft. crib face in place; 62 lin. ft. double 6x6-ft. log culvert in place; 818 ft. 18-in., 260 ft. 24-in., 32 ft. 30-in. and 276 ft. 36-in. C.M.P.; 344 cu. yds. hand laid rock embankment; 100 right-of-way monuments.

REDWOOD CITY, San Mateo Co., Cal.—Harranah Co., Standard Oil Bldg., San Francisco, at \$15,075 awarded contract by county supervisors to repair and pave a portion of Hillside Boulevard, formerly known as San Bruno Ave., in First Supervisorial District. Union Paving Co., Call Bldg., San Francisco, next low at \$15,922.

EUREKA, Humboldt Co., Cal.—U. S. Pipe and Foundry Co., Monadnock Bldg., San Francisco, awarded contract by city council to furnish and deliver 1,800 lin. ft. of 16-in. class B cast iron water pipe or equal with bell and spigot joint; f.o.b. wharf. Eureka. 35

SUTTER COUNTY, Cal.—N. M. Fall Porterville, at \$8860 submitted only bid to C. H. Whitmore, district engineer, State Highway Commission, Sacramento, Nov. 10, to grade and pave with Portland cement concrete, 0.3 mile near the county hospital in Sutter County. Bid held under advisement.

OAKLAND, Calif.—C. H. Purcell, state highway engineer, has recommended to the supervisors of Contra Costa, Alameda and Santa Clara counties a route for the proposed Richmond to San Jose bayshore industrial highway of Greater Oakland The recommended route is: From San Jose west of the present county road, approx. one mile; north skirting the bay to San Leandro; then north of the Oakland airport, skirting the Oakland industrial res.; thence to Fifth and Cypress Sts., Oakland, and from there

north to Richmond. At Richmond two branches are proposed, one to the connection with the proposed Richmond-San Rafael Bay bridge, the other to San Pablo Ave. and then e to the Carquinez bridge.

SAN FRANCISCO—C. B. Eaton, 715 Ocean Ave., at \$19,251 awarded contract by Board of Public Works to improve Cayuga Ave. from Onedia Ave. to Seneca Ave. and Seneca Ave. from Otsego Ave. to Alemany Blvd., etc., involving grading, armored sidewalks, 8-in. and 12-in. vit. clay pipe sewers, brick catchbasins 2-in. asphalt conc. surface pavement on 6-in. class F concrete base.

SAN FRANCISCO—C. B. Eaton, 715 Ocean Ave., at \$4,320 awarded contract by Board of Public Works to improve Alameda St. bet. Potrero Ave. and York St. and west line of York St. including intersections of Hampshire St., involving grading.

SAN FRANCISCO—E. J. Treacy, Call Bldg., at \$1,350 awarded contract by Board of Public Works to improve crossing of Delano Ave. and Mount Vernon Ave., involving armored concrete curbs, 2-course cement concrete sidewalks, 8-in. and 12-in. vit. clay pipe sewers, brick manholes, brick catchbasins, 2-in. asphalt conc. pave. on 6-in. class F concrete base.

SAN FRANCISCO—E. J. Treacy, Call Bldg., at \$1,666 awarded contract by Board of Public Works to improve crossing of Kirkwood Ave. and Mendall St., involving grading, armored concrete curbs, 1-course cement sidewalks, brick catchbasins, 2-in. asphalt concrete pavement with 6-in. class F concrete base.

SALINAS, Monterey Co., Cal.—City council declares intention (92) to improve Natividad St., bet. West Lake St. and Menke St., involving grading; hyd. cem. conc. curbs, walks; 5-inch hydraulic cement concrete paving. 1911 Act. Bond Act 1915. Hearing December 1. M. R. Keef, city clerk. Howard Cozens, city engineer.

CARMEL, Monterey Co., Cal.—Engineer Howard Cozens, Salinas, commissioned by city council to prepare plans to pave Sixth St., bet. Monte Verde and Mission, and of Monte Verde, Lincoln, Dolores and Mission Sts., bet. Sixth and Ocean Sts.

SAN FRANCISCO—Municipal Construction Co., Call Bldg., at \$2,250 awarded contract by Board of Public Works to improve 44th Ave. between Moraga and Noriega Sts. (where not) involving armored concrete curbs, vit. clay pipe sewers, 2-in. asphalt concrete surface with 6-inch class F concrete base.

BAKERSFIELD, Kern Co., Calif.—Until 5 P. M., Dec. 1, bids will be received by the city council for constructing sanitary sewers in blocks 241, 245 and 246, Bakersfield, formerly Kern, in District No. 609. The work involves:

- (1) 1333 ft. 6-in. cement sewer pipe;
- (2) 2 manholes;
- (3) 3 lampholes.

Estimated cost, \$1156. Act of 1911. V. Van Riper, city clerk.

APACHE COUNTY, Arizona—Until November 26, 2 p. m., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to supply and place crushed material for subgrade reinforcement on Sections G and H of Route No. 19, Clifton-Springville National Forest Highway, 11.32 miles in length, involving:

- 14,900 cu. yds. crushed rock or crushed gravel for subgrade reinforcement;
- 59,000 sta. yds. hauling crushed rock or crushed gravel.

Plans obtainable from engineer on deposit of \$10, returnable, checks for same to be made payable to Federal Reserve Bank of San Francisco.

SAN DIEGO COUNTY, Cal.—Until November 25, 2 p. m., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for grading Section B and placing selected material on Sections A and B of Route 75, Laguna National Forest Highway, in Cleveland National Forest, 10.36 miles in length, involving:

- 21 acres clearing;
- 28,750 cu. yds. excavation, unclassified;
- 200 cu. yds. excavation, for structures;
- 5,000 cu. yds. overhaul;
- 6.5 miles preparing roadbed;
- 1,096 lin. ft. corr. metal pipe in place;
- 19,000 cu. yds. selected material in place.

Plans obtainable from engineer on deposit of \$10, returnable, checks for same to be made payable to Federal Reserve Bank of San Francisco.

OAKLAND, Cal.—City council declares intention to improve Foothill Blvd., bet. Parker Ave. and Hollywood Blvd., and portions of Jones and Truman Aves., adjacent to Foothill Blvd., involving grading; curbs; paving; conduits; culverts; storm water inlets; etc. 1911 Act. City will pay 41% of total cost from Treasury. Hearing Dec. 4. Frank V. Merritt, city clerk. Walter N. Frickstad, city engineer.

HAYWARD, Alameda Co., Cal.—City council has started proceedings to pave Warren and Prospect streets, between Main and Simon Sts.

SAN FRANCISCO—Bureau of Engineering, Department of Public Wks completes specifications to improve Quesada St. bet. Griffith and Hawes Sts. Est. cost, \$1,200, involving:

- 125 lin. ft. armored concrete curb;
- 125 lin. ft. 6-in. V.C.P. side sewer;
- 3,125 sq. ft. asph. conc. pavement, 2-in. asph. conc. surf. on 6-in. class F concrete base.

SEBASTOPOL, Sonoma Co., Cal.—Until December 1, 7:30 P. M., bids will be received by F. G. McFarlane, city clerk (195-A) to improve one block of Burnett St., involving grading, 5-in. concrete pavement, concrete curbs. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

SAN FRANCISCO—Until Nov. 19, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to construct Section A of the Alemany Blvd., involving:

- (1) 100,000 cu. yds. excavation;
- (2) 2 brick manholes;
- (3) 100 lin. ft. 12-in. V.C.P. sewer;
- (4) 170 lin. ft. 18-in. do.;
- (5) 70 cu. yds. class B conc. in 18-inch sewer encasement, piers and tunnel bulkheads;
- (6) 7,000 lbs. bar reinforcing steel;
- (7) 600 lin. ft. 18-in. corr. pipe;
- (8) 1 redwood intake.

Estimated cost \$55,000. Cert. check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

PACIFIC GROVE, Monterey Co., Cal.—Until November 20, 7:30 P. M., bids will be received by Elgin C. Hurlbert, city clerk, (3276) to improve 3rd, 7th, 8th, 9th and 10th Sts. between Ocean View and Lighthouse Aves., and 4th and 5th Sts. bet. Central and Lighthouse Aves., involving cement concrete curbs and gutters; oil macadam surfacing; conc. catch-basins, 4-in. vit. clay lateral sewers. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

ALAMEDA, Alameda Co., Cal.—City council declares intention (96) to improve Third St., bet. Pacific Ave. and Maple St., involving grading; conc. curbs, gutters, walks; corrugated iron culverts; 6-inch oil macadam pavement. 1911 Act. Hearing Dec. 3. W. E. Varcoe, city clerk. Burnett Hamilton, city engineer.

ALAMEDA, Alameda Co., Cal.—City council plans to widen Park Ave. bet. Central and Santa Clara Aves., by cutting down sidewalk walks 6 ft. on each side. Total estimated cost \$21,967 of which \$5767 would finance paving and \$16,200 for moving and reconstructing buildings.

ALAMEDA, Alameda Co., Cal.—J. P. Holland, Inc., 1834 McKinnon Ave., San Francisco, at \$175 cu. yd. awarded contract by city council to grade Industrial Highway.

SAN FRANCISCO—C. L. Harney, Call Bldg., at \$7,735 awarded contract by Board of Public Works to improve uncompleted portions of 26th Ave. bet. Ortega and Pacheco Streets; 41st Ave. bet. Noriega and Ortega Sts., etc., involving armored concrete curbs side sewers, 6-in. conc. base pavement with 1½-in. asph. conc. surface.

SAN FRANCISCO—G. A. Love and Son, 395 Collingwood Street, at \$700 awarded contract by Board of Public Works to construct artificial stone sidewalks in portions of Saturn St., 15th St., Ord St., etc.

REDWOOD CITY, San Mateo Co., Cal.—County Supervisors have started proceedings for sewer construction to meet the needs of Daly City and Colma in the north end of the county. Estimated cost \$146,000. George A. Kneese, county surveyor.

LOS ANGELES, Cal.—Consolidated Steel Corp., 1200 N. Main St., awarded contract to furnish and install one 50,000 gallon gravity tank, two 9000 gallon pressure tanks and one 5000 gallon house tank in the class A lab-

oratory building to be erected on 2nd St. bet. San Pedro St. and Central Ave., for the Brunswick Drug Co. MacDonald & Driver, general contractors, 311 Board of Trade Bldg. A. C. Martin, architect, 228 Higgins Bldg.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on December 3, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Butte County, a steel bridge with concrete deck over the tracks of The Western Pacific Railroad Company and across North Fork of Feather River at Pulga (11-But-2-C), composed of one 349.95-foot steel arch span, one 821.4-foot plate girder span, one 79.06-foot plate girder span, two 62.51-foot plate girder spans, and one 44.02-foot plate girder span.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DIVISION OF HIGHWAYS

C. H. PURCELL,

State Highway Engineer.

COST OF FRAME HOUSE 13% LESS TODAY THAN YEAR AGO

The cost of building a six-room, story and a half frame house is 13 per cent less today than it was a year ago, according to figures obtained by the Marine Midland group of eighteen New York State banks. The actual figures were \$4,349.46 today, as compared with \$5,013.33 in 1929. This comparison was obtained by the banking group in the course of a survey of commodity prices, the results of which are being published in advertisements over the signatures of the member banks in the principal newspapers of the state. The purpose of the campaign is to help stimulate business by bringing to the attention of the public the opportunities for economical buying offered by present prices.

Not only is there a saving of 13 per cent in building a small house now as compared with a year ago, but the items most closely affecting repairing or remodeling jobs show savings as high as 25 per cent. The various items going into the total cost of the house are given in the banking group's survey report as follows:

	Today	1929
Masonry (including excavating)	\$595.50	\$701.39
Lumber & millwork	2044.66	2407.69
Plastering	325.00	335.00
Plumbing	475.00	482.00

Heating	210.00	250.00
Painting (interior and exterior) ..	335.00	400.00
Hardware (rough and finished fixtures) ..	77.00	97.55
Electrical fixtures (including wiring) ..	148.00	178.00
Tile	34.00	42.00
Gas Service	34.45	34.45
Shades	20.00	30.00
Miscellaneous (surveys, ins., permits) ..	50.85	50.85

\$4349.46 \$5013.33

The survey undertaken by the banking group will include, besides the building industry, the more important merchandise lines such as food, men's women's and children's clothing, furniture, household equipment, and automobiles. In each case the prices prevailing today will be compared with those of a year ago and the advertisements giving the results of the survey will point out the advantages of buying at the present time.

"Business recovery is being retarded by the false economy of the people whose incomes have not been affected by the depression," George F. Rand, president of the Marine Midland Corporation, stated. "Renewed buying by those who have the money available should stimulate business all along the industrial lines."

FRENCH ARCHITECT, WINNER OF SCHOLARSHIP, TO STUDY AIRPORTS

Award of the French traveling scholarship of the American Institute of Architects to Pierre Mathe of Paris is announced by Dr. Charles Butler of New York, chairman of the Institute's Committee on Education.

M. Mathe, who is twenty-eight years old, will tour the United States under the auspices of the Institute. Airports will be his chief field of study.

M. Mathe, who was chosen by a committee of leading French architects, has already won the Second Grand Prix de Rome, and still has two more opportunities to compete for the first prize. He has finished his training at the Ecole des Beaux Arts, and is already engaged in active practice, specializing in the design of airports in association with M. Martin, architect of the Midi Railroad in the Airport Branch of the Societe d'Appareillage et de Specialites Electriques.

He has studied airports of Germany, Holland and England, and, Dr. Butler's announcement pointed out, will be in a position to draw interesting comparisons between European and American methods of airport installation. The company for which he is architect has already completed plans for a number of airports to be constructed in 1931, of which that at Cannes on the Riviera is the most important.

M. Mathe superintended the construction of the new Casino at Dinard and various apartment houses in Paris. In association with M. Tatout, one of the best known of the successful younger architects of Paris, he took part in the competition for the League of Nations Building in Geneva.

The French traveling scholarship was established by William Adams Delano and his partner, Chester H.

Aldrich of New York, both fellows of the Institute. Mr. Delano, a former president of the New York Chapter of the Institute, is a member of the National Fine Arts Commission.

The French committee of selection was composed of Andre Arfvidsen, chairman, and Camille Lefevre, Georges Gromot, Auguste Pellechet, and Gustave Jaumes. Arfvidsen, Lefevre and Gromot are honorary corresponding members of the American Institute of Architects.

M. Arfvidsen, well known in America, is the architect for the new office building of the National City Bank in Paris, and M. Lefevre is architect of the Louvre. M. Pellechet, architect of the new Zurich Insurance Company building on the Grands Boulevards in Paris, has just been awarded the Grand Medaille of the Societe Centrale in Paris.

M. Jaumes, who in recent years has devoted himself especially to decoration, is known in Philadelphia for his great tapestries of the departure of the American troops for the war hung in Independence Hall, and for the tapestry of the Rivers of France in the salon of the steamship Ile de France. He has just been selected to design four large tapestry panels in the new French Embassy in Washington. M. Gromot is well known to many American students as head of a successful atelier of the Ecole des Beaux Arts.

The French scholarship plan, a development of the Institute's program of international relations, was initiated as an experiment three years ago by Julian Clarence Levi of New York, and was administered by a committee of which Mr. Levi was chairman. Mr. Delano and Mr. Aldrich will continue the scholarship under the administration of the Institute's Committee on Education.

For somewhat over a year we have been facing declining activity, already lasting longer than the average major depression, says the monthly bulletin of the La Salle Extension University. Enough time has elapsed to enable the necessary readjustments leading to a recovery to be worked out. Aggressive leadership now can drive away the pessimism which is as much unjustified by the facts of present conditions as was the exuberant optimism of a little over a year ago.

Much is now being done to hasten recovery. Business men are planning their budgets for next year with confidence. Many are taking this opportunity to improve plants and equipment. Bankers are contributing their experience to the wise solution of the complex problems of modern business. The Government is co-operating in helpful ways. Even more remains to be done.

Usually sentiment is least hopeful at the later stages of a decline when the evils of the last boom have already been largely remedied and conditions are right for an upswing to normal. The evidence indicates we are in that situation now. The need, therefore, is for a clear recognition of the facts and for courageous action with leadership which will hasten the return of prosperous conditions once more.

We have experienced the discipline of falling prices and depression. We realize that success and profits come only by conscientious work, careful planning, economical operations, and

correct management policies. The knowledge necessary to restore prosperity is available—not the artificial show of prosperity in 1929, but a planned prosperity with production nicely balanced to normal, sensible consumption requirements.

We have lately had too much enthusiastic pessimism. There is no evidence to indicate that America's period of growth has ended. By aggressive leadership both in eliminating the weaknesses of the past such as overproduction, inflation, speculation rather than analysis and research and in initiating wiser business policies for the future we can quickly pull ourselves out of our difficulties. Normal conditions will return when we bring them back by our own effort's.

Now is the time for action.

A CONSTRUCTIVE PROGRAM OF ACTION FOR BUSINESS LEADERS

1. Plan budgets for next year with hopeful confidence.
2. Push public work and institutional building, large and small, in all communities.
3. Modernize plant, machinery, and equipment now while costs are lower. Be ready for recovery with an efficient organization.
4. Adopt aggressive, effective advertising and sales methods to revive business.
5. Co-operate with the stock and produce exchanges in preventing the disastrous effects of destructive pessimism.
6. Oppose the proposed 25 per cent increase in first-class postal rates which would handicap business communication and restrict direct-mail sales promotion.
7. Work out constructive measures for restoring the purchasing power of agriculture.
8. Use every means to stimulate foreign trade.
9. Increase employment by providing useful work in the home, office and shop.
10. Bankers to help by generous support to worthy enterprises.
11. Submerge demagoguery and petty politics and give real statesmanship a chance.
12. Be optimistic. The time for positive action is here.

ROOF AIRPORTS PLANNED FOR ENGLAND

England is planning an extensive system of "roof" airports to be constructed in London, Manchester, Liverpool, Bristol, Leeds, Newcastle and Cardiff. Each of these ports, it is estimated, will cost \$6,500,000.

They will be constructed of steel, and contain six stories in their height of 130 feet. Each roof port will have an area of 1800 feet on each side. Arcades and shops, car parks and other offices on the second, third and fourth floors. The fifth floor will contain offices, reception rooms and hangars and workshops for planes which will land on the roof above.

"The air ministry is emphatic in getting these big buildings up in every city," says A. J. Roach-Cuming, one of the engineers on the job. "They believe it is the only possible solution for the aerionizing of Britain, the present airdromes being too far from the cities which they serve."

Working without a local license, permit or bond, R. H. Evans and A. F. June, both of Oakland, were fined \$25 each when they pleaded guilty to plastering an addition to a house in San Leandro. Complaint was made by R. Nikirk, city building inspector.

A report filed with the Los Angeles County Board of Supervisors by John E. Reckhold, county surveyor, for the fiscal year ended June 30, shows that public improvements, including sanitary sewers, storm drains, water works and lighting systems, in the county handled through his office, completed or under way, involve more than \$10,500,000. The largest project, plans for which are now being prepared, is the proposed drainage system in the South Side Drainage District, between Los Angeles City and the harbor district, estimated to cost about \$8,900,000.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

SAN JOAQUIN POWER ANNOUNCES \$7,392,000 CONST. PROGRAM

With construction scheduled to start next week on new transmission lines in the Fresno district at a cost of approximately \$873,000, the San Joaquin Light and Power Corporation announces plans for the construction of a \$540,000 substation on the site of its new \$4,610,000 steam plant at Herndon.

This new project, together with the power lines, steam plant and \$1,370,000 for new natural gas mains to serve the steam plant and communities north to Merced, bring the expenditures of the Pacific Gas and Electric Company and the San Joaquin Light and Power Corporation for new improvements in the San Joaquin Valley during the next twenty months up to \$7,392,000.

The new substation at Herndon will be equipped to handle voltages of both 110,000 and 220,000 out of the 70,000 horsepower steam-power generating plant. Harold K. Fox, chief construction engineer of the San Joaquin Light and Power Corporation, will have charge of the work.

The transmission line improvements include a high-power transmission line between the steam plant and Belota, a few miles east of Stockton, where connections will be made with a Pacific Gas and Electric line now under construction between the Salt Springs project on the Mokelumne River and Newark, near the coast.

This new line will make possible the exchange of power between the San Joaquin and Pacific Gas and Electric generating plants.

Additional lines will extend southward via Ashlan and Sanger substations to Corcoran substation. The line will consist of a 220,000-volt circuit, 60 miles in length, and will be strung on towers of the present line between Wilson substation, near Merced, and the Prughton substation, near Sacramento.

The present line between the Wilson substation and the Ashlan substation will be increased from 110,000 volts to 220,000 volts, making a continuous 220,000-volt tie line between the new steam plant and the Pacific Gas and Electric system. A second circuit to operate at 110,000 volts will be added to the existing towers between Herndon and Ashlan, and from Ashlan substation to Sanger, a distance of 14 miles. A third circuit is to be added to the existing 43 miles of towers between Sanger and Corcoran greatly increasing the capacity of the feeders. This project, together with necessary substation equipment, will cost \$293,000.

Dimensions, load data and list prices of New Departure ball bearing are given in a 62-page data book published by the New Departure Mfg. Co., Bristol, Conn. A feature of the bulletin is a convenient thumb index.

Engineer's Permit Is Not a License To Practice Architecture

Recently the California State Board of Architectural Examiners received a letter from a Los Angeles architect saying he had heard rumors that structural design was to be eliminated from the written examinations given by the board of applicants for architects licenses; also that several engineers with whom he had talked, having been granted state licenses as civil engineers, were of the opinion that they were structural engineers and as such had opened offices with the expectation of designing buildings. They were of the opinion, the letter stated, that being licensed engineers they were privileged to practice architecture under the title of "structural engineer."

Such ideas are not only erroneous, according to A. M. Edelman, secretary of the State Board of Architectural Examiners (Southern District), but it is the intention of the board to take action against any engineer attempting to practice architecture without an architect's license. Mr. Edelman made the following emphatic statement regarding the matter.

"Relative to the elimination from the written examination for applicants of 'structural design and strength of materials', please be advised that the third day of the written examination is devoted to these subjects, and there never was any desire or consideration on the part of the State Board of Architectural Examiners to eliminate them from their examination. On the contrary, strict observation is made to the markings of the applicant's qualifications on those subjects.

"Regarding the eligibility of civil engineers to practice architecture, please be advised that where a person has been licensed as a civil engineer, he is not entitled to practice architecture under the provisions of the State Act Regulating the Practice of Architecture, or of the State Act Regulating the Practice of Civil Engineering, and any one doing so, is subject to the penalties prescribed under the Architect's Act if found guilty.

"It is the intention of the State Board of Architectural Examiners to bring action against all persons who are practicing without a license, or who are putting out any sign, card or other device which might indicate to the public that they are qualified to practice architecture under a civil engineer's license."

Announcement is made of a proposed highway between the Mexican border and Ensenada at a cost of \$1,000,000 by capitalists interested in the promotion of a new hotel at the Mexican seaport. The syndicate financing the hotel is said to be headed by Joseph Mesmer of Los Angeles. The highway will probably be built under some arrangement with the government of Lower California.

GENERAL HELD FOR DAMAGES CAUSED BY THE SUB-CONTRACTOR

"A" contracted with "B" to put a refrigerating system in A's warehouse. B subcontracted the work to C, who exercised an independent employment. The court recently held that B, by force of the contract with A, is liable to A for damages resulting to A for the negligence of C in doing the work.

In the case of H. W. Van Slyke Warehouse Co. v. Vilter Mfg. Co., Sept., 1930, 58 W. 2d 471, Wash., the Vilter Co. had contracted to place a refrigerating system in the Van Slyke Warehouse Company's building at Seattle. The pipes used in the system had to be welded together with an oxy-acetylene torch. The Vilter Co. subcontracted the work to F. A. Suren & C. I. Drew, partners, who attempted welding a joint of pipe together so close to a wooden wall that the building caught fire and was badly damaged. The Vilter Co. claimed that Suren & Drew were independent contractors and therefore only Suren and Drew could be liable.

The Supreme Court said: "Where work is inherently or intrinsically dangerous in itself and will necessarily or probably result in injury to third persons, unless measures are adopted by which such consequences may be prevented a party will not be permitted to evade responsibility by placing an independent contractor in charge."

PLASTERERS MEET IS SET FOR FRESNO

The Executive Board of the California State Conference of Master Plasterers' Associations in an Executive Board meeting at Fresno last week, voted to hold the Ninth Annual Convention in that city on Feb. 12, 13 and 14. In the past, the conventions have been held on Monday, Tuesday and Wednesday, but the ninth annual gathering will be held on Thursday, Friday and Saturday. Committees are already busy making arrangements for the Convention.

Joseph E. Young, President of the Conference, presided at the Executive Board meeting and other representatives were: M. E. Summers, First Vice-President, Fresno; George Padgrift, Los Angeles; Lew Hughes, Pasadena; Sydney James, Southwest Chapter; Frank Clausen, Oakland; Fred Young, Los Angeles; W. A. Keen, Glendale; N. L. MacKenzie, Fresno; S. L. Ford, Long Beach; L. Ludlow, Santa Monica; W. B. Scollan, Sacramento; D. R. Wadle, Secretary, Los Angeles.

Proper selection of electrodes for various types of welding is facilitated by the information contained in a recent bulletin GEC-93 issued by the General Electric Co., Schenectady, New York.

BASIC PRINCIPLES OF CONCRETE MAKING COORDINATED

By JOSEPH A. KITTS
Consulting Concrete Technologist, San Francisco

1. ABSOLUTE VOLUME THE BASIC MEASURE OF INGREDIENTS.

INTRODUCTION

The purpose of this series of articles is to present the first coordination of the various fundamental principles of concrete mixtures and technology of production discovered by Thacher, Feret, Fuller, Abrams, Talbot, the writer, and other past and contemporary workers in concrete research.

Determination of the basic principles of concrete mixtures has been a very abstruse subject of research involving the expenditure of many millions of dollars and resulting in many competitive theories, and a dearth of agreement among concrete specialists. Today, withal, the lay engineer, and contractor, is lost between impractical theory and inadequate practice. Today's most troublesome construction problem is how to make good concrete.

Modern progress has not been made in the study of concrete mixtures and the explanation is that modern thought has not been applied to it. Concrete is an ancient material and a heritage of ancient ideas surrounds it. This heritage has reacted to prevent modern interpretation and coordination of the fundamental principles developed by the many workers in modern concrete research.

Concrete, if made honestly and understandingly, is a durable material peculiarly suitable in numerous qualities for vast modern requirements and uses. However, there have been and continue to be serious failures in the use of concrete, failures in strength, impermeability, durability, resistance to wear, ice, salt water, etc. Concrete failures are often due to unscrupulous omission of cement and to poor design and workmanship. On the other hand failures often occur, despite the most scrupulous care, because the principles of concrete making are not wholly understood. The fundamental principles of mixtures are not fully established and generally accepted matters of current knowledge. The quest of fundamental principles of mixtures has been and continues to be a most abstruse subject of research and there are almost as many controversial theories as there are specialists in concrete making.

It is proposed, herein, to harmonize and coordinate those theories which have proven to be fundamental, and with due credit to the author, when known. This coordination presents the following major items of new progress:

(1) Development of a coordinated, systematized and expedient field and laboratory procedure of pretesting materials and concrete;

(2) THE USE, PRACTICALLY AS WELL AS TECHNICALLY, OF ABSOLUTE VOLUME AS THE BASIC MEASURE OF PROPORTIONS (the most basic of all principles of proportioning);

(3) Measurement of absolute volumes of materials by weighing, by loose-moist volume, or by inundation;

(4) Discovery of the LAW OF THE OPTIMUM GRADING MODULUS for any maximum size of aggregate and cement content;

(5) Elaboration of the Fuller, Talbot and other grading equations for aggregate mixtures;

(6) Development of an expedient ALGEBRAIC METHOD of determining proportions of three, four, five or more sizes of aggregates for grading to a given graphical or mathematical curve;

(7) Discovery of the LAW OF THE OPTIMUM CEMENT CONTENT for any maximum size of aggregate and slump and strength of concrete;

(8) Elaboration of the Abrams law of the water-cement ratio for any strength;

(9) Elaboration of the Thacher law of the sand-cement ratio for any strength;

(10) Appreciation of the Voids and Density theories of proportioning;

(11) Discovery of the LAW OF THE OPTIMUM SLUMP or flow (workability) for any maximum size of aggregate;

(12) Elaboration of the Feret theory into the law of yield of combinations;

(13) Development of the physico-mathematics of materials and mixtures, empirical equations, and a complete calculation method of proportioning;

(14) Coordination of these laws and developments for practical use in preliminary, routine, and research tests and for manufacturing control of production; and,

(15) Specifications providing for technological control of production to meet the requirements of modern engineering construction and of manufacture of concrete at commercial plants for proportioning, mixing and delivery.

While an understanding of the principles of concrete mixtures requires an appreciation of the many physical conditions which affect the various characteristics of the concrete, the physics and mathematics involved are elementary and require only a little study to understand and employ. With such an understanding the practical application resolves into a very simple and expedient technological process.

This first article will treat particularly of the absolute volume as the basic measure of ingredients, its importance as a basis of coordination of principles of mixtures, and the history of concrete and of concrete research in relation thereto.

ABSOLUTE VOLUME THE BASIC MEASURE OF INGREDIENTS

Lack of agreement and harmony of thought regarding the principles of concrete mixtures has been largely due to the maze of contradictory data resulting from use of the ancient and indefinite basis of measure of ingredients in concrete—"bulk volume," including the variable proportion of voids or air space between particles.

BULK VOLUME MEASURES

The ancient and prevailing measure of aggregates in concrete has been and remains, even at this scientific age, the "loose-moist bulk volume," a unit measure of which varies from 0.40 to 0.80 in absolute volume of rock solids and, likewise, from 0.60 to 0.20 in voids of air space.

"Loose-dry bulk volume" has been used extensively as the basis of measure in laboratory and research tests and, varies from 0.45 to 0.55 in absolute volume of solids.

The standard measure of aggregates, adopted about 1921 by the American Society for Testing Materials, the Portland Cement Association, and other technical agencies, is the "dry-rodded bulk volume," which varies from 0.50 to 0.90 in absolute volume of solids.

A method of measuring sand by inundation with water was devised by Bertin prior to 1922 and has been

used with some favor. "Inundated bulk volume" varies from 0.45 to 0.85 in absolute volume of solids.

The "density," or absolute volume of solids in a unit bulk measure, varies with the degree of compacting, shape of particles, moisture content and grading of the aggregate, from 0.40 to 0.90. Thus, measurement of aggregates by bulk volume is similar in results to measuring for a pane of glass with an India rubber tape. The effects of its use in concrete research have been erroneous results and conclusions and the consequent failure of an enormous expenditure of labor and money in concrete research to develop a knowledge of concrete mixtures adequate for modern requirements.

WEIGHT MEASURES

The acme of accuracy is obtained by weighing, with appreciation of the relation of the absolute volume of the material to its specific gravity and weight. The absolute volumes in unit weights vary inversely as the specific gravities of the various materials, 1- to 3+. Weighing is the best method of measure but, because of varying specific gravity, not a fundamental basis of measure of ingredients in concrete.

ABSOLUTE VOLUME

"Absolute volume" is used, herein, in the practical sense (not the precise) to mean the volume displaced by the aggregate particles. It is the total volume within the surfaces of the particles in the cases of solids, aggregates, cement, etc., and the volume at prevailing temperatures in the case of water and other liquid admixture. It is generally called "apparent volume" by concrete physicists.

The actual or absolute volumes of aggregates, cement and water are the basic physical measures of the proportions of concrete because these ingredients fit together, physically, as absolute volumes, and in no other way. In other words, the volume of concrete obtained by a mixture of ingredients is equal to the sum of the absolute volumes of aggregates, cement, water, and admixtures, with a plus correction for entrapped air and a minus correction for the volume of cement going into solution with water.

In order to appreciate the importance of the absolute volume as the basic measure of proportions in concrete research and in the manufacture of concrete of quality with economy, it seems important to review the history of concrete, concrete research and the present status of the current knowledge of concrete mixtures with relation to the needs of the day.

HISTORICAL

Hydraulic lime and natural cement mortars and concretes have been used under the ages, 10,000 years or more perhaps. The Egyptians, 4000 years ago, used a natural cement which set under water. A natural cement concrete was made by the Carthaginians and portions of an aqueduct, built by them some 2300 years ago, are still standing. The Romans, about the same time, used puzzolan cement concrete of such durability that relics of sewers, aqueducts, water mains, foundations, buildings and roads may be seen today. The dome of the

Pantheon, 142 feet in diameter, built at the beginning of the Christian era, is concrete of such good quality that it has withstood the various destructive forces of 18 centuries and is sound today. That ancient concrete structures were not always durable is evidenced by early repairs and replacements thereto, by complete obliteration of parts, and it is likely that disintegration in a decade or less was sometimes the experience with ancient as with modern concrete.

The first concrete was probably made by adding stone fragments to hydraulic lime or natural cement mortar used for plaster or stone masonry. We know that very remotely in the past the common formula of proportions was one basket of cementing material to two of sand to four of rock, or 1:2:4 by loose-bulk volume, including the variable proportions of voids between particles of the various ingredients. This crude and indefinite basis of measurement and arbitrary ratio of ingredients prevails today and is used on a greater volume of concrete than all the various theoretical methods of proportioning combined, but, it has been adequate only under favorable circumstances, generally matters of chance rather than foresight.

"Portland" cement, now the most important of our cementing materials, was invented by Joseph Aspdin, of Leeds, England, in 1824, and he established a manufacturing plant at Wakefield in 1825. The early manufacture was by "rule-of-thumb" methods, and of variable quality, but many individuals have, from time to time, improved the chemical, physical and mechanical processes so that, today, the manufacture of Portland cement is a highly developed technological process insuring uniform quality. While the ingredients of portland cement are few in number, eighty separate operations under close chemical and technological control are employed to insure uniform standard quality of the finished product. Not more than 2 per cent of portland cement, as manufactured, is below standard quality.

Contrast this modern development with that of the manufacture of the ancient material, concrete. Seventy-five per cent of concrete is of inferior quality; 40% because of bad proportioning and lack of technological control of production; 20% because of poor workmanship in mixing, placing, and curing; 10% because of soft, friable aggregates, silt, organic matter, and other deleterious substances; and 5% because of poor and deteriorated cement. The general practice of making concrete is still in the arbitrary-ratio, bulk-volume, and rule-of-thumb-control stage of development—ancient, not modern.

The invention of metal bar reinforcing of concrete to resist tensile stresses is indicated by patents in 1854 and subsequently. Following the invention by Ransome in 1855 of a rotary kiln for burning cement, the cost of cement was rapidly reduced; reinforced concrete construction likewise rapidly increased; and, while the prior formulas of design were largely empirical by 1905 the reinforcing of concrete for structural uses was a highly developed science. Modern thought has been applied to the determination of the principles of the modern idea of reinforcing concrete, but not to the principles of mixture of that ancient material, concrete itself.

Anyone can make concrete of a sort by mixing rock particles, cement and water, and, as late as 1900, when reinforced concrete was coming into

strong favor as a structural material, concrete engineers recommended it as an economical structural material "because the concrete can be made by common labor." It should be observed that the making of this ancient material, familiar to builders from generation to generation down the ages, was not considered to be a technological matter of making volumes of ingredients, etc. Making of portland cement was early considered to be a process of exact chemical and technological control, but making of concrete, quite as complex a material, is looked upon as a manufacturing process by very few engineers and handled as such by a very small proportion of those. This peculiar influence of the ancient fact of concrete has likewise affected concrete research, as will be explained.

Prior to the advent of "reinforced" concrete, the prevailing proportions of plain concrete were cement: 2 sand; 4 rock, by loose bulk volume, including the variable air space between particles. The somewhat limited number of tests of this concrete indicated it to have a compressive strength of 2000 lbs. per sq. in. at an age of 28 days (or one month) and this was adopted generally as the basis of design of reinforced concrete. In accordance with the ancient idea that concrete could be made with common labor the concrete part of reinforced concrete structures continued to be made without technological control, with increasing number of structural failures as the volume of reinforced concrete construction increased, failures often attended by loss of many lives and great financial loss. More comprehensive tests of this 1:2:4 concrete showed it to have strength varying from 500 to 5000 lbs. per sq. in. and more commonly from 500 to 1500. This situation gave an impetus to concrete research, old theories were revived, and new theories of proportioning have been, and continue to be, evolved and discarded down to this day.

During the past thirty-five years some millions of dollars have been spent, by the Portland Cement Association and others, in research to determine the principles of mixtures, and we have been groping in an opaque fog of contradictory data and competitive individual theories with the result that there is, today, no generally accepted, nor complete, nor adequate, theory of proportioning as a matter of current knowledge, and the lay engineer, and the builder, is skeptical of all theories of proportioning and production control—excepting his own. Concrete remains an "unreliable material," as characterized by Dr. Geo. F. Swain in his "Steel for Strength and Security," with high justification under the prevailing standards of production. But, concrete serves a vast modern requirement when made with luck or intelligently, and cannot be dismissed as Dr. Swain suggests.

The failure of this enormous expenditure in concrete research to develop a complete technology is due primarily to the power of ancient conceptions of concrete proportions and basis of measure of proportions to exclude modern thought of the physics involved, of the absolute volume as the rudimentary basis of measure. The rudimentary physics of measure, of the materials, the fundamental basis of measure of proportions, has escaped the otherwise keen insight of famous engineers and physicists almost without exception. Instead of using a definite basis of measure, absolute volume, in research and practice, a variable basis of measure, loose-moist

bulk volume, loose-dry bulk volume, dry-rodded bulk volume, or weight, has been used. The absolute volume in a given bulk volume varies from 0.4 to 0.9; the absolute volume in a given weight varies inversely with the specific gravity (1.0 to 3.0+); and the standard measure of aggregates, today, the dry-rodded volume, varies from 0.5 to 0.9 in absolute volume. This error of 10% to 50% in the measure overshadows the results of research tests, gives contradictory results, and has often led to conclusions contrary to the fundamental facts.

Another cause of the failure of concrete research has been the attempt to find some simple formula such as the ancient 1:2:4 proportion, and every individual, almost without exception, who has discovered a fundamental fact of mixtures, has advanced his discovery as the correct and only principle of proportioning to the exclusion of all others. The result is that many fundamental principles of mixtures have been discovered and erroneously discarded instead of co-ordinated as they would have been if modern rather than ancient thought had prevailed.

Feret, prior to 1905, used absolute volume in his tests but appears to have failed to appreciate it as the practical basis of proportions as well as the scientific. He did, however, advance the theory that the yield of combinations was the sum of the absolute volumes of ingredients and air voids. Messrs. Talbot, Richart, and Gonservan used the absolute volume as the basis of measure in research tests prior to 1923 but evolved no practical application and did not advance it as the fundamental basis of measure of ingredients.

The hundreds of thousands of tests of past research has accomplished more than is indicated on the surface, due to old facts having been discarded for new ones, instead of co-ordinating them. Repetition and observation of predominating results have indicated the principle of the cement content employed in the simple arbitrary ratios and have indicated the principles underlying the following theories:

1. The various voids theories of Moyer and others;
2. The cement content theories of Henby and Kilts;
3. The sand-cement ratio theory of Thacher;
4. The density theories of Feret, Talbot and others;
5. The grading theories of Fuller, Talbot, Graf and others;
6. The preliminary test theory of Feret;

7. Abrams' theory of the fineness modulus and water-cement ratio; and, 8. The McMillan theory of the water-cement ratio and trial methods.

All of these theories have elements of fact but the older ones have been found wanting and discarded, heretofore, instead of co-ordinated with the new, due to the ancient idea that there was a simple formula of proportions. Concrete is a complex material in physical structures and variety of constituents and none of these simple theories are complete and adequate. There are a number of interrelated fundamentals in these various theories and the writer, through unusual opportunity, has co-ordinated them. Much of this had been accomplished by 1925.

About 1925, commercial central proportioning and mixing plants began to be built; about 1927, the transit mixer was invented; and, today, there are some hundreds of commercial concrete factories in the various cities

throughout the United States, many of them with the acme of modern equipment; and, they are in grave difficulties because of the many theories of proportioning demanded by the engineers for their customers, because of lack of agreement among concrete authorities, because they are compelled to make concrete to inadequate specifications with unsightly and poor quality of results which are the business, and because of lack of a technological skill in concrete production.

Current specifications for concrete favor the unscrupulous contractor who steals cement, because they are not based on an appreciation that making concrete is a technological process and do not provide for technological control. In lieu of technological control, employing a skill based on a co-ordination of current knowledge of the principles of concrete mixtures, 25% to 50% more cement is specified than necessary under such skill of control, and generally without avail.

Concrete of varying and often inadequate quality is being made, under these conditions, at an excess cost of \$0.15 to \$3.00 per cubic yard over that of required and uniform quality possible under the co-ordination of processes to be presented in this paper. The economic loss probably exceeds \$100,000,000 per annum, partly due to inefficient use of cement and partly to the use of 2000-lb. concrete instead of the more efficient basis of structural design, 3000-4000-lb. concrete.

The Portland Cement Association stopped short of the solution of the problem involved and the correction of this situation, and is now going backward from a partial attainment of technological control to approximate water-cement ratio and trial and guess methods, receding from an accomplishment which needed, for complete success, only a little co-ordination of their great work with that of others in concrete research, and an appreciation of the absolute volume as the basic measure of proportions. There is no absolute water-cement-ratio-strength law; the water-cement ratio is not complete in itself as a formula of mixtures; there is no simple formula of making permanent quality concrete, precluding technological control, any more than there is such a formula for the manufacture of cement or any other manufactured compound. More scientific knowledge of concrete mixtures is needed, not less, and the demand for cement and concrete depends upon the ratio of its economic return to its cost.

The status of the current knowledge of concrete mixtures is indicated by the standard measure of aggregates, the "dry-rodded" bulk volume—ancient, not modern. The result is that 75 per cent of all concrete made today is inferior in quality for the cement content and cost. Despite well intentioned and scrupulous engineering and constructional care, a great dam disintegrates, a building falls, a concrete wharf disintegrates, a great bridge is dangerously honeycombed with rock pockets, the concrete of a flume is porous, a pavement breaks up, etc., etc. The making of concrete is a matter of friction on the job and of litigation afterward because of the lack of current knowledge of the fundamentals of concrete mixtures. The principle cause of this situation is the past lack of appreciation of the first law of mixtures:

The basic measure of ingredients of a concrete mixture is the absolute volume.
This definite basis of proportions

makes it possible to co-ordinate the fundamental facts of the various theories of mixtures. The following articles will continue with the co-ordination of basic principles of concrete making.

J. Y. Leveque Heads

New Construction Firm

Formation of the Pacific Coast Foundation Company, Inc., under the sponsorship of San Francisco capitalists, with headquarters at 53 Sutter Street, is announced by J. Y. Leveque, executive vice-president of the company.

The organization and personnel of the company is such as to enable it to design and construct bridges, tunnels, caissons, subaqueous construction and hydraulic development.

Mr. Leveque, director and executive vice-president, has had years of experience as an executive.

Mr. D. E. Root, director and vice-president is in charge of construction. Mr. Root has been engaged in engineering construction for many years and has been in charge of major projects such as the Oakland-Alameda Tube.

The new company has been fortunate in securing the services of Francis Betts Smith as its consulting engineer. Mr. Smith has a wide experience in Pacific Coast construction activities and is recognized as an authority on foundations and subaqueous construction.

Mr. Sherman W. Gibbs, long associated with Mr. Smith, will act in a consulting capacity for the new organization.

Branch offices and representatives of the Pacific Coast Foundation Company, Inc., are located in Los Angeles, Portland and Seattle.

ASSOCIATION OPENS OFFICES

Building Industries Association, recently organized group to stabilize credits and eliminate unscrupulous contractors, has opened permanent offices at 302-303 Commercial Building, San Jose, with L. C. Bossi, secretary-manager of the association in charge. The association is now making preparations to offer complete specialized credit service for members of the building industry. This includes general contractors, all types of sub-contractors, material dealers, lumber dealers and loaning agencies, such as banks, building and loan associations and private individuals making building loans.

FRESNO'S PROPOSAL TO BAR OUTSIDE LABOR ABANDONED

An ordinance which would bar laborers and employees, not citizens of Fresno County, from working on municipal projects was submitted to the Fresno city commissioners for discussion by Commissioner of Public Works C. C. Van Valkenburgh, Jr. It was withdrawn when the question of constitutionality arose.

Under the terms of Van Valkenburgh's proposal any contractor employing any laborer or employee who was not a qualified citizen of Fresno County would be subject to a fine of \$10 per man for each day of employment that the employee worked.

Finance Commissioner Wm. Giass said he believed such an ordinance probably would be unconstitutional because the constitutional guarantee that the rights of any citizen of this country could not be abridged by any state or local laws or ordinances and that the privilege of any citizen was a right to obtain labor.

SPECIFICATIONS HELD TO BE NON-AMBIGUOUS

Obviously, a contractor cannot recover payment on an ambiguous contract. It is well settled that contract or specifications are invalid if the same are ambiguous. On the other hand, all that is required to be assured, in order that the contract is valid and enforceable is that the quality of work can be determined by reading the specifications, says The Contractor.

In Rice v. Hanrahan Co., 285 Pac. 414, a city and a contractor entered into a contract for street construction work. The specifications for concrete pavements called for one part of Portland cement, two parts of sand and four parts of broken rock or stone by measure, with the proviso that the proportions might be changed by the contractor whenever the voids in the materials used were not filled by use of the ingredients in the specified proportions. It was also stated that a cubic yard of concrete in place should contain not less than six sacks of cement. The specifications also provided:

"The cement used must be Portland cement meeting the requirements and tests of the standard specifications for Portland cement adopted by the American Society of Testing Materials."

In holding the contract valid, the court said:

"It thus appears that the contractor is required to furnish materials definitely described and to mix them ordinarily in the fixed proportions with a view to having a serviceable pavement with all voids filled. It was recognized, however, that occasionally, in order to fill all voids, it might be necessary to vary somewhat the proportions of sand and rock so as to procure the right density and make a durable pavement. The contractor has no discretion to depart from the specifications determining the condition and quality of the materials, and since the purpose is to assure, thru intelligent exercise of discretion, an admixture making a pavement free of the voids which are apt to occur in any such work because of occasional variation in uniformity of one or another of the ingredients, there is not that vice in the specifications which the law condemns. . . . If the engineer may satisfy himself by tests 'made by some reliable chemist,' and those tests are 'to conform to specifications required' in the one case by the American Association of Civil Engineers and in the other by the American Society of Testing Materials, it is fair to conclude that 'reliable chemists,' in general, as well as engineers and contractors, are thoroughly familiar with the specifications intended."

BID OR BOND UNSIGNED TO BE REJECTED

Where a bid submitted to Los Angeles county is not signed, or where a surety bond is not signed by any of the necessary signatories, in the future the Los Angeles County Board of Supervisors will exercise its right to reject the bid by reason of such defect, according to an announcement by Miss Mame E. Bently, clerk of the board. Heretofore the board has granted to bidders the privilege of correcting the mistake or omission at the meeting in the presence of other bidders who have always been given the opportunity to protest. Numerous instances of confusion have resulted, hence the new order, which Miss Bently states will be rigidly observed in the future.

THE OBSERVER

What He Hears and Sees on His Rounds

Terming his genius the well-spring of architectural beauty in modern cities, the Society of Arts and Sciences announces award of its gold medal to Cass Gilbert for his masterpiece, the Woolworth building.

Burt E. Edwards, general manager of the Los Angeles harbor, has received word from Washington, D. C., that an initial appropriation for starting work on the \$7,000,000 breakwater extension would be made at the next session of congress.

San Francisco Board of Supervisors has voted to call a special election in January to vote bonds of \$2,500,000 to finance miscellaneous improvements to relieve unemployment conditions. The improvements will comprise street work, park and playground development.

Announcing that the General Motors Corporation has maintained salaries and wages, President Alfred P. Sloan, Jr., declared that a reduction in the wage scale would not only delay the return of more normal times but unnecessarily limit the future prosperity of the nation.

City of Seattle, on recommendation of Mayor Edwards, has authorized \$2,000,000 worth of construction to relieve the unemployed. The city council has agreed to cut as much "red tape" as possible to permit the work to go ahead in the immediate future.

At the annual convention of the California Retail Lumbermen's Assn. held in Pasadena, early this month, credit conditions and proposed legislation were given much consideration along with trade practices. Wise restriction of credits and curtailment of installment selling were declared essential to better business. Proper use of credit was held to be the guarantee of business progress. Over-extension of credit was seen as the bane of the building industry.

The Department of Architectural Engineering, Washington State College, is conducting one of the most constructive bits of publicity ever instituted in the Pacific Northwest on behalf of the architectural profession. Stanley A. Smith of this department is conducting over radio station KWSC every Wednesday night at 7:30 a radio program entitled: "King's Castle," which consists of a discussion by newlyweds over a proposed "dream house." Each week the newlyweds discuss a given step toward the realization of their dream of a home of their own.

The whole plan is to expose the fallacy of building a home without retaining a competent architect.

Co-operation on a program of studying the problems common to both the architect and contractor will be undertaken by the Permanent Joint Conference Committee composed of the Cincinnati Chapter of the American Institute of Architects and Allied Construction Industries of Cincinnati. It is believed that through these co-operative efforts many of the difficulties which have beset members of

both these professions will be solved and misunderstandings cleared up. Mr. Gustav W. Drach of Gustav W. Drach, Inc. is permanent chairman of the permanent committee and Mr. J. A. Higgins, general manager of Allied Construction Industries, is secretary.

The City of Portland, Ore., is violating its own building code. Fifteen rooms on the fourth floor of the city hall, on which floor are housed many city employees, do not conform to the requirements of the building code. The deficiency ranges from 5 square feet to 48 square feet. One room has no outside ventilation and is a 100 per cent violation of the code.

These are some of the facts brought out in a report by Ben Smith, city plan examiner, to Commissioner Barbur of the department of public works.

The conditions for maintenance of good health are bad, states a report from Dr. John G. Abele, who says that all bureaus of the department of public works are found to be crowded and in some instances very poorly ventilated, and that the poor ventilation and the crowded conditions tend to the spread of colds and other communicable diseases.

What is probably a new record for bond issues approved on a single day was set November 4 when loans totaling at least \$408,544,000 for public improvements of various kinds were approved by voters throughout the country.

In reporting the total "The Bond Buyer," financial publication, says that the volume may be even larger as returns from referenda covering proposals for an additional \$25,000,000 have not yet been announced.

Only a comparatively small number of bond issues were defeated in the November elections, the compilation shows. Out of a total of \$487,935,000 in bond issues submitted for action by voters, only \$67,550,000 were rejected against the \$408,544,000 approved, with only \$25,000,000 to be heard from. Results of the North Carolina vote on a \$2,000,000 bond issue will not be known until next month. Balance covers many small proposed issues.

The Bond Buyer says the total approved probably is the largest authorized in a November election in this country, when the largest portion of the annual proposals is submitted. The total compared with \$345,933,000 in November, 1928, the previous high of which there is any record. In that year \$288,833,000 in bond issues were rejected.

The increase is attributed principally to the submission of three bond issues aggregating \$230,000,000 alone by the states of Louisiana, New Jersey and New York.

An interest-free loan of \$50,000 has been offered to the city of Hagerstown, Md., for the expansion of public works to relieve unemployment by the Pangborn Corp. of that city. The loan is conditioned upon the raising of an additional sum of at least \$200,000 to be supplied by other private interests under the same conditions.

TRADE NOTES

Wm. Burhans has purchased the Dos Palos Plumbing & Electric Shop from John Onst at Los Banos.

The Toluca Construction Company is opening an office at 4525 Forman Ave., North Hollywood, Calif., and desires manufacturers' samples and catalogs to complete A-I-A file.

Burdett Green has been appointed secretary-manager of the American Walnut Manufacturers' Association, succeeding George N. Lamb, who resigned to become general sales manager of the Flexwood Company.

Plant of the Santa Cruz Portland Cement Company at Davenport, Santa Cruz County, will commence operations on the five-day week basis today. It is announced by Fred Davis, plant superintendent. Lime kilns will not be affected under the new regulation, Davis declared.

Burlingame Hardware Company, 1326 Broadway, Burlingame, announces the change of the firm name to Broadway Hardware Company. L. D. Sanderson, who for the past five years was associated in a co-partner plan with W. A. Heiman, in the Burlingame Hardware Company, will operate the Broadway store independently.

An extra dividend payment of 50 cents a share on the common stock was declared by the U. S. Gypsum Company Nov. 12, payable December 31 to stock holders of record December 15. The regular dividends also declared are 40 cents on the common and \$1.75 on the preferred stock.

C. W. Leihy, for the past two years with the Seattle offices of the General Electric Co., has resigned his position to accept the post of engineering editor of Electrical West, San Francisco publication of the McGraw-Hill Co. Leihy is a graduate of Oregon State College and spent two years in the designing, engineering and commercial sections of the General Electric Company at Schenectady before going to Seattle.

Hallenscheid & McDonald, San Francisco and Los Angeles, distributors of bathroom fixtures and other products, has opened a branch at 3125 Western Ave., Seattle. Charles W. Morse, formerly with the San Francisco office, is manager of the Seattle branch, which will have the territory of Washington, Oregon and British Columbia.

Royalite is the name of a new product of the United States Rubber Company which has been developed for use as a covering for floors and walls and as an interior trim. Royalite is produced by the General Products Department, and will be marketed through the Flooring Division. While Royalite will be used extensively as a flooring material, its usefulness is much broader, in that it can be used on walls as effectively as on floors.

Howard G. Bissell, architect, secretary of the Stockton City Planning Commission, addressed the Knights of the Round Table at a luncheon in that city last week. His topic was "America's Contribution to Architecture."

ALONG THE LINE

Lawrence H. Taylor, formerly state highway engineer in charge of maintenance, with headquarters at Redding, has been appointed maintenance engineer of the Oakland street department at a salary of \$300 a month.

Edward O. Allen, San Francisco attorney, has been appointed by Governor Young to the State Industrial Accident Commission, to succeed Delger Trowbridge, resigned. Allen has been attorney for the state commission for many years. Trowbridge's unexpired term continues until Jan. 1, 1933.

Chas. A. Whitmore has been reappointed by Governor Young as State Building and Loan Commissioner. The appointment is for a term of four years. Whitmore was first appointed building and loan commissioner about two years ago in succession to Geo. S. Walker of San Jose, who resigned to enter private business.

Chas. L. Hilgartner, president of the Hilgartner Marble Co. of Los Angeles, died at his home in Baltimore, Md., Nov. 4, after an illness of three months, aged 69 years. He was also president of the Hilgartner Marble Company of Baltimore, one of the largest marble works in the world. Officials of the Los Angeles plant announce that business of the firm will be conducted as before with no present change in the personnel.

Edward Hyatt Jr., state engineer of California, has been elected president of the Western Association of State Engineers. George M. Bacon, Utah State engineer, was elected vice-president and George S. Knapp of Kansas and M. C. Hinderlinder of Colorado, were named to the executive committee. The association is made up of the engineers of the seventeen western arid and semi-arid states.

H. C. Chambers has been nominated for the office of president by the Southern California Chapter, American Institute of Architects, to serve during the coming year. Carleton M. Winslow, has been nominated for the office of vice-president; H. Roy Kelley, secretary; Palmer Sabin, treasurer and J. E. Allison, director for the three year term. The election will take place at the December meeting at which time delegates to the national convention to be held next year in San Antonio, Texas, will be selected.

Claude C. Brown, chief gas and electrical engineer of the State Railroad Commission, has issued the annual warning to householders concerning the use of natural gas, to prevent asphyxiation during the winter months. Proper ventilation, Brown says, would eliminate repetition of last year's fatalities. They numbered twenty in two months and a half. The deadly gas created by improper combustion and poor ventilation, the engineer said, is colorless and odorless, and care should be exercised by natural gas users in heating apartments and dwellings.

A 4-page folder of the Byron Jackson Co., Berkeley, gives an account of the principles followed in the construction of deepwell turbine pumps.

Palo Alto Seeks

To Strengthen Law
Favoring Local Labor

Another effort on behalf of local labor will be made by representatives of the carpenters and painters to secure a revision of the city ordinance at Palo Alto covering preferential employment of resident workers on municipal projects.

The ordinance now in effect makes it mandatory that public work financed from the city treasury shall give preference to local labor provided such preference does not increase the cost of the job to the city.

According to spokesmen of local labor, this ordinance, while committing the city to a policy does not guarantee the resident workers any protection against competition with imported labor that can be secured on wage scales below those that are standard in Palo Alto.

Dissatisfied with the statements made previously in defense of the local ordinance that a measure omitting the qualifying provision relative to cost increase would be invalid, the representatives of local labor declare that in some other cities ordinances favoring local labor are on the books minus the clause to which objection is found.

It is the plan of the labor representatives to amass those ordinances of other cities and submit them, together with a plea for a revision of the local measure, at an early meeting of the city council.

The local labor representatives cite the building of the New Palo Alto Hospital as an outstanding example of the defeat of the ordinance's objectives by the cost qualification. Only a relatively negligible amount of resident labor has been employed on that job, they point out. Attention is called by local labor also to the fact that the concrete work in paving of California Avenue has been done chiefly by the employment of imported workmen.

NEW REVERSING MOTOR BEING
MARKETED

The General Electric Company announces a new line of single-phase, repulsion induction motors, designated type SCA, capable of very frequent reversal. These motors have the same appearance as the General Electric type SCR general-purpose, single-phase motors, and are mechanically interchangeable in all respects with corresponding horsepower and speed ratings of that type.

Available ratings from $\frac{3}{4}$ to 5 hp. at 1800 r.p.m., and from $\frac{1}{2}$ to 2 h.p. at 1200 r.p.m. All mechanical modifications which may be applied to the general-purpose SCR motors are equally applicable to the new type SCA. The starting torque is high and ranges from 225 to 227% of normal full-load running torque depending on the rating.

The control for the new motor is very simple, consisting only of a full-voltage, three-pole, reversing switch which may be either manual or magnetic.

Machine tools, garage equipment, and door openers represent a small section of the actual field of application.

Booklets recently issued by the Hercules Powder Co., Wilmington, Del., include one described a new type of explosive known as Hercules Gelamite; a 38-page, compilation of seventeen lectures on the subject of mine foremanship by J. J. Rutledge, chief mine engineer, Maryland Bureau of Mines; and an illustrated catalog in Spanish on explosives, blasting accessories and smokeless powder.

HERE — THERE —
EVERYWHERE

Pomona Valley Lumbermen's Club has been reorganized with J. Fred Nutter of the Pomona Valley Lumber Co. as secretary.

Sacramento Chapter, American Association of Engineers, has endorsed the \$1,750,000 bond issue proposed by the capital city Board of Education to finance the erection of new schools.

The Sixth Annual Banquet of the Building Material Dealers' Association of Northern California will be held December 12 at the Whitcomb Hotel, it is announced by A. G. Rhodes, chairman of the committee in charge of arrangements.

A. P. Nielson of Seattle was elected president of the Northwest Master Painters' Association to serve for the ensuing year. Other officers, elected at the recent convention of the association in Vancouver, B. C., are W. J. Parker, Tacoma, Wash., first vice president; E. E. Peterson, Portland, Ore., second vice-president, and C. A. Brodersen, Forest Grove, Ore., secretary-treasurer. Astoria, Ore., was selected as the 1931 convention city.

At the recent convention of the California Retail Lumbermen's Association discussion of the Contractors' Registration Law revealed that sentiment was strongly in favor of it because of the protection it affords home builders against operations of unscrupulous and incompetent builders. Ten changes proposed in the law by James F. Collins, state registrar, were considered and will be given support by the association. The changes in the law as proposed by Mr. Collins have already appeared in these columns.

Proposals for the construction of the projected Carquinez salt water barrier as a highway crossing, to relieve congested traffic on the Carquinez bridge, are opposed in a report by F. J. Grumm, survey engineer for the State Highway Commission. Merging of the two projects was opposed on the ground the bridge was adequate for traffic needs for 25 years hence, and that the amounts the highway commission could apportion to the barrier project would not be sufficient to have a bearing on the financing of the latter project.

Harry L. Hess, for the past nine years on the engineering staff of the Oakland City Port Commission, first as assistant engineer and later as harbor engineer, has been appointed assistant chief engineer of the Berkeley Water Front Company which concern has started development of the entire waterfront of San Francisco Bay from the Key System pier to Richmond. Previous to going with the Oakland Port Commission, Hess was employed as designing engineer in the dredging department of the Union Construction Company of Oakland.

A booklet describing the patented, self-contained leather oil seal made by the Chicago Rawhide Mfg. Co., 1301 Elston Ave., Chicago, Ill., has been issued by that company.

Totally inclosed fancooled induction motors of the squirrel-cage type are described in leaflet 2124 of the Allis-Chalmers Mfg. Co., Willwaukee, Wis.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Mrs. R. C. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1894).

R-3324-S DRAFTSMAN, 30-36 years old, technical graduate, with experience indicating executive ability, for general layout and design of refinery equipment. Apply by letter with photo. State salaries earned and reasons for leaving last two positions. Location, No. California.

R-3403-S INDUSTRIAL ENGINEER, not over 35, with experience dealing with labor and production problems as well as rate setting. Must have organizing ability, initiative, tact and energy, technical education and a liking for mathematics as applied to production costs. Apply by letter giving experience in detail, education and general qualifications, with photo. Salary open. Location, Pacific Coast States.

R-3338-S CONSTRUCTION SUPERINTENDENT, preferably with experience in Latin America and capable of taking charge of a hydro-electric construction project involving tunnels, dams, penstocks, power house, coffer dams, etc. Apply by letter with references and photo. Location, Colombia, South America. Hdqtrs., San Francisco. Salary about \$400 month and expenses.

R-3340-S CONSTRUCTION FOREMAN, experienced on high-head hydro-electric plant construction and capable of handling native labor. Must have experience with ferrum pipe installations. Salary about \$300 a month and expenses. Apply by letter. Loc., South America. Headquarters, San Francisco.

W-1873-C-S CONSULTING ENGINEER knowing garage operation, garage equipment, car repair, car utilization and manufacture of parts for repairs, to advise on equipment for service stations and repair shops schedule of operation of trucks, busses, and passenger cars and to organize maintenance and repair of trucks, busses and passenger cars of various makes. Experience in responsible charge of fleet operation and maintenance of trucks and busses desirable. Contract for one year, renewable. Salary open. One-third to one-half in paper rubles for living expenses, balance in United States money to American bank. Applications only by letter which will be forwarded to Moscow for decision. Location, Russia.

WESTINGHOUSE ISSUES NEW GENERAL CATALOG

The Westinghouse General Catalog, 1921-1932, comprised of 1352 pages presenting descriptions and illustrations of apparatus representative of myriad of products manufactured and sold by the Westinghouse Electric & Manufacturing Company, has been announced by that company. The catalog presents complete listings of distribution apparatus, switchgear apparatus (except large oil circuit-breakers and power switchboards), lighting equipment, domestic appliances, gearing apparatus, and current-collecting devices; condensed listings of industrial motors and control apparatus, industrial heating apparatus, and commercial cooking equipment; and descriptions of other products. Style numbers, assigned to pieces of standard apparatus to facilitate ordering and the classification of records, are given for the standard equipment listed.

The following products that are of

special interest to architects, general contractors, and electrical contractors are covered in the catalog: motors and control; arc-welders for steel frame construction; No.-Puz panelboards; meter service breakers; water systems, and industrial, commercial and street lighting equipment.

An interesting feature of the new catalog is the "Instant Index," which appears on a two-page spread, printed on a heavy blue stock, in the center of the book. In this index the 24 groups of equipment described in the catalog are listed in large bold type, and from the name of each group an arrow points to the index notch of the section of the book covering that equipment. Because all the groups thus listed can be noted at a glance and because two large notches at the bottom of the pages make it easy to open the book to the "Instant Index," finding the information for which one is looking is greatly facilitated. As in previous issues, a subject index and a Style Number Index also are included.

An illustrated introductory section, printed in two colors on a heavy enamel stock, presents a brief history of the Westinghouse Electric & Manufacturing Company and a description of interesting research developments.

Realty Men to Study Industrial Buildings

With a view to the prevention of the untimely demise of buildings from which industries are removing, the Industrial Property Division of the National Association of Real Estate Boards at its recent Detroit conference named a committee of realtor location experts who will study industrial buildings with the purpose of determining whether or not it is feasible to attempt to plan such structures so that they are adaptable to the manufacturing processes of a wide variety of industries.

Expansion of business may mean that a given industry needs a totally different location; transportation facilities and sources of electricity, raw products may change power and fuel location for manufacturing plant, or fashion and the ever changing wants and desires of the consumer may doom the product of the industry and cause the death of the concern. Then what of the building which has been especially built to house one particular industry?

Use Too Restricted

It is the belief of the Division that the present prevailing limited usage to which industrial buildings are restricted is, for the most part, due to the fact that the structures were planned without taking into consideration the fact that at some future time it might be advisable for them to house totally different industries. The newly appointed committee will work toward setting forth specific recommendations for the planning of industrial buildings, recommendations on size, light, space, of industrial property some guide whereby to build for the maximum utility from a structure and from which financing concerns could judge whether they are putting resources into a structure whose prosperity hangs on the particular industry it is built to house or are putting funds into a building which has a wide scope of usefulness. Members of the committee in charge of making the study are: J. C. Erleson, Chicago, chairman; Joel L. Schlesinger, Newark, New Jersey; W. K. Bates, Boston, Mass.; and James Carey Martien, Baltimore, Maryland.

Will Investigate Financing

An investigation of ways and means of supplying funds to new industries and to industries that require more

capital in order to make them profitable assets to their communities is to be launched by the Division this fall. It was announced at the Detroit meeting. Various plans for bringing additional capital to industries equipped to undertake more production but lacking the necessary funds for expansion will be analyzed. Plans developed by individual financing corporations will be examined. The special committee appointed to conduct this survey includes: J. H. Van Vliet, Chicago, chairman; W. E. G. Gallard, New York City, vice-chairman; W. G. Burchfield, Houston, Tex.; G. Harvey Porter, Baltimore, Maryland, and F. E. Ayres, Louisville, Ky.

5,500,000 GALLONS A DAY IS RENO PUMP OUTLAY

One of the largest deepwell pumps for city water supply in this country, having an output of 5,500,000 gallons a day, was recently placed in operation in Reno, Nevada. The new pump supplies domestic water to Reno and Sparks, Nevada, and was needed as a source of supply in times of water shortage in the nearby mountain streams of the eastern Sierra slope, which form the normal source of supply.

The well, located near the main highway between Reno and Sparks, was drilled by the Western Drilling Company of Carson City for the Sierra Pacific Power Company. The pump, a Western make, known as a deep-well turbine, is driven by a General Electric 4,000-volt, 400-horsepower vertical hollow shaft motor turning at 1150 r. p. m. The motor is the largest vertical hollow shaft motor yet built. It requires only a low starting current and is thrown directly on the line with the magnetic switch. A phase reversal relay prevents unscrewing the pump connections in case of power phase reversal. The top bearing is water cooled and is protected against overheating by a temperature relay which shuts down the pump if the bearing becomes overheated. As the cooling water is taken directly from the pump discharge, failure of pumping water will also shut down the pump.

To meet the demands of this pumping plant, a new outdoor substation was installed which transforms power from 22,000 to 4000-volts through a bank of three 667-kva. transformers. This substation also supplies the industrial power load in the same vicinity. It is provided with an outdoor reclosing circuit breaker equipment on the 4000-volt side to eliminate unnecessary shutdowns. This substation has all supply and load lines underground.

RUSSIAN LUMBER CONSIGNMENTS SELLING SLOWLY IN CUBA

Russian softwood, mostly spruce, amounting to some 2,000,000 board feet arrived on consignment in Havana, Cuba, during the past year and approximately 56 per cent remains unsold, says a recent communication from Acting Commercial Attaché Albert F. Nufer at Havana to the Lumber Division of the Department of Commerce.

This Russian lumber consists of spruce and pine, the bulk of the shipments being spruce. Of the 2,000,000 quantity delivered, about 3,500,000 board feet remains unsold, of which 3,700,000 board feet are spruce. The Cuban trade reports that the primary use to date of this Russian lumber has been for box manufacture.

SANTA MONICA HARBOR DEVELOPMENT PLANNED

Construction of cribs for the breakwater to be constructed at Santa Monica for the Santa Monica Harbor company will probably be started within thirty days, according to Taggart Aston, consulting engineer of Los Angeles.

These cribs will be built at Los Angeles Harbor and towed to the location of the breakwater. Construction will be on a cost plus basis, under the direction of an experienced builder formerly associated with Mr. Aston in similar work in other parts of the world.

The cribs will be of water-tight construction, each 100 ft. in length, 30 ft. wide at the bottom, sloping to a width of 23 ft. with a stadium type top surmounting the structure for spectators. The walls will be 32 ft. in height to the top of the slope, the water at this point being 25 ft. deep at mean lower low water and 30 ft. deep at mean high tide. The sides above water will rise 12 to 14 ft. finished in steps. Each crib will consist of 14 cells with reinforced walls, the walls being from 20-in. to 12-in. in thickness with center walls 10-in. thick, and 12-in. floor. Each crib will contain approx. 1000 cu. yds. of concrete and weigh 1500 tons. When filled with sand the weight will be approximately 3500 tons. The crib will be built with a cove on the outside to repel the waves. There will be a 12-in. macadam surfacing on the base, about 1 1/4 to 1 3/4 yds. to the lineal foot, laid by divers. This will prevent the water reaching the sub-base under the crib. The present construction program calls for completion of one crib every ten days. The total length of the breakwater is to be 3500 ft.

Present work includes extension of the Santa Monica municipal pier for a length of 200 ft. to a point where a steel suspension bridge will connect the pier with the breakwater. Contract for placing and bracing the pier extension, including driving of piles, etc., has been let to W. G. Murdock of Los Angeles, who will probably complete that portion of the work within two months. Construction of the bridge will be started but no attempt will be made to complete the bridge before the first unit of the breakwater, or 1500 ft., has been laid. W. G. Murdock will place the first of the steel cylinders for the bridge to a point 8 ft. above low water. Contract for the steel has not been let, but the successful bidder will probably be announced within the next few weeks.

The estimated cost of the pier extension, suspension bridge and the first 1500 ft. of the breakwater is \$410,000. The second unit of 1500 ft. of breakwater will cost about \$340,000. Construction of wharves, slips and appurtenant structures will total \$100,000.

Mr. Aston states that this type of construction has been successfully used in government works at Halifax, Montreal, the Welland Canal, connecting Lake Ontario and Lake Erie, a 26-mile project, the municipal harbor project at Barcelona. The latter projects were under Mr. Aston's personal supervision.

Designs for similar type of construction have been requested by Los Angeles Harbor, Engrin Nicholson for Fish Harbor and Cabrillo Harbor breakwaters, by Maj. Lanagan, U. S. Engineer, for a Los Angeles Harbor breakwater and for a breakwater at Monterey Harbor.

ENGINEER APPOINTED

Romeo R. Martel has been made professor of structural engineering at the California Institute of Technology,

Pasadena. Mr. Martel has been at the Institute since 1918, successively as instructor, assistant professor, associate professor and professor of civil engineering. He represented the Southern California Council on earthquake protection at the third Pan-Pacific Science Congress, Tokyo, 1926, and also attended the World Engineering Congress in Tokyo in 1929 as representative of the California Institute of Technology.

HIGHWAY BUILDING FILMS ARE AVAILABLE

A new series of road-construction films, sponsored by the Bureau of Public Roads, U. S. Department of Agriculture, has just been released. They are for the use of highway engineers, road builders, engineering students, and others interested in better roads. These films, showing the most modern methods, replace films withdrawn from circulation because improvements in road making have made the old films obsolete.

"Mixed-in-Place Bituminous Surfaces," 2 reels, compares the bituminous treatment of crushed stone and gravel surfaces (that uses light road oil and small stone with the practice of using heavier road oil and larger stone. The basic principle of the mixed-in-place bituminous surfaces is the use of bitumen instead of water as a binder. The film shows the advantages of this type of road construction together with the details of construction. Most of the scenes were taken in Arizona, California and Indiana. This film takes about thirty minutes to show.

"Hot-Mixed Bituminous Pavements," 1 reel, shows that hot mixing of properly proportioned ingredients is essential for maximum stability in bituminous pavements, and that mixing of dry materials before the addition of bitumen is vital for a uniformly stable surface. The film treats of the construction of bituminous concrete pavements, including sheet asphalt. Most of the scenes were photographed in California. It takes fifteen minutes to show this film.

"Penetration Bituminous Macadam," 1 reel, replaces the old film, "What About Macadam?" and pictures the construction of penetration bituminous macadam surfaces. The scenes were made in the New England States where this type of road has been developed to a high degree, especially in Massachusetts and Rhode Island. This film takes fifteen minutes to show.

In the hour required to show the three films, one may learn much about modern methods of constructing these types of roads. The films show different methods that may be used under varying conditions. Though of a technical nature and designed primarily for road builders, the general public may learn much by seeing the films and will better appreciate the good roads over which they ride in their automobiles.

Borrowers of these films should apply to the Office of Motion Pictures, U. S. Department of Agriculture, Washington, D. C. Like all the department's films, they are loaned free of charge, the borrower paying only transportation charges to and from Washington. Films may be borrowed for one showing; or for a series of showings provided arrangements are made sufficiently far in advance. Schools, colleges, or organizations may film practically at cost. Many institutions avail themselves of this opportunity, as the number of copies for free distribution is limited. Foreign governments and State Highway Departments have been frequent purchasers of the department's road-construction films.

OAKLAND AMENDS GAS TANK ORDINANCE

Gasoline tanks must be filled hereafter within property-lines of service stations and not from streets or sidewalks, according to an ordinance passed to print by the Oakland city council, effective when given final passage in eight days.

Commissioner George Wilhelm, who introduced the ordinance, said there have been frequent complaints because of interruption to traffic caused by heavy gasoline tank-wagons halting at curbs and piping gasoline into service station tanks. As it usually takes some time to fill a big gasoline tank, Wilhelm said that the filling should be done within the service station property lines.

The law, as amended, reads as follows:

Section 7. All storage tanks shall be placed in the spot agreed upon by the Fire Marshal and Bureau of Research; provided, however, that the opening of an intake pipe of any gasoline storage tank shall not be located within the sidewalk or street area, and must be located not less than three feet (3') inside of the property line, and the transferring of gasoline into any such storage tank shall be done inside of the property line, and no pipe, hose or other appliance used for the conveyance or passage of gasoline shall be laid over or upon any sidewalk.

All intake pipes of gasoline storage tanks heretofore installed shall be changed to conform with the provisions of this section within (10) days after the passage of this ordinance.

Section 2, Sections 7a to 7f, inclusive, are hereby added to Ordinance No. 418 N S, to read respectively as follows:

Section 7a. Where the sidewalk is not excavated for basement use, the top of the storage tanks must be at least four (4) feet below the surface; the space between the top of the tanks and the sidewalk shall be filled with earth.

Section 7b. Where the sidewalk is excavated and used as part of the basement, the tanks may be placed under the sidewalk and may rest on or under basement floor; a brick or concrete wall not less than twelve (12) inches thick shall surround said storage tanks, extending from bottom to four (4) feet above the tops of the tanks; the space between top of tanks and the top of walls shall be filled with earth, covered with at least three (3) inches of concrete.

Section 7c. Where two or more tanks are installed, they shall be separated by brick or concrete wall not less than twelve (12) inches thick.

Section 7d. No tank shall be connected to another so that gasoline can flow from one to another.

Section 7e. No storage tank shall be covered with earth until an inspection has been made by the Fire Marshal.

Section 7f. One storage tank only may, with the consent of the Marshal, be installed for a private garage on private property; said tank to be at least twenty (20) feet from any building or structure or part thereof, and covered with at least two (2) feet of earth.

Frederick H. Meyer has been appointed a member of the Board of consulting Architects for the San Francisco Civic Center project. The appointment has been confirmed by the Board of Public Works. Arthur Brown Jr., J. Bakewell and H. H. Gutterston have been appointed to serve in conjunction with Mr. Meyer in an advisory capacity. The appointments are honorary and members of the board serve without compensation.

HAZARDS ASSUMED IN BOULDER CANYON PROJECT DESCRIBED BY ENGINEER

Hazards to be assumed by the contractor relative to fluctuations in prices of equipment and supplies for the Boulder Canyon project appear to be small compared with the hazards which will be assumed by the United States under the contemplated plan for the development. In the opinion of the project's construction engineer, Walker R. Young, says the U. S. Dally.

The contractors' greatest hazard appears to be in fluctuations of the price of labor, he said in a communication just received by the Commissioner of Reclamation, Dr. Elwood Mead. Mr. Young pointed out, however, that the position of the Associated General Contractors that there should be a determination of some basis for competitive bidding on the project, and a form of contract resulting neither in excess cost to the United States nor in excess profits or risk to the contractors is well taken.

The contractors' organization passed a resolution at a board meeting recently at Rye, N. Y., asking the Secretary of the Interior, Ray Lyman Wilbur, to take up with the Comptroller General the matter of basis for competitive bidding and a contract form "to the end that this great project can most economically and successfully be performed."

The resolution, according to a copy made available at the Bureau of Reclamation, cited the large cost of the project and the number of years needed for its completion—a period "during which it will be most difficult to forecast with any degree of accuracy the cost of necessary materials and labor."

Steps Toward Reducing Hazards to Contractors

Uncertainties in estimating the cost of construction, the resolution said, necessarily require the prudent contractor to resolve all doubt in his favor in computing and submitting his bid.

The resolution, it was explained orally at the Bureau was referred to field offices for a reaction, and it now appears that the matter is one for administrative action and that it will not be necessary to refer it to the Comptroller General.

Further information from Mr. Young's communication to the Commissioner follows:

The Bureau has already taken a number of steps toward reducing to a minimum the hazards which must be assumed by the contractor. For example:

A conscientious effort has been made, at considerable expense to the Government, to secure accurate and detailed information for the prospective bidders' and contractors' benefit, as well as for the Bureau's use. The "unknowns" have been reduced as much as humanly possible.

All materials which will become a part of the finished structures will be furnished by the Government, eliminating uncertainties regarding cost of these materials.

According to the contemplated plan, the uncertainties of construction will be reduced to the absolute minimum. All hazards in connection with diverting the river will be assumed by the United States. The diversion tunnels will be of large capacity, in fact, very much larger in proportion than are usually provided in construction of dams. The diversion tunnels will be constructed according to designs furnished by the Government, and will be built under the inspection of the Government. If they fail, contrary to

ordinary procedure, the Government will stand the loss and the contractor will be paid for their reconstruction.

A mosaic map of an extensive area in the vicinity of the dam site as well as excellent topography has been secured, which gives the contractor complete information relative to the character of the country in which the work is to be performed, and provides maps from which he can accurately estimate quantities and on which he can lay out his plant.

Mosaic Maps Will Give Contractors Full Data

Hydrographic data over a period of a great many years has been assembled from which he can obtain information regarding the probable discharge of the river and, therefore, the works that will be necessary for the protection of his plant. A gaging station has been established in Grand Canyon, which serves to warn him of any impending danger from up river.

Foundation conditions have been thoroughly developed at the damsite by extensive diamond drill operations. As a result, the depth to bed rock and the character of material to be excavated are accurately known.

The Government will assume the responsibility of selecting the sand and gravel pit, thus eliminating any hazard in that direction.

A construction railroad and highway to the damsite will be furnished by the Government in advance of the beginning of operations and, in addition, the Government will supply electric energy at the damsite at specified rates, thus eliminating any uncertainties to be assumed by the contractor in the preliminary work.

Townsite facilities will be made available by the Government, including public utilities at specified rates.

The resolution set forth no constructive ideas for bettering the position of the contractors. If it is decided to do work on a cost basis, there appears to be no good reason why it should not be done by "Government force" account. A cost plus basis would be incompatible with the general principles underlying contracting work.

A reduction in the amount of bond, which is usually set at 50 per cent of the contract price, is suggested, as a contractor might have difficulty in furnishing a bond for the costly Boulder Canyon project.

It is believed that the situation could further be relieved if it were stated definitely in the contract that payment of progress estimates would be made in full after a reasonable hold back had been built up. It is provided that the work to date had been done in a satisfactory manner. A 2½ per cent holdback instead of the usual 10 per cent is suggested, to be built up by holding back 10 per cent of the progress earnings until the holdback had been built up to the total amount of \$2,500,000. The dam and power plant are estimated to cost \$100,000,000.

The contract might be drawn to provide annual adjustments in unit contract prices, in a specified ratio between an index figure for the prices of materials and labor for the year in which the contract was signed, and each succeeding year thereafter. The index figures should be furnished by a national agency—possibly the Department of Commerce and Labor.

If this plan were adopted, a differential should be established, so that any increase would be in part borne by the United States and in part by

the contractor, to prevent higher prices being paid by the contractor than were necessary in comparison with the ruling market. Likewise, in case of a reduction below the index, the United States would share in the resultant saving.

As an example, this differential might be fixed at a 75 per cent share for the United States, and a 25 per cent share for the contractor, in which case any increase in the price of the contractors' equipment, supplies and labor would be borne by the respective parties in that proportion. Likewise any decrease would accrue to the benefit of the respective parties in the same proportion. In other words, the contractor would be secured against any risk in excess of 25 per cent of the increase in these items, and would profit to the extent of 25 per cent of any corresponding decrease.

CURRENT SITUATION IN CEMENT REPORTED

Plant capacity and shipments have increased rapidly in the cement industry since 1922, according to the United States Bureau of Economic Development of Commerce. The increase in shipments became very slow about 1927, and from 1928 there was a decided decrease. While shipments are falling off, plant capacity is steadily increasing, and there is no indication of any recession in the growth of plant capacity, the Bureau reports.

Minor fluctuations occur in plant capacity from month to month, while stocks and shipments show marked seasonal fluctuations which are characteristic of the industry. Stocks of cement in 1930 were considerably higher than for the corresponding months in 1929. Shipments in 1930 show a moderate decrease from the 1929 figures. Shipments for the first 10 months of 1929 total 152,264,000 barrels and for 1930, 144,272,000 barrels.

The facts brought out most forcibly in the Bureau's survey of the situation are: (1) A rapidly increasing plant capacity with no indication of a falling off in the rate of increase; (2) a moderate falling off in shipments; (3) a moderate increase in stocks on hand; and (4) a pronounced and steady decrease in price per barrel. Future conditions that may develop as a result of this combination of circumstances demand the earnest consideration of very cement plant operator, the Bureau concludes.

The foregoing facts are brought out by supplementary tables and charts which have been made a part of the Bureau's regular monthly statement giving cement statistics for October.

EXPLORATION WORK FOR DAM UNDER WAY

Contracts have been awarded by the Los Angeles County Flood Control District for exploration work at the site of San Gabriel Dam No. 1, about two miles below the Forks, where a high dam had been planned, but was abandoned because of lack of a safe foundation.

This new dam is one of three proposed by Chief Engineer E. C. Eaton to be financed out of the \$21,000,000 left of the original \$25,000,000 bond issue.

The district has a permit from the Federal government to build a rock all flexible type dam with concrete face at the site now being explored if a suitable foundation can be secured.

Cost of the exploration work, consisting of diamond drill holes and tunnels, will be about \$14,000. Inasmuch as the supreme court once ruled

that only a high dam could be built under the bond issue, carrying out the plan to build three smaller dams is contingent upon the court giving its sanction.

Building News Section

APARTMENTS

Sub-Contracts Awarded.

APARTMENTS Cost, \$85,000
OAKLAND, Alameda Co., Cal. 62nd near College Ave.
 Three-story frame and stucco apartment with concrete basement (30 2-3- and 4-room apts.)
 Owner—A. Jensen, care architect.
 Architect—H. K. Jensen, 354 Hobart St., Oakland.

English type of architecture, composition and shingle roof, steam heating system, and all modern conveniences.

Plumbing and Steam Heating—E. O. Dryer, 1918 Lakeshore Blvd., Oakland.

Electrical Work—Fritz Elec. Co., 838 Webster St., Oakland.

As previously reported, structural steel awarded to McGrath Steel Co., 354 Hobart St., Oakland; lumber to Smith Lumber Co., foot of 18th Ave., Oakland; pans to Steelform Contracting Co., Monadnock Bldg., San Francisco.

Plans Completed.

APARTMENTS Cost, \$—
LOS ANGELES, Calif. Sunset Blvd. near Kings Road.
 Fourteen-story reinforced concrete class A apartments (168 rooms).
 Owner—Wm. I. Moffett, Pacific National Bldg., Los Angeles.
 Architect—Leland A. Bryant, 6513 Hollywood Blvd., Los Angeles.

Sub-Contracts Awarded.

APARTMENTS Cost, \$175,000
SAN FRANCISCO. Green Street near Octavia Street.
 Six-story class A steel frame and concrete apartments (112 rooms).
 Owner and Builder—F. L. Hansen, 282 Seventh Street.
 Engineer—John G. Little & Co., 251 Kearny St.
Ornamental Iron—C. J. Hillard Co., Inc., 19th and Minnesota Sts.
Structural Steel—McClintic-Marshall Co., 2050 Bryant St.

Carpentry Finish Contract Awarded.
APARTMENTS Cost, \$650,000
SAN FRANCISCO. California St. and Joice Street.

Eight-story class A steel frame and reinf. concrete apartments (300 rooms).

Owner & Builder—Marian Realty Co., 110 Sutter St.

Architect—H. C. Baumann, 251 Kearny Street.

Carpentry Finish—Louis Anderson, 3370 Army St.

Construction Indefinitely Postponed.

APARTMENTS Cost, \$115,000
BURLINGAME, San Mateo Co., Cal.
 Two-story frame and stucco apartments (two 4-room apts.)
 Owner—Edward Stack.
 Architect—Edwards and Scharly, 605 Market St., San Francisco.

Contract Awarded.

APARTMENTS Cost, \$—
LOS ANGELES, Cal. No. 1861 Cherokee Avenue.

Ten-story and basement Class A reinforced concrete apartments (86x 95 ft. (200 rooms).

Owner—Cherokee Properties, Ltd.

Architect—Marcus P. Miller, Board of Trade Bldg., Los Angeles.

Contractor—Herbert M. Baruch Corp., Ltd., Lincoln Bldg., Los Angeles

Correction in Owner's Address.

APARTMENTS Cost approx \$18,000
OAKLAND, Alameda Co., Calif. Park Boulevard.

Two-story and basement frame and stucco apartments.

Owner—H. E. Lansing, 3316 14th Ave., Oakland.

Architect—F. H. Slocombe, 62 York Drive, Piedmont.

Bids are being received by owner on a general contract and also segregated bids.

Contract Awarded.

ALTERATIONS Cost, \$12,000
SAN FRANCISCO. No. 1531 Jackson Street.

Alter three-story and basement frame flats for apartments (4 4-rm apts).
 Owner—John Davis.

Architect—Walter Falch, Hearst Bldg., San Francisco.

Contractor—George Hansel, 506 29th Ave., San Francisco.

Sub-Bids Wanted.

APARTMENTS Cost, \$45,000
OAKLAND, Alameda Co., Cal. N 34th St. E Grove St.

Three-story and basement frame and stucco apartments (42 rooms).

Owner and Builder—Edward C. Gilbert, 581 33rd St., Oakland.

Architect—F. H. Slocombe, 62 York Drive, Piedmont.

Sub-bids are being taken on tiling, concrete floors, finish hardware, carpets, window shades and gas stoves.

November 20, 1930

Date of Opening Bids Postponed Until Nov. 26th, 2:00 P. M.

ADDITION Cost, \$22,000
WATSONVILLE, Santa Cruz Co., Cal.

Three-story frame and stucco addition to apartments (4 apts).

Owner—Stewart Thompson, 19 Madison St., Watsonville.

Architect—Wolfe and Higgins, Realty Bldg., San Jose.

Garage to care for 10 cars, steam heating plant, etc.

Plans Being Completed.

APARTMENTS Cost, \$250,000
SAN MATEO, San Mateo Co., Cal. Location Withheld.

Six-story and basement Class C steel frame, brick and concrete apart-

SKILSAW Portable Electric Hand Saws (4 models).

SKILSAW Portable Electric Sander

SKILSAW Radial Arm Attachments.

SYNTRON Portable Electric Hammers (4 models, motorless).

MALL Flexible Shaft Machines (50 models).

Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

Labor Saving Portable Electric Tools.

1248 Mission St. Underhill
 San Francisco 7662

SALES . SERVICE . RENTALS

ments (21 2, 3, 4, 5, 6, 7 and 8-room apts.)

Owner—Withheld.

Architect—Willis Lowe, 354 Hobart St., Oakland.

Bids will be taken in one week or ten days.

CHURCHES

Preparing Preliminary Plans.

CHURCH Cost, \$—
TAFT, Kern Co., Cal.

One-story frame and stucco church (70x50 ft.) auditorium to seat 250.

Owner—First Christian Church of Taft.

Architect—Robert H. Orr, Corporation Bldg., Los Angeles

H. J. Kirschlein is chairman of the building committee.

SANTA BARBARA, Cal.—Missionary Alliance has purchased property on Arlington Ave. as site for new church to be erected soon. Cost of site was reported at \$17,000.

Plans Being Figured—Bids Close Nov. 24, 2 P. M.

CHURCH Cost, \$6500
WILLOW, Glenn Co., Cal.

One-story frame and stucco church.

Owner—First Church Christ Scientist Willows.

Architect—Otto Deichmann, 110 Sutter St., San Francisco.

Bids are being received by Mrs. R. M. Montz, Secty at Willows, from local contractors only.

Preparing Working Drawings.

CHURCH Cost, \$70,000
OAKLAND, Alameda Co., Cal. Emerson and Excelsior Aves.

Reinforced concrete church.

Owner—Roman Catholic Archbishop of San Francisco, 1100 Franklin St., San Francisco.

Architect—W. E. Schirmer, 700 21st St., Oakland.

Bids will be taken about Dec. 1.

Plans Being Prepared.

CHURCH Cost, \$25,000
NAPA, Napa Co., Cal.

Gothic Type Church, 110-ft. by 25-ft. with interior elevation of 38-ft., seating 300 persons.

Owner—St. Mary's Episcopal Church, Rev. Chas. W. Pearson, rector, Napa.

Architect—C. LeRoy Hunt, 2nd and Main Sts., Napa.

A campaign for \$10,000 is now underway. \$15,000 already having been subscribed. Members of the building committee are: Harry E. Boudier,

Hensley S. Davis, George W. Danforth, C. W. F. Merwin and Will C. Keig.

Contract Awarded.

ALTERATIONS Cost, \$22,100
OAKLAND, Alameda Co., Cal. East 17th St. and Fruitvale Ave.

Alterations and additions to church (2 vestibules, foyer, porch, etc.)

Owner—Third Church of Christ Scientist, 1642 Fruitvale Ave., Oakland.

Architect—Henry E. Guttererson, 526 Powell St., San Francisco.

Contractor—A. Cedarborg, 1455 Excelsior Blvd., Oakland.

FACTORIES AND WARE-HOUSES

Sub-Contracts Awarded.

PLANT Cost, \$10,000
FORT BRAGG, Mendocino Co., Cal.
Group of corrugated iron buildings for distributing plant.

Owner—Associated Oil Co., 79 New Montgomery St., San Francisco.
Plans by Eng. Dept. of Owner.

Contractor—Dyer Const. Co., Ray Bldg., Oakland.

Concrete—F. Tamborini, Fort Bragg.
Lumber, Mill and Electric Work—Union Lumber Co., Fort Bragg.

Plumbing—Windlinx Hardware Co., Fort Bragg.

Mill Work, Corrugated Iron and Hardware—Union Lbr. Co., Ft. Bragg.

Sub-Contracts Awarded.

PLANT Cost, \$10,000
SOUTH FORK, Humboldt Co., Cal.
Group of corrugated iron buildings for distributing plant.

Owner—Associated Oil Co., 79 New Montgomery St., San Francisco.
Plans by Eng. Dept. of Owner.

Contractor—Dyer Const. Co., Ray Bldg., Oakland.

Clearing—C. E. Taggett, South Fork.
Sheet Metal—Harris Sheet Metal Wks Eureka.

Millwork and Corrugated Iron—George McEbs Co., Eureka.

Lumber—Pacific Lumber Co., Scotia.
Gravel Filling, Etc.—W. Kern, Weott.

Contract Awarded.

ADDITION Cost, \$25,000
EMERYVILLE, Alameda Co., Calif.
Peladeau and Powell Sts.
One-story brick and steel addition to present factory.

Owner—Westinghouse Electric Co. premises.

Contractor—Cahill Bros., 206 Sansome Street.

Plans by Eng. Dept. of Owner.

Bids Being Held Under Advertisement.
SERVICE BLDGS. Cost, \$45,000
REDWOOD CITY, San Mateo Co., Cal.
Group of service bldgs. (wood frame and tile walls).

Owner—Pacific Gas & Electric Co., 245 Market St., San Francisco.

Plans by Eng. Dep. of Owner.

Group includes warehouse, garage, service departments, superintendent's offices, etc.

STOCKTON, San Joaquin Co., Cal.
—Liquid Sugar Corp., Ltd., has purchased the Union Mill of the Sperry Flour Co. at Stockton and will remodel the plant and install new equipment. The Liquid Sugar Company is a subsidiary of the International Sugar Company and is financed principally by that organization. Pierre d'A. Philippe, nationally-known sugar authority, is president of both organizations and R. C. Melvin of San Francisco, vice-president.

Additional Sub-Contracts Awarded.

ASSEMBLY PLANT Cost, \$3,500,000
RICHMOND, Contra Costa Co., Cal.
Group of steel frame and brick buildings (1story assembly plant, 300,000 sq. ft. 2- or 3-story wharf building and receiving building).

Owner—Ford Motor Car Co., Detroit.
Architect & Engineers—Albert Kahn, Inc., Marquette Bldg., Detroit.

Chief Engineer—(Ford Motor Car Co.) R. B. Brown, Detroit.

Contractor—Clinton Const. Co., 923 Folsom St., San Francisco.

Glass and Glazing—Tyre Bros., 666 Townsend St., San Francisco.

Rolling Steel Doors—D. A. Pancoast Co., 665 Market St., San Francisco.

Steel Lift Doors—Bally Iron Works, Springfield, Ohio.

Terrazzo Floor—Henry Gervais Co., 1727 Mission St., San Francisco.

Rubber Tile, and Quarry Tile Floors—Malott and Peterson, 3221 20th St., San Francisco.

Folding Doors and Automatic Operators—R. V. Harry Co., San Francisco.

Gunitie Work—Cement Gun Const. Co., 58 Sutter St., San Francisco.

Lathing and Plastering—T. D. Sexton, San Francisco.

Other awards reported Sept. 29, 1930.

Plans Being Figured.

WAREHOUSE Cost approx. \$150,000
SAN FRANCISCO, Sansome and Vallejo Streets.

Three-story reinforced concrete warehouse.

Owner—Poultry Producers of Central California, 700 Front St.

Architect—H. C. Baumann, 251 Kearny Street.

BISHOP, Inyo Co., Cal.—State Highway Commission rejects bids to construct truck shed in connection with maintenance station at Bishop and the work will be done by commission forces on the day labor basis.

Bids To Be Taken In About Two Weeks.

HANGAR, ETC. Cost, \$100,000
ALAMEDA, Alameda So., Cal. Webster Street.

All-steel hangar and administration building (120x440-ft.).

Owner—Alameda Bay Airdrome (R. U. St. John, field manager).

Architect—Not Given.

The structure will be 120 by 440 ft. and will house shops and offices, in addition to providing plane storage space for 70 small planes or 15 trimotored transports.

November 15, 1930

Preparing Working Drawings.

SERVICE BLDGS. Cost, \$6,000
SAN MATEO, San Mateo Co., Cal.

Group of service buildings (concrete construction).

Owner—Pacific Gas & Electric Co., 245 Market St., San Francisco.

Plans by Eng. Dept. of Owner.

Complete Bid Listing.

CREAMERY Cost, price, \$115,560
SAN FRANCISCO, 15th and York Sts. (137x200-ft.).

Two-story and basement class E concrete creamery (foundation bid for two additional stories to be added later).

Owner—Challenge Creamery and Butter Assn., 307 Montgomery St.

Architect—Dodge Riedy, Pacific Bldg.

Low Bidder—Monson Bros., 475 Sixth Street.

Following is a complete list of bids:

Monson Brothers	\$115,560
J. Harold Johnson	115,597
K. E. Parker	121,300
G. P. W. Jensen	121,470
J. L. McLaughlin	122,518
MacDonald & Kahn	122,727
Sorensen & Haggmark	122,978
Barrett & Hill	124,821
F. J. Rellig	127,714
F. J. Selgrist Co.	128,000
F. Mueller	129,935
W. R. Nielsen	133,185
Chas. H. Nielsen	135,000
Ira Coburn	157,792

Bids held under advisement.

RENO, Nev.—Stoddard Moulding Mill suffered a \$75,000 fire loss Nov. 13. Preparations will be made to rebuild at once.

Construction Postponed Until April 1

MFG. PLANT Cost, \$75,000
WATSONVILLE, Santa Cruz Co., Cal.

One-story brick vitamin manufacturing plant.

Owner—Lettisvine Vitamin Co., Inc., Watsonville.

Plans by Mr. Brositt, Eng. Dept.

Chas. Dickens and Staff, 4 Key Route Arcade, Oakland.

Incorporators are: Dr. Chas. Dickens of Oakland; H. F. Boyer, James T. Mann, Harry L. Sears, Ned B. Strong and James H. Cutler of Watsonville.

Bids Opened.

TRUCK SHED Cost, \$—
GARBERVILLE, Humboldt Co., Cal.

Maintenance station truck shed.

Owner—State of California.
Plans by State Department of Public Works, Division of Highways, State Office Bldg., Sacramento.

Following is a complete list of bids received, all being referred to the Sacramento offices of the State Highway Commission for action:

McCarthy & Johanns	741 14th St., San Francisco	\$4,488
Mercer-Fraser Co., Eureka		5,466
Oliver S. Almie, 709 N. Fifth St., Grants Pass, Ore.		5,983

Contract Awarded.

DISTRIBUTING PLANT Cost, \$—
SAN FRANCISCO, 18th and Caroline Streets.

Distributing plant (concrete gravel bunkers, bins, etc.; 1st unit).

Owner—Kaiser Paving Co., 74 New Montgomery St.

Engineer—L. H. Nishkian, 525 Market Street.

Lessee—Readymix Concrete Co., 575 Berry Street.

Contractor—L. J. Cohn, 1 De Haro St.

Following is a complete list of bids:

L. J. Cohn, San Francisco	\$13,728
Monson Brothers	14,116
Barrett & Hill	15,665
Spivock & Spivock	16,360
Sorensen & Haggmark	16,900
MacDonald & Kahn	17,430
J. A. Bryant	18,000
S. Rasori	18,239
Clinton Stephenson Co.	18,376
H. L. Petersen	19,716
J. L. McLaughlin Co.	19,786
Villadsen Brothers	20,500

GARAGES AND SERVICE STATIONS

Wrecking Under Way.

SERVICE STATION Cost, \$—
SAN FRANCISCO, 8th Ave. and Fulton Sts.

Service Station.

Owner—Weisheim Bros. & Co., 582 Market St.

Architect—Withheld.

Contractor—J. B. Peterson, 4021 Agua
 Vista Ave., Oakland.

Plumbing—C. W. Wolken, 2059 38th
 Ave., Oakland.

Electric Wiring—Hancock Townsend,
 2510 Fruitvale Ave., Oakland.

Glass and Glazing—Cobbledick Kibbe
 Glass Co., 666 Howard St., S. F.

Sheet Metal—City Corncor Co., 3119
 San Pablo Ave., Oakland.

Mill Work—Eureka Mill & Lumber
 Co., 3615 E-14th St., Oakland.

Plans Being Prepared.
 OFFICES Cost, \$650,000
 PORTLAND, Ore. Fourth and Mor-
 rison Sts.

Twelve-story and basement steel
 frame and concrete offices and (9)
 stores (brick and terra cotta ex-
 terior).

Owner—Mortgage Inv. Co., Guardian
 Bldg., Portland.

Architect—Clausen and Clausen,
 Guardian Bldg., Portland.

The first two stories will cover the
 entire 100 by 100 foot land area while
 the upper 10 stories will be L-shaped
 with a 48-foot square light court at
 the rear. There will be 9100 square
 feet of rentable store space on the
 ground floor, 8545 square feet on the
 second floor, and the upper ten stories
 will provide 60,450 square feet of rent-
 able office space.

Plans Being Prepared.
 ADDITION Cost, \$—
 SAN FRANCISCO. 468 Turk St.

One-story concrete addition to build-
 ing.

Owner—Bell Bros., Mills Bldg.

Architect—Withheld.

Lessee—Hoover & Sweeper Co., 626
 Golden Gate Ave.

THEATRES

Structural Steel Bids Wanted.
 THEATRE Cost, \$500,000
 ALAMEDA, Alameda Co., Cal. North
 Central Ave. W Park St.

Structural steel frame and reinforced
 concrete theatre (to seat 3000).

Owner—Alameda Amusement Co.

Architect—Miller & Pflueger, 550 Mar-
 ket St., San Francisco.

Bids are now being received for
 structural steel and erection of same.

Contract Awarded.
 ALTERATIONS Cont. price, \$24,332
 OAKLAND, Alameda Co., Calif. 5631
 College Avenue.

Alterations to two-story class C brick
 theatre.

Owner—Up Town Theatre, premises.

Architect—A. A. Cantin, 544 Market
 St., San Francisco.

Contractor—Alfred J. Hopper, 1769
 Pleasant Valley Road, Piedmont.

Preparing Plans.
 THEATRE Cost, \$150,000
 SANTA ANA, Orange Co., Cal. Broad-
 way.

Two-story Class C brick theatre (50x
 150 feet) to seat 900.

Owner—United Artists.

Architect—Balch & Stanbery, Film
 Exchange Bldg., Los Angeles.

Plans Being Completed.
 ALTERATIONS Cost, \$60,000
 RICHMOND, Contra Costa Co., Cal.

Alterations to class C steel frame and
 brick theatre (change balcony,
 etc.)

Owner—Fox West Coast Theatres Inc.

MISCELLANEOUS SUPPLIES AND MATERIALS

LOS ANGELES, Cal.—Until 11 A. M., Nov. 28, bids will be received by the city purchasing agent, Thomas Oughton, for radio transmitting and receiving sets, Spec. No. 2234, as follows:

(1) Furnishing and installing medium high frequency radio telephone, remote controlled transmitting plant.
(2) Furnishing and installing complete medium high frequency radio sets as follows:

(a) 22 radio receiving sets in police

headquarters (1) alternating current, (2) 6-volt direct current.

(b) 45 radio receiving sets to be installed in police department automobiles.

PHOENIX, Ariz.—Until 10 A. M., Dec. 17, bids will be received by the Phoenix city manager for 221 button type reflector stop signs or rubber stop signs. All bids will be accompanied by a full sized sample. George H. Todd, city manager.

EUREKA, Humboldt Co., Cal.—Until Dec 2, 8 P. M., separate bids will be received by A. Walter Kildale, city clerk, to furnish and deliver for the year 1937:

- (a) Lubricating oil and grease;
- (b) Fuel Oil;
- (c) Gasoline.

Further information obtainable from

BUSINESS OPPORTUNITIES

SAN FRANCISCO.—Names and addresses of the individuals or firms concerned in the following opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street. Phone GARfield 8744:

20596—Wrought Steel T and Strap Hinges, Jambes-Namen, Belgium. Exporters of extra heavy T and strap hinges to the United States are desirous of contacting local importers of these commodities.

20595—Oriental Rugs and Carpets. Mirzapur, U. P. India. Manufacturers of Oriental rugs and carpets, made of pure fine wool, desire to extend their market to the United States.

20599—Veneered Wood. San Francisco, Calif. French firm seeks an agent interested in imported veneered wood.

20604—Mineral Paints. Lohwald, Germany. Manufacturers of (Keim) mineral paints desire to contact California importers of this commodity.

20606—Representation, Passaic, N. J. Party, 52 years of age, is anxious to represent manufacturers of exporters abroad.

20611—Representation. San Francisco. An electrical engineer with long selling experience is desirous of having direct representation or establishing sole agency in the territories of Mexico or China in machinery, electrical appliances, telephone equipment, structural materials of any description, radio sets and parts.

20612—Marble Chips. New York. Firm is interested in obtaining a list of importers or dealers in this city, handling marble chips, such as used by tile setters, flooring concerns, etc.

20614—Black Micantite Tapes. Tokio, Japan. Japanese exporters wish to contact electric goods merchants in this city interested in importing black micantite tapes.

20645—Representation. New York City. Export and import shipping agent with 18 years' experience is desirous of contacting large exporting or importing houses in California in need of representation in the East to look after all details, as to shipping, handling, etc.

20646—Glass. Charleroy, Belgium. Suppliers of Belgium flat drawn window glass seek a local market.

20647—Electric Drills. San Francisco. French manufacturer of electric drills seeks an agent in San Francisco.

C.T. Kraft, (Pioneer Brass, Bronze and Aluminum Foundry), 153 14th St., San Francisco, desires to contract with party or firm to act as a sales representative for California new brass broom rack, preferably one in a position to sell direct to the customer.

Russett Co. (Mr. W. A. Fays), 2008 E 22nd St., Los Angeles, manufactures of rust proof liquid, desires to contract firm which would be interested in manufacturing and sales distribution of same.

Engineering News Section

BRIDGES

SAN LUIS OBISPO COUNTY, Cal.—San Atlas Constr. Co., Andrews Bldg., San Luis Obispo, awarded contract by State Highway Commission at \$9483.25 for constructing in San Luis Obispo County a timber bridge across San Carpelo Creek, about 11 miles north of San Simeon (V-SLO-56-A) to be repaired by constructing a timber truss span 75 ft. 10 in. long on concrete piers to replace some of the existing bents. Unit bid follows: 350 cu. yds. struc. excav., \$1.75; 110 cu. yds. class A conc. (struc.), \$19; 85 cu. yds. class A conc. (placed by tremie), \$16; 3800 lbs. reinf. steel, 5.5c; 24,500 lbs. struc. metal, 12c; 12 M. B. M. redwood timber (dense select all-heart struc.), \$180; 25 cu. yds. conc. to be moved, \$4.75.

LOS ANGELES COUNTY, Cal.—Robert E. McKee, 515 Hewitt Street, Los Angeles, at \$29,785 awarded contract by State Highway Commission to construct reinforced concrete girder bridge over The Atchison, Topeka & Santa Fe Railway at Manhattan Beach, consisting of one 42-ft. span, two 31-ft. spans, and one 30-ft. 10-in. span and one 30-ft. 2-in. span on concrete bents.

MERCED, Merced Co., Cal.—As previously reported, E. K. Angle, Dos Palos, at \$8200 awarded contract by county supervisors to construct timber pile bridge in Road District No. 4. Following is a complete list of bids received:

E. K. Angle, Dos Palos.....	\$ 8,200
J. E. Fitzsimmons, Lodi.....	8,990
Ralph Hunter, Sacramento.....	9,000
Roy Krueger, Gustine.....	10,350
M. A. Jenkins, Sacramento.....	10,737
C. D. DeVellis, Oakland.....	10,887
E. Fritz.....	11,773
R. T. Bush.....	12,418
M. B. McGowan, San Francisco	13,986

VANCOUVER, B. C.—Hodgson, King Marble, Dawson & Wade Co., Ltd., Vancouver, B. C., submitted the low bid to the city of Vancouver at \$1,677,047 for the construction of the Burrard St. bridge. Shea-Pacific Co. submitted the next lowest bid at \$1,727,232. The items are: 3,200 tons of struc. steel; 50,000 cu. yds. concrete; 2,000 tons of reinforcing steel; 18,000 sq. yds. paving. Bridge is to be 2817 ft. long and 80 ft. wide. J. R. Grant, Vancouver, B. C., is consulting engineer.

SANTA BARBARA, Cal.—Until 10 A. M., Dec. 1, bids will be received by the county supervisors for the construction of a reinforced concrete bridge across San Jose Creek. Plans obtainable from county surveyor, O. H. O'Neill. Eng. estimate \$6000.

SANTA ROSA, Sonoma Co., Cal.—Bids will be asked shortly by Joint Highway District No. 16 to construct bridge over the Russian River at Jenner; estimated cost \$190,000. War Department has granted permit to district to construct the bridge. J. B. Platt, engineer, Daugherty-Shea Bldg., Santa Rosa. Details of construction will be published shortly.

MERCED, Merced Co., Cal.—As previously reported, T. A. Wayne, Atwater, at \$5567 awarded contract by county supervisors to construct six concrete bridges in Road District No. 3 over various Canals. Following is a complete list of bids received: (a) for bridges 218-219-220; (b) for bridges 221-222-223:

	(A)	(B)
T. A. Wayne.....	\$3100	\$2467
United Concrete Pipe Co. 3300	2645	
John Groom.....	3301	2650
R. T. Bush.....	3338	2758
T. E. Clark.....	3351	
H. Sneed.....	3480	2760
C. C. Disney.....	3850	3100
Liner & Allen.....	4402	3167

SAN MATEO COUNTY, Cal.—Bodenhauer Construction Co., San Diego, at \$36,756 awarded contract by State Highway Commission to construct reinforced concrete girder bridge over Redwood Slough near Redwood City, consisting of three 35-ft. spans and one 22-ft. span on concrete pile bents. Unit bids on this project previously published.

CLOVERDALE, Sonoma Co., Cal.—J. E. Bentley, Cloverdale, at \$1657.98 awarded contract by city trustees to construct culverts in various sections of the city.

MODESTO, Stanislaus Co., Cal.—County Surveyor J. H. Hoskins will submit revised plans to the War Department seeking authorization to construct bridge over the San Joaquin river at Patterson. The revised plans will allow for an 11-foot greater clearance between the high water mark and the lower span of the proposed \$175,000 bridge, as was recommended by war department engineers. A dirt fill-in on the western bank will more than compensate for the added cost in increasing the height of the bridge, Hoskins says. The \$175,000 figure is for a fixed span type, which is from \$25,000 to \$45,000 less than a drawbridge, according to the county surveyor.

BAKERSFIELD, Kern Co., Cal.—Currie & Dulgair, Bakersfield, at \$8952 awarded contract by county supervisors to construct reinforced concrete three-compartment box culvert in the Bakersfield-Taft Highway, involving: 600 cu. yds. excavation; 1100 cu. yds. embank. in place; 1600 ft. b.m. sheet-piling; 313 cu. yds. concrete; 36,700 lbs. reinf. steel; shoring of present bridge.

BAKERSFIELD, Kern Co., Cal.—F. A. Greenough, Bakersfield, at \$2318 awarded contract by county supervisors to construct timber bridge on Shafter-Lerdo Highway, involving: 150 cu. yds. excavation; 180 cu. yds. embank. in place; 30,900 ft. b.m. timber.

BAKERSFIELD, Kern Co., Cal.—Currie & Dulgair, Bakersfield, at \$1765 awarded contract by county supervisors to construct reinforced concrete box culvert on Kern River Park Highway, involving 60 cu. yds. excavation; 88.78 cu. yds. concrete; 6422 lbs. reinforcing steel.

BUTTE COUNTY, Cal.—R. B. McKenzie, Red Bluff, at \$32,370 submitted low bid to State Highway Commission Nov. 19 to construct substructure of a bridge over North Fork of the Feather River at Pulga, consisting of two reinforced concrete abutments, two reinforced concrete piers, six concrete footings and four erection anchors. Complete list of bids follows:

R. B. McKenzie, Red Bluff.....	\$32,370
Gist & Fell, Arcadia.....	34,246
Gutleben Bros., Oakland.....	34,332
M. H. Slocombe, Los Angeles.....	34,901
B. B. Boyd, San Diego.....	36,146
Peter McHugh, San Francisco.....	36,954
Lord & Bishop, Sacramento.....	37,087
Rocca & Coletti, San Rafael.....	37,271
Ward Eng. Co., San Francisco.....	38,333
M. White, Santa Monica.....	43,103
F. J. Maurer & Son, Eureka.....	44,536

Bids held under advisement.

BERKELEY, Alameda Co., Calif.—Lee J. Immel, 1031 Evelyn St., Berkeley, awarded contract by city council to construct culvert extension west of Euclid Ave., at Cordornices Creek, involving: (a) 90 ft. 36-in. corr. metal pipe, \$5.65 ft.; (b) 90 ft. reinforced concrete centrifugal pipe, \$6.55 ft.; (c) no bid; (d) 30x30-in. Monolithic conc. box culvert, \$12.

Geo. F. McMullen (a) \$6.45; (b) \$6.60; (c) \$6.85; (d) \$9.35.

DREDGING, HARBOR WORKS & EXCAVATIONS

SOLANO COUNTY, Cal.—Until Dec. 8, 3 P. M., under Circular Proposal No. 31-148, Specifications 2529, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, to raise existing levee along east and south boundaries of the Liberty Farms Project No. 2, located southerly of Yolanda Station on the Sacramento Northern Railroad, involving approximately 380,000 cu. yds. Further information obtainable from above.

RICHMOND, Contra Costa Co., Cal.—American Dredging Co., 255 California St., San Francisco, at \$31 cu. yd. submitted low bid to U. S. Engineer Office, San Francisco, to furnish sand for making fill in Richmond Harbor, involving 195,000 cubic yards. Pacific Coast Aggregates at \$39 only other bidder. Taken under advisement.

RICHMOND, Contra Costa Co., Cal.—Olympia Dredging Co., 249 1st St., San Francisco, at \$697 cu. yd. submitted only bid to U. S. Engineer Office, San Francisco, for dredging in Richmond Harbor, involving 94,340 cu. yds. Taken under advisement.

SACRAMENTO, Cal.—Until November 20, 3 P. M., under Circular Proposal No. 31-144, Specifications No. 2636, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish, deliver and place rip-rap stone along the Sacramento river in the vicinity of Ryde, involving 1000 tons. Specifications and further information obtainable from above.

STOCKTON, San Joaquin Co., Cal.—Paris Bros., Berkeley, submitted low bid and will be awarded the contract by the U. S. Engineer Office, Sacramento, under Circular Proposal No. 31-113, Specifications No. 2310-1670 for constructing certain levees or embankments along the San Joaquin River, the closest item of work being located about 10 miles, and the most remote item being located about 20 miles below the City of Stockton, in connection with the construction of the 26-ft. channel project in the San Joaquin and Stockton Channel. Complete list of bids follows:

- Paris Bros., Berkeley, (a) Item 24, involving 7700 cu. yds., \$104; (b) Item 31, involving 34,900 cu. yds., \$694; (c) Item 32, involving 31,200 cu. yds., \$694.
Delta Dredging Co., Pittsburg (a) \$11; (b) \$11; (c) \$11.
E. T. Fisher, Stockton (a) \$15; (b) \$15; (c) \$15.

SACRAMENTO, Cal.—Until Nov. 28, 3 P. M., bids will be received by U. S. Engineer Office, California Fruit Levee, Sacramento, to furnish and deliver under Order No. 2653, 1,500 tons rip-rap stone for winddams. Further information obtainable from above.

IRRIGATION PROJECTS

MERCED, Merced Co., Cal.—El Nido Irrigation District votes bonds of \$135,000 to finance construction of irrigation works, involving:

- (1) 12 miles of main canal, involving 150,000 cu. yds. canal excavation, 65,000 sq. ft. 2-in. concrete lining;
- (2) 15 miles of lateral canals, involving 120,000 cu. yds. canal excavation.
- (3) Construction of 24-in. to 48-in. siphons with headwalls, bridges, drops stop-gates and side-gates, etc.

A. Blakesley of the Merced Irrigation District is engineer for the district and W. A. Wright, secretary.

STREET LIGHTING SYSTEMS

RED BLUFF, Tehama Co., Cal.—Until December 1, 7:30 P. M., bids will be received by Enville C. Spaulding, city clerk, (1911-D) to install ornamental street lighting standards together with underground system in Walnut St., etc. Standards of Union Metal Mfg. Co. Design No. 792, 1-light. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

VISALIA, Tulare Co., Cal.—Bids received Nov. 17 by Ida Markham, city clerk (127-C) to install ornamental electrolier system with 52 two-light standards, together with underground system in portions of North and South Locust St.; North and South Court St., etc. Standards of Union Metal Mfg. Co. Design No. 2281. 1911 Act. Bond Act 1915. New bids have been ordered received, to be opened Dec. 1, 7:30 P. M. Cert. check 10% payable to city required with bid. Plans on file in office of clerk.

An unofficial listing of bids received November 17, follows:
A. C. Rice, Oakland.....\$19,869
R. A. Walker, Los Angeles.....20,061
Walker-Martin Corp., L. A.....20,167
Sam Fingerhut, Bakersfield.....20,506
Butte Elec. & Mfg. Co., S. F.....20,994

MACHINERY AND EQUIPMENT

VALLEJO, Solano Co., Cal.—Until November 24, 10 A. M., bids will be received by Alf. E. Edgcombe, city clerk, to furnish and deliver one automobile of the roadster type. Cert. check 10% payable to city required.

with bid. Specifications obtainable from clerk.

HANFORD, Kings Co., Cal.—Until November 24, 8 P. M., bids will be received by D. C. Williams, city clerk, to furnish and deliver one Caterpillar Tractor with canopy top and one Killefer Scraper; bids to be f. o. b. Hanford.

DANFORTH, Tulare Co., Cal.—Until November 28, 7:30 P. M., bids will be received by W. J. Minville, city clerk, (pro tem), to furnish and deliver roadster type automobile; cost not to exceed \$700 fully equipped; allowance to be made on Ford Model T touring car. Certified check 10% required with bid.

SAN MATEO, San Mateo Co., Cal.—Until December 1, 10 A. M., bids will be received by E. C. Lydon, clerk, San Mateo School District, to furnish and deliver one automobile school bus; capacity of from 38 to 40 pupils; equipped with motor at least 25-h. P., S.A.E., and of at least 6 cylinders. Separate bids will be considered for chassis and for body.

MADERA, Madera Co., Cal.—Until December 2, 10 A. M., bids will be received by L. W. Cooper, county clerk, to furnish one new Moreland Truck Chassis, not less than 5300 pounds capacity. Specifications on file in office of clerk.

SACRAMENTO, Cal.—Until November 28, 2 P. M., bids will be received by D. H. Greeley, superintendent of equipment, State Highway Commission, Shop No. 3, 1852 34th St., Sacramento, for the purchase of the following equipment no longer required:

- CHC 1296 Standard 3½-ton truck chassis and cab only.
- CHC 1580 Liberty Oil Distributor.
- CHC 293 Austin Giant 8' Leaning Wheel Grader.
- 1 only Fairbanks-Morse 6 H.P. Gas Engine.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at 1852 34th St., Sacramento, from 8:30 A. M. to 4:30 P. M. on any working day.

HUMBOLDT COUNTY, Cal.—Until November 28, 2 P. M., bids will be received by W. H. Pierce, superintendent of equipment, Shop No. 1, State Highway Commission, Eureka, for the purchase of the following equipment, no longer required:

- CHC 2498 Chevrolet Truck Chassis
- CHC 2493 Ford Express
- CHC 1278 Standard Truck Chassis
- CHC 1236 Standard Truck Chassis

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bid will be considered.

All equipment may be inspected at the Division of Highways yards at Eureka, from 8:30 A. M. to 4:30 P. M. on any working day.

FRESNO, Fresno Co., Calif.—Until November 28, 2 P. M., bids will be received by R. J. Carlisle, superintendent of equipment, Shop No. 6, State Highway Commission, 645 West Olive St., Fresno, for the purchase of the following equipment, no longer required:

- 1 Sullivan Drill Sharpener CHC No. 1.
- 1 Solar Blue Print Frame complete with plate glass 29x42 inches and felts.

- 1 Ford Tudor Sedan, Model "A", CHC 2862.
- 1 two-ton Caterpillar, CHC 235.
- 1 two-ton Caterpillar, CHC 237.
- 1 Itx 7x6 Compressor with Continental Model N Gas Engine mounted on skids, CHC No. 36.

Bidders may make offer for one or more items but must state price offered for each. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways' yards at 645 West Olive Ave., Fresno, from 8:30 A. M. to 4:30 P. M. on any working day.

SAN LUIS OBISPO COUNTY, Cal.—Until November 28, 2 P. M., bids will be received by R. P. Hamlin, superintendent of equipment, Shop No. 5, State Highway Commission, for the purchase of the following equipment, no longer required:

- CHC 1 x120" cylindrical gravel screen, 36" x120" with 3" openings.
- CHC 1225 Standard 3½-ton power dump truck.
- CHC 1334 Standard 3½-ton power dump truck.
- CHC 110 Office Wagon.
- CHC 111 Office Wagon.
- CHC 2196 Chevrolet 1-ton hand dump truck.
- CHC 3 Steam Engine 7½" Vert Single Cyl. 12 HP F. M.
- CHC 47 Concrete Mixer, Foote No. 16-E with 10 HP Novo Engine.
- 3 Only 2-wheel Scrapers.

Conical Sand Screen with cast base and driving gears, length 6', diameter 5'x1' 5-15" holes

- 1 Only 1-yd. Drag Line Bucket Sauer-man.
- 2 Only 1-yd. Car Unloaders.
- CHC 167 Office Wagon.
- CHC 25 Gas Engine, Doak 30 HP.
- CHC 232 4-wheel 1½-ton Trailmobile

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at San Luis Obispo, from 8:30 A. M. to 4:30 P. M., on any working day, except Gas Engine CHC 23. Doak 30 HP which may be inspected at the Highway yards at Paso Robles and Standard Trucks, CHC 1225 and CHC 1334 which are located at the Little Sur Prison Camp and may be inspected by arrangement with the superintendent.

FIRE ALARM SYSTEMS

SALINAS, Monterey Co., Cal.—Until December 1, 7:30 P. M., bids will be received by M. R. Keef, city clerk, to furnish and install 460 feet of 1½-inch galvanized conduit starting at present firehouse and terminating in service meter box located in alley west of Main St. and on Gablian St., and including the hooking up of the same to the present traffic signals and installing control switch in firehouse. Specifications on file in office of clerk.

OAKLAND, Cal.—Eagle Signal Sales Corp., 939 Market St., San Francisco, at \$1476 awarded contract by city council to furnish and install traffic signals and signal timers. Bid covered furnishing and delivering 20 signal timers, \$676; furnish and deliver 5 traffic signal secondary timers, \$800.

OAKLAND, Cal.—Globe Elec. Works (R. F. Flatland), 1899 Mission Street, San Francisco, awarded contract by city council to furnish and install signal cable in connection with traffic system, involving 1½-inch cable conduit, 8.84 lin. ft.; 2-in. cable conduit, 8.70 lin. ft.

RESERVOIRS AND DAMS

HOOVER DAM.—The Interior Department announces that advance copies of specifications covering construction of Boulder Dam will be available to contractors early next month. The first contract to be let will include the 727-ft. dam, the four 50-ft. dia. diversion tunnels, the coffer dams and the power plant and, according to the statement, it is planned to open bids for all this work early in February.

Principal items and approximate quantities of materials involved as follows:

1,800,000 cu. yds. all classes of open-cut excavation; 1,900,000 cu. yds. of tunnel and shaft excavation; 1,200,000 cu. yds. of earth and rock fill in coffer dams and river-channel protection; 4,400,000 cu. yds. of concrete; 228,000 cu. ft. of grout, placing 5,500,000 lbs. of reinforcement bars, drilling 150,000 lin. ft. of grout and drainage holes, installing 1,800,000 lbs. of small metal pipe and fittings, installing 32,500,000 lbs. of large metal conduits, installing 10,600,000 lbs. of structural steel and installing 20,000,000 lbs. of gates, hoists and other metal work.

SANTA BARBARA, Cal.—The Santa Barbara water commission has retained Hugh E. Martin as consulting engineer to survey the Mono and Gibraltar dam sites to determine the best location for a second Gibraltar dam.

PIPE LINES, WELLS, ETC.

OAKLAND, Cal.—Steel Tank & Pipe Co., 1100 Fourth St., Berkeley, at \$37,142 (\$3.79 ft.) awarded contract by East Bay Municipal Utility District to furnish 8900 lineal feet of ¾-inch thickness, 24-inch diameter electric welded sheet steel pipe for distributing system.

COALINGA, Fresno Co., Cal.—Until December 1, 7:30 P. M., bids will be received by E. J. McCroskey, city clerk, to furnish and deliver 5000 ft. 3-inch lap-weld pipe line (7.70). Certified check 10% required with bid.

SEWERS AND SEWAGE DISPOSAL PLANTS

REDWOOD CITY, San Mateo Co., Cal.—County supervisors declare intention (19) to construct sewer system in Daly City and Colma Sections. Estimated cost \$146,000. Work under 1911 Act and County Improvement Act 1921. Hearing December 1. Project involves:

Vit. Clay Pipe Sewer

66,000 lin. ft. 6-in.
1,600 lin. ft. 8-in.
4,600 lin. ft. 10-in.
2,900 lin. ft. 12-in.
5,400 lin. ft. 15-in.

Cast Iron Pipe Sewer

2,100 lin. ft. 8-in.
200 lin. ft. 14-in.

Vit. Clay Wye Branches

1,740 6x4-in.
20 8x4-in.
70 10x4-in.
100 12x4-in.
50 15x4-in.
330 manholes;

- 1 concrete sedimentation tank;
- 1 gravel sludge bed with concrete floor;
- 2 brick pump sumps;
- 2 400-gal. p. m. pumps;
- 2 500-gal. p. m. pumps;
- 1 140-gal. p. m. pump;
- 2 concrete pumphouses;
- 1 corrugated iron pumphouse.

R. A. Klassen, Redwood City, is engineer on the project. Elizabeth M. Kneese, county clerk

SAN FRANCISCO.—E. J. Treacy, Call Bldg., at \$2303 submitted low bid to Board of Public Works to improve Brussels St., between Ward and Mansell Sts., including crossings of Ward, Ordway and Mansell Sts., involving construction of vitrified clay pipe sewers, manholes and wye branches. Complete list of bids follows:

E. J. Treacy	\$2,303
M. J. Lynch	2,741
J. Verano	2,075
A. G. Ralsch	3,238
C. B. Eaton	3,515
Pay Improvement Co.	3,666

WATER WORKS

ANTIOCH, Contra Costa Co., Cal.—P. L. Burr, 320 Market St., San Francisco, at \$3049.15 awarded contract by city council to install 10-in. c. i. water mains, laterals and fire hydrants in B street, between Sixth and Tenth Sts.

PHOENIX, Ariz.—Construction of the Verde Intake pipe line, for which bids will be received by the city manager, Geo. H. Todd, at 10 A. M., Dec. 2 (previously noted) includes construction of a main supply line, 31.5 miles in length, a distribution system 8 miles in length, one 20,000,000-gallon reservoir and one detritor. According to C. C. Kennedy, consulting engineer, San Francisco, bids will be taken on alternative routes for the main supply line, one route to have 20,000 lin. ft. of 5½ by 7 ft. tunnel and the alternate route to have tunnels 2000 and 2500 ft. long. Alternative bids will be taken on cast iron pipe; welded steel pipe; and reinforced concrete pipe in sizes of 54-in., 48-in. and 45-in. The pipe line from the reservoir to the city will be 6½ miles in length, of 48-in., 45-in. and 36-in. cast iron pipe, or welded steel pipe, or lock joint pipe, or Hume centrifugally cast reinforced concrete pipe, or steel pipe centrifugally lined with concrete and gunite coating on outside. Work will also include a sand removal apparatus, \$2,200,000. Bonds have been sold for the above improvements.

MODESTO, Stanislaus Co., Cal.—H. E. Gragg, city clerk, ask bids shortly to furnish and deliver a quantity of pipe for water system extensions. Frank Rossi, city engineer.

SAN FRANCISCO.—Until Dec. 1, 3 P. M., under Proposal No. 661, bids will be received by Leonard S. Leavy, City Purchasing Agent, 270 City Hall, to furnish and deliver cast iron pipe, tar coated (made in the U. S. A.), for San Francisco Water Department, as follows:

30,000-ft. size 6-inch.
30,000-ft. size 8-inch.

Specifications obtainable from above.

SAN FRANCISCO.—Bids will be asked shortly by S. J. Hester, secretary, Board of Public Works, to furnish and install electrically driven centrifugally pump with appurtenances at the Mills Field Municipal Airport.

REDWOOD CITY, San Mateo Co., Cal.—City Engineer C. L. Dimmitt is making surveys for pipe line to connect with the well on the Howard Canine property east of Chestnut St., in connection with the municipal water system; estimated cost \$17,500.

STREETS AND HIGHWAYS

FRESNO, Fresno Co., Cal.—Valley Paving & Construction Co., Visalia, submitted low bid to county supervisors to pave Mount Whitney Ave. in Riverdale Road District No. 14, involving 2500 lin. ft. of 3-in. Permatite asphaltic concrete surface, 45 ft. wide, and 5000 lin. ft. of curbs and gutters. Johnson & Sons, only other bidder. Taken under advisement until Nov. 25.

KERN COUNTY, Cal.—Valley Paving & Construction Co., Visalia, at \$22,819 awarded contract by State Highway Commission to grade and pave with cement concrete, 0.3 mile near Wasco.

HILLSBOROUGH, San Mateo Co., Cal.—Town trustees declare intention (30-2) to improve portions of the Arden Road and San Raymundo Road, etc., involving grading; 4-in. asphalt, conc. base pave with 2-in. asphalt, conc. surface, etc.; hyd. cem. conc. gutters; hyd. cem. conc. steel reinf. retaining walls; 4-in. clay tile pipe drains; conc. storm water sewers; catchbasins. City will pay \$2500 of cost from Treasury. 1915 Bond Act. Hearing Dec. 2. John A. Hoey, town clerk.

SAN FRANCISCO.—Federal Construction Co., Call Bldg., at \$5421 awarded contract by Board of Public Works for paving at Mills Field Municipal Airport involving, 52,000 sq. ft. 2-in. asphalt, conc. wearing surface; 35,200 sq. ft. ¾-in. emulsified asphalt wearing surface; 15 tons asphaltic concrete repairs; 2600 sq. ft. concrete sidewalks; 165 lin. ft. armored concrete curb and gutter; 1 concrete inlet; miscellaneous work; manhole readjustment; gate relocation; water pipe installation.

MONTEREY, Monterey Co., Cal.—J. L. Connor, P. O. Box 542, Monterey awarded contract by city council (3020) to construct 4-inch cement concrete sidewalks in Lighthouse Ave., between north line of U. S. Military Reservation and common boundary

line between the city of Pacific Grove and the city of Monterey.

VALEJO, Solano Co., Cal.—City council has authorized Southern Pacific R. R. to construct proposed crossing over Fourth St., a link in the southern extension of Sonoma St., over the tidelands to South Vallejo. The cost is estimated at \$3500 and will be borne by the city. T. D. Kilkeny is city engineer.

SAN JOSE, Santa Clara Co., Cal.—City council declares intention (5238) to improve Morse and Chapman Sts., between Fremont and Singletary Aves., involving grading; 1½-in. asph. conc. surface pavement on 2½-in. asph. conc. base; cem. conc. sidewalks, curbs, vit. pipe lateral house sewers. 1911 Act. Hearing Dec. 1. John J. Lynch, city clerk. Wm. Popp, city engineer.

SAN JOSE, Santa Clara Co., Cal.—Until November 24, 8 P. M., bids will be received by John J. Lynch, city clerk, (5216) to improve portions of Morlan Ave., bet. Santa Clara and 13th Sts., involving grading; 1½-in. asph. conc. surface pavement on 2½-in. asph. conc. base; cem. concrete walks and curbs. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Wm. Popp, city engineer.

SAN JOSE, Santa Clara Co., Cal.—Until November 24, 8 P. M., bids will be received by John J. Lynch, city clerk, (5218) to improve Vermont St., bet. Myrtle and Elm Sts., involving grading; 1½-in. asph. conc. surface pavement on 2½-in. asph. conc. base; 4-in. vitrified house lateral sewers; cem. conc. walks and gutters. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Wm. Popp, city engineer.

BURLINGAME, San Mateo Co., Cal.—Union Paving Co., Calif. Bldg., San Francisco, at approx. \$8000 awarded contract by Southern Pacific R. R. to pave portions of R. R. Ave., bet. 5th and 9th Aves., in rear of freight depot.

EUREKA, Humboldt Co., Cal.—Until December 2, 5 P. M., bids will be received by A. Walter Kildale, city clerk, to furnish and deliver 1000 cubic yards, more or less, screened gravel. Further information obtainable from Clerk.

OAKLAND, Cal.—Until December 4 12 noon, bids will be received by F. C. Merritt, city clerk, to improve portions of Hopkins Street Place and Portions of Hopkins Street and Coolidge Avenue, involving grading, curbs, pavement, walks, storm water inlets, sewer with manholes, lampholes and wye branches, vit. pipe side sewers. 1911 Act. City will pay 22½% of total cost from Treasury. Certified check 10%, payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

OAKLAND, Cal.—Until December 4 12 noon, bids will be received by F. C. Merritt, city clerk, to improve portion of 92nd Ave., involving grading, pave, sewer, manholes, wye branches, storm water inlets and conduits. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

SANTA BARBARA, Cal.—Hunter & Richardson, 525 E. Haley St., awarded contract by the city at \$39,224 to improve Padre St., between State St. and Hollister Ave., and portions of

Los Olivos St., Pueblo St., Junipero St. and Wellington Ave., involving: 1733.18 cu. yds. embank.; 5753.66 cu. yds. excav.; 112,868.5 sq. ft. 7-5-7-in. concr. paving, including grading; 2559.2 ft. combined concr curb and 3-ft gutter; 382.3 ft. curb; 10,281.3 sq. ft. gutter; 66.6 ft. stone curb to be reset; 29 house sewer connections; 30 ft. 6-in. vit. main sewer; one 5-ft. manhole; 1.6 cu. yds. 4-in. concr. apron; 23,861.7 sq. ft. cement sidewalk; 16 ft. 24-in. reinf. concr. pipe; 42 ft. 36-in. reinf. concr. pipe; 66 ft. 42-in. reinf. concr. pipe; 166 ft. 12-in. concrete pipe; 15 ft. 8-in. corr. iron pipe; 2 2-ft. corr. iron catchbasins; one 7-ft. by 7-in. slot catchbasin.

SUTTER COUNTY, Calif.—As previously reported, N. M. Ball, Porterville, at \$8860 submitted low bid to State Highway Commission to grade and pave with Portland cement concrete 0.3 mile near the Sutter county hospital. Project involves: 7 sta. clear and grub, \$30; 1,350 cu. yds. roadway excavation without classification, \$70; 110 sta. yds. overhaul, \$65; 40 cu. yds. structure excavation, \$1; 2,150 sq. yds. subgrade for pavement, \$10; 450 cu. yds. class "A" P. C. C. pavement, \$11.75; 9,500 lbs. bar reinf. steel (pavement), \$406; 250 tons untreated crushed gravel or stone, \$3,500; 190 cu. yds. saly. surface (detour), \$125; 142 lin. ft. 12-in. corr. metal pipe, \$1; 160 cu. yds. remove and dispose of conc. in existing pavement, \$3; move and reset two monuments, \$250; 14 sta. yds. finish roadway, \$10. Taken under advisement.

OAKLAND, Calif.—City council has started proceedings to improve East Tenth and Russet Sts. bet. High St. and 54th Ave., involving 7-in. conc. pave. in center with 9-in. at edges; estimated cost, \$46,608 of which the city will pay \$17,072. W. N. Frickstad, city engineer.

STOCKTON, San Joaquin Co., Cal.—George French, Jr., P. O. Box 675, Stockton, at \$14,967 submitted low bid to county supervisors to improve road in Ripon District adjoining the Burham Ferry Road. Complete list of bids follows:

G. French, Jr.	\$14,967
Pieriera and Reed	15,191

Santa Maria Const. Co., Santa Maria	25,273
W. A. Dontanville, Salinas	28,349
Corwall Const. Co., Santa Barbara	31,006

Bids held under advisement.

Although awarded judgment of \$17,004 last year in San Francisco from the Raich Improvement Company, the Globe & Rutgers Fire Insurance Company has been unable to collect the judgment as the improvement company is no longer in existence.

Such are the allegations made by the insurance company in an action against A. J. Raich, contractor, filed in the superior court at San Jose last Friday to collect the amount of the San Francisco judgment and interest since 1923.

The improvement company, in conjunction with the Clinton Construction Company, were laying an asphalt street in pier 40 in San Francisco in October, 1925, when the fire heating of the asphalt got out of control and damaged the pier to the extent of \$44,476, according to the complaint.

The Clinton Company was insured for \$25,000 with the Globe Insurance Company and were held liable for \$13,898 damage to the pier, which was the amount of insurance paid them. The Clinton Company in turn assigned to the insurance company their claim against the Raich Company.

In February, 1929, the insurance company won judgment of \$17,004 from the Raich Improvement Company in the San Francisco superior court. But when the sheriff attempted to levy the property of the improvement company he learned they had ceased doing business in that name and that A. J. Raich was conducting it under his own and other names, according to the complaint.

The insurance company alleges a Raich is the owner of the entire stock of the Raich Improvement Company and therefore responsible for the judgment. The law firm of Miller & Thornton of San Francisco represent the insurance company.

The proposal to control the architecture of buildings erected on property contiguous to the Los Angeles civic center has been passed up to the Board of City Planning Commissioners and the city planning committee of the city council. This movement is favored by the Los Angeles Chamber of Commerce, which, according to President John C. Austin, has agreed that a reasonable attempt to control the architectural design of buildings facing the civic center should be made.

M. H. SLOCUM LOW ON FOUR TIMBER BRIDGES IN KERN CO.

KERN COUNTY, Cal.—As previously reported, M. H. Slocum, 2055 Veteran Avenue, Los Angeles, submitted the low bid to the State Highway Commission November 12 to construct four timber bridges in Kern County from 17 to 21 miles west of Easco, one composed of twelve 19-ft. spans, one composed of four 19-ft. spans and two composed of two 19-ft. spans each, all on framed bents with concrete footings. Following is a complete list of the unit bids received:

(1) 620 cu. yds. struc. excav.	dense select all - heart struc. grade;
(2) 3000 cu. yds. imported borrow;	(10) 70 M. ft. b.m. redwood timber, select all-heart struc. grade;
(3) 200 ton ssand (detour surfacing);	(11) 170 cu. yds. class A Portland cement concrete;
(4) 280 tons crusher run base (detour surf.);	(12) 84 cu. yds. class B Portland cement concrete;
(5) 93 bbls. heavy fuel oil;	(13) 19,600 lbs. reinf. steel;
(6) 138 lin. ft. 18-in. corr. metal pipe	(14) 1 lot misc. items of work;
(7) existing timber bridges to be removed;	The state will furnish corrugated metal pipe.
(8) 60 cu. yds. existing pavement to be removed;	
(9) 80 M. ft. b.m. redwood timber.	

The total bids were:

(A) M. H. Slocum, \$25,118.	(E) Ulrich Const. Co., \$26,714.
(B) G. A. Graham, \$25,682.	(F) Gist & Bell, \$29,735.
(C) V. R. Dennis Const. Co., \$25,728.	(G) J. S. Metzger, \$30,458.
(D) R. B. McKenzie, \$25,870.	(H) Finnel Co., \$31,872.

OFFICIAL PROPOSALS

NOTICE TO CONTRACTORS

General Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, December 16, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the **General Work for the Hospital Building and Industrial Building, Stockton State Hospital, Stockton, California**, in accordance with plans and specifications therefor.

The Hospital Building is two stories with partial basement, reinforced concrete with tile and solid plaster partitions, wood roof construction and the roof and a total floor area approximating 14,500 square feet.

The Industrial Building is two stories, reinforced concrete, wood and concrete second floor construction, steel roof construction and a total floor area approximating 6,150 sq. ft.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Wks Building, Sacramento, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications & proposal forms may be secured by licensed General Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

UNION WAGES SHOW GAIN IN 1929 SURVEY

The long-time upward trend of union wage scales continued in 1929, and organized labor's demand for shorter hours was recognized in most of the contract renewals, according to a nation-wide survey of union rates published by the U. S. Department of Labor.

Three-quarters of a million workers, in eight crafts and 67 important industrial centers, were reached in the survey. In all, 75 trade and subdivisions were examined.

For 1929 the hourly wage rate for all these trades showed an increase of seven-tenths of a cent per hour as compared with 1928. The real return to the worker was increased somewhat above this figure by declining prices.

Some 20 building trade crafts showed an increase of 1.3 per cent. Bakers, laundry workers, and stone cutters affiliated with labor unions won wage increases of 2.5 per cent or better during the year.

While wages for the combined groups increased fractionally, the full-time hours per week decreased by one-tenth of an hour for the 786,000 union workers surveyed. The 44-hour week—five eight hour days and Saturday morning—is the union standard. The survey showed fewer than one-tenth of the organized workers toiling as many as 48 hours weekly.

The steady extension of the 5-day week is shown by the finding that slightly more than one-sixth of all union workers surveyed work 40 hours or less per week.

The average union wage rate at the middle of 1929 was \$1.20 per hour, or \$9.60 for an eight-hour day.

Against these advances by the union crafts, some of the larger non-union groups reported working hours and wages unchanged since 1926.

In the steel industry average weekly earnings for the 54-hour week increased from \$34.41 in 1926 to \$36.48 in 1929.

MUST PAY FOR WORK ON BUILDING THAT BURNED

If a building contract does not explain that a contractor shall receive payment for work performed on a building which is destroyed before its completion, the courts usually hold that the owner agreed to pay a reasonable amount to the contractor for the work performed, says The Constructor.

In Robb v. Parten, 226 N. W. 515, it was proved that a contractor agreed in writing to furnish and install all the material in a dwelling. Before completion of the work the building was destroyed by fire. The owner refused to pay the contractor for the work which he had performed, and the contractor filed suit.

The higher court promptly held the owner bound to pay for the work performed by the contractor before the building was destroyed by fire.

Cannot Recover Compensation and Damages, Court Rules

An injured employee who accepts compensation under the workmen's compensation laws is barred from suing and recovering damages under the common law, says The Constructor. An employee may sue for damages, if he believes he may recover a greater amount than is provided by the state compensation laws, but he cannot ordinarily recover both compensation and damages.

In Swartz v. Conradis, 148 AU. 529, it was shown that a general contractor was erecting a school building. He sublet the plastering contract to a sub-contractor. An employee working for the latter was severely injured, while engaged at his work, by the falling of a ceiling. He received compensation from the subcontractor and then sued the principal contractor for damages on the grounds that the latter failed to provide a safe place in which to work. He alleged that the general contractor negligently constructed the ceiling so that the injuries actually were caused by the general contractor's failure to provide a safe working place. Ordinarily, the general contractor would have been liable in damages, but since the employee had accepted compensation under the state compensation laws from subcontractor, the court held the principal contractor not liable, stating the following important law:

"When the relationship of contractor, subcontractor, and employee springs into existence, the compensation act takes hold; the common-law relation of the parties theretofore existing is changed into a statutory relation. Of course, the parties may disavow this relation and relapse into their former common-law status. . . . To maintain this common-law action, appellant (employee) must show some legal relation between him and defendant that has been injured under circumstances which sustain an action of trespass for the wrong. . . . The subcontractor carried compensation insurance and the plaintiff (employee) the compensation provided by the compensation act. . . . Where an employee seeks to recover from a contractor in a common-law action, he must show that the contractor has rejected the provisions of the workmen's compensation act in the manner there provided, otherwise he will be relegated to the compensation act for redress."

The U. S. Department of Labor will soon establish an employment bureau at Las Vegas, Nevada, to handle the employment situation in connection with the Hoover Dam project. The bureau will try to keep surplus workers away by the spreading of information regarding the progress of development and number of men needed. The Reclamation Bureau of the Department of the Interior will co-operate in this work.

\$45,000,000 WATER PROGRAM PROPOSED

A \$45,000,000 water development on the American River, involving the construction of three major dams, to provide free water for the Delta of the Sacramento and San Joaquin Rivers flood control, irrigation and electric power, is proposed in a report prepared by State Engineer Edward Hyatt, Jr.

The report was prepared by A. H. Edmonston, deputy State engineer, for the Joint Legislative Committee on Water Resources, and deals with a specific project proposed by the American River Hydroelectric Company, which would fit into the proposed coordinated plan for developing California water resources.

The study sets forth the service obtainable under flood control, salinity control, irrigation and power from three major reservoirs, at Folsom, Auburn and Colma, and two minor projects at Pilot Creek and Webber Creek with an aggregate storage capacity of 1,750,000-acre feet and power installation of 200,000 horsepower.

"The reservoirs could be operated to control floods on the American River to 100,000 second feet maximum flow at Fair Oaks," the statement said. "They would maintain an inflow into the Delta of Sacramento and San Joaquin Rivers at 5000 second feet for salt water control, and to meet the irrigation demands of the Delta Area; furnish an additional irrigation supply of 300,000-acre feet per season and produce incidentally 600,000 kilowatt hours of electrical energy annually."

BUILDING OFFICIALS SECURE NEW MEMBERS

Eight new members were added to the roster of the Pacific Coast Building Officials' Conference during the month of October; one active, five associate, and two active participating, as follows:

Active—E. E. Myers, building inspector, Oceanside, Calif.

Professional—P. F. Meade, district manager, Portland Cement Association, Denver, Colo.

Associate—Associated Brick Manufacturers of the Inter-Mountain Territory, Salt Lake City, Utah; Payne Furnace and Supply Co., Beverly Hills; Simons Brick Co., Los Angeles; and Smith-Emery Co., Los Angeles.

Active Participating—City of Pomona, Calif. (C. C. Caves, mayor), City of Orange (D. H. Dale, building inspector); and Beverly Hills.

Pacific Coast Building Officials' Conference has received a letter from the "old country"—Edward Wood & Company, Ltd., of Manchester, England, requesting a copy of the Uniform Building Code, expressing particular interest in welding provisions. A copy also requested by the Fraser, Brack & Engineering Company, Ltd., contracting engineers of Montreal, Canada.

A. I. A. PLANS NATION-WIDE STUDY OF UGLY COMMUNITIES

A nation-wide study to promote "better planning of all communities for permanent human use as essential to modern civilization" has been started by the Committee on City and Regional Planning of the American Institute of Architects.

Finding that millions are wasted annually on ugly buildings, and that bad environment blights behavior, health and enjoyment of life, the Committee, as its initial task, is seeking an answer to the question: "Can character and individuality of cities and regions be consciously attained?"

Replies thus far received indicate a conflict of opinion, according to Chas. H. Cheney of Los Angeles, chairman of the committee. Farsighted, intelligent planning and careful building up of the morale of the district is cited as the best method by J. C. Nichols, Kansas City, Mo., member of the National Capital Park and Planning Commission.

Herbert U. Nelson of Chicago, executive secretary of the National Association of Real Estate Boards, questions the value of conscious striving for municipal beauty. Cities are composed of men and women working for better standards of living, and will continue to improve the quality of their development, Gardner S. Rogers of the Civic Development Department of the United States chamber of Commerce declares. Others doubt whether American cities can have any well defined character.

"The original 'city beautiful' movement failed, or at least did not succeed largely because it was concerned with surface good looks," says Mr. Nichols, developer of the Country Club District of Kansas City, characterized by Mr. Cheney as one of the three or four outstanding residential communities of the country.

"To assume decoration would give charm and character to a city that was structurally bad was as illogical as to assume a finely tailored suit would transfigure an unfortunate man, afflicted with a physical deformity.

"Slowly, painfully America learned the lesson that there are great fundamental considerations in city building. When the first city planner came among us to declare that his art simply consisted in exercising 'such foresight as would promote the orderly and slightly development of a city, with due regard for health, amenity and convenience and for its commercial and industrial advancement,' a revolution in our thought had occurred. And when the town planner looked beyond the corporate limits and included the city's environs, another advance took place.

"Of course, mere cleanliness enhances the charm of an urban community. Orderliness goes much further. Nature furnished all the precedents for man in handling the landscape, whether in designing the street network or grouping buildings in pleasant relationships.

"Parks, not only great open areas but small ones as well, are inspiring; playgrounds, a human necessity; segregated commercial, industrial and residential areas, essential for the sake of efficiency as well as congenial living; well designed commercial and domestic buildings, worth while; imposing public structures properly related, a worthy expression of the ideals and achievements of a free people. Control of the use of property for the good of the great majority is necessary as protection against the

few who put self-interest above the general welfare.

"But, speaking from nearly a quarter-century of experience in striving to apply the principles of the city planner to the practical demands of modern city living, especially as applied through the protection of home life through the perpetuation of fine influences not difficult to set up, the greatest thing to be desired is intangible.

"I refer to morale. Unless there is developed among the people a deep-seated loyalty to these things, no city is truly great. It isn't so much that the Country Club district, or any other home section, is lovely and wholesome today that matters. What is needed most is an alert and determined interest in checking the smallest violation of the rules laid down in the restrictions or the ordinances or statutes. The greatest asset a city or a neighborhood may claim is loyalty that is intelligent and unwavering.

"Fortunately, the planned city becomes the city intelligent, the city loyal. Morale grows out of something for which people may be proud. If city planning did nothing more than inspire a finer type of citizenship, it would have justified itself. Since it is the great stabilizer of property values and the protector of wealth, it is one of the most practical things man ever has devised."

Practically all cities are alike in their mechanical equipment, Mr. Rogers points out, adding: "All have the telegraph and the telephone; light, power and heat; good roads and amusements, but there is a wide divergence among cities in those elements which make living more worthwhile and more profitable.

"The improvement of quality assists in the establishment of character, and character is the best of advertising media. We are attracted to people, not because they have accumulated quantities of worldly goods, not because they are large nor because they can talk longer or faster than others, but because of their character. Character in a city as in man is the expression of its ideals and aspirations. It is personal and local.

"A city therefore should develop in accordance with local conditions and local or sectional traditions. The elm, a beautiful and characteristic tree of New England cities, would be inappropriate in any of the Gulf coast cities, and the palm-lined avenues of Los Angeles would appear ridiculous if developed in Chicago.

"A New York skyscraper does not make a city of fifteen thousand population a metropolis, and the building of a Philadelphia tenement house in a small town injures rather than improves the housing situation. The folk lore, sentiment and character of any section of the country is built around local conditions and local attributes, and it is these which should be utilized, refined and perfected in the building of a city. I therefore commend for your consideration the business has so successfully employed, namely, to improve the character of the municipal product as the best means of increasing the production, the enhancement of property values, and the realization of a more successful life."

Mr. Nelson expresses the opinion of some of the realtors, according to Chairman Cheney's statement, in holding that beauty is a by-product of

good order, utility and economy of design. "I think," Mr. Nelson continues, "that the airplanes of today are more pleasing than those of ten years ago and that this quality derives from improvement in these factors.

"I am inclined to doubt, therefore, that conscious striving for beauty in our cities will give us the results we want and that you have in mind. I believe that if we plan our cities so as to utilize the ground most efficiently for structures and for traffic, so as to give to our citizens healthful conditions and convenient opportunities for recreation, the net result will be beautiful cities.

"European concepts of civic centers, boulevards and plazas are not adapted to American habits of living. Although they dominated the National City Planning Conference fifteen years ago. The universal use of automobile transportation in this country makes possible cities of much greater area in proportion to population than the older type of cities. The conception on which Chicago is working strikes me as being sound, namely, to have great concentric circles of playground and forest reserve surrounding the city, giving easy access to all to real outdoor life.

"I believe the point where architects and city planners should start their work today is with the family residential unit. I believe this unit to be inefficient and costly with relation to the needs it serves and in comparison with what could be developed with the scientific and technical knowledge we already have.

"When this problem is adequately solved, the rebuilding of American cities and communities can proceed with relation to the new solution. I often regret that architects do not give more time and thought to this matter. Most of those I meet are thinking in terms of exterior and conscious aesthetic effects based on tradition or habit."

One prominent citizen of Washington, D. C., informs the committee that there is "some slight evidence of originality" in American cities. "One town," he observes, "will have ten more oil signs on the right hand side of the main approach to the city than the next town. The next town has eighteen more chicken dinner signs than the town before.

"The town after that has its slums on the south side of the railroad tracks and the town after that has them on the north side. Each town has the most wonderful Chamber of Commerce that was ever organized, and a lot of other allied, uplift outfits who are long on conversation and extremely short on action."

REAL ESTATE ACTIVITY

An increase of 7.2 in the index figure representing real estate activity for October over the figure representing September activity is reported by the National Association of Real Estate Boards, following its monthly computation of statistics on real estate market activity. The figure representing real estate market activity for October is 74.

The index figure is based upon official reports of the total number of deeds recorded in 64 typical cities throughout the country. Real estate activity for 1926 is taken as the base in computing the monthly figure.

METROPOLITAN WATER PROJECT COST IS TWO HUNDRED MILLIONS

Capable of serving 7,500,000 people and estimated to cost \$200,000,000, plans for the Colorado river aqueduct, the greatest ever projected for a domestic water supply, were outlined at Los Angeles last week by Frank E. Weymouth, chief engineer of the Metropolitan Water District.

Combined with the resources of the Los Angeles - Owens river aqueduct, the gigantic water system will provide for a Southern California population of 10,000,000.

While no definite plans have been made for financing the project it is thought that steps may be taken to call a special election within the 13 cities comprising the Metropolitan district. The probable date of the election would correspond either to the municipal primary or the Los Angeles city election next year.

The aqueduct would have its intake near the town of Parker, Ariz., 150 miles south of the Boulder dam site. From that point water for the project would be pumped through huge pipe lines by electrical power for a distance of 90 miles to the summit of Shaver pass and thence flow by gravity and tunnels under the San Geronio pass along the base of the San Bernardino mountains, and ultimately find its way to a series of huge reservoirs.

From these reservoirs the Southern California communities and cities that are members of the Metropolitan Water District would obtain their new augmented water supply.

The Weymouth plan proposes construction of a dam near Parker to divert the water supply needed for Upper Parker route and was one of

The Bridge canyon route, a proposed gravity flow aqueduct, was considered too costly to undertake, Weymouth said. The route now proposed passes through the safest possible geological formations, and will be lowest in unit cost of any of the routes studied, all elements of construction and operation considered.

The aqueduct would be 265 miles in length and would have a capacity of 1500 cubic feet per second. It would have nearly four times the capacity of the Owens river aqueduct, and in full operation would require 200,000 horsepower of electrical energy to pump the water from the stream level at Parker to the summit of Shaver pass, 90 miles away.

The lift to the summit of the pass, about 1500 feet, would be accomplished by a series of electrical pumps.

The Metropolitan Water District, comprised of 15 Southern California municipalities, now has a contract with the United States government, under which it will receive an allocation of 35 per cent of the electrical power to be developed from Boulder dam, for the purpose of pumping the water up the grade to Shaver summit. It has been estimated that approximately 600,000 horsepower will be generated from the government power plant at Boulder dam and the district's allocation from this power therefore would be approximately 216,000 horsepower.

Recommendations for the aqueduct route were drawn by Mr. Weymouth after consultations held with his corps of experts both on the ground of the aqueduct route and from engineering studies and surveys.

5. The relation existing between the owner and the employer of the lien claimant.

6. Knowledge by the owner of the performance of the work.

7. Facts showing a performance or other facts necessary to complete a cause of action.

8. Implication made by law such as the reasonable value of the services rendered or materials furnished and on implied promises to pay.

The information concerning the completion of the building or work, of the co-partnership, the relation between the owner and the claimant, knowledge on the part of the owner, a reasonable value of services rendered, or materials furnished and promise to pay are purely questions of fact and need not be stated in the claim of lien. The fact that the lien has not been filed within the statutory time is a defense against the enforcement of the lien and has nothing to do with the right to file the claim of lien and the right to have the lien enforced. The court determines whether the lien is valid, that is whether it was filed in time and whether the work and labor performed or the materials furnished can be charged against the building or work.

It is necessary only for the claimant to conform substantially with the statute in stating those things required to be stated in the claim of lien. It is not necessary that the precise words of the statute be used, although substantial compliance with the statute is required. The statute will not be given such a narrow or technical construction, so as to fritter away, impede, and destroy the right of the claimant. The persons for whose benefit the lien law was enacted are not presumed to be versed in accuracy of expression and the claims made by them are to be construed more to substance rather than to form in view of the purpose of the record and statement, namely to inform the owner.

The purpose of the lien is to give information to the interested parties, of whom the lien claimant is, the kind of labor and/or materials for which the lien is claim, and other information required so that the owner of the property or other interested parties may have such information in order that such parties may investigate and determine whether or not the lien claimant has a valid cause of action. If the lien is filed in the county recorder's office, all parties have constructive notice of the contents of the lien and all information contained therein. Consequently it is necessary and essential that the information required to be given by the statute be contained in all liens filed.

Statement That Sum Is Full Payment Legal

Usually, if an account is disputed by an owner the contractor cannot collect the full amount if he accepts a check having thereon a notification that the check is in full payment on the account, says The Constructor. This law is effective if the notification written on the check, or enclosed in a letter accompanying the check, indicates that the debtor intended for the check to be final payment. So held the higher court in *Alcorn v. Arthur W. S. W.* (24) 276.

In this case it was proved that an owner refused to pay the contractor. Later he mailed his check for a small part of the amount he owned and wrote on the check a statement that the amount was "full payment." The contractor accepted and cashed the check and later contended that he did not see the written statement on the check. The higher court held the contractor not entitled to receive payment of the balance due.

MECHANICS LIEN LAW— WHO FILES LIEN AND HOW TO FILE TOLD BY ATTORNEY

The following article prepared by Harry C. Westover, attorney-at-law of Santa Ana, appeared in the November issue of the West Coast Builder and is reprinted by request.

One who furnishes labor or materials upon any building work or structure may file a lien for the value of the materials furnished or the work and labor performed. Section 1187 of the Civil Code of Procedure provides that every person claiming the benefit of the lien law may file for record with the county recorder of the county in which the property or some part thereof is situated, a claim of lien.

The mere furnishing of labor and materials does not create a lien. In order to create a lien the claim of lien must be filed with the county recorder, and until the claim of lien is perfected by filing it with the county recorder the lien is a mere inchoate right which the mechanic or materialman may perfect or not at his pleasure and which until perfected has no existence.

Mechanics' liens are entirely of statutory creation, and the statute must be looked to, both for the right to the lien and the mode by which it can be enforced. The right to a mechanics' lien depends upon compliance with the statute, and in order that a valid lien may arise and be enforced the claimant must strictly or at least substantially observe compliances with the provisions of the statute. It is not necessary to take any step other than those required in the statute. A party desiring to hold and enforce a lien upon the property of one who

did not employ him must bring the case clearly within the terms of the statute.

There is no definite form provided for mechanics' liens. It is necessary only that the following things be stated, and they may be stated in any order that the claimant so desires:

1. There must be a demand for the amount due the claimant after deducting all charges, credits, or offsets.
2. The name of the owner or reputed owner must be given, if known.
3. A general statement of the kind of work done or the materials furnished must be made by the claimant.

4. The claimant must state the name of the person by whom he was employed or to whom he furnished materials.

5. A description must be given of the property sought to be charged, sufficient for identification.

6. The claim must be signed by the claimant and verified by the claimant or some other person.

Anyone desiring to file a valid mechanics' lien must give the information as set forth above and the claim of lien must be signed and verified. It is necessary that the claim of lien state or show any of the following:

1. The completion of the building.
2. The date of completion.
3. The filing of the claim within 30, 60, or 90 days after the completion of the building.
4. The names of the members of the firm where the claim is made by a partnership.

THE OBSERVER

What He Hears and Sees on His Rounds

The Valley Lumber Co. of Fresno, which recently purchased the business of the Fresno Lumber Co. at Fresno, is selling the stock and will close the yard.

Public work in San Bernardino County will be done by day labor. It is announced by C. E. Grier, chairman of the board of supervisors. This policy has been adopted, he asserts, to "insure that employment is given to citizens of Sann Bernardino county." He claims the board has on record a resolution requesting contractors on public work to employ only citizens residing in the county but says it has been disregarded.

In order to discourage "two hit" contractors from invading Santa Maria, erecting small buildings, and leaving a wake of unpaid bills and employes, Santa Maria contractors are urging the adoption of an ordinance which will require a \$10,000 bond from every contractor doing business in that community. A petition containing the signatures of Santa Maria builders was represented in the city council. In the discussion which followed, it was revealed that a \$500 bond is required of plumbers and \$2500 bond of electricians.

Request that the city of Fresno restrict employment on municipal projects to Fresno County citizens will be made to the city council by Clarence Dowd, secretary of the Fresno Labor Council. It is Dowd's contention that all workmen employed by either local or out-of-town contractors on municipal projects should be citizens of this county and he will request that an ordinance to that effect be passed by the city commission. Commissioner of Public Works C. C. Van Valkenburgh Jr., submitted such an ordinance for discussion last week but withdrew it when opposition was voiced by other commissioners.

Contractors who take advantage of the jobless by cutting wages, then underbid others on construction jobs, will be blacklisted from bidding on municipal jobs for the next two years, according to George Avery, chairman of the Seattle Board of Public Works. Avery's decision was the result of a police court hearing in which L. Coluccio was charged with underpaying workmen engaged in building a bridge. Coluccio's defense was based on the statement that during "hard times" workmen should be glad to get work at any wages.

The board insisted that charter provisions specifying a minimum wage and providing a penalty for its violation, be upheld, and that contractors who do not observe the regulations be excluded from bidding.

More than \$200,000 in veterans funds will be available for construction of homes before January 1, George M. Stout, secretary of the veterans' welfare board, announces. Later the \$20,000,000 bond issue voted on by the people in November will be released. The \$200,000 represents income of the board from payments of veterans who already have their homes.

Action to clarify in the public mind the elements which the home buyer should find in a good unimproved subdivision and the elements which he should find in a good fully improved subdivisional development, is under way through the Home Builders and Subdividers Division of the National Association of Real Estate Boards.

The executive committee of the Division at a recent meeting at national headquarters, Chicago, took these steps toward the establishment of a better understanding of what constitutes sound subdivision development:

1. Adopted detailed standards of practice both for the subdivision in which consists still of unimproved lots and for the subdivisional development, in which has been provided all the facilities which make lots ready for use as home sites. The standards of practice include definitions of terms, and state clearly the proper functions and policies of a subdivider and subdivisional developer.
2. Appointed a committee to draft a proposed model statute which would provide for the classification of vacant real estate under the securities commissions of the various states.

In drafting the proposed legislation the committee will work with Nathan William MacChesney, general counsel for the National Association of Real Estate Boards, who drafted the "MacChesney License Law," a model law, providing state license for real estate brokers and salesmen which is substantially the basis of real estate license legislation now in effect in 26 states. The committee will report the tentative draft of the proposed model law to the executive committee of the Division at the annual business meeting of the Association, to be held in St. Petersburg, Florida, January 15, 16 and 17. The standards of practice will likewise be brought before the board of directors of the National Association at the St. Petersburg meeting.

J. W. Wheeler, of Seattle, Washington, is chairman of the committee which will draft the model statute. Other members of this committee are Axel Lonnquist, Chicago, and Charles C. Malley, New York and Westchester County, New York.

City officials in charge of the inspection of buildings, including superintendents of buildings, building inspectors and fire chiefs, will attend a training school in Syracuse, N. Y., December 2 and 3 under the direction of the New York State Conference of Mayors, the state department of labor and the state board of housing. This school is a part of the program to provide training facilities in New York State for all groups of municipal officials. There will be five sessions of the school, and the curriculum will include studies of the labor law, model housing code, minimum standards for building codes, administration of building codes, checking structural designs, building construction, elevator installation, hoistway construction and structural weaknesses or defects.

Herbert Fleishhacker, San Francisco banker known for his optimism over the destiny of California in times economic, says he believes the downswing of business has scraped bottom.

He takes the attitude almost as a matter of course that business could get very little if any worse, and that improvement is a matter of time, the Pacific coast having an advantage for quick recovery on account of climate, aside from other considerations.

Resumption of "normal" operations by big concerns in various industries, ordinarily developing as winter weather disappears, should be evident along the coast as a comparatively early date compared with the East. On the West Coast we should escape much of the winter hardships which Eastern industrial cities may have to contend with, Fleishhacker

Representatives of organized labor in Sacramento have protested to State Treasurer Chas. G. Johnson, against the use of enlisted men in making repairs and alterations at Mather Field in Sacramento. Johnson was informed that many skilled workers are out of jobs in Sacramento, and under the circumstances the labor heads believe it is poor policy for the government to use enlisted men to put Mather Field in shape for the air corps. Located in Los Angeles by telephone, Senator Samuel Shortridge told Johnson he will protest to the war department in Washington. Johnson says he also will confer with Congressman-elect C. F. Curry, Jr., about having union men employed at the field.

Asserting the rental the government pays in twenty years for some of the post offices would pay for the construction of its own buildings, Representative Clyde Kelly, Republican, Pennsylvania, has informed President Hoover, he will ask Congress next month to appropriate \$10,000,000 as an initial fund in a gigantic Federal building program. His plan is to have the construction work cover a twenty year period, to be started early next year to work can be furnished the jobless. The Government, he said, pays \$17,500,000 yearly in rents for its minor post offices and substations.

Joseph T. Ryerson & Son, Inc., Chicago, Ill., arranging a series of meetings in the principal cities of the country at each of which G. Van Dyke, manager of the special steels department, will give a talk and demonstration on the subject of alloy steels, tool steels and stainless steels. The lectures, of a non-technical character, cover the better part of a day and are given in such a way as to be clearly understandable by superintendents, shop foremen, welders and others who may not have had technical training.

Pacific Coast Cement Co., Seattle, Wash., has announced that depletion of stocks and orders on hand make it possible to forego the usual mid-winter suspension of operations, both at the quarry in Alaska and at the plant in Seattle. Last year the Seattle plant suspended operations for 75 days during the winter season.

At the recent convention of the California Retail Lumbermen's Association held in Pasadena, proposed new law legislation was presented at an executive session by Attorney Glen Behrmer of Los Angeles, who cited the need for some measure to protect the building industry against reckless financing.

TRADE NOTES

Twelve California redwood mills reported a cut of 5,371,000 ft. for the week ended November 8, while shipments were 4,568,000 ft. and new business amounted to 4,510,000 ft.

John M. Fabbris, wholesale dealer in foreign and domestic marbles, has combined with the A. Carpenter & Empire Trading Co., Importers and Pacific Coast representatives of the Rising & Nelson and Chapman Slate Companies. The new company is known as the Fabbris-Carpenter Company Ltd. and will wholesale marble, stone, slate and tile with offices and show rooms at 275 Bush St., San Francisco, and at the Board of Trade Building, Los Angeles. The A. Carpenter & Empire Trading Co. are continuing in the importing business and have also moved their offices to 275 Bush St., San Francisco.

The Gypsum Association, recently organized in Chicago, with offices at 211 West Wacker Drive, announces the opening of a New York office at 11 West 42nd St., with Mr. J. Kent Smith as District Engineer. Mr. Smith is a graduate of the University of Pennsylvania in both Engineering and Law and has, for a number of years, been connected with the Eastern Underwriters' Association. He will co-operate with architects, engineers and building commissioners concerning the use of gypsum and gypsum building products.

Federal Cement Tile Co., Chicago, Ill., has acquired the American Cement Tile Mfg. Co. Executives and general offices will be at Chicago, with plants at Hammond, Ind., Lincoln, N. J., Wampum, Pa., and Birmingham, Ala. It is proposed to change the name of the company to Federal-American Cement Tile Co.

Paving Properties Co., Ltd. of Oakland, a real estate and development organization, capitalized at \$250,000, has filed articles of incorporation with Secretary of State Frank C. Jordan. Directors are Edwin T. Blake, Berkeley; H. D. O'Banion, San Leandro; W. P. Mulhern, Oakland; Herbert E. Hall, Piedmont; and J. A. Ellis, Alameda.

The Patents Holding Corporation, Frederick, Md., has granted a license to the Caterpillar Tractor Company to manufacture power propelled road graders and maintainers under Patents controlled by the Patents Holding Corporation.

Chain Belt Co. of Milwaukee announces the appointment of the Concrete Products Sales Co., Ltd., of Oakland, as a new distributor of its equipment.

Fort Pitt Bridge Works Co. has been formed by consolidation of the Fort Pitt Bridge Co., Pittsburgh, Pa., and the Massillon Bridge & Structural Co., Massillon, Ohio. The combined companies will have an annual capacity of 125,000 tons of structural bridge steel. Officers of the new company are: Theodore A. Straub, president; H. R. Bickle, vice-president; P. B. Straub, secretary-treasurer.

HERE—THERE
EVERYWHERE

Westinghouse Electric & Manufacturing Company has let contracts for a \$25,000 addition to the present plant in Emeryville.

The 1931 annual convention of the Western Association of State Engineers will be held at Sacramento, probably during the month of November.

Changes in ordinances to relieve furnace men from paying electrical license fees as well as their regular furnace fees are requested of the Oakland city council by the Furnace Dealers' Association of Northern California.

Sacramento Builders' Exchange will feature a golf tournament at the Del Paso Country Club on December 2nd. It is expected the tournament will close with a stag dinner at the club quarters.

City trustees of Carmel, Calif., have passed an ordinance regulating the installation of gas appliances, requiring licenses of persons who install, maintain or repair such appliances.

Architect C. M. Winslow has been appointed a member of the Los Angeles Municipal Art Commission to succeed Architect Donald B. Parkinson, resigned.

As a means of creating work for the unemployed of Greater Oakland and at the same time to bring about needed municipal improvements, Harry G. Williams, Oakland city auditor, declares himself in favor of a bond proposal of \$2,000,000.

The Canadian government has given approval to expenditures of more than \$27,000,000 for public works to relieve unemployment. Expenditure of approximately \$14,000,000 has been authorized by various provinces and municipalities, and many of these undertakings are already under way. The construction and improvement program for the Canadian National Railways calls for an outlay of \$11,139,650 and that of the Canadian Pacific will cost \$11,514,000. Relief work in Quebec and Alberta still to be considered will probably bring the total expenditure up to approximately \$50,000,000.

Inland Steel Co., Chicago, Ill., through its employees has developed a plan for the relief of workmen for whom no employment can be provided under present conditions. Those who are working have voluntarily pledged a portion of their earnings to a relief fund, to which the company will contribute an equal amount. Employees' contributions vary from 2 to 5 per cent, those earning less than \$125 per month not contributing when they have dependents. The money so collected will be distributed through trained social workers, acting as advisers to a central committee of employees. Expenses of distribution will be borne by executives of the company.

W. W. Wilkinson has been appointed Southern California representative of the Oregon-Washington Plywood Co., with headquarters in Los Angeles

ALONG THE LINE

C. W. Pinkerton, Whittier Lumber Company, Whittier, who attended the Lumber Association at Chicago, was re-elected director representing the California district for three years.

Col. B. C. Allin, director of the Port of Houston, Texas, has submitted his resignation to accept the position of port manager for the City of Stockton, Calif. His appointment will take effect January 1. His salary will be \$10,000 a year, which is an increase of \$1000 over what he receives at Houston.

Independent Pneumatic Tool Co., Chicago, Ill., announces the election of Charles W. Pendock to the board of directors. Mr. Pendock is president of the LeROI Co., Milwaukee, Wis. He succeeds the late William A. Libkoman.

Roy V. Wright of New York has been elected president of the American Society of Mechanical Engineers to serve for the year 1931, succeeding Charles Piez of Chicago.

A. W. Eager, 66, Los Angeles architect, died in that city November 18, after a protracted illness. Born in Hamilton, Ontario, Eager spent forty-three years in Southern California, during which time he designed the national soldiers' home at Sawtelle and several hotels. He was credited with introduction of the English type of architecture in the Southern California section.

William Ogden has been appointed manager of the manufacturers' division of the Affiliated Bureau, established in connection with the general offices of the Associated General Contractors of America in Washington, D. C.

Shipments of tile and clay products from Santa Catalina Island are materially increasing cargo receipts at Los Angeles harbor. The shipments average nearly 100,000 Mission roof tile and 45,000 hollow building tile each week. Most of the tile is being shipped to Phoenix, Arizona.

The American cement industry is determined to maintain the living standards of its workers. Frank H. Smith of New York, president of the Portland Cement Association told manufacturers in convention in Chicago, Nov. 18. The standards are being maintained despite the decrease in cement shipments, Smith declared. The industry, he said, is weathering the economic depression, adding that business in general "seems to be decidedly on the mend."

Plans for the development of the Berkeley waterfront, as proposed by R. L. Vaughan San Francisco engineer, will be considered by the Berkeley City Council on December 3. Vaughan seeks a 50-year lease on waterfront tidelands to be developed by San Francisco capitalists who propose to spend \$150,000 annually.

The town of Mill Valley contemplates adoption of a new building ordinance. Building Inspector Charles McCrum recommends adoption of the "California Building Code of 1930."

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684).

K-327-W-1946-C-S CONSULTING CIVIL ENGINEER, to supervise structural design and construction of steel plant and advise on decision of all questions arising in design of buildings. Apply by letter. Location, United States. Headquarters, New York City.

R-3332-S SHIFT BOSSES, one for gold mine and one for cyanide mill. Must be single and have good record of practical experience. Salary \$200 month, less \$45 for board. Location, Orient.

R-3324-S DRAFTSMAN, 30-35 years old, technical graduate, with experience including executive ability, for general layout and design of refinery equipment. Apply by letter with photo. State salaries earned and reasons for leaving last two positions. Location, Northern California.

R-3403-S INDUSTRIAL ENGINEER, not over 35, with experience dealing with labor and production problems as well as rate setting. Must have organizing ability, initiative, tact and energy, technical education and a liking for mathematics as applied to production costs. Apply by letter giving experience in detail, education and general qualifications, with photo. Salary open. Location, Pacific Coast States.

K-329-W-1954-C-S SUPERINTENDENT of motive power for steam railroad. Must have had recent experience in such position with prominent American railroad. Salary \$20,000-25,000 a year of which one-third to one-half must be in paper rubles for living expenses. Balance in United States money to American bank. Contract for one year, renewable. Applications only by letter which will be forwarded to Moscow for decision. Location, Russia.

R-3417-S DRAFTSMAN and designer experienced on reinforced concrete structures. Must be American citizen. Salary \$250 month. Temporary location, East Bay.

UPHOLD PAYMENT MADE ON A WRONG ACCOUNT

If a contractor has two or more accounts with a materialman he must direct the latter to which account a payment shall be credited, otherwise the materialman may legally credit any account he chooses, says The Constructor. This and other points of the law were decided in *Radichel v. Federal Surety Co.*, 226 N. W. 473. The facts proved that a contractor had several accounts with a materialman, and that he made a payment. Through error the materialman failed to credit the proper account. In this case the court held the owner bound to pay this full amount, saying:

"The contractor could designate the account upon which the credit should be made. In the absence of such designation, plaintiff (materialman) could apply it as it desired. Here it eventually appeared upon plaintiff's books as was the intention of both debtor and creditor. Defendant had no right to direct how it should be applied or to whom it should be paid."

ARCHITECTS IGNORED

Cass Gilbert has received the gold medal of the Society of Arts and Sciences for his masterpiece, the Woolworth building.

Architecture is the one art in which Americans can lay some claim to being pre-eminent. Yet few Americans know the names of the men who designed the great buildings which foreigners visit and go back home to tell the folks about.

Arthur Page Brown, for example, designed the Ferry building. Yet how many of the thousands who hurry through that lovely structure ever heard the name of that architect?

School children might well memorize the names of the men who designed the principal or most lovely structures in their city.—S. F. Examiner.

Oakland Sued On Ferguson Dock Patent

The city of Oakland has been warned to keep off its Ninth Avenue pier.

G. D. Keyston, representing the Dock & Terminal Engineering Company of Cleveland, owners of the so-called "Ferguson patent" for building docks, informed the council that the Ninth avenue pier is an infringement on the Ferguson patent, and warned the city not to use the pier or to permit this alleged infringement of the patent to exist any longer. A demand was also made for all profits of the pier since its construction.

Arthur Abel, head of the engineering staff of the port commission, declared that nearly all cities with docks are being sued for alleged infringements of the Ferguson patent, and a suit for \$225,000, instituted in San Francisco three years ago, is still pending in courts.

"There are 14 points of construction in the Ferguson patent," Abel, "and probably every dock in the country uses some of these methods. There has been much question as to whether they could be monopolized by any one commercial company. That is also in the courts. It is a sub-floor system. They claim that their patent is violated anywhere where concrete is used. As there is a lot of concrete used on docks, there are a great many lawsuits about it from the Ferguson representatives. We will, however, continue to use the dock."

The Ferguson letter to the council was referred to the city attorney.

INCORPORATES

The Richmond Paint Products Company have filed papers of incorporation in Martinez. The firm is capitalized at \$250,000. A previous announcement made by the firm is to build a plant at Thirteenth Street at the Santa Fe tracks. A fire resisting paint products is to be manufactured.

The following are a list of directors: Charles B. Hall, San Leandro; W. B. Bohrmann, William Reuter and Fred Hurlbert, all of Oakland; A. E. Aldrette and Dr. George Sisson of Berkeley, and E. J. Duffy of Richmond.

Horace E. Plummer, chief of the bureau of buildings of Portland, Ore., sees an \$11,770,000 building program for that city. A new post office involves an expenditure of \$1,175,000; the Commonwealth Building, \$3,000,000; Lloyd Hotel, \$3,000,000 and a twelve-story office building costing \$625,000 are a few of the items included in his building optimistic view

LOCAL LABOR FOR PUBLIC PROJECTS AIM OF FRESNO COUNCILMEN

Favoring passage of an ordinance which would compel all contractors doing public work to employ none but residents of Fresno County and American as a matter of public policy, the Fresno city commission during an informal meeting with Clarence Dowd, secretary of the Fresno Labor Council and father of an ordinance of that nature, questioned the constitutionality of such a move.

As a result, City Attorney Claude Rowe was requested to work with Dowd in framing an ordinance which "would protect Fresno labor" and at the same time be legal. Action was withheld until they report.

Dowd presented an ordinance which he said was in effect in Santa Barbara and San Bernardino, which proposes a fine of \$100 per man per day for any contractor who employs any but Fresno County residents on public work.

Rowe said that he was not certain as to the law of the matter, but believes it would be invalid. He said the ordinance could not specify Fresno County residents but would have to be restricted to residents of the city of Fresno. Dowd voiced no objection to this, stating that San Diego and Los Angeles ordinances required that the employees be residents of the city, but said he felt that inasmuch as there are large numbers of Fresno laborers living on the outskirts of the city, he made it Fresno county instead of confining it to the city.

City Commissioner George Ball read a letter he received from Loren A. Butts, former city attorney, in which Butts said he believed the ordinance would be illegal and would tend to stifle competition in bidding on public projects, would limit the field of labor to a small market and as a result would increase the cost of such projects to the taxpayers. Dowd countered with the statement that Minneapolis recently paid a contractor \$3,000 more than it would have had to pay another contractor for the same work and materials on a project there, merely because the contractor was a Minneapolis man.

Dowd said that it was merely a matter of protecting home labor. He said the unemployment situation in Fresno is getting serious. He said there are 200 carpenters in Fresno of whom 175 are out of work. He said a similar situation exists in other skilled trades and that the labor unions are being forced to help out families in actual want.

SANTA ROSA CONTRACTORS ORGANIZE EXCHANGE

To create better conditions in the building industry, thirty-five general contractors, sub-contractors and material dealers, at a meeting in the Occidental Hotel at Santa Rosa last Wednesday evening organized the Santa Rosa Builders' Exchange. Fully organized the exchange will have a membership of seventy-five, according to W. L. Lindsay, acting chairman and C. L. Roberts, acting secretary of the organization.

Two committees were appointed, one to submit a set of by-laws at the next meeting, which will be held next Tuesday, and another to have charge of the organization plans.

William Herbert, Robert Yates and C. W. Hansen compose the by-laws group, while H. E. Huntington, Cecil Halstead, City Building Inspector Walter Stracke, A. M. Hildebrand and A. Smith are on the organization committee.

NEGLECTED PHASES OF OUR HOUSING PROBLEM ARE CITED BY CITY PLANNING ENGINEER

(By Leonard S. Smith, City Planning Engineer)

Mr. Smith is a member of the American Society of Civil Engineers and former Professor of City Planning and Highway Engineering at the University of Wisconsin.

The paper published herewith was presented at the Ninth Annual Meeting of the Pacific Coast Building Officials Conference, held at Long Beach, Calif., October 2, 1930.

The adequate housing of our workmen and, to a large extent, the proper housing of his "white collar" brother constitutes the nation's and the world's greatest problem because its solution will aid that of so many other civic problems.

America's housing problem differs from that of other nations chiefly in the fact that we have the financial resources needed to remove this great menace to our democratic institutions. We lack only the understanding and the will to do so.

Your speaker wishes to emphasize the fact that our American housing problem concerns much more than a shortage of homes or a surplus of dirty slums, though both of these evils are acute. Too many of our citizens appear to think and act as though class distinctions were built on natural rather than on artificial grounds and that the crowded slum is the proper or natural abode for certain citizens and the palatial home for others. Are we not through indifference suffering less from a shortage of homes than from a shortage of civic vision and has not this form of selfishness brought heavy penalties to us all? For if we force people to live like pigs, we must expect them to act like pigs toward us. It is, indeed, just as possible to kill a man with a bad house as it is to kill him with a gun. It is only a case of a cruel, lingering death rather than a quick death.

A great teacher has said: "The heart of the world is under very plain jackets. The heart of the world is at very simple firesides and unless you know the pressure of life among the lower classes, you know nothing of life whatever."

In a brand new country like ours the sweating of the land by crowding it with houses and tenements and by crowding these houses with slum families is, indeed, shameful but so unnecessary. Such selfish exploitation of the community's welfare and safety must cease for our own safety if not for others'. It is full time that we recognize the fact that the fierce resentment cherished toward society by certain classes often has a real basis and the lack of a decent home for parent and child is often the prime and adequate cause for this resentment. We must recognize that, more fundamental than imprisoning communists or deporting aliens bolsheviks is the prompt adoption of an intelligent housing policy which will prevent the creation of such enemies of society by providing reasonable home environment.

Mr. Walter McNowell, vice president of the Pacific Coast Building-Loan Association, in last month's Coast Investor, said, "Is it not an indictment of our boasted prosperity that folks still abide in city slums, crowded tenements, the prey not only of poverty and disease but also of crooked politicians and criminals—and this at a time when there is so much sunshine, fresh air and uncrowded acres of uninhabited land?" Have we not in the past depended

too much on community chests and upon individual charities to relieve the ever continuing needs of the homeless dweller, the human weeds of our social system and so often the main supply of our criminal class? Such a method is only treating the symptoms of the disease and can furnish no real or adequate remedy. Every day present slums grow in size and new slums are created by land sweating.

What is most needed is the adoption of land policies which will prevent the millions of our much needed new homes from becoming blighted districts and slum communities. Experience has abundantly proved that the crowding down and misallocation of slum areas is too expensive to serve as a general remedy. Since there can be only one crop of land, how important it is that it should be expertly planned and protected by suitable zoning protections and restrictions.

Indeed, it is along such lines that our cities have recently made the most progress. Where such measures have failed, the cause can be traced to city councils in destroying the permanency of such regulations by frequent revisions and exceptions to the zoning ordinances.

Government Aid

It may not be generally known to this audience that every European nation has been engaged in providing low-cost housing for its workmen for many years. Even since the war, England has provided over 500,000 such houses. During the war our own government built over 60,000 houses in thirty different cities for munitions and ship workers. This was done as a war measure, for it was found that we could not "man the works until we had housed the man."

However, the prejudice against the direct participation of government in housing in this country is such as to preclude such a remedy in peace times.

Some form of tax exemption has been frequently used by some states to encourage home building. It will be noted that such exemption did not apply on the land values but only on the houses and even here the exemption was limited in time generally to ten years.

Excessive Taxation of the Homes

Lieut. Governor R. L. Carnahan states in the August Coast Investor that the total city, county and state tax burden is now 609 million dollars and he figures that the head of every family of five pays on an average of \$1.35 per day and this in addition to any special assessments. He justly states that "When you take \$1.50 out of the daily income of the average man who has a wife and three children you are taking a very substantial proportion of his income and this is a problem to which we should give earnest consideration."

It might easily be that even a small part of this \$1.50 if invested in a building and loan association would provide a home in a reasonable time. No other element contributes to good citizenship as does home ownership and yet at the present time about 60% of our people live in rented houses and move about from year to year. This lack of a fixed habitation breeds an indifference to local civic needs and problems, resulting in dishonest government.

Mr. McNowell suggests that we offer a tax exemption of 5000 on new homes to encourage home ownership. "The basis of all material, moral and

spiritual excellence." He also suggests that taxes be fixed not only on the value of the property but also on the ability of the owner to pay. While the justice of this plan is obvious, the difficulties, legal and otherwise, would probably prevent its adoption.

Excessive Special Assessments

Even if the home owner is successful in meeting the tax demand of the city and county, he frequently must face the payment of numerous and excessive special assessments, often several overlapping. Mr. Carnahan cites one extreme case where over three square miles within the city limits of Los Angeles special assessments had been levied of over forty per cent of the market value of the real estate upon which they were placed.

While these conditions are partly due to our rapid growth in population and wealth, a far more important cause of such maladjustment of tax burdens is due to the lack of sane city planning, past and present. But whatever the causes, it is obvious that excessive taxes and special assessments are powerful deterrents of home ownership. Both call loudly for reform.

New Houses Needed

With our 600,000 new marriages annually the country should provide a corresponding number of new houses. Since 1921 the new houses provided annually have never been over 500,000 and have averaged about 400,000. In Los Angeles alone the number of new housing units has dropped from 19,509 in 1923 to 5,301 in 1929. The housing of our day laborers, especially the Mexican and Negro, is far below standard and often disgraceful, while the housing of the middle class mostly in tenements—one to three rooms—is lacking in the amenities of wholesome family life with the resulting low birth rate and high divorce rate.

An eminent jurist, Supreme Court Justice Lewis of Brooklyn, recently said, "It is my conclusion that childless homes are responsible for the almost complete absence of home life. Not long ago a home meant something. It was the location of our birth. It was the place where we entertained our friends and where we had our family functions. Today we are born in hospitals, we entertain in clubs, we eat in restaurants, we are married in churches, or hotels, and we are buried from funeral parlors."

While the above picture is somewhat overdrawn, it remains true of a large part of our people who are denied the blessings and comforts of a one-family home and furnishes an unanswerable argument for more and better homes.

Industrial Housing

In addition to the notices which should win the tax and selfish assistance of every good citizen to our housing problem, the employers of labor possess the more tangible and selfish motive of direct self-interest in the economies of production.

Especially since the war the labor turnover of our large industries has been exceptionally high, mostly due to the inadequate housing of labor. This labor turnover has frequently been several hundred per cent. As the cost of hiring and firing a man may average about \$30, a high labor turnover results in an excessive cost of production. Realizing the fact of such a handicap, several thousands of industries have invested large amounts of their capital in housing their labor and justify such investments in the resulting economies of production due to the increased efficiency of their labor and the reduced cost of labor turnover.

Put our nation needs a more efficient and more loyal citizenship even more than does industry. A million new homes for workmen is not too many for present requirements es-

pecially if we are to replace our slum houses with decent homes.

If we are to extend our foreign markets, opened up by the war, indeed, if we are even to maintain our present supremacy, we must not only house our new industrial machinery but, more important still, we must adequately house our industrial workers, the human machines upon whose health and efficiency so largely depends the economies of mass production.

Democracy has no greater nor more far-reaching handicap than the housing conditions that mar our cities, villages and even our farm homes. Evidently not much longer can the richest and most powerful nation in the world postpone the solution of this its greatest civic problem, a problem that influences so vitally the character and permanency of our democratic institutions.

We need most ideals that can be followed in daily life, that can be translated into terms of the home. Our engineer president evidenced such ideals only last month (August) by announcing the organization of a nation-wide investigation to accomplish the following three objects:

- (1) To increase the supply of capital available for home building;
 - (2) To reduce the cost of financing building and purchase of dwellings on the installment payment plan, and
 - (3) To bring within reach of the most modest means homes of artistic design equipped with every comfort and convenience.
- This inquiry, privately financed, will be known officially as the "White House Conference on Home Building and Home Ownership." The personnel of the conference is such as to inspire confidence that at last we shall have the facts to justify appropriate and adequate action.

Summary of Points

- (1) The adequate housing of our people is the nation's greatest civic and economic need.
- (2) The greatest obstacle to the proper solution of this need of more and better housing is the general ignorance concerning this need.
- (3) The sweating of the land by crowding it with houses and people must in the end result in blighted districts, debased citizenship, reduced land values and increased taxation for prisons, courts and hospitals.
- (4) Community chests are a palliative, not a real remedy. When our people understand the situation thru education the first and most important step has been taken.
- (5) Public zoning of the land has been found most valuable by permanently protecting our housing.
- (6) Government aid has been found helpful through exemption from taxation of the houses (not of the land) for a limited period.
- (7) Present method and extent of levying of special assessments discourage home building.
- (8) Building and Loan companies encourage and directly aid home ownership by providing for payment by monthly installments.
- (9) 600,000 new homes units are annually required. We are 1,000,000 home units behind our present requirements. Home building in Los Angeles in the last six years has dropped 73%. The Los Angeles Realty Board reported 41,000 new homes needed here in the next 32 months.
- (10) Industries should more generally use capital for housing their men as well as their machinery and not expect the laborer to come to the factory site with a house on his back like a turtle. Otherwise a new factory may be a community liability instead of an asset.
- (11) President Hoover's Housing Committee is at last organized so as to get the facts of our housing problem and propose the needed remedy.

BUILDER IS LIABLE FOR DEFECTIVE WORK

It is well settled that a contractor is not entitled to payment and that he is liable to an owner if the building does not conform with the plans and specifications, says The Constructor. The amount of damages allowable is the cost of altering the building to conform with the contract, plus any other damages proved by the owner.

In *Morrel v. Simonian*, 254 Pac. 694, the contractor agreed to construct a building according to the plans and specifications. The specifications provided that the cement should be three inches thick. When the building was completed the owner discovered that the cement, instead of complying with the specifications, was only two inches thick and that the building was defective in other respects. He sued the contractor for damages and the lower court held the owner entitled to recover \$354. The contractor appealed to the higher court which, however, upheld the lower court's decision, saying:

"A witness testified that he was present when appellant (contractor) commenced the construction of the building; that he saw the building many times; that it was not level, being lower on one side than the other; that he had measured the cement, and that it was only two inches thick, and in some places not quite that much; and that he also noticed that the studding had buckled and that the roof was sagging. We are of the opinion that, under this evidence, the lower court's findings are sustained."

STATES MAY LIMIT WEIGHT OF VEHICLES ON ROADS

The Illinois supreme court, in the case of the People against W. Linde, has ruled that the legislature is within its constitutional rights in limiting the weight of vehicle loads on roads in Illinois, says Engineering News-Record. Linde was in the employ of Green, Mullerbrueck & Nagel, Inc., a corporation engaged in construction work. When arrested Linde was driving a truck towing a trailer upon one of the improved highways of the state on the way to a job on which the corporation was engaged in building a state road bridge. Upon the trailer was a crane, and the weight on the front axle of the trailer was 28,000 lbs. The state law, provides that the maximum gross weight to be permitted on the road surface through any axle of any vehicle shall not exceed 16,000 lbs. On being convicted and fined in the lower court, Linde appealed.

The evidence at the trial disclosed that the corporation could not be a successful bidder on construction jobs of the type to which the crane was being moved unless such crane could be used; that if it were barred from the highway its only value would be as junk; that it would be "impracticable" to take the crane apart and reassemble it and that to do so would require the assistance of another crane.

The court held that the state has paramount authority and control over its highways; that no one has an absolute and unqualified right to use them; that in the exercise of its police powers the general assembly has the power to limit or prohibit the use of the state highways by any kind of vehicle if such limitation or prohibition is reasonably necessary to save

the highway from injury or to provide for the public safety and general welfare, and that even though such regulation may result in a restriction of liberty of contract or use of private property, there is no invasion of any guarantee of the Constitution of the United States or of the Constitution of Illinois.

COLD PROCESS ROOFING CEMENT MARKETED

Roofing and building contractors will be interested in the announcement of the Willard Rubber Company, Ltd., of San Diego, to the effect that after a long series of experiments, the company's chemists have succeeded in developing a cold process roofing cement for built-up roof work.

The claims for this new cement are: Applied cold, it eliminates fire hazard during application and the attendant high insurance; it reduces labor costs; it establishes a perfect bond between the plies of felt; it does not dry out, causing cracks to develop in the felt; it lengthens the life of felt; it retains its elasticity, conforming with changes of temperature; being of rubber composition, it forms additional layers of water-proofing; it does not gasify, causing gas pockets between layers; gravel, crushed stone, etc., as surfacing material become firmly bonded, and remain so, since the cement does not dry out and release the particles.

Service tests in the Southwest where the action of the sun combined with the cold nights plays havoc with felted cemented with inelastic quick-drying cements, convince the manufacturers that this product will give the same satisfaction in all parts of that country that it has under test.

The manufacturers believe that builders in rural sections, where roofing contractors may not be available, will be able with this cold process cement to obtain all the advantages of a built-up roofing that, lacking equipment, have hitherto been denied.

AUSTRALIAN SAW MILLS TO IMPROVE PRODUCT

An improved product and reduction in costs of manufacture of native lumber are being sought after by Australian saw-millers, says a communication from James E. Peebles, American Trade Commissioner at Sydney to the Lumber Division of the Department of Commerce.

It is reported that Australian mill men are going over their production methods and making a careful study of dry kiln methods. Attempts are also being made to arrive at a simplification of the various sizes of commonly used stock and to eliminate all unnecessary handling and intermediate marketing charges.

Hitherto, it is reported by the trade, native lumber used in buildings has shown marked tendencies to warp due to improper manufacture and seasoning. This is quite evident in native flooring.

Silent and roller chains, sprockets and attachments are the subject of a new 124-page catalog issued by the Union Chain & Mfg. Co., Sandusky, Ohio, which contains not only complete information on these products but also engineering data of practical value in figuring chain drives.

The Bucyrus-Erie Company of South Milwaukee, Wisconsin, has issued the 20-page Bulletin No. FB-10301, which describes and illustrates the convertible Bucyrus-Erie three-fourth-yard shovel, dragline, clamshell, drag shovel, and lifting crane, and gives the main specifications. A copy may be obtained upon request to the manufacturer.

APARTMENTS

Sub-Figures Being Taken
APARTMENTS Cost, \$60,000
SAN FRANCISCO. NE Beach and Scott Streets.
 Three-story and basement frame and stucco apartments (12 3 and 4-room apts.)
Owner and Builder — V. Rasmussen, 2255 North Point St., San Francisco.
Architect—Irvine & Ebbets, Call Bldg., San Francisco.

Sub-Bids Being Taken.
APARTMENTS Cost, \$150,000
SAN FRANCISCO. SE Sacramento and Gough Streets.
 Seven-story steel frame, wood and concrete Class C apartments (42 apts.)
Owner—W. Props, 1801 California St., San Francisco.
Architect—Irvine & Ebbets, Call Bldg., San Francisco.
Engineer—W. Adrian, 417 Market St., San Francisco.

Preliminary Plans Being Prepared.
APARTMENTS Cost, \$125,000
FRESNO, Fresno Co., Cal. Fulton and Sacramento Sts.
 Fireproof apartments.
Owner—I. Teilmann, Kearney and Teilmann, Fresno.
Architect—W. D. Coates, Jr., Rowell Bldg., Fresno.

Permit Applied For.
APARTMENTS Cost, \$17,500
SACRAMENTO, Sacramento Co., Cal. 2124 P Street.
 Two-story and basement frame and stucco apts. (22 apts.)
Owner—Hark & Mackrell, 1517 17th St., Sacramento.
Architect —Not Given.

Preparing Sketches.
APARTMENTS Cost, \$400,000
LOS ANGELES, Cal. Wilshire Dist.
 Thirteen-story and basement Class A reinforced concrete apartments (13 12 room apts.)
Owner—George J. Moran.
Architect—Arthur E. Harvey, 3875 Wilshire Blvd., Los Angeles.

Pids Opened—Under Advise ment.
APARTMENTS Cost, \$200,000
BERKELEY, Alameda Co., Cal. Sacramento St. and University Ave.
 Three-story class C brick apartments (56 2-3 and 4-room apts.)
Owner—Davis-Pearce Co., Grant and Weber Sts., Stockton.
Architect and Manager of Construction—Davis-Pearce Co., Grant and Weber Sts., Stockton.
 Following contractors submitted figures.
 H. L. Petersen, 731 Treat Ave., San Francisco.
 Monson Bros., 476 6th Street, San Francisco.
 Wm. Horstmeyer, 461 Market St., San Francisco.
 G. P. W. Jensen, 320 Market Street, San Francisco.

Sub-Contracts Awarded.
APARTMENTS Cost, \$175,000
SAN FRANCISCO. Green Street near Octavia Street.
 Six-story class A steel frame and concrete apartments (112 rooms).

Owner and Builder—F. L. Hansen, 282 Seventh Street.
Engineer—John G. Little & Co., 251 Kearny St.
Reinforcing Steel—W. C. Hauck, 280 San Bruno Ave.
Painting—R. P. Paoli, 3159 Fillmore Street.
Flooring—Regal Floor Co., 620 4th St.
 As previously reported, ornamental iron awarded to C. J. Hillard Co., Inc., 19th and Minnesota Sts.; structural steel to McClintic-Marshall Co., 2050 Bryant St.

Contract Awarded.
APARTMENTS \$10,000 (1st Unit)
EUREKA, Humboldt Co., Cal. Clark and E Streets.
 Two-story frame and stucco apartments (4 4-room apts.)
Owner—Dr. Barbara A. Gasser.
Architect—Newton Ackerman, 102 W. Fourth St., Eureka.
Contractor—Willis J. Steeves, 2303 Union St., Eureka.

Bids Opened.
ADDITION Cost, \$22,000
WATSONVILLE, Santa Cruz Co., Cal.
 Three-story frame and stucco addition to apartments (4 apts.)
Owner—Stewart Thompson, 19 Madison St., Watsonville.
Architect—Wolfe and Higgins, Realty Bldg., San Jose.
 Garage to care for 10 cars, steam heating plant, etc.
 Following is a complete list of bids:
 Sam. D. Flori, 985 Hamlin St., San Jose\$17,141
 Paul Anderson, San Jose..... 18,823
 T. H. Rosewall, Watsonville..... 18,848
 B. J. Smith, San Jose..... 19,000
 I. E. Lovelace, Watsonville..... 20,196
 Bids held under advisement.

Preparing Working Drawings.
APARTMENTS Cost, \$70,000
SAN FRANCISCO. Cor. Cervantes and Prado Sts.
 Three-story and basement frame and stucco apartments (21 2 and 3-room apts.) (composition roof, steam heat and hot water system, elevator).
Owner & Builder—Ben Liebman, 1555 Francisco St., San Francisco.
Architect—Irvine & Ebbets, Call Bldg., San Francisco.

SKILSAW Portable Electric Hand Saws (4 models).
SKILSAW Portable Electric Sander
SKILSAW Radial Arm Attachments.
SYNTRON Portable Electric Hammers (4 models, motorless).
MALL Flexible Shaft Machines (50 "models).
 Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

Labor Saving Portable Electric Tools.

1248 Mission St. Underhill
 San Francisco 7662
 SALES . SERVICE . RENTALS

BONDS

SANTA MONICA, Los Angeles Co., Cal.—Fred S. Wilson, Industrial secretary for Santa Monica, proposes that the citizens of Santa Monica vote a bond issue of \$100,000 for the erection of a 6-story fireproof industrial building to give employment to the jobless. Action has not been taken by the city council.

FRESNO, Fresno Co., Cal.—Bullard School District defeated bonds in the amount of \$34,000 to finance construction of new school and other improvements.

CHURCHES

Preliminary Plans Prepared.
CENTER Cost, \$30,000
SACRAMENTO, Sacramento Co., Cal. Fifth and P Streets.
 Two-story brick Christian Center.
Owner—First Japanese Baptist Church of Sacramento.

Architect—Chas. F. Dean and Ivan Satterlee, Associate, California State Life Bldg., Sacramento.

HOOVER DAM—Complete specifications for the Hoover Dam will be ready early in December, according to an announcement by the Department of Interior. Bids for the construction of the 727-ft. dam, four diversion tunnels, the cofferdams and power plant, will be opened in February.

The first contract to be let will include the 727-ft. dam, the four 50-ft. diversion tunnels, the cofferdams and the power plant (except installation of machinery). The principal items and approximate quantities are:

1,800,000 cu. yds. open cut excav. (all classes);
1,900,000 cu. yds. shaft and tunnel excavation;
1,200,000 cu. yds. earth and rock fill in cofferdams and river channel protection;
4,400,000 cu. yds. concrete;
23,000 cu. ft. of grout;
5,500,000 lbs. reinf. bars (placing);
190,000 yd. placing grout and drainage holes;

1,900,000 lbs. small metal pipe and fittings installed;
32,500,000 lbs. large metal conduits;
10,600,000 lbs. structural steel;
20,000,000 lbs. of gates, hoists, and other metal work.

Specifications covering construction of the government portion of the railway have been forwarded by the Denver office to Washington. This section is about 10.5 miles in length, and will extend from the summit, the end of the Los Angeles & Salt Lake Ry. section, down to the dam site. The principal items and quantities follow:
115,000 cu. yds. common excav.;
354,000 cu. yds. rock excavation;
163,000 cu. yds. unclass. borrow;
802,000 sta. cu. yds. overhaul;
287,000 cu. yds. long haul unclassified borrow "loaded into hauling equipment";
705,000 yd. m. haul and spread "long haul unclass. borrow";

29,000 cu. yds. tunnel excavation;
200,000 ft. b.m. permanent tunnel timbering;

800 cu. yds. struc. excav., common;
1200 cu. yds. struc. excav., rock;
6000 cu. yds. rock fill;
220 cu. yds. concrete;
16,000 lbs. reinf. steel;
2100 cu. yds. rock riprap;
2600 cu. yds. concrete cribwall;
1600 lin. ft. 24-in. corr. pipe;
120 lin. ft. 30-in. do;
180 lin. ft. 36-in. do;
250 lin. ft. 42-in. do;
200 lin. ft. 48-in. do;
600 lin. ft. 60-in. do;
30,000 ft. b.m., of bridges of trestle timbering;

200 lbs. of rail stringers in rail top trestle;

2000 lin. ft. piling;
80 pile point shoes;
22,800 cu. yds. ballasting;
7.0 miles laying track (tie plated);
10 miles laying track (not tie plated);

Specifications for the construction of an 8-mile highway from Boulder City to the Hoover Dam Site have been forwarded to Washington. The principal items are:

113,000 cu. yds. common excavation;
266,000 cu. yds. rock excavation;
40,000 cu. yds. unclass. borrow;
250,000 sta. cu. yds. overhaul;
30,000 cu. yds. tunnel excavation;
30,000 ft. b.m., of tunnel timbering;
1200 cu. yds. of struc. excav., common;

600 cu. yds. struc. excav., rock;
210 cu. yds. backfill;
170 cu. yds. concrete;
8500 lbs. reinf. steel;
2500 cu. yds. riprap;
5000 cu. yds. concrete cribwall;
140 lin. ft. 18-in. corr. metal culvert;
1380 lin. ft. 24-in. do;
720 lin. ft. 36-in. do;
1100 lin. ft. 48-in. do;
970 lin. ft. 60-in. do;
420 lin. ft. 72-in. do;
60,000 ft. b.m., of bridge timbering;
40,000 cu. yds. gravel surfacing placed

80,000 sta. cu. yds. gravel surfacing in stock piles;
8.6 miles of highway treated with oil;
2700 lin. ft. guard rail.

Specifications and plans are now being prepared for work in Boulder City covering water works, sewer system, lighting system; also buildings for Government employees, including an administration building, dormitory, garage, and several residences.

 - Currie & Dulgur, (1) 77c; (2) 69c; (3) \$75; total, \$2553.20.
 - Petersen & Elssler, (1) \$1; (2) 70c; (3) \$75; total \$2593.50.
 - G. A. Graham, (1) \$1.25; (2) 60c; (3) \$77; total, \$2674.80.
 - Greene Const. Co., (1) \$1.25; (2) 75c; (3) \$78; total, \$2732.70.
 - Geo. Isaac, (1) \$1; (2) \$1.50; (3) \$260; total, \$2969.25.
 - M. H. Slocum (1) \$1.50; (2) 65c; (3) \$87; total, \$3020.20.
 - Stroud Bros., (1) \$2; (2) \$1.25; (3) \$96; total, \$3431.40.

KERN COUNTY, Cal.—M. H. Slocum, 2055 Veteran Ave., Los Angeles, at \$25,118 awarded contract by State Highway Commission to construct 4 timber bridges from 17 to 21 miles west of Wasco, 1 composed of twelve 19-ft. spans, 1 composed of four 19-ft. spans and 2 composed of two 19-ft. spans each, all on frame bents with concrete footings.

STOCKTON, San Joaquin Co., Cal.—Public hearing will be held in the city council chambers December 9 to consider construction of the proposed Charter Way subway. It is expected the project will be financed by the Western Pacific and Southern Pacific railroads and the city of Stockton. Lyle Payton is city engineer.

SACRAMENTO, Cal.—City Manager Jas. S. Dean announces the Southern Pacific Railroad has indicated its willingness to share in the cost of the proposed H St. Subway, estimated to cost between \$90,000 and \$100,000, including paving. The railroad would pay approximately \$45,000 of the total cost. Plans will provide for a clear span structure of the type now in use at 16th and B Sts. with sufficient room for four lanes of traffic, constructed in piles and reinforced with steel.

STOCKTON, San Joaquin Co., Cal. San Joaquin County Board of Supervisors has applied to U. S. District Engineer for approval of plans and specifications of a trestle bridge, 68 ft. long on south bank, 68 ft. trestle on north bank and 75 ft. steel span over center section of slough. It is proposed to erect the bridge 2.9 miles southwest of Thornton.

MERCED, Merced Co., Cal.—Until December 9, 11 A. M., bids will be received by P. J. Thornton, Clerk of Board of Supervisors, to construct concrete bridge No. 226 over Mustang Creek on Looney Road, North Line Section 10, Township 5 South, Range 12 East, in Road District No. 1. Certified check of 10% required, made payable to Chairman of Board. Plans and specifications on file with County Clerk or County Surveyor or obtainable from W. E. Bedesen, county surveyor on deposit of \$10, returnable. G. H. Winton, city engineer.

STOCKTON, San Joaquin Co., Cal.—A consulting engineer is to be employed by County Engineer Julius Manthey to prepare plans and specifications for a bridge at the Garwood ferry. Engineer Manthey reported the War Department has already indicated they will approve the plans.

STOCKTON, San Joaquin Co., Cal.—Public hearing on Charter Way Subway, which was to be held in city council chambers December 11, has been indefinitely postponed. Preparation of plans will be delayed 6 months. Subway was to be financed by Western Pacific and Southern Pacific railroads and the City of Stockton. Lyle Payton, city engineer.

MARIN COUNTY, Cal.—Healy-Tibbitts Const. Co., 64 Pine Street, San Francisco, at \$329,667, submitted low bid to State Highway Commission, Nov. 26, to construct bridge across Richardson Bay and over tracks of the Northwestern Pacific Railroad at Manzanita, consisting of one 50-ft. plate girder lift span on concrete piers with pile foundations, one 45-ft. steel stringer span on concrete bents with pile foundations and approx. 2340 ft. of timber trestle on pile and frame bents. Complete list of bids follows:

Healy-Tibbitts Const. Co., San Francisco, \$329,667
H. W. Rohl Co., Los Angeles, \$33,335
MacDonald & Kahn, S. F., 341,436

Pacific Bridge Co., Portland... 343,961
Merritt, Chapman and Scott, San Pedro... 346,710
Lord & Bishop, Sacramento... 347,499
Fredrickson & Watson and Fredrickson Bros., Oakland... 347,972
Rocca & Colletta, San Rafael... 352,131
Butte Const. Co., S. F.... 353,726
Siems Helmers, Inc., San Jose 367,335
Skeels & Graham Co., Roseville... 373,223
San Francisco Bridge Co., S.F. 374,246
A. W. Kitchen, S. F.... 385,659
Mercer-Fraser Co., Eureka... 389,384
M. B. McGowan, S. F.... 395,228
Schuler & McDonald, Oakland 402,620
Bids held under advisement.

NAPA, Napa Co., Cal.—City Council approved plans for new Third St. Bridge. Same will be sent to War Department for approval as to clearing, etc., before further details can be worked out. H. A. Harrold, city engineer. Recent bond election called to finance same for \$40,000.

STOCKTON, San Joaquin Co., Cal.—John Hachman awarded contract at \$1330 by Board of Supervisors to construct bridge near the site of a former structure on the Waverly Road over Duck Creek. Other bidders were John Strom, \$1999; T. E. Toothacre, \$1945; J. E. Fitzsimmons, \$1985; Nelson Bros., \$2225.

DREDGING, HARBOR WORKS & EXCAVATIONS

SAN FRANCISCO—Meyer Rosenberg, 1755 San Bruno Ave. at approximately \$200,000 awarded contract by Western Pacific Railroad, Mills Bldg., for 1,728,000 sq. ft. of fill in Islals Creek area which the railroad proposes to develop for industrial sites and to be served by the combined Western Pacific and Great Northern Railroads.

VALE, Oregon.—Until 10 A. M. Dec. 19, bids will be received by the United States Department of the Interior, Bureau of Reclamation, Vale, Oregon, for the construction of earthwork and structures bet. stations 2060 plus 58 and 2450 of the Vale main canal and the Bully Creek east bench lateral system, Vale Project, Oregon, involving:

- (1) 582,350 cu. yds. excav. all classes;
 - (2) 25,000 sta. cu. yds. overhaul;
 - (3) 8400 cu. yds. backfill about struc.;
 - (4) 1890 cu. yds. concrete;
 - (5) 118,000 lbs. plate reinf. bars,
 - (6) 5590 lin. ft. laying 12- 15- 18- and 24-in. concrete pipe;
 - (7) 20,900 lbs. install gates, gate lifts and struc. steel;
 - (8) 22 M ft. b.m. erecting bridges.
- Materials will be furnished by the government. Spec. may be obtained from the office of the Bureau of Reclamation at Vale, Oregon, Denver, Colo., or Washington, D. C. Edward Mead, Commissioner.

OAKLAND, Cal.—Until Dec. 26, 3 P. M., bids will be received by U. S. Engineer Office, Custom House, San Francisco, to dredge Oakland Harbor. Further information obtainable from above.

IRRIGATION PROJECTS

MERCED, Merced Co., Cal.—Election will be held December 17 in the proposed West San Joaquin Irrigation District to form district as sponsored by the People's Protective Association. The district will comprise approximately 250,000 acres, including lands in Merced, Fresno and Stanislaus counties. After formation, bonds will be voted to finance construction of a complete system of irrigation works.

STREET LIGHTING SYSTEMS

SAN FRANCISCO.—Complete list of bids received by City Purchasing Agent, 270 City Hall, to furnish and deliver 600 metal and 300 concrete Boulevard Lighting Standards follow:

(1) single light concrete; (2) single light bracket concrete; (3) with two-light brackets concrete; (4) single light cast iron; (5) 2-light cast iron; (6) single light cast bronze; (7) 2-light cast bronze; (8) single light composite bronze and concrete; (9) single light bracket composite bronze and concrete; (10) two-light bracket composite bronze and concrete; (11) single light cast steel; (12) two-light cast steel; (13) composite wrought and cast iron single light; (14) single light bracket composite wrought and cast iron; (15) 2-light bracket composite wrought and cast iron; (16) single light composite wrought and cast iron; (17) single light bracket composite wrought and cast iron; (18) 2-light bracket composite wrought and cast iron. (a) each first 100; (b) each in excess of 100.

California Artistic Metal & Wire Co., (4) \$198.75; \$174.25; (5) \$265.70; \$231.35; (6) \$476; 452; (7) \$634; \$598. Taper Tube Pole Co., (4) \$174.40; \$157.90; (5) \$197.25; \$177.75; (16) \$91.01 \$83.85; (17) \$160.10; \$127.05.

Street Lighting & Equipment Co., (13) \$114; \$114; (14) \$162.35; \$162.35; (15) \$175; \$175.

Enterprise Foundry Co., (4) \$104.50; \$96.50; (5) \$124.50; \$112.50; (11) \$164.40; \$156.40.

NePage-McKinnley Co., (1) \$70; \$64; (2) \$145; \$139; (3) \$225; \$218; (4) \$137.50; \$132.50; (5) \$169; \$164; (6) \$288.50; \$283.50; (7) \$340; \$335; (8) \$150; \$141; (9) \$220; \$221; (10) \$302; \$296; (13) \$108; \$96; (14) \$148; \$138; (15) \$175; \$165; (16) \$110; \$99; (17) \$157; \$147; (18) \$180; \$170.

Federal Ornamental Iron & Bronze Co., (4) \$165; \$157; (5) \$200; \$188; (6) \$355; \$347; (7) \$425; \$413.

F. Grassl & Co.-Travertine Works, Inc., (1) \$115.50; \$96.50; (2) \$188.50; \$159.50; (3) \$221.40; \$192.40; (8) \$188.50; \$168.50; (9) \$258.50; \$228.50; (10) \$291.40; \$262.40.

Joshua Hendy Iron Works (4) \$121.31; \$104.81; (5) \$139.37; \$120.37; (16) \$119.55; \$105.05; (17) \$188.29; \$150.29; (18) \$197.95; \$159.95.

Battle Electric & Mfg. Co., (1) \$165; \$150; (2) \$225; \$220; (3) \$275; \$260; (4) \$196; \$180; (5) \$230; \$220; (6) \$490; \$480; (7) \$580; \$550; (8) \$300; \$290; (9) \$370; \$350; (10) \$390; \$375.

Bids held under advisement.

ALAMEDA, Alameda Co., Cal.—Board of Public Utilities has been requested by the city council to submit plans on the most economical underground system of wiring possible in connection with the widening of Webster street. Cost of such a project has been estimated at approximately \$119,000, including extension of the present system of electroliners in use on Webster street north of the

segregation line along the tube approach. City Manager Clifton E. Hickok estimated that it will cost \$28,353 to widen the street four feet on each side between the segregation line and Central avenue. This project, however, cannot be started until the new electroliners have been installed, as in the case of Park street.

MARE ISLAND, Cal.—Until Dec. 24, under Circular Proposal 80-2783, Spec. 6362 bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., for Turbo-alternator, consisting of 2,000-k.w., erected on structural steel supports, provided by government, changes to existing switchboard panel and electrical apparatus and the services of a supervising erector. Information obtainable from Commandant, Navy Yard, Mare Island, Calif.

MACHINERY AND EQUIPMENT

CARMEL, Monterey Co., Cal.—City trustees order bids received to furnish a tractor and grader for street department; estimated cost \$3500.

ROSEVILLE, Placer Co., Cal.—Until December 3, 8 P. M., bids will be received by F. R. Chilton, city clerk, to furnish one asphalt machine, including tool heaters, tamper heaters, etc., and such other combined equipment required by city superintendent of streets for street repair work.

PHOENIX, Ariz.—Until Dec. 10, 2 P. M., bids will be received by John E. Brown, superintendent, U. S. Indian Field Service, Phoenix, to furnish and deliver 1 concrete mixer, similar and equal to 7S Lakewood manufactured by The Lakewood Engineering Co., Cleveland, O., equipped with 8 to 10 hp. 2-cylinder gas engine, to be radiator cooled, power charging skip, water tank, automatic, self-measuring, mixer to be mounted on steel frame with steel wheels, capacity: dry material 14 cu. ft., wet mixed concrete 7 cu. ft. Further information obtainable from above.

EL SEGUNDO, Los Angeles Co., Cal.—City rejects bids to furnish two 1½-ton motor trucks and same will be purchased in the open market.

STOCKTON, San Joaquin Co., Cal.—The Liquid Sugar Corporation has purchased the Union mill of the Sperry Flour Company at Stockton and will install about \$200,000 worth of machinery in the structure.

VERNON, Los Angeles Co., Cal.—Weeden & Company and American Securities have purchased the \$5,000,000 Vernon Bond issue, proceeds to be used for the construction of a municipal power plant and distribution system.

LOS ANGELES, Cal.—Southern California Edison Company has budgeted \$28,000,000 for construction work and extra maintenance during 1931, including \$9,000,000 for the installation of another 135,000-horsepower capacity turbine at the Long Beach steam plant.

OAKLAND, Cal.—Until Dec. 1, 4:30 P. M., bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 California Bank Bldg., to furnish and deliver one heavy duty tractor for use on the Outer Harbor Terminal. Specifications obtainable from above.

ROSEVILLE, Placer Co., Calif.—Western Pipe & Steel Co. awarded

contract by Pacific Fruit Express for 600 underframes for refrigerator cars. The underframes represent an expenditure of \$300,000.

TAFT, Kern Co., Cal.—Until 7 P. M., December 9, bids will be received by the Taft Union High School District for furnishing and installing the following equipment:

One bandsaw, 36-in., of high grade modern type with 5 H. P. motor direct connected and with attachments and blades.

One Jointer, 6-inch with floor base ½ H. P. motor, guard fence and set of extra blades.

One Belt sander, vehicle drums and spindle for 8-in.x48-in. belt oscillating and with attachments, extra belt and 1½ H. P. motor.

1 Shaper, single vertical spindle, 8500 R. P. M., cast iron floor base, 1½ H. P. motor with attachments and extra bits and cutters.

One Nibbling machine, Campbell No. 1, or equal grade, with attachments and extra punches and plates.

Specifications are on file at the office of the principal of the high school. B. Rintoul, president of the board of trustees.

RAILROADS

SAN FRANCISCO.—Pacific Coast Steel Corp., 215 Market St., at \$24.70 each, under Proposal No. 653, awarded contract by city purchasing agent to furnish and deliver 500 34-in. rolled steel car wheels, and to Standard Steel Works Co., 2910 Russ Bldg., at \$26.25 each contract to furnish 48 23-in. rolled steel car wheels.

FIRE EQUIPMENT

YREKA, Siskiyou Co., Calif.—Until Dec. 8, 7:30 P. M., bids will be received by U. F. Brown, city clerk, to furnish one 500 g.p.m. motor-driven pumping engine and hose car with water equipment and a motor-driven service hook and ladder truck. Certified check 10% required with bid. Specifications on file in office of clerk.

RESERVOIRS AND DAMS

RED BLUFF, Tehama Co., Calif.—International Diamond Drill Co., Hobart Bldg., San Francisco, at approximately \$10,000 will be awarded contract by U. S. Engineer Office, Sacramento, for drilling nine test holes at site of the proposed Table Mountain Dam 13 miles north of Red Bluff.

GLENDALE, Los Angeles Co., Cal.—City council will ask bids in January to construct proposed \$350,000 reservoir at Glorieta and Verdugo.

SACRAMENTO, Cal.—A \$45,000,000 water development program on the American River, involving the construction of three major dams, to provide fresh water for the delta of the Sacramento and San Joaquin river, flood control, irrigation and electric power, was proposed in a report made public Nov. 20 by the state engineer.

PIPE LINES, WELLS, ETC.

SAN FRANCISCO.—San Francisco Board of Supervisors have authorized the expenditure of over \$1,000,000 for the construction of a 13-mile pipe line between Newark and San Lorenzo to connect the municipal water system and the Hetch Hetchy line.

GLENDALE, Los Angeles Co., Cal.—Until 10 A. M., Dec. 4, bids will be received by the city council for furnishing and delivering f. o. b.

trenchside, Glendale, the following:

- (1) 204 ft. 30-in. class D cast iron pipe;
- (2) 2200 ft. 30-in. class B cast iron pipe;
- (3) 500 ft. 24-in. class B cast iron pipe;
- (4) 600 ft. 20-in. class D cast iron pipe;
- (5) 40 tons class D fittings in size 20-in. and larger.

All of the above pipe to conform to the specifications of the American Water Works Assn. The chemical analysis of the iron, regardless of other tests, shall conform to the following limits in chemical composition, Sulphur, maximum, 0.10%; phosphorus, maximum, 0.90% manganese, maximum, 0.65%, minimum, 0.35%; silicon, maximum, 2.10%, minimum, 1.20%.

Each fitting to have cast in letter and figures plainly visible the letters C. G. W. D., size of fittings, and in addition the degree of curvature on all ends.

- (6) 6700 ft. 4-in. standard single hub cast iron soil pipe;
- (7) 5000 ft. 6-in. standard single hub cast iron soil pipe;
- (8) 14 6-in. standard 1/4 bend soil pipe fittings;
- (9) one 6-in. standard 1/5 bend soil pipe fittings;
- (10) one 6-in. standard 1/6 bend soil pipe fitting;
- (11) six 6-in. standard 1/8 bend soil pipe fittings;
- (12) two 6-in. standard 1/10 bend soil pipe fittings;
- (13) twelve 4-in. standard 1/4 bend soil pipe fittings;
- (14) one 4-in. standard 1/5 bend soil pipe fitting;
- (15) one 4-in. standard 1/6 bend soil pipe fitting;
- (16) 36 4-in. standard 1/8 bend soil pipe fittings;
- (17) two 4-in. standard 1/10 bend soil pipe fittings;
- (18) six 6x6 standard "Y" branch soil pipe fittings;
- (19) (19) 36 6x4 standard "Y" branch soil pipe fittings;
- (20) 36 4x4 standard straight tee soil pipe fittings.

Alternate bids will be received on items 6 to 20, inclusive, for extra heavy pipe and fittings.

Quantity may be increased or decreased 25% at the option of the City of Glendale at any time before signing of contract. Certified check, 10% G. E. Chapman, city clerk. P. Diederich superintendent of plant and production.

SEWERS AND SEWAGE DISPOSAL PLANTS

OAKLAND, Cal.—Ed. Bowman, 3017 B St., Oakland, apparently submitted low bid to the city council to construct drainage structures, etc., in E Tenth St., Russett St., E Eighth St., 47th Ave., etc. Following is a complete list of the unit bid received:

- (1) 12-in. reinf. conc. pipe conduit;
- (2) 15-in. do;
- (3) 18-in. do;
- (4) 21-in. do;
- (5) 24-in. do;
- (6) 24-in. do with conc. covering;
- (8) 8x24-in. corr. iron and cement culvert;
- (9) 8x29-in. do;
- (10) 2-ft. 3-in. x 2-ft. 3-in. concrete arch culvert;
- (11) 3-ft. 6-in. x 8-ft. 6-in. reinforced concrete box culvert;
- (12) storm water inlet, 34-in.;
- (13) storm water inlet, 21-in.;
- (14) storm water inlet top 21-in.;
- (15) conc. handhole with cover;
- (16) conc. end, curtain and header walls (cu. ft.);

- (17) guard railing;
- (18) manhole;
- (19) manhole top;
- (20) lamphole.
- (A) Ed. Bowman, Oakland.
- (B) Oakland Sewer Const. Co., Oakland.
- (C) John Pestano, Oakland.
- (D) W. J. Tobin, Oakland.

SANTA MARIA, Santa Barbara Co., Cal.—City Engineer York Peterson making surveys to extend sewer system in north section of city; estimated cost \$25,000.

OAKLAND, Cal.—Ed Bowman, 3017 B St., awarded contract at \$9705 by city council to construct drainage structures, etc., in E 10th, Russett, E 8th Sts. and 47th Ave., etc.

NEWPORT BEACH, Orange Co., Cal.—Plans and specifications for the bend adopted by the city council. The estimated cost is \$185,000. Currie Engineering Co., Anderson Bldg., San Bernardino, is the engineer. The council has ordered acquisition of the necessary property.

NEWPORT BEACH, Orange Co., Cal.—Currie Eng. Co. and City Engineer R. L. Patterson are preparing plans for the new sewage disposal plant to be constructed northwest of the city. The plant will cost about \$185,000. Plans will be ready to submit to the city council within thirty days.

EUREKA, Humboldt Co., Cal.—City Engineer E. D. Gardner has been instructed by the city council to prepare plans for the installation of an electrolier system in Fourth street from Broadway to J Street. The cost is estimated at \$15,000. Project will be financed under the 1911 Act.

MONTEREY, Monterey Co., Cal.—Until December 2, 7 P. M., bids will be received by Clyde A. Dorsey, city clerk, (3942) to construct 6-in. vitrified sewers in portions of Fillmore St., Grand St., Terry St., Parcel St., etc., together with 31 manholes, 4 inspection holes and 570 wye branches. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

BEVERLY HILLS, Cal.—Until Dec. 16, 8 P. M., bids will be received by city council to furnish 108 ornamental lighting posts to be installed in Santa Monica Blvd. Spec. obtainable from city clerk.

SALINAS, Monterey Co., Cal.—Until December 1, 7:30 P. M., bids will be received by M. R. Keef, City Clerk, to construct sanitary sewer in Hoover St., a sanitary sewer in alley in Block 4 1/2, Sherwood and Helman Addition to Salinas; a sanitary sewer in Cattlemen's Lane; a storm sewer from National St. to Wilson St. storm

sewer; and a storm sewer from the Southern Pacific Railroad to the Reclamation Ditch. Plans obtainable from Howard Cozens, city engineer.

SAN FRANCISCO — E. J. Treacy, Oak Hldg., at \$2303 awarded contract by Board of Public Works to improve Brussels St., between Ward and Mencl Sts., including crossings of Ward, Ordway and Mencl Sts., involving construction of vitrified clay pipe sewers, manholes and wye branches.

BERKELEY, Alameda Co., Cal.—Until December 2, 10 A. M., bids will be received by Florence E. Turner, city clerk, to construct storm sewer in Indian Rock Path from Arlington Ave. easterly. Certified check 10% payable to city of Berkeley required with bid. Plans obtainable from city engineer on deposit of \$10, returnable.

WATER WORKS

MONROVIA, Los Angeles Co., Cal.—Until 7:30 P. M., Dec. 15, bids will be received by the city council for furnishing and installing one centrifugal booster pump, capacity 1400 G. P. M., total head 270 ft. and one 150 h.p. motor. Surety company bond or certified check 10%. Specifications, etc., may be obtained from the city engineer. F. A. Dupar, city clerk.

LOS ANGELES, Cal.—Bids received by the city purchasing agent, Thomas Oughton, November 24 for gate valves under specifications No. 2226, are as follows:

California Pipe & Supply Co., (1) 8 36-in. hub end, double disc, square head, side geared gate valves, each with 6-in. by-pass, f. o. b. cars S. P. team track, Van Nuys, or f. o. b. delivered to department warehouse at Van Nuys, \$1202; (2) one 30-in. hub end, double disc, square head, side geared Rensselaer or equal square bottom type gate valve, with 6-in. by-pass, f. o. b. delivered to department warehouse, Van Nuys, \$833; (3) one 30-in. hub end, double disc, square head, side geared gate valve with 6-in. by-pass, f. o. b. delivered to department warehouse, Van Nuys, \$808; (4) two 30-in. hub end, double disc, square head, side geared gate valves, each with 6-in. by-pass, f. o. b. delivered to department warehouse, 410 Ducommun St., Los Angeles, \$818; (5) one 30-in. hub end, double disc, square head, side geared gate valve with 6-in. by-pass, f. o. b. delivered to department warehouse, 410 Ducommun St., Los Angeles, \$818.

Fitzpatrick & Lock Co., (1) \$1234; (2) \$839.95; (3) \$783; (4) \$778.25; (5) \$939.10.

Pacific Pipe & Supply Co., (1) \$1234; (2) \$839.95; (3) \$783; (4) \$778.25; (5) \$939.10.

Chapman Valve Co., (1) \$1495; (2) no bid; (3) \$915; (4) \$915; (5) \$1329. Rensselaer Valve Co., (1) \$1610; (2) \$1021.25; (3) \$931; (4) \$931; (5) \$1157. National Cast Iron Pipe Co., (1) \$1225; (2) no bid; (3) \$825; (4) \$825; (5) \$900.

Darling Valve & Mfg. Co., (1) \$2063; (2) no bid; (3) \$1287; (4) \$1287; (5) no bid.

ANTIOCH, Contra Costa Co., Cal.—Until December 8, 8 P. M., bids will be received by J. E. McElhenry, town clerk, to furnish and install a horizontal pressure filter; for enlarging the building housing filters in addition to other minor improvements at Municipal Water Plant. Certified check 10% payable to town clerk required with bid. Plans obtainable from E. L. O'Hara, city engineer.

SANTA CRUZ, Santa Cruz Co., Cal.—City council rejects bids to furnish between 8,000 and 10,000 lin. ft. welded steel water pipe. It has not been decided whether to ask new bids or to purchase the material in the open market. Bids received were:

Calif. Corr. Culvert Co.	\$2.22
*American Concrete Pipe Co.	2.50
Steel, Inc.	2.81
Montague Pipe Co.	3.11
Western Pipe & Steel Co.	3.29
A. R. Pipe	3.98
U. S. Pipe & Foundry Co.	3.66

*This bid covered concrete pipe.

NATIONAL CITY, San Diego Co., Cal.—F. W. Seifert has outlined a plan whereby 10,000,000 gallons of sewage now running daily into San Diego Bay can be converted into water suitable for agricultural purposes. A treatment plant, pumping plant, reservoir and about 16 miles of 20-in. pipe would be required.

SAN MATEO CO., Cal.—Mayors of Redwood City, San Carlos and Belmont have commissioned A. J. Cleary, consulting engineer, Mills Bldg., San Francisco, to survey the water resources of the three communities. The tri-city survey is a part of the plan to create five city water districts to include Menlo Park, Atherton, Redwood City, San Carlos and Belmont. Surveys in the other two cities have been completed, and when the latest survey is completed steps will be taken to consolidate the cities in a water conservation district.

BOULDER CITY.—Until 2 P. M., Dec. 12, bids will be received by the United States Bureau of Reclamation, Denver, Colo., for the fabrication and erection of two arc-welded or riveted plate steel tanks for water supply. Boulder City, Nev., Boulder Canyon Project. One tank will be 100 ft. in diameter and 34 ft. high, with No. 10 gauge sheet steel roof of 2,000,000 gals. capacity, to be erected in Boulder City. The other tank will be 40 ft. in diameter and 25 ft. high, without roof, of 235,000 gals. capacity, to be erected at the site of the filter plant about 4 miles east of Boulder City. The estimated quantities of metal work involved are: 2,000,000-gal. tank, 450,000 lbs.; 235,000-gal. tank, 35,000 lbs. The tanks will be erected on oiled sand foundations constructed in advance by the government. A guarantee of ten per cent will be required with each bid. No deposit for plans. Spec. may be obtained from the office of the Bureau of Reclamation at Las Vegas, Nev., or Denver, Colo. R. F. Walter, chief engineer.

OWYHEE DAM, Ore.—Until 2 P. M. Dec. 23, bids will be received by the United States Department of the Interior, Bureau of Reclamation, Denver, Colo., for furnishing three 48-in. internal differential needle valves for Owyhee Dam, Owyhee project, Ore. Spec. No. 516. The valves will be installed by the government. For particulars address the Bureau of Reclamation at Owyhee, Denver or Washington. D. C. Elwood Mead, Commissioner.

MONROVIA, Los Angeles Co., Cal.—Until December 15, bids will be received by city council to furnish and install booster pump at Ivy Ave. Pumping Plant. Specifications obtainable from city clerk.

MILBRAE, San Mateo Co., Calif.—Milbrae Utility District will hold an election December to decide the question of issuing and selling bonds of \$14,000 to finance the installation of a water piping system, storage tanks, pumps, etc. The line will connect with a supply main of the Spring

Valley Water Company at El Camino Real and Chadbourne Ave. and will terminate at a storage tank on the Mills Property. Henry Welbrook is manager for the district. Geo. A. Kneese, Courthouse, Redwood City, engineer.

SANTA BARBARA, Cal.—C. G. Clausen Co., 825 Folsom St., San Francisco, at \$747 awarded contract by city council to furnish 900 ft. 6-in. c. l. pipe. Other bids: American Cast Iron Pipe Co., \$584; U. S. Pipe & Foundry Co., \$593.70.

STREETS AND HIGHWAYS

WESTMORELAND, Imperial Co., Cal.—Until 7:30 P. M., Dec. 11, bids will be received by the Westmoreland Sanitary District, Imperial County, for the construction of sewers, involving approx. 25,000 lin. ft. of vit. sewer laterals, including 8-in., 10-in. and 12-in. pipe, with manholes, vyes, flush tanks, etc. 1911 Act. Plans may be obtained from the Currie Engineering Co., 219 Anderson Bldg., San Bernardino, upon deposit of \$5.

HAYWARD, Alameda Co., Calif.—Approximate quantities involved in improving Prospect St. bet. Simon and Warren Sts. and Warren St. bet. Main and Prospect Sts., are as follows: 709 sq. ft. concrete sidewalk; 202 lin. ft. 4-in. dia. vit. clay side sewers; 34,923 sq. ft. 6-in. full penetration mulchified asph. macadam pavement (including grading); 54 lin. ft. Redwood headerboard. M. B. Temple, city clerk. J. B. Holly, city engineer.

OAKLAND, Cal.—San Leandro Rock Co., 1273 Foothill Blvd., San Leandro, awarded contract at .90c cu. yd. by City Port Commission to furnish 5000 tons quarry waste crushed rock for drainage structures.

BURLINGAME, San Mateo Co., Cal.—City Council declares intention to improve Newhall Road from Forest View to Sanchez Ave., involving grading, paving with 6-in. waterbound macadam base and 2½-in. asph. wearing surface, 4-ft. sidewalks, 10-in. conc. pipe cross drain, catch basin, sewer laterals, 6-in. concrete curb. Imp. Act 1911. Hearing Dec. 8. J. R. Murphy, city clerk. C. M. Thomas, city engineer.

SAN JOSE, Santa Clara Co., Cal.—City Council declares intention (5239) to improve Elizabeth, Hayes and Hewlett Sts., involving grading, pave with 1½-in. asph. conc. wearing surface, 2½-in. asph. conc. foundation, cem. concrete sidewalks, curbs, gutters, manholes, 6-in. vit. pipe sewer, 4-in. vit. pipe house lateral, concrete storm water inlet with 8-in. vit. pipe drain. 1911 Act. Hearing Dec. 8. John J. Lynch, city clerk. Wm. Popp, city engineer.

FRESNO, Fresno Co., Cal.—Valley Paving & Const. Co., Visalia, at \$33,820 awarded contract by county supervisors to pave Mount Whitney Ave. in Riverdale Road District No. 14, involving 2500 lin. ft. of 3-inch Permatite asphaltic concrete surface, 45 ft. wide and 5000 lin. ft. of curbs and gutters. Complete list of bids follows:

Valley Paving & Const. Co.	\$33,820
Union Paving Company	34,590
E. J. Johnson & Son	36,545
Kuhn Brothers	38,640
Thompson Brothers	42,890

SANTA CLARA COUNTY, Calif.—Coutoules Const. Co., San Francisco, at \$212,284 submitted low bid to the State Highway Commission Nov. 26, to grade and pave with bituminous macadam, 10.7 miles between San Felipe and one mile east of Bells Station. Complete list of bids follows:

Coutoules Const. Co., S. F.	\$212,284
H. E. Coats, Sacramento	214,750
H. W. Rohl Co., Los Angeles	217,851
Healy-Thibbs Const. Co. S. F.	223,738
Frederickson and Watson & Frederickson Bros., Oakland	224,904

Hemstet & Bell, Marysville	226,154
A. Teichert & Son, Sacramento	228,784
M. L. Bevanda, Stockton	229,333
I. R. Rider, San Jose	233,275
Larsen Bros., Galt	233,283
C. W. Wood, Stockton	240,731
McCravy Co., Los Angeles	241,556
Granite Const. Co., Watsonville	244,889

Peninsula Paving Co., S. F.	248,659
J. F. Knapp, Oakland	253,994
W. H. Hauser, Oakland	256,622
E. R. Dennis Const. Co., San Diego	266,345

Steele & Graham, Roseville	279,551
Isbel Const. Co., Fresno	299,265
F. W. Nighbert, Ekersfield	328,642

Bids held under advisement.

IMPERIAL COUNTY, Calif.—E. R. Dennis Const. Co., San Diego at \$227,453 submitted low bid to State Highway Commission Nov. 26, to grade and pave with asphalt concrete, 6 miles between Araz and Yuma. Complete list of bids follows:

E. R. Dennis Const. Co., San Diego	\$227,453
Steele Finley, Santa Ana	240,238
Bassich Bros. Const. Co., Torrance	249,914
R. E. Hazzard Const. Co., San Diego	249,965
H. W. Rohl Co., Los Angeles	273,257
Southwest Paving Co., L. A.	288,644
Griffith Co., Los Angeles	292,818
Hanahan Co., S. F.	294,950
Hall Johnson Co., Alhambra	310,950

Bids held under advisement.

SAN BERNARDINO, Cal.—San Bernardino County Supervisors will cooperate with the city of San Bernardino in improving three entrances to the city. West Fifth St., East Third St. and Colton Ave., south of the National Orange Show grounds, are slated to share the improvement.

Phone GA 4734 San Francisco

program, which will involve the outlay of at least \$100,000 by the city and county. It is possible the sum may be doubled and its scope extended to embrace construction of a paved boulevard, between San Bernardino and Colton, vit the Orange show grounds.

SAN LUIS OBISPO COUNTY, Cal.—Until December 17, 2 P. M., bids will be received by State Highway Commission to grade and pave with asphalt concrete, 10.9 miles between Paso Robles and north boundary.

SANTA BARBARA COUNTY, Cal.—Until December 17, 2 P. M., bids will be received by State Highway Commission to grade and pave with Portland Cement Concrete, 2.8 miles between Gaviota and 1 mile north of Las Cruces.

ALAMEDA, Alameda Co., Cal.—See "Street Lighting Systems," this issue. Widening of Webster street proposed by city council at a cost of \$119,000. Clifton E. Hickok, city manager.

HAYWARD, Alameda Co., Calif.—City council declares intention (\$26) to improve Prospect St. bet. Simon and Warren Sts. and Warren St. bet. Main and Prospect Sts., involving grading, 6-in. full penetration asph. macadam pavement, 4-in. vit. clay pipe side sewers, cement concrete curbs, gutters and walks. 1915 Bond Act, 1911 Act. Hearing Dec. 3. M. B. Templeton, city clerk. Jesse B. Holly, city engineer. (Quantities of materials involved will be published shortly).

TAFT Kern Co., Cal.—Due to protests the city trustees have cancelled proceedings under Res. of Intention No. 225 to improve portions of San Emidio St., involving grading; conc. curbs, walks and gutters. 1911 Act. C. A. Page, city clerk.

MENLO PARK, Santa Clara Co., Cal.—City Engineer Bert J. Mehl preparing plans for full-width paving, curbs, gutters and storm sewers in Stanford Park, property owners having petitioned for the work. The ten streets to be improved are those from El Camino Real to Arbor Road bet. the Creek and Middle Ave. The cost is estimated at \$102,186.

SANTA MARIA, Santa Barbara Co., Cal.—Santa Maria Const. Co., Santa Maria, awarded contract by the city council \$28,575.88 to improve Cypress St. bet. Broadway and Suez Ave., and portions of other streets, under 1911 Act. involving:

- (1) 94,000 sq. ft. 4-in. asph. concrete pavement;
- (2) 53,000 sq. ft. 3-in. oil macadam;
- (3) 11,554 sq. ft. cement gutters, with small amount of incidental work.

SANTA BARBARA, Calif.—County supervisors approved the expenditure of \$67,000 as Santa Barbara county's share of the cost of the proposed highway from San Joaquin Valley to the Coast highway by way of Maricopa and Carpinteria. Kern and Ventura counties, the state and the U. S. forestry service will contribute a large part of the cost.

SAN LEANDRO, Alameda Co., Cal.—City council abandons proceedings to install electroliner system in Dutton Ave. from East 14th St to Kenilworth Ave. Project will again be considered early next Spring.

SAN FRANCISCO—H. V. Tucker, 300 Vermont St., at \$38,731 awarded contract by Board of Public Works to construct Section A of the Alemany

Bldg., involving 100,000 cu. yds. excavation; 8 brick manholes; 100 lin. ft. 12-in. and 170 lin. ft. 18-in. V.C.P. sewer; 70 cu. yds. class B conc. in 18-in. sewer encasement, piers and tunnel bulkheads; 7000 lbs. bar reinforcing steel; 600 lin. ft. 18-in. corrugated pipe; 1 redwood intake.

SAN FRANCISCO—E. J. Tracey, Cal. Bldg., at \$2048 awarded contract by Board of Public Works to improve crossings of Kansas and 22nd Sts., involving grading; armored conc. curbs; sidewalks; brick catchbasins; 2-inch asph. conc. surface pave on 6-in. Class F conc. base and improve 22nd St., bet. Kansas and Rhode Island Sts., (where not), involving armored conc. curbs; side sewer; 6-in. Class E conc. pavement.

OAKLAND, Cal.—Until December 4 12 noon, bids will be received by P. C. Merritt, city clerk, to improve portion of 92nd Ave., involving:

- (1) 50,637 sq. ft. grading;
- (2) 1,626 lin. ft. concrete curb;
- (3) 3,259 sq. ft. conc. gutter;
- (4) 27,172 sq. ft. penetration macadam pavement;
- (5) 2 storm water inlets (Type E);
- (6) 153 lin. ft. 21-in. reinf. conc. pipe conduit;
- (7) 114 lin. ft. 18-in. conc. pipe conduit;
- (8) 80 lin. ft. 12-in. conc. pipe conduit;
- (9) 765 lin. ft. 8-in. vit. pipe sewer;
- (10) 4 manholes;
- (11) 16 Y branches.

1911 Act. Cert. check 10% payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

SAN LUIS OBISPO, Cal.—City Engineer Leon Moore completing plans for concrete paving in Pacific St., bet. S. P. R. R. tracks and Lower Higuera street.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, 3rd floor, City Hall, completes specifications to improve Bancroft Avenue bet. Quint St. and Thornton Ave. Estimated cost \$2150, involving:

- (1) 106 lin. ft. armored conc. curb;
- (2) 775 sq. ft. one-course conc. sidewalk;
- (3) 70 lin. ft. 10-in. V.C.P. culvert;
- (4) 5340 sq. ft. asph. conc. pavement, 2-in. asph. conc. surface, 6-in. class F conc. base.

SAN JOSE, Santa Clara Co., Calif.—Peninsula Paving Co. awarded contract at \$3,763.30 by city council to improve Vermont St. bet. Myrtle and Elm Sts., involving grading; 1½-inch asph. conc. surface pavement on 2½-in. asph. conc. base; 4-in. vitrified house lateral sewers; cem. concrete walks and gutters. Two other bids were: San Jose Paving Company at \$3,873.50 and A. J. Ralsch, \$4,171.50.

OAKLAND, Cal.—Until December 4 12 noon, bids will be received by P. C. Merritt, city clerk, to improve portions of Hopkins St. Place and portions of Hopkins St. and Coolidge Ave. involving:

- (1) 344,626 sq. ft. grading;
- (2) 852 lin. ft. conc. curb with steel curb guard;
- (3) 10,350 lin. ft. conc. curb;
- (4) 270,020 sq. ft. conc. pavement;
- (5) 933 sq. ft. conc. driveway;
- (6) 60,816 sq. ft. conc. sidewalk;
- (7) 188 lin. ft. 10-in. vit. pipe conduit with concrete covering;
- (8) 14 lin. ft. 10-in. pipe conduit;
- (9) 101 lin. ft. 12-in. do;
- (10) 46 lin. ft. 15-in. do;
- (11) 28 lin. ft. conc. box culvert with reinforced top;
- (12) 2 concrete handholes with cast iron covers;
- (13) 2 concrete inlets with cast iron gratings;
- (14) 1 manhole;
- (15) 1 storm water inlet (Type A);
- (16) 12 storm water inlet (34-in. opening);
- (17) 176 lin. ft. 8-in. vit. pipe sewers;
- (18) 2347 lin. ft. 5-in. vit. pipe side sewers;
- (19) 9 manhole tops;
- (20) 2 lampfro;
- (21) 1 lampfro to be reinforced;
- (22) 4 Y branches.

1911 Act. City will pay 22½% of total cost from Treasury. Certified check 10%, payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

VENTURA, Ventura Co., Cal.—Until Dec. 16, 11 A. M., bids will be received by L. E. Hollowell, county clerk, to surface approximately two miles of Eliseo Road in Wheeler Canyon with read oil, sand and gravel, 18-ft. wide and 5-in. thick, involving 4500 tons of asphaltic surfacing mixture. Spec. obtainable from C. W. Pettit, county surveyor.

VENTURA, Ventura Co., Cal.—Until Dec. 16, 11 A. M., bids will be received by L. E. Hollowell, county clerk, to construct oil macadam shoulders on each side of pavement in Ventura Ave. bet. Ventura Ave. oil slide and L. Cross, approx. 4 miles in length, involving 120,000 sq. ft. 5-in. oil macadam. Spec. obtainable from C. W. Pettit, county surveyor.

SACRAMENTO, Cal.—Until Dec. 8, 10 A. M., bids will be received by Harry W. Hall, county clerk, Room 201, Court House Bldg., to construct a corrugated galvanized iron culvert on Ryde-Howard Landing Road located on Grand Island. Certified check of 10% required, payable to Chairman of Board, returnable. Plans and specifications on file with County Engineer. Harry W. Hall, county clerk; Chas. Deterding, county engineer.

See call for bids under official proposal section in this issue.

OAKLAND, Cal.—City council declares intention to improve Foothill Blvd. bet. Parker Ave. and Hollywood Blvd., and portions of Jones and Truman Aves., adjacent to Foothill Blvd. Project involves:

- (1) 486,293 sq. ft. grading;
 - (2) 713 lin. ft. conc. curb with steel curb guard;
 - (3) 15,733 lin. ft. conc. curb;
 - (4) 475,428 sq. ft. conc. pavement;
 - (5) 654 lin. ft. 2-ft. 3-in. by 3-in. concrete culvert;
 - (6) 200 lin. ft. 10-in. vit. pipe conduit;
 - (7) 96 lin. ft. 12-in. do.;
 - (8) 1,114 lin. ft. 15-in. do.;
 - (9) 59 lin. ft. 15-in. extra strength reinf. conc. pipe conduit;
 - (10) 67 lin. ft. 18-in. vit. pipe conduit;
 - (11) 202 lin. ft. 21-in. do.;
 - (12) 818 lin. ft. 24-in. do.;
 - (13) 6 concrete inlets with cast iron top (34-in. opening);
 - (14) 1 storm water inlets (Type A);
 - (15) 3 storm water inlets (21-inch opening);
 - (16) 13 storm water inlet (34-inch opening);
 - (17) 5 manholes with standard top;
 - (18) 2 manholes with inlet top (34-in. opening);
 - (19) 1 15-in. lamphole.
- 1911 Act. City will pay 41% of the total cost from Treasury. Hearing Dec. 4. Frank Merritt, city clerk. Walter N. Frickstad, city engineer.

OAKLAND, Cal.—City council declares intention to improve E Tenth St. bet. High St. and 50th Ave., Russet St. bet. 50th and 54th Aves., etc. Project involves:

- (1) 156,749 sq. ft. grading;
 - (2) 341 lin. ft. conc. curb with steel curb guard;
 - (3) 2,597 lin. ft. concrete curb without steel curb guard;
 - (4) 154,790 sq. ft. conc. pavement;
 - (5) 93 lin. ft. 8-in. by 10-in. corr. iron and concrete culvert;
 - (6) 14 lin. ft. 10-in. vit. pipe conduit;
 - (7) 34 lin. ft. 15-in. vit. pipe conduit;
 - (8) 2 handholes;
 - (9) 1 concrete inlet with cast iron top;
 - (10) 1 storm water inlet (21-in. opening);
 - (11) 1 manhole top.
- 1911 Act. City will pay 29% of cost from Treasury. Hearing Dec. 11. W. N. Frickstad, city engineer.

FRESNO, Fresno Co., Cal.—City Council ordered the abandonment of alleys between Wilson and Palm Aves. New plans call for 70 foot streets and an eight foot right-of-way.

SAN JOSE, Santa Clara Co., Calif.—San Jose City officials will protest the proposal of the San Jose Railroads Company to abandon 5000 feet of line on Willow St. The railroad's petition to abandon the line followed the launching of the Willow Glen widening project by Willow Glen. The San Jose Railroads protest that the income of the line is insufficient to permit the company to contribute what would be its share of the cost of the improvement, about \$30,000.

SAN JOSE, Santa Clara Co., Calif.—San Jose Paving Company awarded contract at \$2,242.30 by city council to improve portions of Morlan Ave. bet. Santa Clara and 13th Sts., involving grading, 1½-in. asphalt conc. surface pavement on 2½-in. asphalt concrete base, cement concrete walks and curbs. Other bids submitted were A. J. Raich at \$2,518.90 and Peninsula Paving Co., \$2,342.14.

SANTA CRUZ, Santa Cruz Co., Cal.—Granite Const. Co. awarded contract at \$8,333.96 by Board of Supervisors to improve Palm Ave. from Lake Ave. to Watsonville city limits, including crossbars, involving asphaltic macadam surface on 5-in. water-bound macadam base, cement concrete curbs and gutters.

SAN DIEGO COUNTY, Calif.—Triangle Rock & Gravel Co., San Bernardino, submitted low bid of \$32,714.20 to U. S. Bureau of Public Roads 461 Market St., San Francisco, for grading Section B and placing selected material on Sections A and B of Route 75, Laguna National Forest Highway, in Cleveland National Forest, 10.86 miles in length, involving:

21 acres clearing;	
28,750 cu. yds. excavation, unclassified;	
200 cu. yds. excavation, for structures;	
5,000 cu. yds. overhaul;	
6.5 miles preparing roadbed;	
1,096 lin. ft. corr. metal pipe in place;	
19,000 cu. yds. selected material in place.	
Contract to be awarded December 8. Complete list of bids follows:	
Triangle Rock & Gravel Co., San Bernardino	\$32,714.20
A. J. Vodenhamer, Ventura	\$3,371.50
V. R. Demis Const. Co., San Diego	39,508.50
Nelson & Sloane, Chula Vista	41,355.50
O. A. Linberg, Stockton	43,828.72
Hadaman & McVicar, Pasadena	48,403.50
Gist & Bell, Arcadia	48,420.80
Dimm & Taylor, L. A.	54,083.10
Engineer's Estimate	45,173.50

SAN LUIS OBISPO CO., Calif.—As previously reported, bids will be received Dec. 17 by the State Highway Commission to grade and pave with asphalt concrete, 10.9 miles bet. Paso Robles and north boundary. Project involves:

160,000 cu. yds. rdwy. excav. without class;	
850,000 sta. yds. overhaul;	
5,000 cu. yds. struc. excav.;	
\$2,800 cu. yds. subgrade for pavement;	
36,300 sq. yds. asphalt binder;	
47,900 tons asphalt concrete;	
660 cu. yds. class A Portland cement concrete (structures);	
64,000 lbs. bar reinf. steel (structures);	
364 lin. ft. 8-in. corr. metal pipe;	
370 lin. ft. 18-in. do.;	
1223 lin. ft. 24-in. do.;	
140 lin. ft. 30-in. do.;	
24 lin. ft. 36-in. do.;	
94 lin. ft. corr. metal pipe (clean and relay);	
1750 cu. yds. remove and dispose of Port. cem. conc. in existing pavement and structures;	
2800 bbls. fuel oil (shoulders);	
9.3 miles new property fence;	
1.8 miles move and reset property fences;	
780 lin. ft. laminated timber guard rail;	
4120 lin. ft. move and reset guard rail;	
577 stations finish roadway;	
108 ea. monuments, complete in place.	
State will furnish corrugated metal pipe, spillway assemblies and cast steel frames and covers for drop inlets.	

SANTA BARBARA COUNTY, Cal.—As previously reported, bids will be received by State Highway Commission, December 17, to grade and pave with Portland cement concrete, 2.8 miles between Gaviota and 1 mile north of Las Cruces. Project involves:

9 acres clear and grub right of way;	
107,000 cu. yds. rdwy. excav. without class;	
255,000 sta. yds. overhaul;	
8350 cu. yds. struc. excav.;	
26,500 sq. yds. subgrade for pavement;	
6560 cu. yds. class A Portland cement concrete (pavement);	
1920 cu. yds. class A Portland cement concrete (structures);	
318,700 lbs. bar reinf. steel (pavement and structures);	
570 lin. ft. 18-in. corr. metal pipe;	
480 lin. ft. 24-in. do.;	
60 lin. ft. 30-in. do.;	
123 lin. ft. 48-in. do.;	
274 lin. ft. corr. metal pipe (clean and relay);	

2100 cu. yds. remove and dispose of concrete in existing pavement and structures;

70 cu. yds. cushion course;

2000 tons crusher run base;

160 cu. yds. rubble masonry (retaining wall);

5.7 miles new property fences;

8900 lin. ft. soil timber guard rail;

950 bbls. fuel oil (shoulders);

149 stations finish roadway;

94 ea. monuments, complete in place.

State will furnish corr. metal pipe.

BELMONT, San Mateo Co., Calif.—Construction of a pedestrian underpass at railroad tracks on O'Neill Ave. between Ralston Ave. and Harbor Blvd. was proposed by city council.

BELMONT, San Mateo Co., Cal.—Union Paving Co., Call Bldg., San Francisco, awarded contract at \$136,305 by city council to grade and pave Belle Monti tract in West Belmont.

D-3616—Representation. San Diego, Cal. Party familiar with eastern and middle west trade is interested in contacting local manufacturers looking toward acting as representative in that territory. 31

STATE MANUFACTURERS' AID IN EMPLOYMENT PLEDGED

The California Manufacturers' Association has announced full cooperation with the California State Chamber of Commerce in a business stabilization program as part of a plan to lessen unemployment and stimulate a demand for goods.

Essentials of the program outlined recently by the state chamber of commerce are: Modernize, maintain the fullest employment possible, merchandise aggressively and maintain normal buying.

Every manufacturer and mill owner of California will be appealed to by the two organizations. They are urged specifically to clean up shops, warehouses and stores, overhaul machinery, make necessary repairs and alterations. In industries where it is possible to consider rotation of workers on part-time rather than wholesale layoffs or shutdown.

CANNOT MAKE DELAYED COMPENSATION CLAIM

An injured employee who received compensation based upon the state compensation laws cannot obtain additional payment or damages unless the complaint is filed without undue delay, was the holding in *Murphy v. W. O. Cook Const. Co.*, 285 Pac. 604, says *The Constructor*.

The details are that a man named Murphy was employed as a laborer about a cement mixer operated by a construction company. A gust of wind blew some cement into his eyes which ruined the sight of the right eye within a few hours. Murphy was taken to the hospital where the eye was removed.

The construction company paid Murphy compensation for the loss of one eye based under the provisions of the state compensation laws. Four months later Murphy filed suit to recover damages for injury to his other eye. The court refused to allow additional damages, saying:

"If appellant (Murphy) had made a timely claim for compensation for injury to his left eye, and some award had been made therefor and not paid in full, it might very well be shown by lapse of time and subsequent developments that such award was insufficient and ought to be increased. But no such case is here. Moreover, in this case the award for the loss of the right eye, and for which compensation had been timely demanded, had been fully paid."

VERBAL AGREEMENT TO PAY ACCOUNT BINDING

Ordinarily, a promise to guarantee payment of a contractor's account must be in writing or it is not valid, says *The Constructor*. On the other hand, a verbal agreement to pay another person's account is enforceable. In the former case the one making the guarantee is not the debtor unless the contractor fails to pay, but in the latter instance he is the debtor from the beginning.

In *Harper Co. v. Teate*, 125 So. 21, a materialman furnished building material to a contractor. The owner verbally promised to pay the account. Later the owner argued that he was the contractor's surety and not liable because he did not positively guarantee to pay. The court held the owner liable, explaining, as follows:

"If a materialman, upon the request or by the authority of the owner, furnishes material to a contractor in reliance upon the promise of the owner, express or implied, to pay for it so that the owner becomes a primary debtor and not a mere surety, the materialman is entitled to a lien for the full amount of the debt."

LUMBERMEN'S CLUB ELECTS

At the annual meeting of the Orange County Lumbermen's Club at Fullerton the following directors were elected: J. Jahraus, Laguna Beach; Lumber Co., Laguna Beach; R. N. Nelson, Buena Park Lumber Co., Buena Park; D. E. Liggett, Liggett Lumber Co., Santa Ana; Henry Adams,

Adams-Bowers Lumber Co., Anaheim; Guy Tyler, Barr Lumber Co., Santa Ana; Glenn Merrill, Patten & Davies Lumber Co., Anaheim and Grey Skidmore, Skidmore & Bowers Lumber Co., Downey.

Recent publications of the American Rolling Mill Co., Middletown, Ohio, include a bulletin on suggested A.S.T.M. specifications for open-hearth plates and one describing the cooling and ventilating apparatus in the new Minneapolis Civic Auditorium.

"The Industrial Hose Handbook," a 78-page publication of the Electric Hose & Rubber Co., Wilmington, Del., describes the various types of hose now being manufactured and makes recommendations for proper selection in a large variety of industries.

Nearly 80 per cent of the total imports of oak lumber into the Union of South Africa during the first six months of this year were of American origin, states a report from Assistant Trade Commissioner DuWayne G. Clark at Johannesburg to the lumber division of the Department of Commerce. Indications earlier in the year pointed to the probability that Japanese oak was coming into this market in quantities which were approximately equal to those from the United States. However, during the first six-month period of this year American oak has thoroughly dominated the market. Total receipts of oak during this period were 3,522,000 board feet, of which 3,117,000 were from the United States and \$35,000 from Japan.

GRANFIELD, FARRAR AND CARLIN LOW ON MARIN COUNTY ROAD PROJECT

MARIN COUNTY, Cal.—As previously reported, Granfield, Farrar and Carlin, 67 Hoff Ave., San Francisco, at \$189,633 submitted low bid to State Highway Commission to grade and surface with bituminous macadam, 3 miles of state highway between Alto and Waldo in Marin County. Following is a complete list of unit bids:

- | | | |
|--|---|---|
| (1) 15 st. clear right of way; | (10) 30,850 lbs. bar reinf. steel, struc.; | (19) 4500 tons light riprap; |
| (2) 300,000 cu. yds. rdwy. excavation without class; | (11) 48 lin. ft. 15-in. corr. m'd pipe; | (20) 3.1 miles new property fence; |
| (3) 2,400,000 sta. yds. overhaul; | (12) 626 lin. ft. 18-in. do; | (21) 1222 lin. ft. laminated timber guard rail; |
| (4) 3980 cu. yds. strc. excav.; | (13) 70 lin. ft. 24-in. do; | (22) 241 timber guide posts; |
| (5) 18,900 tons crusher run base; | (14) 48 lin. ft. 30-in. do; | (23) 161 sta. finish roadway; |
| (6) 7500 tons broken stone (bitum. macadam surface); | (15) 2104 lin. ft. 8-in. perforated metal pipe underdrains; | (24) 71 each, monuments complete in place. |
| (7) 390 tons emulsified asphalt; | (16) 11,880 lin. ft. furnish untreated Douglas fir piles; | |
| (8) 495 bbls. light fuel oil; | (17) 188 each, drive Douglas fir piles; | |
| (9) 440 cu. yds. class A Port. cement concrete (struc.); | (18) 435 sq. ft. sheet piling; | |

The State will furnish corrugated metal pipe, cast steel frames and covers for drop inlets and flood gates.

- The bidders were:

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on December 17, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

San Luis Obispo County, between Paso Robles and the northerly boundary (V-S-L-O-2-A), about ten and nine-tenths (10.9) miles in length, to be graded and paved with asphalt concrete.

Santa Barbara County, between Gavita and one mile north of Las Cruces (V-S-B-2-E), about two and eight-tenths (2.8) miles in length, to be graded and paved with Portland cement concrete.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Re-

quirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

C. H. PURELL,

State Highway Engineer.

Dated November 19, 1930

Adjustment of production in the lumber industry to meet market requirements is one of the basic factors to be discussed by Colonel W. B. Greeley, Manager of the West Coast Lumbermen's Association of Seattle, and former Chief Forester of the United States, at the meeting of the Western Division of the United States Chamber of Commerce, at Portland, December 8 and 9.

"I have planned to outline some of the major economic problems of the lumber industry in western Oregon and Washington at the December meeting of the Western Division," states Greeley, "particularly the problem of carrying forty years' supply of raw material—on the tax rolls; the excessive productive capacity which has been created; the industrial necessity for a better adjustment of current production to market requirements; and the public aspects of this problem in relation to the conservation of natural resources and avoidance of waste."

Other business leaders in the lumber industry, writing to the United States Chamber of Commerce, make the following comments on the condition of the lumber industry which should be taken up at the Portland Conference:

"A rational adjustment of western lumber production to current demand.

"Wider markets for all lumber, particularly western lumber, through reduced transportation costs.

"Remedy to conditions including;

unrestrained competition; unscientific timber tax laws, standing timber being taxed annually instead of when cut, forcing holders into premature liquidation whether or not there is demand for the products; lack of proper control; inadequate tariff protection and foreign invasion of markets; the formation of regional lumber consolidations or mergers to assume leadership in manufacturing and sales policies."

Resolutions passed by the Cleveland, Ohio, Building Trades Employers' Association, recommending that contractors try for an even distribution of labor on construction jobs to relieve the unemployment situation, were read at the Santa Clara County Building Trades Council meeting in San Jose, last week by Secretary A. J. Rose.

The plan suggested in the resolution is that in use by the State Highway Department of rotating labor, putting one group of men to work three days a week and another group for the remaining three days. Special consideration would be given to former employees badly in need of work.

Bert P. Ward, secretary of the District Council of Carpenters, pointed out that in Seattle, steps have been taken to maintain the usual wage scale. Some contractors there have cut wages, Ward declared. They have as a consequence, been barred from working on all municipal jobs during the next two years.

Secretary-Manager Patterson of the Sacramento Builders' Exchange announces five new members in his organization: Games & Sawyer, heating specialists; Carpenter & Mendenhall, plumbing contractors; Davies Paint Shop of Stockton, painting contractors; C. E. Turner, electrical contractor and Howard A. Tyler (Northern California Materials Company), building materials.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic"
Storage Systems and "Lyon" Tank Water Heaters.

S. F. BUILDING DURING NOVEMBER TOTALS \$1,313,672

San Francisco building construction undertaken during the month of November, 1930, based on the valuation of building permits issued, involved an expenditure of \$1,313,672, according to John B. Leonard, superintendent of the Municipal Bureau of Building Inspection. During the month 441 permits were issued as compared with 560 permits for the corresponding month last year when the work undertaken involved an expenditure of \$2,437,796.

During the past eleven months, Leonard reports, 6,096 permits issued, the improvements costing \$20,434,606 as compared with 6,655 permits for work costing \$32,064,334 for the same period in 1929.

Following is a segregated report of the November, 1930, operations:

Class	No. of Permits	Est. Cost
A	2	\$ 250,000
E	2	51,000
C	4	126,900
Frames	118	536,725
Alterations	312	158,546
Public Bldgs.	2	81,501

Total.....	441	\$1,313,672

BUILDING-LOAN LAW CHANGE, AIM

"The division of building and loan supervision, in co-operation with the legislative committee of the Building and Loan League of California, is now working on proposed changes in the building and loan laws which experience has proved necessary and advisable to insure a more complete supervision and greater public safety," according to a report rendered to the department of investment at the November meeting of Governor Young's council, by Charles A. Whitmore, state building and loan commissioner.

"The tremendous growth of the building and loan business during the past few years emphasizes the necessity for laws which would create adequate machinery to enable the building and loan commissioner to fully protect and safeguard the investing public.

"There are several general points which will be taken into consideration in connection with any legislative plan, as our laws are very cumbersome and ambiguous in many respects. These confusing portions of the laws should be clarified so as to remove any doubt as to their meaning, and some definite additions to the laws should be made so as to give the commissioner broader and more discretionary powers of supervision."

Oregon Building Congress with headquarters in Portland is considering the preparation of a state building code.

C. H. PURCELL TO RETAIN HIGHWAY POST

C. H. PURCELL
State Highway Engineer

Governor-elect Rolph has announced that C. H. Purcell will be retained as state highway engineer under his administration.

Mr. Purcell was appointed to the post by Governor Young shortly after he was inducted into office and has served with signal ability.

He was secretary of the commission appointed by President Hoover and Governor Young to study the San Francisco bay bridge project and the preliminary engineering work in connection with it was carried out under his direction.

Because of his knowledge of the project a strong appeal for his retention was made by those interested in it.

Mr. Purcell came to the California state highway department from the U. S. Bureau of Public Roads, for which he was district engineer, with headquarters at Portland, Oregon.

Annual meeting of the California Retail Hardware & Implement Association will be held in San Francisco, February 17-19. It is announced by LeRoy Smith, 112 Market St., San Francisco, secretary of the association.

PROPOSED AMENDMENT REGULATES CONTRACTS ON S. F. PUBLIC WORKS

A proposal to amend the charter of the City and County of San Francisco, regulating contracts for public works, Article II, Chapter III, Section 1, last paragraph of said section, as published in the Labor Clarion, local labor journal, reads as follows:

Every contract for work to be performed within the State of California at the expense of the City and County or paid out of moneys deposited in the treasury, whether such work is to be done within or outside the limits of the City and County, and whether such work be done directly or under contract duly awarded, or indirectly by or under subcontract, partnership, day labor, station work, piece work, or any other arrangement whatsoever, must provide or be understood to provide and be subject to the following terms and conditions: (1) That in the performance of the contract and all work thereunder eight hours shall be the maximum hours of labor on any calendar day; (2) that all laborers, mechanics and other persons performing labor thereunder shall be paid not less than the rates of wages prevailing in private employments for comparable work, such prevailing rates of wages for each kind of labor required in the performance of the contract to be set out in the specifications before advertising for bids; and, and, and previously established by general ordinance of the Board of Supervisors, the prevailing rates of wages applicable to such contract work shall be determined by the office, board, commission or department having the right to award the contract, and such determination shall be based upon an examination of the wage rates which have been established by the joint action of employers and employees, or which have been accepted by both as standard wages; changes in the wage rates so established may be made from time to time, provided that no rates may be changed in any contract in course of execution or remaining uncompleted, except where the contract so provides or the parties so agree; (3) that any person performing labor in the execution of the contract shall be a citizen of the United States; (4) that all laborers and mechanics employed in the execution of the contract or other arrangements shall have been actual residents of the City and County for a period of one year immediately preceding the date of their engagement to perform labor thereunder, provided, however, that the authority awarding the contract may, upon application of the contractor, waive such residence qualification and issue a permit specifying the extent and terms of such

(Continued on page 32)

COOPERATION OF ARCHITECT WITH BUILDING INSPECTOR

(By Robert H. Orr, Architect, Los Angeles)

Of all laws enacted for the benefit of human welfare none are more important than the laws pertaining to health. Closely related to health, and upon which it largely depends, is sanitation. The handmaid of both is our housing and building laws and ordinances. Health, sanitation and housing affect every man, woman and child in all civilized countries. Let an epidemic occur, our buildings will be dynamited and razed, human bodies will be heaped in the streets and burned in order to stamp it out. We are engaged in a service which directly cooperates with the health departments in bringing about better living conditions and sanitation by erecting buildings. But we are not permitted to tear down the most miserable shack, it being deemed confiscation of property.

This state has wisely set up housing laws which aim to protect the health and happiness of its citizens. Health follows by reason of good wholesome living conditions, happiness follows by reason of health and pleasant surroundings. The state's housing laws are mandatory upon all those who build, and the enforcement of its provisions are left to the building inspectors of the municipalities. There is no court of appeal or arbitration, no near standards to which a near approach can be determined. It is a minimum provision to be exacted of all.

Counties Lack Building Laws

Under the state comes the next subdivision of our commonwealth, the counties. Most all counties are without building ordinances, except where there is a city and county government, and all are subject to those enacted by the state. Most all counties are well provided with sanitary laws, but are quite deficient in building laws. While no great harm has been done thus far, it seems quite unfair that the incorporated cities and towns are left with their city limits unprotected from the investor who may be able to shift or jeopardize the business center by erecting a tall building just beyond the city limits.

Much has been said about being "air-minded," which we apply to aeronautics, but we are confronted by another air-minded group. In cities each block tries to outdo its neighbor. Our municipalities, without height limits, try to outdo one another by erecting the tallest building. This has led to an intense discussion concerning the maximum height of buildings to be erected as a safe investment. How high can they be built without congesting the traffic of the street? To what height can buildings be erected within which modern fire-fighting apparatus may be able to cope with fire? With elevators that may offset and work in relays, they may be depended upon for any height. To those who have given intensive thought to the subject, the question seems to be to what height can buildings be erected and leave a factor of safety in the sustaining members?

Height Limit for Buildings

The builders of this generation are so air-minded that the maximum height has not yet been calculated. It will be greater as lighter materials are found. Plastering materials are now being used that weigh one-half of the usual lime and sand mix. Why load a building with sand when pumice stone will give the same binding results, with a material reduction in weight? It will be greater when new formulae are found for metals that

Address of Mr. Orr at the annual convention of the Pacific Coast Building Officials' Conference, Long Beach, Nov. 3, 1930. Mr. Orr is a member of the American Institute of Architects and chairman of the Los Angeles Building and Safety Commission.

will carry stresses far exceeding the standards now allowed for modulus of elasticity and rupture. Already announcements have been made of such metals for airplane use, and eventually they will be available for steel structures. With these air-minded builders and our civic borders unprotected, it does seem incredible that our county governments are without building ordinances, similar, if not identical, to those of the incorporated cities, regulating the construction of all classes of buildings and height limits, with adequate building codes or ordinances. Also provisions made for an inspector in every building subdivision, as fully qualified technically, as those within our municipal governments.

What does all of this have to do with co-operation between the architect and building inspector? Using the words, "architect" and "building inspector" in their widest sense, the architect may supervise his work or engage some one to do so; the building inspector may be the head of the department or one in any way having to do with the enforcement of building ordinances. Co-operation or combined effort applies to those who create by design, or those who oversee construction or those who engage in the application of building materials.

Structural Problems in Cities

It is to the cities that our thoughts are to turn as the inspiration and guide in structural matters. The larger the city the more exacting must be its relations between the architect and building inspector. Within the large cities are created the initiative in design and construction, marching hand in hand with science and invention. Ever-increasing problems are presented to meet the need of modern conditions. It may be a building with a large landing deck for airplane carriers; resilience of floors, take-off impulse accelerators, momentum arresters and cheval net protectors, limits beyond which no means has yet been devised for lighting and ventilating a vast enclosure. Or it may be a hangar far beyond the areas of now known buildings, subject to the most intense fire hazards by reason of an ever-present abundance of explosive fuel augmented by vaporized fuel for cleaning purposes. It may be a large steel building built with battle deck construction, the principle of construction employed in the great ocean liners which is coming into use for steel frame buildings. All of these will call for a new vision in building codes and ordinance compilers, and the execution of their technical provisions by the architect and building inspector.

Who will be the architect, and guarded in his relations to his client, if he will take the opportunity to consult the framers of the ordinances, or those most capable of interpreting its building provisions before seriously engaging in the preparation of plans. Codes or ordinances are minimum requirements and if a major plus, of course, more than one interpretation may be placed upon their meaning. For many years a building code that

limited the height of superstructure above a maximum limit height building was applied to each structural unit. A pent house could have a certain height, a sign structure could be so high, each measured from the same beginning point, until some enterprising architect placed one above the other and the ordinance could not prevent it; all of which led to a revision of the limit-height code.

Differences in Supervision

There is a marked difference between the supervision given to construction by the architect, and that by the building inspector responsible to the law. They have things in common, but by the very nature of their training they are different. They approach the problem with an entirely different thought in mind. The architect is concerned about the construction according to the plans and specifications. He will see that each opening is left in its proper place, that provisions are made for placing trim, that the proper run and rise are given to stairways and that there is sufficient head room for clearance. He will be interested in the esthetic values, the selection of materials, the joinery, the textures, the degree of smoothness, the carrying out of full-size details, profile of moldings, the harmony of colors, paneling, cabinets, the modeling of ornaments, the decorative motifs, number of coats of finish and many other things that do not interest the building inspector, except as they may affect the plans and specifications, which do not apply, so far as he is concerned, if they do not conform to the building ordinances.

From the very nature of his training the inspector will be on the alert for structural things. Has the ground been filled, has the proper load per square foot been allowed, have the reinforcing bars been properly placed, is the concrete aggregate of proper proportions, has the riveting of structural parts been well done, are timbers properly framed? After plastering, wiring, roughing in for plumbing fixtures, securing of roofing materials are thoroughly inspected, most of the rest is left to the architect's supervision. Hence the difference between supervision and inspection. Supervision will be planned and lay out in advance the things that are to be done, inspection will apply when they are about to be done or afterward.

Code Versus Architecture

The building codes do not regulate specifically those matters herein grouped for the architect, they do regulate those applying to the building inspector. So it does seem apparent that they are different-minded individuals. The architect is cautious about construction, yet wanting to create a pleasing effect, eager to satisfy the owner, seeking the beautiful. The building inspector, mindful of building regulations and laws, interpreting what the law does say, insisting upon the work being strong, safe, protecting the inhabitants, and keeping the weather out, may not be interested in whether the building will be warm or cold, not at all interested about its beauty, convenience or adaptability. And yet both are right. One is vested under the authority of a law as an individual licensed to practice a profession, the other is charged with the enforcement of the law and its provisions, with police power to stop and enforce—"it shall be unlawful."

Beauty is one of the most essential and enduring things about buildings. If you do not believe it, go abroad and see the wonders of the world in structures. The whole world is the house when one of these landmarks disappears. Comfort and convenience are essential. Who wants to live in an uncomfortable home or work in a poor office building? Who wants to be inconvenienced by a bad plan?

Opportunity for Co-operation

Here is such a wonderful opportunity for co-operation. The architect when in doubt about the provisions of the code consults the inspector; in doubt about legalized materials, consults the inspector. No architect should attempt to cover up, but should be frank and fair. Confidence once lost cannot be easily re-established. How about the plans? Have they been well prepared, details clearly shown, headroom around stairs properly laid out? No one can hold the inspector responsible if it is found on the final check-up that the toilets are one inch shy in width, stairways an inch or two short at the top, headroom insufficient, beams with impaired clearance for headroom. These are things the architect should guard against and for which he should be responsible. These are architectural features.

How about the plans the inspector checked and on which he issued a permit for construction? Were they plans or sketches? Could they be checked intelligently? Will they be understood by the field inspector? Will he be able to reconcile the plan to the construction? Has the owner been given a fair chance to get good value from the plans passed? Can any blame be properly placed for faulty construction? Has the owner any right to expect that the building inspector will protect his interest, when he does not take the precaution to supply definite plans? The owner has some rights, because he pays taxes that go to support the building inspector. Who ever heard of an owner lodging a demand that the building inspectors insist upon better construction?

When Co-operation Fails

It is a well-established fact, in building departments, that where the architect's supervision is dispensed with, the final check will develop innumerable things that have been overlooked. When both the architect and building inspector have co-operated upon a building, it is seldom that technical violations occur, and on the other hand many things are done that will work for the benefit of the building.

It is also observed that buildings built for investment are not as well built as others, although the laws and ordinances are the same. This is especially true about apartments. Note the apartment-house damage to the extent of from ten to twenty thousand dollars by the last earthquake that occurred in Southern California. It was not a severe earthquake. No damage of any consequence was reported upon other types of buildings. These are illustrations of non-co-operation. A poor set of plans and specifications, intended to allow cheap construction and an inspector hampered by every known trick to cover up poor construction, can prove a building which is a menace to life and limb.

Two Values on a Building

These should be two values placed upon a structure. A building with the services of the architect and inspector should be of greater value than one without it. Every financial institution should recognize this. The investor should acknowledge it. The purchaser of a home should consider it a mark of dependability. On no account should a lack of these virtues be placed upon the inspector alone when the architect's services are lacking. He cannot take the place of two

men of different technical values. Building departments should make it compulsory for an owner to pay an additional permit fee, when the architect is not required to supervise the work because it places an added burden upon the inspector. And in such a case additional inspection should be required of the department. The building inspector's work is made easier by a complete set of plans and specifications. Upon them is established basic grounds for co-operation. The architect has a feeling of security and satisfaction, when he knows the safety tests have been applied in the checking of plans and the field work has come under the scrutiny of technical men.

Co-operation then should mean the architect welcoming the technical advice that a building department has to offer, for it is to be expected that he is not versed in the knowledge obtained by the various building divisions, plumbing, electrical, heating, ventilating and mechanical equipment which they obtain and put into practice, the standards and requirements by national bureaus. Co-operation should place some established value upon plans and specifications. There cannot be co-operation, in its true sense, where there are open questions for controversy. As a rule, the outcome of a disputed question will be the acceptance of a standard which would be of least value to the building.

Co-operation of the architect and the building inspector will produce better buildings, a safer investment; buildings built in conformity with good practice, less fire hazards, more earthquake resistant and which will keep out the weather. It will have an immediate reaction, a satisfied owner. Such a building will be a real asset to the community and a monument for posterity.

No one can go about the country and insist upon better buildings in which they have co-operated. The architect derives a sense of satisfaction when he can point to some landmark that he has done; and the inspector can take just as much pride in a service which does so much good for a community.

Ten Points of Co-operation

In closing let me summarize ten points upon which we as architects and inspectors should co-operate:

(1) Insist upon a survey of the property. I have known inspectors to find, after the foundations are in and just as often after the building has been erected, that the courts and yards are not of legal dimensions, because the lot line was not established.

(2) The architect should consult the inspector about the salient points in the plan before making the working drawings.

(3) Check with the engineering department and ascertain the fill, if any, and determine the nature of the soil.

(4) File a complete set of plans with the building department. Some architects hold out detail sheets. These are necessary and should be filed.

(5) Do not begin work of any nature until a building permit has been issued and posted. Notify the inspector about all matters that require it.

The first five points have to do with matters before construction; let us consider five general rules for the period of construction.

(6) The architect should have a supervisor upon the work during the pouring of concrete. The inspector should check the placing of reinforcement and give general inspection to the aggregate. Special care should be given to the materials furnished for the superstructure, adhering to the standards established by the building department. Require certificates to be furnished for all registered materials.

(7) Do some measuring and leveling while the building is under construction. It is not sufficient to just look at things. Check the plan against the construction upon all points. Many technical violations occur by not allowing for the thickness of the plastering coat or the thickness of the subfloor in laying out stairways.

(8) Above all things, have confidence one in the other. If there is confidence, the architect can give his attention to the aesthetics, the finishing of materials, decorative and innumerable small details. The inspector can give his time to the technical matters—heating, ventilating, plumbing, electrical work and mechanical equipment.

(9) See that the jurisdiction held by other bureaus—health, sanitation, fire, police, state housing, industrial accident and fire underwriters—has been cleared.

(10) The final check should be made in the presence of the architect, his supervisor and the building inspector. A certification of completion, listing register deficiencies, a permanent record which may be obtainable when property is transferred. Such a procedure will protect the public and the investor.

TRANSVERSE BENDING LOADS ON CHANNEL BEAMS

The shapes of steel rolled I beams and channels have been designed with the main purpose of giving large resistance to bending in accordance with the simple flexure theory for beams; the torsional strength and stiffness of such sections are known to be relatively small. In order to develop the bending resistance of I beams and channels without permitting them to twist, it has been very generally assumed that transverse bending loads on these sections should be applied at the outside of the transverse cross-sections and parallel to the webs. In the case of I beams this assumption is correct, but when a channel is so loaded it twists appreciably as it bends.

Bulletin No. 211 of the Engineering Experiment Station of the University of Illinois contains the results of tests and of analyses to determine where the loads should be applied on steel rolled channels to produce bending without twisting, and also to determine the longitudinal stress in a channel beam if the channel is loaded so that twisting accompanies bending.

Six types of channels were tested, and each channel was tested as a horizontal cantilever beam with a vertical load applied at the end. The load consisted of a weight hung on the free end of the beam, the end of the beam being restrained so that the section remained practically plane. For each channel the angle of twist was measured at six or seven sections along the length of the beam (for each of several positions of the load, the load being applied at two or three points on each side of the back of the channel).

From the results thus obtained the position of the load that caused no twisting of the channel was easily found, and the location of the shear center for each channel section was thereby determined. Also, for each of several lateral positions of the load the strains along each of the four edges of the channels were measured at several sections along the beam, the strains being measured at several sections along the beam, the strains being measured over a 2 in. gage length. Thus the effect of the twisting of the channel on the longitudinal stresses at different sections along the beam was determined.

Copies of Bulletin No. 211 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

THE OBSERVER

What He Hears and Sees on His Rounds

A proposal to build a bridge across San Francisco Bay will be discussed by an engineer of the State Highway Commission before the Board of Directors of the Sacramento Chamber of Commerce, December 22. Consideration of the matter follows a suggestion made that the chamber endorse the project.

The American Chemical Society urges every American industrial engineer in Soviet Russia to withdraw from that country at once "for their own personal safety and as a protest of world science against communistic tyranny." Declaring the 5-year industrialization plan doomed to failure, the society warned that the blame will be placed upon American technical experts.

A \$250,000,000 building program for the Methodist Episcopal Church in the United States to help the employment situation is recommended to the Board of Home Missions and Church Extension by the Rev. E. M. Conover, director of the board's bureau of architecture.

"Ninety-five per cent of the 25,347 Methodist church buildings in the United States need to be replaced, remodeled or enlarged," his report said. "The value of the present buildings is \$439,950,000 and within the next five years \$250,000,000 should be expended for more adequate buildings and inside equipment. Even this would not begin to bring the physical equipment up to par with the public school equipment."

Application has been filed with the Federal Power Commission by the East Bay Municipal Utility District for a preliminary survey for power units on the Mokelumne river near Mokelumne Hill and Jackson, Alameda County. The district seeks to increase its power supply for distribution in Oakland, Berkeley, Alameda, Piedmont, Emeryville, San Leandro, Albany, Richmond and El Cerrito. The cost of preliminary work was estimated at \$164,000.

Los Angeles lead Pacific Coast cities in building operations for the month of November, issuing 2148 permits for improvements representing an investment of \$4,784,444. Seattle ranked second with 456 permits for work costing \$3,024,675. San Francisco took third place with 441 permits for improvements valued at \$1,313,672. Portland next with 412 permits carrying a total of \$391,360. Oakland reported 244 permits for work costing \$366,616.

A building code for Orange county is the aim of the county planning commission. A tentative draft of an ordinance has been submitted to the commission by one of the members, Jules W. Markel, general contractor of Santa Ana. It is proposed to embody in the code provisions regulating plumbing and electric wiring and standards of construction; also permitting set-back lines and restrictions that will eliminate signs from the public highways. Co-operation of the Orange County Builders' Exchange and various civic groups will be sought in perfecting the code before it is submitted to the board of county supervisors for their consideration.

The Milwaukee electricians' union is going to underwrite the skill of its members. It has just entered into an unusual trade agreement with the local electrical contractors and dealers association that binds it to protect employers against faulty workmanship, enables them to guarantee customers that every union employee measures up to the qualifications called for by his grading.

Three grades of workers are provided for in the agreement: highly skilled men at \$1.25 an hour; less skilled ones of limited experience at \$7c an hour; helpers at lower wages to be increased from year to year until they qualify for the second grade.

Faulty workmanship will be charged directly to the union member responsible for it. Union members who fail in practical tests for their indicated grades will be demoted, must go to school. Electricians' classes have been started at the Boys' Technical High School in Milwaukee.

Hope for solution of the unemployment problem lies largely with the country's engineers, Col. Arthur Woods, chairman of the president's committee on employment, told the American Society of Mechanical Engineers meeting in New York Dec. 1.

"If the engineers of America could supply the same degree of trained intelligence to the problem of stabilization of industry as they have in the past to its expansion, we should march a long way toward regularization of employment," said Colonel Woods.

He urged engineers make a study of methods already in operation to stabilize employment and prevent another crisis in the future.

The society responded to his appeal by voting to undertake a nation-wide investigation into means adopted throughout the country to stabilize employment. Committees in each of the society's 71 local sections in every principal industrial area of the country will conduct the inquiry, under supervision of a central committee.

Lawrence W. Wallace of Washington, executive secretary of the American engineering council, sponsored adoption of the resolution of the society.

A school teacher in New Orleans, the Postmaster of Tom's River, N. J., a cabinet maker in Chicago, a tailor in White Plains, and a dentist in Tuckahoe, N. Y., have made profits running as high as fifty per cent on the money they invested in the land, says the National Association of Real Estate Boards in the ninety-fourth of its series of articles for the public. It doesn't all go into the stock market, and these little romances of tiny fortunes that may have never been made in any other way, may encourage others to invest in the land. The stories are true. The Realty Association has documents on each case in their files. They are just accounts of plain realty deals made by plain people, and there aren't four figures in any of them.

Charles R. Gurney, secretary of the East Bay Building Trades Council has complained to the Alameda county supervisors that county labor is not being exclusively employed by con-

tractors holding county contracts for construction work at the Fairmount and Highland Hospitals. He charged that in some instances local sub-bidders, particularly tile contractors, were not given the opportunity to bid by the contractors.

Industrial activity in electrical manufacturing is 28% below the level of last year at the same time, reports from individual concerns to Electrical World reveal. October ran 6.3% below September. But electrical manufacturing has held much closer to the 1929 record than has industry in general. For the first 10 months of this year the decrease was under 3%, whereas the weighted average for all industry dropped 15%. Compared with 1928, the 10 months showed an increase of 24%. Even October, lowest month thus far in 1930, was 2.5% ahead of October, 1928.

The San Francisco Building Trades Council has been advised that in order to safeguard wage standards, New York City's emergency employment committee has decided to give workers three days' employment at \$5 per day instead of five days at \$3 per day. The change was made at the suggestion of leaders of organized labor. The committee is attempting to raise \$5,000,000, and hopes to provide jobs for 20,000 unemployment by January 1.

John P. Irish, member of the Oakland civil service board, urges a city bond issue to finance improvements to relieve unemployment. Stating that the main plan for creating employment and at the same time securing needed improvements was a bond proposal for at least \$3,000,000, Irish declared that he advocates the proposition, Irish said:

"Why beat around the bush? The city must provide work for its unemployed citizens and the big way to accomplish this is by means of a bond issue."

Gene Bradbury, secretary of the Long Beach Builders' Exchange, says "Watch Your Step" in his weekly bulletin.

"All sub-contractors, material and supply firms are warned to watch their step in entering into contracts with an Owner and Builder. It is almost impossible to stick them under the State Contractors' License Law (until it is amended) because of the fact that you cannot prove a diversion of funds or fraud as they are both owner and contractor. About the only recourse is a lien (and in these cases there is nothing to lien) or a Civil Suit and generally speaking this expense is not warranted."

Sears, Roebuck & Co. have found it impracticable to try to sell homes "out of a catalog" and are scrapping their mail order plan in favor of personal sales promotion, according to the American Lumberman. This statement was made by Lowell G. Collins, manager of the company's local modern homes division office, in a talk at the sales promotion department of the Advertising Club of St. Louis. Mr. Collins gave an interesting insight into some of the company's experiences in the home building field, which he described as a "vast, undeveloped opportunity," and told some of the things the company plans to do.

The city council of Portland, Ore., is urged to take whatever steps possible to prevail upon property owners to stop evictions of families who are unable to pay their rents. The council is informed that within the past twenty days 28 families have been evicted for non-payment of rent, according to records at the constable's office.

On January 1 a new billboard law will go into effect in New Jersey, the object being to reduce the hazards of the street and road and preserve the scenic view. Billboards will be subject to strict regulation, all requiring permits from the state vehicle department. If they obscure the view and make driving dangerous, permits will not be issued. They will also be denied if the billboard obscures a "fine bit of scenery." Most billboards will be taxed 3 cents per square foot. For rent and for sale signs must be under two square feet in size, but when erected on the premises advertised are not subject to tax.

Discussing proposed lien law legislation at the recent state meeting of retail lumbermen Attorney Glen Behymer of Los Angeles said a recommendation would be made to amend Section 1184 of the lien law so that the owner of a private as well as a public building must withhold money instead of having the privilege of doing so at will; also that money lenders would be obliged to withhold money for labor and material. He declared these provisions were needed to enable subcontractors and material men to protect themselves by filing stop notices. Mr. Behymer also said the legislature would be asked to give municipal courts concurrent jurisdiction with superior courts in the same county in foreclosure of mechanics' liens.

Inauguration of a proposed five-day working week for city employees is receiving the official consideration of the Los Angeles city council. A resolution urging such an ordinance has been submitted. Councilman Thomas W. Williams introduced and argued for the resolution. "The problem of unemployment is world-wide," he said, "simply because of society's failure to make social readjustments to industrial and economic evolution. The only scientific solution is to shorten the hours of labor so that all persons may be gainfully employed."

A thorough investigation of work on the erection of new school buildings for the San Jose department of education is under way as the result of protests which have flooded the office of the city superintendent of schools to the effect that contractors were lowering wage scales and were hiring outside labor.

Superintendent Walter L. Bachrodt referred the matter to the district attorney's office for investigation.

There is a clause in each contract for school construction which stipulates that "whenever possible preference shall be given to San Jose labor."

The secretary of the board of education is said to have received complaints from various sources that wage scales of carpenters and other building trades mechanics at work on school buildings had been lowered below the regular scale. This matter is also being investigated.

In the face of complaints that outside contractors have brought with them outside laborers to work on the buildings, Superintendent Bachrodt

William Nuckles Doak has been appointed secretary of labor to succeed James J. Davis. It is announced by President Herbert Hoover, the President, in making the announcement, said Doak had been identified with the labor movement practically all his adult life and that he had been a general officer of the Brotherhood of Railway Trainmen for sixteen years. He added his appointment had been endorsed by a score of labor unions, some of them being affiliated with the American Federation of Labor.

TRADE NOTES

C. S. Maltby Magnesite Co., Ltd., capitalized for \$3,000 has filed articles of incorporation in San Francisco. Directors are Mabel P. Maltby, Katharine Percy and H. W. Erskine.

According to newspaper dispatches from New York, the Long Bell Lumber Company and subsidiaries for the quarter ended September 30 reported net loss of \$688,689, against net loss of \$69 in the third quarter last year.

H. C. Lovett Spraying Painting Co., Ltd., capitalized for \$1,000,000, has filed articles of incorporation in Oakland. Directors are H. C. Lovett, 1710 Everette St., Alameda; J. N. Noonan, 3217 Central Ave., Alameda and J. A. Killian, 1674 Lower Grand Ave., Alameda.

Al Loudor, for the past four years manager of the Sausalito Hardware & Plumbing Company, has purchased the business of the Marin Hardware Company from Carl Lundquist. The latter proposes to enter the insurance business.

Standard Lumber Company has filed a petition in the Superior Court at Sonoma, seeking dissolution of the corporation. The board of directors, according to the petition, is composed of George R. Hicks, Jesse Andrew, T. M. Barham, P. H. Neyhart and J. C. Rassenfoss.

H. Fowler and P. E. Meyers of San Fernando have purchased a site on a railroad frontage in King City, Monterey County, and will establish a plant for the manufacture of concrete pipe. The plant will be managed by J. R. Clarke who is now in King City arranging building preparations.

Chalm Belt Co., Milwaukee, Wis., has announced the following elections and appointments: C. F. Messenger, vice-president and general manager; Brinton Welser, vice-president and director; A. R. Abelt, secretary; H. S. Greene, general sales manager; W. H. Brandt, assistant to the president.

American Cast Iron Pipe Company, Birmingham, Ala., is completing a new shop at Acipco for the production of mono-cast centrifugal pipe in the larger sizes, from 14 to 24 in., inclusive. The pipe will be of the bell-and-spigot type, with a bead cast on the spigot end, and will be produced in 16-ft. lengths. The new shop will have a potential capacity of 200 tons of pipe per shift, and is so designed that it can be operated 24 hours per day.

A mammoth steel merger was consummated in Detroit, Mich., Nov. 25 when the National Steel Corporation took over the assets and property of the \$30,000,000 Michigan Steel Company. Details of the combine have not been worked out, but the merger is expected to be effected through exchange of stock. The Michigan concern has an annual capacity of 725,000 tons of ingots. The National corporation is a \$120,828,758 holding company.

HERE—THERE EVERYWHERE

American Society of Agricultural Engineers, (Land Reclamation Division), will hold its annual meeting in San Francisco, January 6-7.

In keeping with the trend of the times, the Central Labor Council offices at Portland, Ore., will be closed on Saturday. Practically all of the business offices in the Labor Temple now observe the Saturday closing.

The next Conference of Southern California Builders' Exchanges will be held in Pasadena some time this month, the date to be announced later. It is announced by Secretary George W. Israel of the Pasadena Exchange.

A tour from San Antonio to Mexico City, under the management of the American Express Company, will be a feature of the annual convention of the National Association of Builders' Exchanges, to be held in San Antonio, Texas, in February.

Permission to invest \$30,000,000 in the construction of two paper pulp plants in Alaska has been granted by the Federal Power Commission to I. and D. Zellerbach and George Cameron, all of San Francisco. Combined production will be 365,000 tons of news print annually.

The Santa Rosa Builders' Exchange recently organized with a membership of fifty, will meet December 10 in the Occidental Hotel, that city, when a constitution and by-laws will be adopted. A banquet will precede the meeting.

The Oakland city council has approved an amendment to the plumbing ordinance as recommended by Commissioner Frank Colbourn permitting master plumbers to receive a refund on license fee deposits after all money owed the city is paid. The ordinance previously prevented the master plumbers from getting refunds.

Preliminary preparations are being made for the annual convention of the California State Building Trades Council to be held in Oakland next March. The Hotel Oakland has been selected as the convention headquarters.

Annual convention of the California Certified Boiler and Elevator Inspectors will be held in San Francisco—January 6, 7, 8. John J. Kane, boiler inspector with the San Francisco Board of Public Works, is in charge of arrangements for the meeting.

Organization of a builders' exchange, operating under the name of the Builders' Business Bureau, with headquarters at 532 Emerson street, Palo Alto, is announced by E. P. Lincoln, manager of the bureau. A feature of the exchange quarters is a general reading room for members of the organization. Manufacturers of building materials and equipment are requested to forward catalogs and general information on their products where they will be filed for the convenience of contractors and subcontractors.

TRADE LITERATURE

Rolling steel doors manufactured by the R. C. Mahon & Co., Detroit, Mich., are described in a 36 page illustrated catalog of the company.

Tapping machine cutters and pipe cutters of various types are described in an 8 page bulletin of the Water Works Equipment Co., 50 Church St., New York City.

The advantages of green surfacing on electrodes for metallic arc welding are discussed in a bulletin of the Fusion Welding Corp., Chicago, Ill.

A new catalog of belting, packing, hose, matting and miscellaneous items manufactured by the Diamond Rubber Co., Inc., of Akron, Ohio, has just been issued.

"The Welder's Handbook," a 32 page illustrated bulletin issued by the American Steel & Wire Co., Chicago, and New York City, is a useful manual of welding practice, using either gas or electric current.

"Design and Control of Haydite Concrete Mixtures" is the title of an 8-page illustrated booklet of the Hydraulic-Press Brick Co., St. Louis, Mo. As the title indicates, the bulletin contains suggestions for securing more satisfactory results with Haydite lightweight concrete.

"Ventilating the General Science Building of Antioch College" is the title of an 8-page illustrated Armo Architectural Bulletin No. 3 issued by the American Rolling Mill Co., Middletown, Ohio.

Form clamps and spacers, bar spacers, bolsters and chairs, screen chairs, sleeper anchors, and a multitude of other accessories for concrete construction are described in catalog 490, a 56-page illustrated publication of the Universal Form Clamp Co., 972 Montana St., Chicago, Ill.

Publications of the Link-Belt Co., 910 S Michigan Ave., Chicago, Ill., include a folder describing the Cub portable belt conveyor and a 32-page comprehensive data book on Promal chains for power transmission and conveying services. Dimensions, strengths, list prices and weights are given in this data book.

Mechanical principles involved in the operation of the gas plus air 3-engine gasoline excavator are clearly set forth in a 16-page illustrated bulletin of the Bucyrus-Erie Co., South Milwaukee, Wis. Other recent publications of this company include bulletins on the models 120-B and 160-B, 4 and 3 cu. yd. electric or steam revolving shovels and the models 1030 (¾-cu. yd.) and 1020 (½-cu. yd.) convertible shovels, draglines, drag shovels, and cranes.

OVERTIME REQUEST DEFERRED BY CONTRACTORS

The Cement Contractors' Association of Southern California at their regular meeting November 20 decided not to take any action at this time on the new proposal of the Cement Finishers' Union for time and a half pay for work on Sundays and holidays and for overtime. Several contractors reported the union workers were not all in accord on the new proposal and would take a final vote on it shortly.

ALONG THE LINE

Bert B. Meek, who recently resigned as State Director of Public Works, is reported to have accepted the presidency of California Lands, Inc., with headquarters in San Francisco, at a annini or Bank of America corporation, holding company that supervises salary of \$30,000 a year. California Lands, Inc., is a \$2,000,000 A. P. G. the operation of farm and fruit lands owned by the Giannini interests.

Earl Lee Keny, prominent business man of Redding and a member of the Republican State Central Committee's executive committee, has been named a member of the State Highway Commission by Governor-elect James Rolph. Kelly will succeed Ralph Bull of Eureka.

W. R. Balsinger, 64, assistant to the president of the Carnegie Steel Company and engaged with the steel company for more than a half a century, died in Pittsburgh, Pa., November 27.

Andrew Bowman, 65, former owner of the Bowman Hardware Company of Sacramento, died in that city November 22. Bowman retired from active business about a year ago and had been identified with the hardware business for twenty years.

Paul E. Overend, Sacramento, Northern California field representative of the California Retail Lumbermen's Association, has been appointed state counsellor for California of the Order of Hoo Hoo.

Four San Francisco directors of the Golden Gate Bridge and Highway District, whose terms had expired, have been re-appointed by the Board of Supervisors. They were William P. Elmer, Carl W. Henry, Supervisor William F. Stanton and Congressman Richard J. Welch. Each was appointed to a four-year term.

The city council of Palo Alto has requested the Board of Public Works to employ local labor on public works of the city insofar as is legally possible. The action was taken as a temporary measure while proposed ordinances regulating employment to local labor are being considered. The proposed ordinances were submitted by local interests.

REDWOOD CITY BUILDING PERMIT TOTALS

I. C. Drathman, city building inspector of Redwood City, announces the issuance of 19 building permits during the month of November, 1930, for improvements involving an expenditure of \$32,715. Following is the record for the past eleven months:

Month	Permits	Value
November	19	\$ 32,715
October	38	47,670
September	37	116,730
August	30	87,350
July	20	117,390
June	25	55,330
May	26	54,280
April	29	35,245
March	30	60,575
February	31	115,492
January	29	76,090

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1884).

R-3423-S CIVIL ENGINEER, technical graduate, 30-35 years old, thoroughly experienced on design of steel and concrete girders, trusses, foundations, etc. Salary \$300-\$350 month depending upon experience. Preference will be given to a resident of San Francisco.

R-3418-S MECHANICAL DRAFTSMAN and designer, familiar with wet and dry magnetic iron concentration plants. Salary open. Location, Ohio.

R-3424-S CHEMIST, technical graduate, preferably with advanced degree, to review French and German technical literature in connection with patent causes. Permanent. Salary open. Location, Bay Region.

K-312-W-1462-C-S MECH A N I C A L ENGINEER, with good technical education, experienced in a variety of industrial safety problems, also in organization and public relations work. Apply only by letter. Salary, \$8000 a year. Location, New York and some travelling.

W-499-C-S CIVIL ENGINEER, graduate, with experience in the design and construction of sewers and water works to purchase an interest in an engineering business. Some experience in electrical engineering desirable. Apply only by letter. Location, Kansas City.

K-325-W-1919-S ENGINEER, who has designed heat exchangers including calculations. Oil refinery experience is essential. An engineer who has been with the Braun Corp. would have the experience. Salary, \$6000 a year, perhaps more. Location, vicinity of New York City.

K-327-W-1946-C-S CONSULTING CIVIL ENGINEER, to supervise structural design and construction of steel plant and advise on decision of all questions arising in design of buildings. Apply by letter. Location, United States. Headquarters, New York City.

CONSTRUCTION CENSUS WILL AID INDUSTRY

Construction statistics compiled as a result of the 1920 census of manufacturing and distribution will be available for the bay district early next year, W. O. Ash, district manager of the United States Bureau of Foreign and Domestic Commerce, announces. He said this will be the first complete statistical information on the construction industry, second in importance in America, and the census tabulations will be a handbook of the existing absolute and potential markets available in the building and improvement field.

Ash announces: "Through a careful study of the statistics covering the activities of the construction group, the manufacturer of building materials will be in a position to determine the best sales area for his particular product. Similarly, wholesaler and retailer will be informed."

A. T. Pratt, 54, former engineer for the California State Highway Commission, died suddenly in a Sacramento hospital, last Sunday. He was a native of Indiana.

STABLE, DURABLE AND ECONOMICAL BUILDINGS IS PLAN OF STATE DEPARTMENT

(By D. C. Willett, Associate Structural Engineer,
State Division of Architecture)

In the design of a building, the first and foremost factor is utility, that is, designing the building for the purpose for which it is to be used. Another very important factor is the esthetic. These two are products of the architect. The mechanical comforts of the building are supplied by the mechanical and electrical engineer. Stability and durability are dependent upon the structural engineer, and upon the economy with which these are obtained, his efficiency is determined. In the past, mathematics played but little part in design. What had been found by experience to be safe practice was handed down from one generation to the next. Progress through trial and error from one innovation to the next was necessarily slow; but scientific research has developed more or less accurate data on the properties of material, so that with our mathematical knowledge and skill the design of a structure is now an almost exact science, which takes into account all of the stresses to which the building may subsequently be subjected.

Approximately \$4,000,000 per year has been allotted to provide for the new buildings required by California's some sixty institutions. Between 40 and 50 per cent of this amount is spent in assuring the structural stability of the buildings.

The architect provides the structural engineer with plans and elevations of the proposed building, and providing for the structural stability of the building, the engineer attacks his problem in the reverse. The builder starts from the foundation, while the engineer begins from the roof and works down, providing for the loads as they accumulate from the roof and floor.

The first problem is: What are the requirements laid down by the architect? Knowing these, what is the most economical material to use that will give the stability and durability required? Determined upon the materials, the engineer first provides for the actual load of the materials, known as dead load, a constant load that must be carried. To this he adds the varied loads that are immediately applied, such as wind, snow and other applied loads, known as live loads. The next and important problem is: What is the deflection of themissible sag allowed in the various structural members?

Knowing the load and the permissible deflection, size of the structural members can be obtained. The limitation of deflection, and not the loads, determines the size of a structural member in many cases. In this way, the size of each structural member of the building is determined until the footings are reached. Knowing the loads from the structure above, and by predetermining the bearing value of the soil on which the building is placed, the size of the footings is determined. In designing a foundation, it is important that the loads be equally distributed over the entire area so that unequal settlement will not occur to crack the building.

Not only is it important that the most economical material be used, but the most economical layout and use of materials must be had. An engineer may be able to design and properly provide for the superimposed loads that are to be carried, and at the same time be far from an efficient engineer. To this the state is

always on its guard. There are many ways in which the structure can be framed, but some are more economical than others. An economical design should also be a balanced design; that is, a design in which the strength of the various units is equal, considering the loads carried. A chain is no stronger than its weakest link. So it is with a structure. In other words, it is a waste to design or build one unit stronger than necessary or twice as strong as another carrying corresponding loads.

Structural Materials

The many structural materials now used can be classed in four general groups, which are, timber, masonry, steel and concrete.

In the determination of the material that will be used in any building, consideration is given to the relative merits and demerits of the various materials; namely, the material of first reference to the use to which the building is to be put and any peculiar condition that may characterize the site. It is these conditions that determine the real cost of the material, and the economy of its use. Without entering into the discussion of the relative strength or weakness of these materials, it might be well to add a word relative to concrete.

Concrete

Concrete differs from most of the other structural materials in that it must be manufactured at the job. Reinforced concrete has become a universal material in construction and is proving a very durable one even with the careless methods of construction. From a financial standpoint, speed is of prime importance to construction; but this demand for speed and time saving has resulted in careless working methods, thus reducing the strength of concrete. Physical characteristics of concrete are determined not only by the quality of the several materials which enter into it, but perhaps to a greater degree by the proportions in which the materials are mixed; for the proper proportioning of fine and coarse aggregates may double the strength. It is a matter of common experience that the old method of arbitrary selection in which fixed quantities of fine and coarse aggregates were used. As regards to the size and grading of the individual materials, is far from satisfactory. Not only is it essential that the aggregates be properly graded and proportioned, but the proper amount of mixing water must be used. Tests have shown that an increase of 23 per cent in the mixing water caused the same reduction in strength as if 33 per cent of the cement is omitted.

The aggregates, which form about 85 per cent of the structural material of a concrete building, are in cases obtained at or near the institutions. This tends to a greater economy of concrete.

The proper placement of the reinforcing in the concrete is another very important feature in concrete construction. Allowing the reinforcement of the average floor slab to be dropped one-half inch from the top surface shown is equivalent to a reduction in the strength of the slab of approximately 30 per cent.

By the proper selection of the structural materials, the economical use of these materials, providing properly for the loads to be carried and by proper and intelligent inspection, eliminating

the reliance on construction in the state provided with stable, durable and economical buildings.

METAL CONGRESS CONVENES HERE IN FEBRUARY

Announced for the second time in the West the National Western Metal Congress and Metal and Machinery Exposition will be held February 16 to 20 in the Civic Auditorium, San Francisco.

Headquarters have been opened in the auditorium building, where W. H. Eisenman, of Cleveland, secretary of the American Society of Steel Treating, is making arrangements for the affair, which will be a treatise on everything pertaining to metals and machinery.

Thirteen prominent technical engineering societies, as follows, are co-operating in preparation of special session programs, calculated to bring much new technical information before the delegates and others in attendance.

American Chemical Society, American Institute of Electrical Engineers, American Institute of Mining and Metallurgical Engineers, American Society for Steel Treating, American Welding Society, National Purchasing Agents' Association, Institute of Metals, Pacific Coast Electrical Association, Pacific Coast Gas Association, Society of Automotive Engineers, American Society for Testing Materials, National Association of Power Engineers and American Society of Mechanical Engineers.

Probably 5000 industrial heads, technical engineers and metallurgists will attend the congress, and twelve times that many are expected at the exhibition. Held two years ago at Los Angeles, the event was a decided success. The San Francisco meeting is expected to be a bigger one.

UNEMPLOYMENT IS REFLECTED IN STATE STATISTICS

Will J. French, director of the department of industrial relations, has advised Governor C. C. Young that the state free employment agencies found jobs for 12,252 men and women in October, compared with 15,114 in October, 1929. This is a decrease of 32.5 per cent. It was an increase of sixty-one over September this year, however.

The total weekly payrolls for 810 representative California industries were \$479,911 less in October than in September. The number employed in these 810 factories was 149,301 in October, a decrease of 19,163 or 11.4 per cent below September.

The total weekly payrolls of these industries in October was \$4,361,204, compared with \$4,723,195 in October, 1929, a decrease of \$1,361,991, or 23.8 per cent. In October, 1929, these same industries had 183,798 employees, 34,297 more than for last month, making the decrease 18.7 per cent.

The division of labor statistics and law enforcement collected \$97,663 in delinquent wages last month as compared with \$96,307 in October, 1929.

Building permits issued in November by A. J. Hurley, city building inspector of Richmond, involve an expenditure of \$41,322 as compared with \$28,550 for the corresponding period last year. Last month five permits were granted for homes costing \$16,200 and for two business structures costing \$12,000.

W. R. Dunn, San Francisco attorney, has been appointed counsel for the Pacific Gas and Electric Company. He will maintain headquarters in San Francisco.

QUANTITY SURVEYOR'S STATUS WITH RELATION TO THE OWNER

(By Ralf Toensfeld, Manager, G. E. Wells Co., St. Louis, Mo.)

Paper submitted at the 1930 convention of the American Institute of Quantity Surveyors.

The "Quantity Surveyor's Status in Relation to the Owner" is today not all that might be desired. This relationship should be one of a very confidential nature, one that would lend itself to implicit faith in each other's integrity. The "Quantity Surveyor's Status in Relation to the Owner" should be on a par with that of the owner's attorney, his architect, and his engineer.

Unfortunately, this is frequently not the case, and I believe it is primarily because the quantity surveyor is too often employed by the contractor instead of by the owner. While the surveyor may be just as conscientious of the owner's interest in his dealings with his clients, the very fact that he is employed by the contractor makes him a part of the contractor's organization in the eyes of the owner.

Obviously the owner believes that a member of a contractor's organization cannot be impartial in matters involving the interest of the contractor as opposed to that of the owner. The owner naturally therefore looks on the surveyor, in instances of this kind, with more or less suspicion and probably in some cases rightfully so.

Serve Clients' Interest

The Quantity Surveyor, like any other professional man, must serve his client to his client's best interest. Is it therefore, reasonable to expect that he should resolve any doubts in his mind in favor of his client when he is employed by the contractor? In any controversy that may arise must he not side with the contractor as far as his conscience will permit? Why then should not the owner look upon him with suspicion even though he may be absolutely honest and conscientious in his findings?

The quantity surveyor is frequently retained by one or more contractors for the reason that he is more accurate and that he can do the work more cheaply than the contractor's own organization. It is therefore quite logical that the quantity surveyor serve in this capacity. Any owner can see the reason for such employment, and can visualize the savings made by the contractor with such arrangement. The owner, however, when he gets his figure, is unable to ascertain that he himself has gained through this employment. He is almost invariably certain that the economies effected are not even partially passed on to him. As a matter of fact, figures based on a conscientious, thorough survey of quantities, as done by a quantity surveyor are frequently higher in competitive bidding than those made up on a more or less slip shod basis.

Low Bidder Sacrifices

If the owner finds that out, the quantity surveyor's "Goose is Cooked" regardless of the fact that the high bid may be a far more legitimate price than the low bid. He does not find out until a long while afterward that the low bidder has left out something, or estimated some of the many quantities that must go into the job too low, hence he must skimp later on to make up for his short coming in the estimate.

There is at the present time, a growing tendency for the formation of contractor's associations whose objects among other things are, the reductions of costs to the contractor. Usually the first step after the for-

mation of such an association is the organization of an estimating bureau. This bureau is organized to do nothing but quantity surveying and to furnish these quantities to all the interested contractors in the association. Probably this form of quantity surveying is the most objectionable form to the owner. Even if it is done conscientiously, as it is no doubt done in most instances, it is done from the viewpoint of the contractor and not the owner.

These bureaus are organized for the protection of the contractor. In order to protect the contractor it is necessary that the quantities taken off must be sufficiently high to assure their adequacy for the installation. Now then, in this scheme of things, all contractors are furnished the same quantities for the same installations. No contractor, therefore, can enjoy an advantage in bidding because he estimated more closely than the others. No contractor will get a job because he forgot something. What incentive is there then for the estimating bureau for accuracy? So long as quantities are sufficiently large the contractors interested have been protected. If quantities are too high and the material actually installed is less than estimated the contractor's interest has even been improved since his profits increase.

A central estimating bureau of this kind, when supported by the contractors, must necessarily be run on a minimum outlay. It follows that it must be very busy and that it must do its work as quickly as possible. Wouldn't the tendency under such conditions be to gamble a bit at times, of course, on the safe side, instead of doing the painstaking duty necessary for accuracy? I think it would and I believe you think so too. It is no wonder that the prospective building owner looks upon these practices with some misgiving.

There is another practice that may lead to insidious results and that is the inclusion of the labor union influence in the control of estimating bureaus.

Labor unions are an excellent accomplishment, I think we are all agreed to that. They have been and are now indispensable in bettering the condition of skilled labor and maintaining the higher level. But they do not belong in the contracting business, nor should their influence be felt in Quantity Surveying.

Some bureaus now make it a practice to include labor hours in the quantities they furnish the contractors. You can easily imagine what would happen were the labor influence allowed this feature of the survey. And if this item were to get into the hands of the workmen themselves, any liberality in the estimates would not even redound to the advantage of the contractor.

No, gentlemen, this is not the way out. Every one should get a square deal, including the owner. He must get what he pays for, no more, and no less; the contractor must be paid for what he gives, no more and no less; the laborer must receive an equitable wage for a good day's work, no more and no less; if the building industry is to survive.

Surveyor Employer of Owner

The way out is to place the quantity surveyor upon the same plane as the architect and the engineers; make him an employer of the owner. Let him work direct for the owner in conjunction with the architect and en-

gineer, or let him work for the architect and engineer with the consent of the owner. Let every set of plans when it leaves the architect's hands, be accompanied by a detailed quantity survey, so that all contractors who are invited to bid, will be fully informed as to exactly what they must furnish. Then and then only will contracts be let upon an absolutely equitable basis.

The difficulty in bringing this about consists entirely in persuading the owner that it will be best for him. And that, gentlemen, is one of your big jobs. You must convince him first that it will cost him less, that the fee he pays will be more than offset by the absence in the contractor's bid of an item covering the same work on not only his job, but also perhaps ten or twelve other jobs he figured and lost; second, that it will pay him, because the contractor's figure will be based upon what actually goes into the job, with no large allowance for overights; third, that he will not be bothered by a low bidder, who will later on argue throughout the job, picking flaws in the plans and specifications, wherever he can, in order to get an extra, and thus increase the cost, because he overlooked something.

The American Institute of Quantity Surveyors must convince the owner that placing himself in your hands will give him the lowest possible legitimate cost and assure him of getting exactly what is specified, without extras, without arguments.

CREOSOTED WOOD PROMOTION PROPOSED

A campaign to promote the use of forest products preserved by creosote oil is to be instituted by the Southern Creosoters' Association, according to E. S. Manley, vice-president of the organization and president of the Texas Creosoting Co., says The Business Week.

The role that can be played by creosote in forest conservation will be stressed in the campaign. The total quantity of wood treated in 1929 was 362 million cubic feet, an increase of 21 million (8%) over 1928. Railroad cross ties constitute the bulk of timber treated with preservatives.

Mexico has already recognized the importance of wood preservatives in forest conservation; has a law which provides that all timber placed in the ground must be treated. Although such a law has been urged upon Congress from time to time by various groups, little headway has been made.

Creosoting specialists point out that large amounts of money are being spent yearly in construction of costly bridges of steel and concrete, maintain that bridges of treated timber would serve the purpose equally well.

BURLINGAME ORDINANCE WILL FIGHT TERMITES

Burlingame, Calif., is preparing to combat the invasion of termites by drafting an amendment to the city's building ordinance stipulating use of certain materials in construction.

Action on this was taken at the last meeting of the city council which, at the recommendation of Building Inspector Albert Krug, instructed City Attorney John F. Davis to draw up the addition to the ordinance. A Los Angeles ordinance will be used as a pattern for the Burlingame measure.

According to Building Inspector Krug there is a prevalence of termites in Burlingame necessitating the adoption of their growth and spread in new buildings.

QUALITIES OF CONCRETE IMPROVED BY NEW EMULSION

A new emulsion designed to give standard portland cements the combined desirable qualities of both high early strength cements and plastic waterproof cements has been introduced in Southern California and used with most satisfactory results, according to the manufacturers. It is marketed under the trade name, "Suconem," and made under a formula perfected by a prominent portland cement chemist, for many years a resident of Southern California, and closely identified with the cement industry. He discovered that an emulsion of chemical solution in a specially refined oil would, when added to portland cement mixtures, not only give them the properties of the high early strength and hydro-plastic cements, but would also greatly reduce the quantity of water needed for mixing and prevent the segregation of aggregates in the fluid concrete.

When this emulsion was first used in concrete, it was noticed that there was a great apparent increase in fluidity and that the slump was usually double that of an ordinary mixture containing the same amount of water. This highly desirable characteristic was taken advantage of by reducing the amount of mixing water until the slump was the same as that of a similar concrete when it was found that approximately a third of the mixing water could be eliminated without reducing the slump. The result of this reduced water content is apparent in the finished concrete, which attains 28-day strength in two or three days and is from 15 to 20 per cent stronger than similar concrete, without the emulsion, at the end of the year, the manufacturers assert. The shrinkage was also greatly reduced and the finish concrete was noticeably free from checks and cracks.

Reduction in shrinkage is largely responsible for the excellent results obtained in bonding new concrete to old, it is stated, as it has been found that this emulsion does away with the trouble previously encountered on this class of work.

The reduced water content, when this emulsion is used, accounts for greatly reduced form leakage and where forms are not watertight and, since there is no extra water to rise prevents unsightly honeycombing to the surface, no laitance appears

and the usual porous water-streaked top of a day's pour is absent, it is pointed out. Finished surfaces are harder and smoother for the same reason.

This emulsion gives workability and plasticity to concrete not heretofore known, it is claimed. The concrete is exceedingly fat and plastic, works readily into place, and moulds perfectly to the forms against which it is cast, without the use of excessive amount of effort to secure proper placing. High early strength of concrete results in a remarkable absence of broken corners and edges and other construction blemishes, due to the fact that the early hardness makes it much more resistant to hard usage.

The emulsion introduces into the concrete a small amount of mineral oil in minutely divided particles which spreads through the concrete and in no way delays the mixing. The oil gives to the concrete remarkable plasticity and at the same time makes it highly resistant to the passage and absorption of moisture. Because of the emulsification of this oil, it has no tendency to collect on the surface and to cause trouble from any other source.

The high resistance to absorption of moisture obtained by use of this emulsion is also desirable in reducing the expansion and contraction of concrete caused by alternate wetting and drying. When it is considered that the difference in volume between wet and dry concrete is equal to that caused by a temperature change of 100 degrees Fahrenheit, the importance of this quality is apparent.

The presence of the oil in the final state slightly increases the viscosity of the fluid concrete, which holds the aggregate in suspension in the liquid mass and permits the hauling of freshly mixed concrete without segregation and without initial set or loss of workability. This not only makes it possible to easily handle concrete from centrally located mixing plants, but also improves the quality of concrete upon jobs where either spouting systems or buggies are used in placing concrete.

"Suconem" is manufactured by Super-Concrete Emulsions, Ltd., 3710 S. Alameda St., Los Angeles, which controls all patent rights in the United States and foreign countries.

fidence in himself and in the craft that bore him. The crowds gathered to greet him would not have been there but for communication engineering.

A hundred years ago Richard H. Dana made a memorable voyage from the coast of New England to the settlements along the seaboard that is now California. In his chronicle, "Two Years Before the Mast," he described a thrilling and perilous sail of six months' duration in either direction. Today mighty steamships accomplish the same objective in a comparatively few days. These noble vessels of commerce are lifted bodily over the ascent in the terrain between the Atlantic and the Pacific ends of the Panama Canal.

Now we journey across the continent in luxurious railway trains in less time than Meriwether Lewis and William Clark spent in preparation to cross a swollen river on their great adventure into the Northwest.

In 1672 Governor Lovelace of New York decreed that a post should go monthly between New York and Boston. The pioneer postman made his way through the trackless forest, and it was a part of his duty to mark the trees for travelers who might wish to follow him. Today a letter mailed in New York City on Monday may be delivered in San Francisco on Wednesday.

Electric lights take the place of tallow candles. In a comfortable temperature of 75 degrees we sit in a theater and enjoy a motion picture, in connection with which the speech of the actors is reproduced while at the same time the street temperature may be 100 degrees or more. We breathe fresh air that is changed throughout the auditorium every five minutes.

An important event occurs in the United States on Saturday and news of it is read on the other side of the world while it is still Friday there.

We sit in the comfort of our homes and hear the King of England speak. Soon we shall see a likeness of the speaker.

The French failed in their attempt to connect the Atlantic and the Pacific by a canal. Disease baffled them. Sanitary engineering made our success possible.

Chemical engineering has revolutionized our industries. Refrigeration engineering gives us fresh fruits and vegetables the year round.

Friday's newspapers are read on Thursday night and October magazines are on the news stands in September.

Concentration of population in cities resulted in a problem which was solved by office buildings taller than the Washington monument. This in turn brought another problem, which steam, electric, and automotive engineering solved by making it possible for us to live miles away from our places of business.

I could go on for hours talking about the things that engineers have given to promote commerce, comfort, and contentment. Who can even approximate the sum total of the value of these great achievements? It can be said, though, that modern civilization would not have been possible but for the mighty works of engineers.

It seems that sometime we must reach the limit of scientific discovery and inventive achievement, but, as someone has said, if we would look into the future, we should read history. Progress in engineering, invention and discovery in the past half century is the best kind of basis for the belief that the wonders of today will be the commonplace of tomorrow, and that developments not now dreamed of will help our grandchildren over the rough spots of life. This reminds me that a commissioner of patents who held office about 1870 is said to have explained his resignation

CIVIL SERVICE CHIEF SEES HUMAN SIDE OF ENGINEERING

To me the human side of engineering has two aspects, one personal, the other social. The personal phase is the opportunity that any branch of engineering gives as an outlet for the creative instinct that is a part of every normal man's nature. The contributions of engineering to the development of civilization and the general well-being of mankind are social in the broadest sense.

I have often thought that an author must feel a deep satisfaction when he holds in his hands a worthwhile book and can say, "I created this; I gave this to my fellow men." An engineer has the same justifiable pride when he looks upon a magnificent building, a huge and powerful dam, a safe and colossal bridge, and knows that he had at least a part in

bringing the great work into being. The book, the building, the dam, the bridge, all are manifestations of "the power of thought, the mighty magic of the mind."

It is not possible even to estimate the value of engineering in the development of industry, of government, of standards of living, of social relations of every kind. We can only say that engineering is essential.

Engineering Achievements

A fair-haired American youth dropped from the clouds to the soil of France and naively announced to the thousands awaiting his arrival, "I am Charles Lindbergh." Just as though anyone in the throng had any doubt as to who he was! Lindbergh's epoch-making achievement was made possible by engineering. He had full con-

by his belief that everything discoverable had been discovered and that inventive genius had accomplished the final goal.

Government Engineers

The United States Government is the largest employer of engineers in the world. Included in the Federal civil service alone there are more than 3,500 professional engineers. Their activities embrace practically every branch of endeavor to which engineering is applied. Those engaged in the better-known branches of engineering predominate, of course. We find Government engineers doing such interesting and humane things as investigating causes of dust explosions in mills and trying to prevent them; developing improved means of preventing farm fires; endeavoring to make mining safe for miners; conserving our natural resources and reclaiming arid lands; charting the seas; studying stream pollution and everything else that has to do with sanitary engineering; improving waterways, and hundreds of other things for your benefit and mine. In a little booklet distributed by the Civil Service Commission, bearing the title "Opportunities for Engineers in the United States Civil Service," it is shown that 69 engineering specialties are represented in the civil service of the United States.

The outstanding appeal that the Federal civil service makes to the engineering graduate is the opportunity it affords for constructive public service. The civil service of the United States will not make you rich. The entrance salaries offered to recent graduates are quite as good as, and often better than, those paid in private employment. Demonstrated ability is rewarded by promotion, but in around \$9,000 a year is the limit in the classified service, and few, of course, attain that grade. But the Government service offers a wide field of opportunity where individual tastes may be developed and where real constructive work may be done.

There are eight grades of engineers in the Federal civil service. The lowest is designated the junior grade, for which the annual salaries range from \$5,000 to \$2,500 a year. The highest is called chief engineer, and the salaries for this grade range from \$8,900 to \$9,000 a year.

The basis for rating junior engineers is their formal education, not to exceed two years of which may be substituted by practical experience, and a written test in an examination room. Above the junior grade no written test is required. For these higher grades the competitors are rated on their education, training, and experience, and, in some cases, on their writings on engineering subjects. The experience requirements for the higher positions become more exacting as to length and quality in proportion to the responsibility and difficulty of the work for which the examination is held.

When the Commission adopted this so-called unassembled type of examination for the higher positions it decided to some extent a source of entertainment in the Examining Division. For example, a competitor in an examination for teacher in the Indian Service said that the plural of solo was duet. In a political economy examination the two principal functions of money were said to be "to have and to hold." Another defined the term "balance of trade" as "a good deal more in all cases." The largest sound in the State of Washington is "the roaring of the waves," said another. But I digress.

The Civil Service Commission is conscious of the responsibility resting upon it in the performance of its duty of supplying through competitive tests the hundreds of engineers of various kinds demanded each year by the sev-

eral departments and independent offices of the Government. The Commission is proud, and justly so, in the knowledge that it has a part in selecting for the Government these men who are to devote to the service of all the people the strength of their minds and their knowledge gained through years of study and effort.

The Hoover Dam

Just at this time the most spectacular engineering project in the United States is, of course, the Hoover Dam. It is the biggest thing since the Panama Canal. Its three purposes, reclamation of arid lands, flood control, and power development, constitute it an outstanding contribution to the development of our country and to the safety, convenience, and progress of our people. The Secretary of the Interior, in naming the dam, honored an engineer of note.

While construction work on the Hoover Dam will be let to private contractors, the Bureau of Reclamation must employ a large number of engineers, for design and experimental work at the beginning, and for inspection as the work progresses. The Civil Service Commission must supply these engineers through its examinations.

In connection with this work the Civil Service Commission recently established a speed record in announcing and holding examinations and certifying eligibles. Late in July the Bureau of Reclamation called upon the Commission for eligibles to fill fourteen positions of civil, mechanical, and electrical engineers at salaries ranging from \$3,800 to \$6,400 a year. Eligibles were not available and examinations had to be held. A week later examinations had been prepared for these high-grade positions and the draft of the announcement went to the Government Printing Office. Within that week information had to be obtained from the Denver office of the Reclamation Service as to the duties of the several kinds and grades of positions. The printed announcement was delivered to the Commission by the Government Printing Office on August 7 with September 10 shown as to the date for the close of receipt of applications. The requirement of open competition made it necessary to give publicity to the examinations throughout the country, thus giving all qualified persons an opportunity to compete. Eleven hundred and twenty applications were received and 344 eligibles resulted. Three weeks after September 10, the closing date, the rating was completed and the certification of eligibles was in the Bureau of Reclamation.

On August 29 the Bureau of Reclamation asked the Commission to certify eligibles for eight positions of junior civil engineer. The certificate was sent by messenger the same day. This was possible because of the Commission's policy of maintaining registers for the junior technical and professional positions.

The Commissioner of Reclamation was so pleased by the Civil Service Commission's prompt service in both these cases that he addressed a letter to the Commission expressing his appreciation.

I mention these things to show that red tape can be cut when necessity exists. To those of you who are engineers in the Federal service I wish to say that the Civil Service Commission can serve the departments better if the departments anticipate their needs and do not wait until vacancies exist before calling upon the Commission to establish registers of eligibles.

War and Peace

The achievements of engineers I have discussed have to do with the problems of peace. The term engineering, however, as you know of course, in its early uses referred specially to

the operations of those who constructed engines of war and executed works intended to serve military purposes. Such military engineers were long the only ones to whom the title was applied, but about the middle of the 18th century there began to arise a new class of engineers who concerned themselves with work which, though they might be in some cases, as in the making of roads, of the same character as those undertaken by military engineers, were neither exclusively military in purpose nor executed by soldiers. These men, by way of distinction, came to be known as civil engineers. Civil engineers were described as those engaged in the art of directing the great sources of power in nature for the use and convenience of man. Perhaps the first branch to be recognized as separate was mechanical engineering. This was soon followed by mining engineering, and later by marine engineering, sanitary engineering, chemical engineering and electrical engineering, until today we have a hundred or more engineering specialties.

War continues to be a major function of engineering activities. Recent developments in mechanical and chemical appliances and compounds are ground for the belief that engineers can make war so horrible that it will be unthinkable to sane minds. But war and sanity have nothing in common, and if lasting peace throughout the world is ever to be attained it seems that it will not come through war, but through better understanding among men and nations of the problems and purposes of individuals and of governments. Every improvement in communication between nations, every step which cuts down distance and time, tends to better understanding and therefore to the possibility of peace. We are moving toward a world economy. Engineering is an important factor in the advance toward real civilization. If peace comes, engineers will help to light the way.

STOCKTON BUILDING PERMITS

Fifty building permits were granted in Stockton during November for improvements valued at \$41,600 as compared with fifty-five permits for \$40,005 during the corresponding period in 1929, it is announced by Wm. Curtis, city building inspector.

The past month's record was the smallest this year and below that of last month when new permits aggregated \$70,195. The majority of last month's business was for six new residential buildings which are under way at a cost of \$25,550.

Permits for 15 new non-residential buildings were granted, aggregating \$9573. Installation of six new signs totaled \$4112. Thirty small additions and alterations were listed at \$9573.

SACRAMENTO BUILDING RUNS \$145,004 IN NOVEMBER

J. R. Shields, city building inspector of Sacramento, reports the issuance of 125 permits during the month of November for improvements aggregating an expenditure of \$145,004 as compared with 158 permits for \$382,714 for the corresponding period in 1929.

During the past twelve months 1666 permits have been issued, the cost of the work being estimated at \$2,775,661 as compared with 1725 permits for the same period in 1929 when the total registered \$4,291,936.

Home building is the most active construction in Sacramento. During November permits were issued for 14 one-family residences costing \$50,100.

Building News Section

APARTMENTS

Plans Being Prepared.

APARTMENTS Cost, \$300,000
PORTLAND, Oregon. Near Central Business Section.

Eight-story and basement reinforced concrete apartments, 100x100 feet, (76 two room; several three and four-room apts.)

Owner—Withheld.

Plans by Elmer E. Feig, Guaranty Trust Bldg., Portland.

Sheet Metal Contract Awarded.

APARTMENTS Cost, \$85,000
OAKLAND, Alameda Co., Cal. 62nd near College Ave.

Three-story frame and stucco apartment with concrete basement (30 2-3- and 4-room apts.)

Owner—A. Jensen, care architect.
 Architect—H. K. Jensen, 354 Hobart St., Oakland.

Sheet Metal—Christensen & Gutsch, 4279 Piedmont Ave., Piedmont.

As previously reported, plumbing and steam heating awarded to E. O. Dryer, 1918 Lakeshore Blvd., Oakland; electrical work to Fritz Elec. Co., 538 Webster St., Oakland; structural steel to McGrath Steel Co., 354 Hobart St., Oakland; lumber to Smith Lumber Co., foot of 18th Ave., Oakland; pans to Steelform Contracting Co., Monadnock Bldg., San Francisco.

Completing Plans.

APARTMENTS Cost, \$100,000
LOS ANGELES, Cal. SW Juanita and Oakwood Sts.

Four-story Class C brick apartments (55x150 feet) (87 rooms).

Owner—Withheld.

Architect—C. Waldo Powers, Insurance Exchange Bldg., Los Angeles

Preliminary Plans Being Prepared.

APARTMENTS Cost, Approx. \$20,000
SANTA ROSA, Sonoma Co., Cal. Seventh and A Sts.

Two-story frame and stucco apartments (6 apts.)

Owner—P. Gambini and S. Testorelli, Santa Rosa.

Architect—William Herbert, Rosenberg Bldg., Santa Rosa.

Owner Taking Segregated Bids.

APARTMENTS Cost approx. \$18,000
OAKLAND, Alameda Co., Cal. Park Boulevard

Two-story and basement frame and stucco apartments.

Owner—H. E. Lansing, 2316 14th Ave., Oakland.

Architect—F. H. Slcombe, 62 York Drive, Piedmont.

Segregated bids are wanted on plumbing, heating, plastering, excavating, concrete work, carpenter labor, wiring, tile work, masonry hardware refrigerations, wrought iron, sheet metal, linoleum, and shades.

It is expected to start construction in about ten days.

REDLANDS, San Bernardino Co., Cal.—R. W. Brown, Riverside and Oakland, will erect a three-story apartment-hotel building on East State Street for a Redlands syndicate. Plans prepared by E. Voellmy of Redlands. It will be a concrete-tile structure, containing 82 rooms, and will cost about \$100,000.

Contract Awarded.

APTS. & STORES Cost, \$10,000
SAN FRANCISCO, N Judah Street N 29th Avenue.

Two-story and basement frame and stucco apts. and stores.

Owner—St. George Holden, 2901 Russ Building.

Architect—C. F. Strothoff, 2274 15th Street.

Contractor—W. L. Terry, 90 Allison Way.

Preparing Plans.

APARTMENTS Cost, \$250,000
LOS ANGELES, Cal. N-Marina St. Seven-story and basement Class A reinforced concrete apartments.

Owner—Withheld.

Architect—Christopher Totten, Prescott, Arizona.

Plans Completed.

APARTMENTS Cost, \$200,000
LOS ANGELES, Cal. E Menlo St., bet. Tenth and Eleventh Sts. Five-story and basement Class B reinforced concrete apartments (178 x46 feet).

Owner—Mable L. Smith.

Architect—W. Douglas Lee, Textile Center Bldg., Los Angeles.

Plans Being Figured.

APARTMENTS Cost, \$15,000
BURLINGAME, San Mateo Co., Cal. Broadway near California Drive. One-story and mezzanine floor reinforced concrete apts. and stores. Owner—Peter Lemperopolus. Architect—Russell Coleman, 1404 Broadway, Burlingame.

Completing Plans.

APARTMENTS Cost, \$50,000
BURLINGAME, San Mateo Co., Cal. El Camino Real (44x92-ft.).

Three-story frame and stucco apartments with reinforced concrete basement (15 2- and 3-room apts.)

Owner—R. Noble, 427 8th Ave., San Francisco.

Architect—Chester Treichel, American Bldg., Oakland.

Owner will take segregated bids in a few days.

Segregated Bids Being Taken.

APARTMENTS Cost approx. \$50,000
SAN JOSE, Santa Clara Co., Calif. Mariposa and Race Sts.

SKILSAW Portable Electric Hand Saws (4 models).

SKILSAW Portable Electric Sander
SKILSAW Radial Arm Attachments.

SYNTRON Portable Electric Hammers (4 models, motorless).

MALL Flexible Shaft Machines (50 models).

Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

Labor Saving Portable Electric Tools.

1248 Mission St. Underhill
 San Francisco 7662
 SALES . SERVICE . RENTALS

Two-story and basement frame and stucco apartments (8 apts.)

Owner—W. Hudges.

Architect—Charles McKenzie, Twohy Bldg., San Jose.

Sub-Contracts Awarded.

APARTMENTS Cost, \$30,000
SAN FRANCISCO, SE Pierce and Union Streets.

Three-story and basement frame and stucco apartment with tile roof (5 5-room apts.) and 11-room residence with 3 baths (70x70-ft.)

Owner—W. J. Raffetto, 401 Columbus Avenue.

Architect—Albert Schroepfer, 681 Market Street.

Contractor—Franchella & Truffell, 2450 Chestnut Street.

Lumber—San Francisco Lumber Co., foot of Mason St.

Structural Steel—McClintic Marshall Co., 2050 Eryant St.

Electric—Crown Electric Co., 153 Eddy Street.

Ornamental Iron—Star Ornamental Iron Works, 1271 Folsom St.

Concrete—A. Dini, 187 Irvington Ave.

Plumbing and Heating—F. J. Klimm, 456 Ellis St.

Plastering and Lathing—E. E. Valentino, 3132 Octavia St.

Mill Work—J. A. Hart Mill & Lumber Co., Jerrold and Napoleon Sts.

Sheet Metal and Patent Flue—J. De Luchi, 2240 Leavenworth St.

There will be two separate entrances to the building. Steam vapor heating system and all modern conveniences

BONDS

VISALIA, Tulare Co., Calif.—Election will be held December 18 in the Linwood School District to vote bonds of \$7,000 to finance erection of a new school. Trustees of the district are: C. M. Raibley, D. J. Reese and Clifford Russell (clerk).

CHURCHES

Permit Applied For.

CHURCH Cost, \$8500
BERKELEY, Alameda Co., Cal. 1521 Derby Street.

One-story and basement frame and stucco church (5 rooms)

Owner—Free Methodist Church, Berkeley.

Plans by G. W. Slack, 2412 Acton St., Berkeley.

Bids To Be Taken In One Week.

CHURCH Cost, \$70,000
OAKLAND, Alameda Co., Cal. Emerson and Excelsior Aves.

Reinforced concrete church.

Owner—Roman Catholic Archbishop of San Francisco, 1100 Franklin St., San Francisco

Architect—W. E. Schirmer, 700 21st St., Oakland.

Reinforcing Steel Contract Awarded.

ALTERATIONS Cost, \$22,100
OAKLAND, Alameda Co., Cal. East 11th St. and Fruitvale Ave.

Alterations and additions to church (2 vestibules, cover, porch, etc.)

Owner—Third Church of Christ, Scientist, 1612 Fruitvale Ave., Oakland.

Architect—Henry E. Guttererson, 526 Powell St., San Francisco.

Contractor—A. Cedarberg, 1475 Excelsior Blvd., Oakland.

Reinforcing Steel—Sault Steel Co., Call Bldg., San Francisco.

Contracts Awarded.

CHURCH Cost, \$6500
WILLOWS, Glenn Co., Cal.
One-story frame and stucco church.
Owner—First Church Christ Scientist,
Willows.

Architect—Otto Delchmann, 110 Sutter
St., San Francisco.

Carpentry—A. Remiter, Artois, \$2,989.
Plumbing—Ralph Flagg, Willows,
\$500.

Plastering—Herman Bosch, 449 Fulton
St., \$1,675.

Completing Plans.

CONVENT Cost, \$—
LOS ANGELES, Cal. Selma Avenue.
Two-story and basement frame con-
vent (16 bedrooms, chapel, com-
munity room, service dept. and
laundry)

Owner—Roman Catholic Bishop of
Los Angeles and San Diego.

Architect—Emmett G. Martin, Chester
Williams Bldg., Los Angeles.
Bids will be called for shortly.

Preparing Plans.

CHURCH Cost, \$70,000
LOS ANGELES, Cal. Third and Jef-
ferson Aves.

One-story and basement frame and
stucco church (86x124 feet).

Owner—St. Paul's Presbyterian
Church (Dr. A. Breiglieb, Pastor).

Architect—Scott Quintin, Medical
Bldg., Alhambra.

Low Bidder.

CHURCH Cost, \$20,000
EUREKA, Humboldt Co., Cal.
One-story redwood church (Colonial
type).

Owner—First Methodist Church.
Architect—Rollin S. Tuttle, Box C,
Los Gatos.

Low Bidder—Carl Nelson, 1421 E.
Channel St., Stockton.

Prop. No. 1, \$26,420; Prop. No. 2,
\$25,100.

Contract Awarded.

CHAPEL Cost, \$4,000
RICHMOND, Contra Costa Co., Cal.
Clinton Ave. and 31st St.
One-story frame and stucco chapel.

Owner—First Presbyterian Church.
Plans by P. M. Sanford.
Contractor—P. M. Sanford, 301 Alta
Punta Ave., Richmond.

Contract Awarded.

CHURCH Cost approx. \$100,000
SACRAMENTO, Sacramento Co., Cal.
SW 39th and J Sts. (106x324-ft.)

Two-story brick and concrete church.
Owner—Roman Catholic Bishop (Rev.
M. L. Lyons, pastor).

Architect—Harry Devine, California
State Life Bldg., Sacramento.

Contractor—Wm. C. Keating, Forum
Bldg., Sacramento.

FACTORIES AND WARE- HOUSES

Plans Being Figured—Bids Close Dec.
22, 11 A. M.

HOG PEN & YARDS Cost, \$—
SAN JOSE, Santa Clara Co., Calif.
County Almshouse grounds.

Hog pen and yards.
Owner—County of Santa Clara, H. A.
Pfister, county clerk.

Architect—Chas. S. McKenzie, Twohy
Bldg., San Jose.

Certified check 10% payable to the
clerk required with bid. Plans on file
in office of clerk.

SANTA ANA, Orange Co., Calif.—
Copperconda Mines Co., R. O. Gru-
well, Jr., president, 118 E 5th Street.
Santa Ana, has purchased the old
Unique Vending Company property,
located on St. Gertrudes Place, Santa
Ana, where it proposes establishing a
refinery to cost approximately \$100,-

000. A 3-story, concrete building now
on the site will be incorporated in the
new plant, which will be used for re-
fining zinc concentrates.

Contract Awarded.

LAUNDRY Cost, \$10,000
BERESFORD, San Mateo Co., Calif.

39th and El Camino Real.
One-story frame and stucco laundry.
Owner—United States Laundry, Beres-
ford.

Architect—Not Given.
Contractor—John Daley, 1104 Vancou-
ver, Burlingame.

Plans Complete.

HANGAR Cost, \$35,000
SACRAMENTO, Sacramento Co., Cal.
Freeport Blvd. at Municipal Air-
port.

Steel frame and wood hangar and air
terminal station, 80x100-ft.

Owner—City of Sacramento (to be
leased to Boeing Air Transport
Company).

Architect—Harry Devine, 1405 41st
St., Sacramento.

Plans will be forwarded to the east-
ern office of the owners for approval
and bids will be called for after that
time.

Structure will be of steel frame and
wood construction covering an area
of 80 by 100 ft., with an exterior cov-
ering of corrugated iron.

Preliminary Estimates Being Taken.

HANGAR, ETC. Cost, \$100,000
ALAMEDA, Alameda Co., Cal. Web-
ster Street.

All-steel hangar and administration
building (120x440-ft.)

Owner—Alameda Bay Airdrome (R. U.
St. John, field manager).

Architect—Not Given.

The structure will be 120 by 440 ft.
and will house shops and offices, in
addition to providing plane storage
space for 70 small planes or 15 tri-
motored transports.

Sub-Contracts Awarded.

WAREHOUSE Cost, \$30,000
SAN FRANCISCO, NW Carroll and
Newhall Streets.

One-story steel frame and concrete
warehouse (south side crane and
runway).

Owner—Truscon Steel Co., Cal Bldg.

Architect—Eng. Dept. of Owner.

Contractor—MacDonald and Kahn, Fi-
nancial Center Bldg.

Painting—Aristo Painting Co., 473

Bryant St.

Roofing—Alta Roofing Co., 976 Indi-
ana Street.

Glass—W. P. Fuller & Co., 301 Mis-
sion Street.

As previously reported, concrete
awarded to Western Paving Co., 74
New Montgomery St.; plumbing to
Geo. Weinholz, 1450 Howard St.

Contract Awarded.

ALTERATIONS Cost, \$12,500
SAN FRANCISCO, No. 145 Fremont
Street.

Alterations and additions to ware-
house and offices.

Owner—Crockett First National Bank.
Architect—Not Given.

Contractor—J. A. Tassi, 25 California
St., San Francisco.

Plans Being Completed.

WAREHOUSE, ETC. Cost, \$60,000
SANTA ROSA, Sonoma Co., Cal.

Service group (warehouse, garage,
shops, transformer house, meter
house, pole yard, etc.)

Owner—Pacific Gas & Electric Co., 245
Market St., San Francisco.

Architect—Eng. Dept. of Owner.

Bids will be taken in two weeks.

As previously reported, grading con-
tract awarded to Connors & Hansen,
Santa Rosa.

Sub-Bids Being Taken.

FOUNDRY Cost, \$12,500
OAKLAND, Alameda Co., Calif. 1919
Peralta St.

One-story steel foundry and machine
shop.

Owner—F. L. De Sanno, 4437 E 10th
St., Oakland.

Architect—Not Given.
Contractor—R. C. Porter & Co., 356
Adeline St., Oakland.

Sub-bids are wanted on brick work,
structural steel, electrical work, cor-
rugated iron and plumbing.

Plans Being Revised.

ADDITION Cost, \$25,000
OAKLAND, Alameda Co., Cal. 6300
College Ave.

One-story brick and steel frame addi-
tion to garage.

Owner—L. C. Firestone, 6300 College
Ave., Oakland.

Architect—A. W. Smith, American
Bldg., Oakland.

Bids will be taken after Jan. 1, 1930.

LOS ANGELES, Cal.—Starr Piano
Co. of Richmond, Indiana, has pur-
chased the controlling interest in
Benedict & Company, 2867 West Pico
Blvd., manufacturers of electric re-
frigerators. The Starr Piano Com-
pany will continue the business under
the name of Benedict & Company,
with H. L. Nolder, representative in
Los Angeles for the Starr Company,
acting as secretary and treasurer. It
is understood negotiations are under
way for securing a site on the south
side of the city on which to erect a
new manufacturing plant, the site,
buildings and equipment to cost ap-
proximately \$250,000.

Contract Awarded.

TRUCK SHED Cost, \$4488
GARBERVILLE, Humboldt Co., Cal.
Maintenance station truck shed.

Owner—State of California.

Plans by State Department of Public
Works, Division of Highways,
State Office Bldg., Sacramento.

Contractor—McCarthy & Johannis, 741
14th St., San Francisco.

Contract Awarded.

ADDITION Cost, \$1995
DELANO, Kern Co., Cal.
Moving highway superintendent's cot-
tage and constructing addition.

Owner—State of California.

Plans by State Department of Public
Works, Division of Highways,
State Office Bldg., Sacramento.

Contractor—R. Hodgson & Son, Port-
erville.

GARAGES AND SERVICE STATIONS

Plans To Be Prepared.

POST OFFICE GARAGE \$300,000
SAN FRANCISCO. Folsom St., bet.
Main and Beale Sts.

Two-story concrete or brick post
office garage.

Owner and Builder—MacDonald &
Kahn, Financial Center Bldg., San
Francisco.

Architect—Ellis & Fairweather, Bal-
boa Bldg., San Francisco.

The post office will pay \$43,000 a
year rental for 10 years, according to
Postmaster Todd, with the option of
buying the garage outright in the
meantime. Under the department's
new policy of purchasing post office
lands and buildings, this likely will be
done.

SALINAS, Monterey Co., Cal.—F. C.
Carlson, Salinas, at \$505.50 awarded
contract by Salinas city clerk for

erecting a garage and laying side-
walks at the city sewer plant.

The only other bid was submitted
by Chas. Holm, Salinas, at \$557.

Bids Rejected—Segregated Bids Being Taken.

SALENSROOM, ETC. Cost, \$20,000.
SAN FRANCISCO. Fillmore St. near Lombard

One-story brick salesroom and service station.

Owner—Ray Hasselback (Ford dealer)
 Architect—Jas. S. Arnott, 417 Market St., San Francisco.

Engineer—W. Adrian, 417 Market St., San Francisco.

Owner is taking segregated bids on the following portions of the work. Carpentry work will be done by day's labor by owner.

Brick work, structural steel, steel sash, mill work, roof tile, electric wiring, plumbing, reinforcing steel, ornamental iron, tile work, painting, glazing, plastering and sheet metal. Bids will be received by the architect.

Plans Being Prepared.
SERVICE STATION Cost, \$—
SAN FRANCISCO. 8th Ave. and Fulton Street.

Service Station.
 Owner—Weiss Bros. & Co., 582 Market Street.

Lessee—Shell Oil Co., Shell Oil Bldg. Plans by Eng. Dept. of Lessee.

As previously reported, wrecking awarded to Symon Bros. Wrecking Co. 1435 Market St.

Present building on site is now being wrecked.

GOVERNMENT WORK AND SUPPLIES

PORTLAND, Ore.—Until December 22, under Circular No. 201, bids will be received by U. S. Engineer Office, Portland, Ore., for 28 steel plate pump liners. Specifications obtainable from above.

SAN FRANCISCO.—Until December 9, 10 A. M., under Schedule No. 928-31-145, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver miscellaneous paints, etc. Specifications obtainable from above.

SAN DIEGO, Calif.—Captain F. C. Hingsburg, chief engineer, airways division of the United States Department of Commerce, has advised the San Diego Chamber of Commerce that bids will be called for this week for the installation of revolving beacons between San Diego and Los Angeles, placement of boundary lights on the Eddie Martin airport at Santa Ana, and erection of radio directional beacons at Lindbergh field in San Diego and at the northern terminal in Los Angeles. The beacons will be installed every ten miles between the two cities.

MARE ISLAND, Cal.—B. Z. Walden 828 Jones St., at \$1,044.95 submitted lowest bid to Public Works Officer, Mare Island Navy Yard, for painting two buildings and coating the roofing of 14 buildings at the Mare Island Navy Yard Hospital. Surfaces to be painted and coated involve approximately 15,000 and 84,000 sq. ft., respectively. The Government will furnish material for roof coating.

Complete list of bids follows:
 B. Z. Walden, 828 Jones St., San Francisco.....\$1,044

Aristo Painting Co., S. F.....1,071

Piedmont Pacific Decorating Co., Oakland.....1,287

J. Chabot, San Francisco.....1,580

D. E. Burgess, San Francisco.....1,565

E. Anderson, San Francisco.....1,690

Roy Grantz, San Francisco.....2,785

Shulman-Conroy Painting Co., San Francisco.....3,100

Bids referred to Washington for awarding.

WASHINGTON, D. C.—(By Special Wire).—Western Coast Co., Seaboard Bldg., Seattle, at \$19,983 submitted low bid Dec. 3, under Specification No. 6297, to Bureau of Yards and Docks, Navy Department, Washington, D. C. for boiler plant building at the naval air station, Seattle, Wash. The building will have concrete foundations and floors, brick walls, steel framing, steel sash, built-up roofing, and electrical and plumbing systems. Bailey Coast Co., Seattle, next low at \$20,831; West Coast Const. Co., Seattle, third low at \$22,973.

SAN DIEGO, Calif.—Until Dec. 17, under Spec. No. 6276, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., for metal aircraft structures shop at the naval operating base (air station), San Diego, Calif. The work includes concrete, brick and hollow tile work, structural steel work, metal doors, metal and wire mesh partitions, steel windows, dumbbells, roof and sheet metal work, wood block flooring, marble flooring, plastering, gas and air piping and heating, plumbing and electrical work. Deposit of \$25 required for plans, obtainable from above.

NEW MEXICO.—Pacific Elevator & Equipment Co., 45 Rausch St., San Francisco, at \$18,429 submitted low bid to National Park Service, San Francisco, to install elevator in Carlsbad Cavern in New Mexico.

Chas. H. Dunning, Phoenix, Ariz., at \$60,235 submitted low bid to sink shaft for the elevator.

Bids referred to Washington for approval.

MONTEREY, Monterey Co., Cal.—Clinton-Stephenson Const. Co., Monadnock Bldg., San Francisco, at \$11,684 awarded contract by Quartermaster, Presidio of Monterey, for the construction of two stables and the electrical work for four stables at the Presidio of Monterey.

Sub-bids are wanted on plumbing, sheet metal, concrete work, excavating and roofing.

SAN PEDRO, Cal.—Until December 8, under Circular No. 12, bids will be received by Quartermaster, Fort McArthur, San Pedro, for complete alterations of post building 48 into two sets of junior officers' quarters. Plans obtainable from above.

HAWTHORNE, Nev.—Until 11 A. M., December 26, bids will be received by the Bureau of Yards and Docks, Washington, D. C., for a mine filling plant to be erected at the naval ammunition depot at Hawthorne, Nevada. The work will include two bulk TNT storage buildings, two box opening buildings, two filling houses, two buildings designated as cooling shed and temporary storage buildings, crating and painting building, three drilling buildings, twenty-nine dugouts with barricades, empty mine storage building, concrete and earth barricades about buildings, standard gauge railroad tracks, roadways, roads, walks, etc. Cost, \$285,000. Plans may be obtained from the District Public Works officer, 100 Harrison St., San Francisco, on deposit of \$40 (Specification No. 6125).

SAN FRANCISCO.—Until December 12, 10 A. M., under Schedule No. 928-31-129, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver pressure type water softener. The normal operating capacity per regeneration shall be 75,000 gallons based on water with 3.0 grains hardness per U. S. gallon. Softener shall have a normal softening rate

of 100 gallons per minute. Softener shall have a maximum rate of flow of 110 gallons per minute. The maximum rate of flow shall not exceed 5 gallons per minute per square foot of zeolite area.

DENVER, Colo.—Until 2 P. M., Dec. 18, bids will be received by the U. S. Bureau of Reclamation, 1411 Welton St., Denver, for furnishing equipment under Spec. No. 497-1, as follows:

One motor-driven gate hoist, with motor, speed reducer and all other parts and accessories, as listed on drawing No. 17-D-837 and one set of additional parts as listed on drawing No. 17-D-843.

Two plane gate assemblies; with all leaves, stems, racks and all other parts and accessories as listed on drawing No. 17-D-839; and one plane gate assembly with all leaves, stems, racks and all other parts and accessories as listed on drawing No. 17-D-841.

S. O. Harper, chief acting engineer. A proposal guaranty of 10% is required with each bid.

PHOENIX, Ariz.—Until Dec. 12, 2 P. M., bids will be received by John E. Brown, superintendent, U. S. Indian School, Phoenix, to furnish and deliver six manual training tables. Further information obtainable from above.

HAWTHORNE, Nevada.—Until 11 A. M., December 26, bids will be received by the Bureau of Yards and Docks, Navy Department, Washington, D. C., for buildings and dugouts, including concrete, iron and steel work, railroad tracks, conveyor and cableway systems, cranes and hoists, boiler plant equipment, heating, plumbing, ventilating, electric light and power, telephone and alarm systems for a mine filling plant at the Naval Ammunition Depot, Hawthorne, Nevada. Specifications No. 6125. Deposit of \$40 for plans.

MARE ISLAND, Cal.—Navy Department has provided \$50,000 for preliminary work in connection with the construction of a 7000 ft. seawall at the Mare Island Navy Yard. The wall will be built south from Independence Dock toward the Magazine Wharf. A portion of the \$50,000 will be used in dredging and trestle work.

Heating and Ventilating—Carrier Engineering Corp., Ltd., 748 E. Washington St., Los Angeles.

Sub-Contracts Awarded.

ALTERATIONS—Cost, \$24,332
OAKLAND, Alameda Co., Cal. No.
 5631 College Avenue
 Alterations to two-story Class C brick
 theatre.

Owner—Up Town Theatre, Premises.
Architect—A. A. Cantlin, 541 Market
 St., San Francisco.

Contractor—Alfred J. Hooper, 1769
 Pleasanton Valley Road, Piedmont

Steel Work—Pacific Coast Engineering
 Co., Foot of 14th St., Oakland.

Lumber—E. K. Wood Lumber Co.,
 Frederick and King Sts., Oakland.

Sash and Doors—Western Door &
 Sash Co., Fifth and Cypress Sts.,
 Oakland.

Plastering—Wallace Biddle, Oakland.
Steel Bars—Truscon Steel Co., Call
 Bldg., San Francisco.

Concrete Material—Makin & Kennedy
 101 4th St., Oakland.

Electrical Work—Matson-Seabrooke
 Co., 4115 Broadway, Oakland.

Painting and Decorating—M. Santeo-
 concio, 58 Monterey St., San Fran-
 cisco.

Sub-Contracts Awarded.
REMODELING Cost, \$—
FRUITVALE, Alameda Co., Cal. No.
 3720 E-14th Street.

Remodel theatre (enlarge foyer).
Owner—Golden State Theatres, Inc.
Architect—Reid Bros., 105 Montgom-
 ery St., San Francisco.

Contractor—Alf. Hooper, 1769 Pleas-
 anton Valley Rd., Piedmont.

Lumber—E. K. Wood Lumber Co.,
 Frederick and King Sts., Oakland.

Tile Work—Rigney Tile Co., 3012 Har-
 rison St., Oakland.

Ornamental Iron—J. A. Petersen, Oak-
 land.

Cast Cement and Plaster Ornaments—
 Fred Jurgewitz, 1632 20th Ave.,
 Oakland.

Plumbing—Walter Grey, 3734½ E-14th
 St., Oakland.

Electrical Work—Matson-Seabrooke
 Co., 4115 Broadway, Oakland.

Steel Toilet Partitions—Albatross
 Steel Equipment Co., 557 Market
 St., San Francisco.

WHARVES AND DOCKS

OAKLAND, Cal.—Warden & For-
 sythe, 264 Syble Ave., San Leandro,
 at \$835 awarded contract by City
 Port Commission, 424 Oakland Bank
 Bldg., for laying railroad tracks east
 of the 345-ft. extension to 11th St.
 Wharf, Outer Harbor Terminal.

**MISCELLANEOUS
CONSTRUCTION**

SAN FRANCISCO—Engineers Hunter
 and Hudson, 41 Sutter St., will ask
 bids shortly for complete electric wiring
 and night illumination system for the
 \$1,250,000 baseball park now in
 course of construction at 15th St. and
 Potrero Ave. for the San Francisco
 Baseball Club, Lindgren & Swinerton,
 general contractors, 225 Bush St.;
 H. J. Brunner, Sharon Bldg., engi-
 neer.

SAN FRANCISCO—Until January
 12, bids will be received by the Board
 of Supervisors for the construction
 and operation of a new incinerator.
 Plant shall handle 800 tons of garbage
 a day and shall revert to the city free
 of cost at the end of 25 years, unless
 purchased before that time. The
 charge per ton shall not exceed \$1.
 Specifications and further particulars
 obtainable from J. S. Dunnigan,
 Clerk of the Board of Supervisors,
 2nd Floor, City Hall.

Sub-Contracts Awarded.

SHOP Cost, \$30,000
MULE CREEK, Amador Co., Cal.
 Reinforced concrete dam and wing
 wall shop building, blacksmith
 shop and pumping station.

Owner and Engineer—Stephen E.
 Kieffer, 57 Post St., San Francisco

Supt. of Constr.—J. J. Leary, lone.
Contractor—Guth & Fox, 1516 21th
 St., Sacramento.

Lumber—Dealan Bldg. & Material Co.,
 31st and P Sts., Sacramento.

Cement—Calaveras Cement Co.,
 Reinforcing Steel—Wm. Weaver, 26th
 St and First Ave., Sacramento.

Hardware—Murphy & Low, 1009 J St.,
 Sacramento.

Concrete Work—Frank Harkin, 1616
 Seventh St., Sacramento.

Plans Being Prepared. Cost, \$20,000
STATION
PITTSBURG, Contra Costa Co., Cal.

Spanish style, tile and stucco, railroad
 station.

Owner—Sacramento Northern Rail-
 road, Mills Bldg., San Francisco.
Plans by Eng. Dept. of Owners.

This structure will be similar to
 that recently erected by the railroad
 company at Chico.

Preparing Working Drawings.
ALTERATIONS Cost, \$25,000
OAKLAND, Alameda Co., Cal. Tele-
 graph Ave. near 28th St.

Alterations and additions to two-story
 and basement brick veneer resi-
 dence for mortuary and chapel.

Owner—Grant D. Miller, 2368 E 14th
 St., Oakland.

Architect—Miller and Warnecke, Fi-
 nancial Center Bldg., Oakland.

Bids will be taken in about 2 weeks.

SAN FRANCISCO—Healy - Tibbitts
 Const. Co., 64 Pine St., at \$7,215 sub-
 mitted low bid to Board of Public
 Works to construct reinforced con-
 crete trestle to support 44-inch pipe
 line of municipal water department
 at Alemany Blvd.; estimated cost, \$7-
 000. Project will involve:

4,000 lin. ft. timber piling;
 110 cu. yds. reinf. concrete piers,
 slab and girders (class A);

30 cu. yds. plain concrete piers
 (class B);

18,500 lbs. reinforcing steel in place.

Complete list of bids follows:
 Healy-Tibbitts Const. Co. \$ 7,315

L. J. Cohn 7,350
 M. E. McGowan 7,625

C. W. Haun 7,840
 *McCarthy & Johanss (void).... 7,995

C. E. Eaton 9,225
 P. McHugh 9,319

Barrett & Hilp 10,560
 E. J. Treacy 10,775

*Bid of McCarthy and Johanss was
 declared irregular due to failure to
 have same sworn before a notary.

**MISCELLANEOUS SUPPLIES
AND MATERIALS**

OAKLAND, Calif.—Until December
 10, S. P. M., bids will be received by
 John H. Kimball, secretary, East Bay
 Municipal Utility District, 512 16th
 St., to furnish approximately 50 tons
 of pig lead. Specifications obtainable
 from above.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Names and ad-
 dresses of the individuals or firms
 concerned in the following opportuni-
 ties will be furnished on request to
 the Business Opportunity Department
 of Daily Pacific Builder, 545-547 Mis-
 sion Street. Phone Garfield 8744.

20651—Representation. Nuevitas,
 Cuba. Party is interested in obtain-
 ing the representation of a bean ex-
 porter to Cuba.

20653—Chemicals. Hamburg, Ger-

many. Party is interested in working
 as selling and buying agent for chem-
 icals in Hamburg.

20655—Lamps. Tokio, Japan. Ex-
 porters of electric decoration and fancy
 colored lamps desire to contact local
 importers.

20657—Electric Light Bulbs. Yoko-
 hama, Japan. Exporters of electric
 light bulbs made in Japan are desir-
 ous of getting in touch with local im-
 porters.

20659—Mohair. San Francisco. A
 large commercial and exporting firm
 in the Hawaiian Islands wishes to
 correspond with manufacturers of mo-
 hair, to receive samples, prices and
 size.

31
 Doubler Chemical Co. (Mr. M. P.
 Kahn), 242 N 10th St., Newark, N. J.,
 manufacturers of chemical to be used
 with paint, desires to secure repre-
 sentation in this vicinity.

H. & R. Manufacturing Co. (Mr. H.
 J. Ryan), Palms Stations, Los An-
 geles, Calif., manufacturing a new
 combination seeder, fertilizer and top
 dressing machine, in two models, one
 for golf courses, schools, etc., and the
 other for gardeners, and also a chalk-
 ing machine for use in marking ten-
 nis courts, football fields, etc., wish-
 es representation.

H. K. Grant, 204 S 1st St., East,
 Cedar Rapids, Iowa, has facilities for
 manufacturer or distributor who wish-
 es to establish a distributing point in
 that locality.

W. F. Pierce, Fountain Square
 Bldg., Cincinnati, Ohio, represents a
 firm with exclusive manufacturing,
 distributing and sales rights in auto-
 matic water power dish washer for
 the United States and foreign coun-
 tries, wishes to contact with concern
 in this vicinity, looking for new pro-
 duct to add to their line.

**ELASTIC SOLID STRESSES
REPORTED IN BOOKLET**

The question as to what stresses
 are produced within the area of con-
 tact when one elastic solid is pressed
 against another has for a long time
 been recognized as one of great im-
 portance. That a solution of the ques-
 tion has a definite practical applica-
 tion may be realized when it is con-
 sidered that the calculation of the
 stresses encountered in ball and roller
 bearings, bridge rollers, rolling lift
 bridges and solid on rails is impos-
 sible by the common formulae of me-
 chanics. The design of such struc-
 tural parts is based largely on results
 of tests, or trial and error methods.

Bulletin No. 212 of the Engineering
 Experiment Station of the University
 of Illinois contains the report of an
 investigation conducted to find a so-
 lution of this problem. One chapter
 is devoted to the mathematical meth-
 od of solution and the remainder of
 the bulletin contains the results of
 the laboratory work involved in the
 verification of the mathematical anal-
 ysis.

By using the methods of solution
 presented in the bulletin it was found
 possible to compute the principal
 stress components within the area of
 contact, both at the surface and at
 points below the surface, when one
 elastic body was pressed against an-
 other. It was also possible to com-
 pute the maximum shearing stress,
 due to the difference of stress com-
 ponents, and to determine the dis-
 tance from the contact surface to the
 point of maximum shear, as well as
 the area of contact. The accuracy of
 the calculations of maximum shear-
 ing stresses in the interior of a body
 was verified by a strain-gage method.

Copies of Bulletin No. 212 may be
 obtained without charge by address-
 ing the Engineering Experiment Sta-
 tion, Urbana, Illinois.

Engineering News Section

BRIDGES

*MARIN COUNTY, Calif.—As previously reported, Healy-Tibbitts Construction Co., 64 Pine St., San Francisco, at \$329,667 submitted the low bid to the State Highway Commission Nov. 26 to construct a bridge across Richardson Bay and over the tracks of the Northwestern Pacific Railway at Manzanita, consisting of one 56-ft. plate girder lift span on concrete piers with pile foundations, one 45-ft. steel stringer span on concrete bents with pile foundations and approximately 3,240-ft. of timber trestle on pile and frame bents. Following is a complete list of the unit bids received on the project:

(1) 700 cu. yds. struc. excavation;
(2) furnish and drive test piles;
(3) 2500 lin. ft. furnishing untreated Douglas fir piles (44-ft. and under)
(4) 6200 lin. ft. furnishing untreated Douglas fir piles (45-ft. and over)
(5) 2000 lin. ft. furnishing creosoted Douglas fir piles (44-ft. and under)
(6) 2520 lin. ft. furnishing creosoted Douglas fir piles (45 to 64 ft.)
(7) 17,900 lin. ft. furnishing creosoted Douglas fir piles (65 to 84 ft.)
(8) 28,600 lin. ft. furnishing creosoted Douglas fir piles (85-ft. and over)
(9) 3100 lin. ft. furnish redwood piles (84-ft. and under)
(10) 29,750 lin. ft. furnish redwood piles (85-ft. and over)
(11) 1138 each, drive timber piles
(12) 1900 lin. ft. reinf. conc. piles
(13) 50 tons gravel backfill
(14) 66 cu. yds. class A Portland cement concrete (placed by tremie)
(15) 580 cu. yds. class A Portland cement concrete (structure)
(16) 455 cu. yds. class B Portland cement concrete
(17) 72,000 lbs. reinforcing steel
(18) 315,000 lbs. structural steel
(19) 5200 lbs. cast steel
(20) 1600 M. ft. b.m. redwood timber, select, all-heart structural grade
(21) 520 M. ft. b.m. redwood timber, select all-heart structural grade
(22) 10.5 M. ft. b.m. Douglas fir timber, select structural grade
(23) 1300 tons asphalt conc. pavement
(24) 280 sq. yds. asphalt plank
(25) 1 unit operating machinery, complete

(26) 1 lot miscellaneous items of work
The total bids were:

(A) Healy-Tibbitts Const. Co., \$329,667.50.
(B) H. W. Rohl Co., \$333,335.
(C) Frederickson & Watson Const. Co., et al., \$340,972.
(D) MacDonald & Kahn, \$341,436.20.
(E) Pacific Bridge Co., \$343,961.
(F) Merritt, Chapman & Scott, \$346,710.60.
(G) Lord & Bishop, \$347,499.
(H) Rocca & Colletta, \$352,131.10.
(I) Putte Const. Co., \$353,786.90.
(J) Siems Helmers, Inc., \$367,335.50.
(K) Skeels & Graham Co., \$373,228.25.
(L) San Francisco Bridge Co., \$371,156.80.
(M) A. W. Kitchen, \$385,659.05.
(N) Mercer-Fraser Co., \$389,384.90.
(O) M. B. McGowan, \$395,228.
(P) Schuler & McDonald, \$402,620.

The unit bids follow:

OAKLAND, Cal.—Until Dec. 16, 13-30 A. M., bids will be received by G. E. Gross, county clerk, for cleaning and painting of steel and iron and painting certain timber work on the Bay Island Farm Bridge in Brooklyn Township. Certified check 10% payable to county clerk required with bid. Specifications obtainable from clerk on deposit of \$25, returnable

BUTTE COUNTY, Cal.—R. B. McKenzie, Red Bluff, at \$32,370 awarded contract by State Highway Commission to construct substructure of a bridge over North Fork of the Feather River at Pulga, consisting of two reinforced concrete abutments, two reinforced concrete piers, six concrete footings and four erection anchors

EUREKA, Humboldt Co., Calif.—County Surveyor Frank Kelly instructed by county supervisors to make preliminary surveys for a bridge across the Eel River at Shively, in southern Humboldt county.

STOCKTON, San Joaquin Co., Cal.—U. S. War Department has authorized the county supervisors to construct bridge over the San Joaquin River near Stockton to replace the present Garwood Ferry bridge. The county supervisors have set aside \$70,000 in the present budget and early construction is contemplated. Bridge will be of the draw span type with 21 ft. roadway and 302 ft. in length over all; swing span will be 258 ft. long. Julius Manthey is county surveyor.

SANTA BARBARA, Cal.—Roy L. Richardson & Son, 2611 Orela St., Santa Barbara, awarded contract by the county supervisors at \$5940 to construct reinforced concrete bridge on Patterson Ave. over San Jose Creek. The other bids were: J. J. Munnenan, \$6480; Silveria & Robbins, \$6800; W. M. Ledbetter & Co., \$7200; J. F. Kuhns Const. Co., \$7650.

BUTTE COUNTY, Cal.—J. H. Pomerooy Co., 251 Kearny St., San Francisco, at \$139,648, submitted low bid to State Highway Commission, Dec. 3, to construct steel bridge with concrete deck over the tracks of the Western Pacific Railroad and across north fork of Feather River at Pulga, composed of one 349.95 ft. steel arch span, one 32.14 ft. plate girder span, one 79.06 ft. plate girder span, two 52.51 ft. plate girder spans and one 44.02 ft. plate girder span. Project involves: 590 cu. yds. class A Portland cem. conc.; 92,000 lbs. reinf. steel; 1-540,000 lbs. struc. steel including erection steel; 35,000 lbs. cast steel; 59,000 lbs. struc. in railing; 34,000 lbs. cast iron in railing; 1000 lbs. bronze expansion plates; 1 lot misc. items of work. A complete list of bids follows:

J. H. Pomerooy Co.	\$139,548
Rocca & Coletti, San Rafael	148,760
Gutleben Bros., Oakland	158,215
M. B. McGowan, S. F.	161,550
C. J. Nystedt, Oakland	171,590
Minneapolis-Moline Power Implement Co., Los Angeles	172,897

DREDGING, HARBOR WORKS & EXCAVATIONS

MARE ISLAND, Cal.—Navy Department has provided \$50,000 for preliminary work in connection with the construction of a 7000 ft. seawall at the Mare Island Navy Yard. The wall will be built south from Independence Dock toward the Magazine Wharf. A portion of the \$50,000 will be used in dredging and trestle work.

STREET LIGHTING SYSTEMS

VISALIA, Tulare Co., Calif.—Butte Electrical and Manufacturing Co., 956 Folsom St., San Francisco, at \$19,999.50 awarded contract by city council (137-C) to install ornamental electrolit system with 52 two-light standards, together with underground system in portions of North and South Locust St.; North and South Court St., etc. Standards of Union Metal Mfg. Co.'s Design No. 2281. Bid was \$50 less than the next low bidder.

RED BLUFF, Tehama Co., Cal.—Butte Electric & Manufacturing Co., 956 Folsom St., San Francisco, at \$3873 awarded contract by city council (191-D) to install ornamental street lighting standards together with underground system in Walnut St., etc. Standards of Union Metal Mfg. Co. Design No. 762, 1 light. Complete list of bids follow:

Butte E. & M. Co.	\$3873
City Imp. Co., Berkeley	3968
Luppen & Hawley, Sacramento	4107
Cox Elec. Co., Red Bluff	4321

MACHINERY AND EQUIPMENT

CARMEL, Monterey Co., Cal.—Farmer's Mercantile Co., Salinas, at \$2225 with an allowance of \$650 on a turn-in, awarded contract by city council to furnish a tractor for the street department and at \$1375 for a grader, allowance on a turn-in, \$50 for the present grader.

SOUTH GATE, Los Angeles Co., Cal.—Until 7:30 P. M., Dec. 16, bids will be received by the city council for furnishing:

- (1) One 21-passenger bus chassis;
- (2) One 21-passenger bus body;
- (3) One 21-passenger bus, bidder to furnish complete descriptive literature and specifications.

E. R. Adams, Bus Superintendent. Certified check or bond, 10%. H. C. Peiffer, city clerk.

TORRANCE, Los Angeles, Cal.—Until 8 P. M., Dec. 16, bids will be received by the city council for trucks as follows:

One 6-cyl. 1½-ton truck, with cab, and equipped with Duo Drive wheels, 6-ft.x11-ft. platform stake body, and Wood Hydraulic Hoist. Delivery to be made in 5 days.

One 4-cyl. 1½-ton truck, with cab, also equipped with Duo Drive wheels, 6-ft.x9-ft. platform stake body, and Wood Hydraulic Hoist of two or more ton capacity. Delivery to be made in 5 days.

A. H. Bartlett is the city clerk.

FRESNO, Fresno Co., Cal.—Until December 16, 7 P. M., bids will be received by J. O. Steinhauer, Clerk, Orange Center School District, to furnish one school bus for transportation of pupils. Bids must not exceed \$2000. Certified check or bidder's bond 10% required with bid. Specifications obtainable from clerk.

LA MESA, San Diego Co., Cal.—Advertising for bids for a new crawler type, 15 h.p. tractor, with an 8-ft. scraper blade and scarifier attachments, for the street department, has been ordered by the city council.

OAKLAND, Calif.—Until December 10, 8 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., to furnish five standard model A Ford Coupes, allowances to be made for cars no longer required by the district. Further information obtainable from secretary.

SANTA CLARA, Santa Clara Co., Cal.—City trustees reject bids to furnish and deliver a motor driven street sweeper. It is probable that the equipment will be purchased in the open market. Go. L. Sullivan, city engineer.

STOCKTON, San Joaquin Co., Cal.—Supervisors authorize county purchasing agent to purchase a motor road grader at a price not to exceed \$3,550. Eugene Graham is county clerk.

FIRE ALARM SYSTEMS

LOS ANGELES, Cal.—Until 11 A. M., Dec. 16, bids will be received by the City Purchasing Agent, 107 City Hall, for furnishing and installing traffic signals on Wilshire Blvd., at Twenty-three intersections.

FIRE EQUIPMENT

SACRAMENTO, Cal.—Seagrave Corp. awarded contract by city council to furnish a 750-gallon pumping unit for proposed new fire station at Stockton Blvd. and Sixth Ave.

RESERVOIRS AND DAMS

GLENDALE, Los Angeles Co., Cal.—Until 10 A. M., Dec. 30, bids will be received by the city council for the construction of two reservoirs on the city reservoir site, in accordance with plans prepared by P. Diederich, city plant superintendent. The reservoir will be built of rectangular shape, 22 ft. deep, with an area of 238,322 sq. ft. The reservoirs will be constructed adjoining, providing a total capacity of 35,000,000 gallons. They will be of the retaining wall type with reinforced concrete roof. The construction involves:

26,000 cu. yds. reinforced concrete;
160,000 cu. yds. excavation;
10,000 cu. yds. tamped embankment;
22,000 cu. yds. earth placed on concrete roof.

VICTORVILLE, San Bernardino Co. Cal.—Mojave River Irrigation District has filed application with the State Department of Public Works, Division of Water Rights, seeking authorization to divert 55,000-ac. ft. of water a year from Deep Creek and the west fork of the Mojave River in San Bernardino County. Dam and diversion works are estimated to cost \$1,500,000 and are to irrigate 26,878 acres. Dam will be 20-ft. high and 75-ft. long.

SANTA ANA, Orange Co., Cal.—The Hoover-Young Water Commission is reported to have included in its recommendations an item of \$15,000,000 for flood control works on the Santa Ana River. The final report of the commission is being drafted. From reliable sources, it was learned that the federal-state report will embrace the following outstanding features:

1. \$76,000,000 Kern dam in the upper Sacramento river, to be used for flood control, power development, salt water control, and increased navigation of Sacramento River.
2. \$5,000,000 industrial canal, to carry fresh water for irrigation and power purposes.
3. \$35,000,000 Friant dam on the San Joaquin river in Fresno county to supply water for the thirsty farm lands of southern San Joaquin Valley, now irrigated by wells.
4. \$24,000,000 series of booster dams at the mouth of the San Joaquin river, Sacramento to the San Joaquin, to transfer surplus water from the
5. \$15,900,000 for flood control works on the Santa Ana river in Southern California.

The Friant dam and the industrial dam are two entirely new projects proposed as part of the co-ordinated water program for the State of California.

PIPE LINES, WELLS, ETC.

WHITTIER, Los Angeles Co., Cal.—Until 7:30 P. M., Dec. 8, bids will be received by the city council for

CONTRACTORS' MACHINE WORKS SPECIALISTS ON REPAIRING AND REBUILDING OF

furnishing steel pipe, including fittings, as follows:

- (1) 143 ft. 30-in.;
- (2) 39 ft. 24-in.;
- (3) 210 ft. 10-in.

Specifications may be seen at the office of Mrs. Debbie E. Allen, city clerk. Certified check or surety company bond, 10%.

LINDSAY, Tulare Co., Cal.—Until December 16, 7:30 P. M. bids will be received by E. V. Bogart, city clerk, to drill and case well in Lindsay Park on north city limits. Specifications on file in office of clerk.

SANTA CLARA, Santa Clara Co., Cal.—City trustees order bids advertised to drill new 16-inch well at municipal water plant. Specifications obtainable from City Clerk Cronin, Geo. L. Sullivan, city engineer.

SEWERS AND SEWAGE DISPOSAL PLANTS

SACRAMENTO, Cal.—J. R. Reeves Co., 12th and American River, Sacramento, at \$16,995.85 awarded contract by city council to construct field drainage system at Municipal Airport.

BERKELEY, Alameda Co., Cal.—J. M. Haney, 1707 Cedar St., Berkeley, at \$43,70 awarded contract by city council to construct storm sewer in Indian Rock Path from Arlington Ave. easterly. Other bids: R. H. Donner, \$457; W. J. Tobin, \$483.

SALINAS, Monterey Co., Cal.—R. H. Downer, 1324 Paloma Ave., Burlingame, at \$4986.30 awarded contract by city council to construct sanitary sewer in Hoover St., a sanitary sewer in alley in Block 4½ Sherwood and Hellman Addition to Salinas; a sanitary sewer in Cattleman's Lane; a storm sewer from National St. to Wilson St. storm sewer; and a storm sewer from the Southern Pacific Railroad to the Reclamation Ditch. Complete list of bids follow:

R. H. Downer.....	\$4986
Oakland Sewer Constr. Co.....	5379
Salinas Valley Concrete Pipe Co.....	5786
W. J. Tobin.....	5818
T. & H. Constr. Co.....	7280

BERKELEY, Alameda Co., Cal.—Until December 9, 10 A. M., bids will be received by Florence E. Turner, city clerk, to construct sewer in Third St. from Gilman St. to Camella St. Certified check 10% payable to city required with bid. Plans obtainable from city engineer on deposit of \$10, returnable.

GONZALES, Monterey Co., Cal.—Election will be held in January in the Gonzales Sanitary District to vote bonds of \$40,000 to finance construction of a sewer system. Members of the district are: Bert M. Carney (chairman); L. Vidroni; M. H. Woodworth and Enos DeCarli.

REDWOOD CITY, San Mateo Co., Cal.—Until Dec. 15, 10 A. M., bids will be received by Elizabeth M. Kneese, county clerk, (19) to construct sewer system in Daly City and Colma Sections; estimated cost, \$146,000. Project involves:

- Vit. Clay Pipe Sewer
- 66,000 lin. ft. 6-in.
- 1,600 lin. ft. 8-in.
- 4,600 lin. ft. 10-in.
- 2,900 lin. ft. 12-in.
- 5,400 lin. ft. 15-in.
- Cast Iron Pipe Sewer
- 2,100 lin. ft. 8-in.
- 200 lin. ft. 14-in.

- Vit. Clay Wye Branches
- 1,740 6x4-in.
- 20 8x4-in.

- 70 10x4-in.
- 100 12x4-in.
- 50 15x4-in.
- 330 manholes
- 1 concrete sedimentation tank.
- 1 gravel sludge bed with concrete floor.
- 2 brick pump sumps.
- 2 400-gal. p.m. pumps.
- 2 500-gal. p.m. pumps.
- 1 140-gal. p.m. pump.
- 2 concrete pumphouses.
- 1 corrugated iron pumphouse.

Work under 1911 Act and County Imp. Act, 1921. Plans on file in office of clerk. R. A. Klassen, engineer, Redwood City.

MISCELLANEOUS CONSTRUCTION

SAN FRANCISCO—Until January 12, bids will be received by the Board of Supervisors for the construction and operation of a new incinerator. Plant shall handle 800 tons of garbage a day and shall revert to the city free of cost at the end of 25 years, unless purchased before that time. The charge per ton shall not exceed \$1. Specifications and further particulars obtainable from J. S. Dunnigan, Clerk of the Board of Supervisors, 2nd Floor, City Hall.

WATER WORKS

SAN FRANCISCO—Until December 5, 11:30 A. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to furnish and install water supply system in Sunset Blvd. Estimated cost \$35,200. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN FRANCISCO—Until December 12, 10 A. M., under Schedule No. 928-31-139, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver pressure type water softener. The normal operating capacity per regeneration shall be 75,000 gallons based on water with 3.0 grains hardness per U. S. gallon. Softener shall have a normal softening rate of 100 gallons per minute. Softener shall have a maximum rate of flow of 140 gallons per minute. The maximum rate of flow shall not exceed 5 gallons per minute per square foot of zeolite area.

MERCED, Merced Co., Cal.—Until December 12, 11 A. M., bids will be received by S. P. Galvin, secretary, Merced Cemetery District, to furnish f.o.b. the cemeteries, galvanized iron pipe (American made) in quantities listed in the specifications which are obtainable from W. E. Bedesen, engineer, Shaffer Bldg., Merced.

SAN FRANCISCO—As previously reported, bids will be received December 5, 11:30 a. m., to furnish and install water supply system in Sunset Blvd.; estimated cost \$35,000. Project involves:

- (1) 10,800 lin. ft. 4-in. c.l. pipe;
- (2) 5,450 lin. ft. 2-in. galv. w.l. pipe;
- (3) 9,324 lin. ft. 1½-in. do.;
- (4) 16,920 lin. ft. 1¼-in. do.;
- (5) 27,405 lin. ft. ¾-in. do. (sprinkler lines);
- (6) 5 4-in. body, brass trimmed, wedge gate, non-rising stem, standard valves, with hub ends, including 4-in. valve boxes and covers and socket wrenches;
- (7) 270 brass lawn cocks, hinged cover and outlet threaded for 1-inch hose with 20 keys for above;
- (8) 30 brass boxes with hinged covers for 2-in. gate valves.

All items, furnished, delivered, installed and connected, ready for operation. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN FRANCISCO—Following bids received by City Purchasing Agent under Proposal No. 661, to furnish and deliver cast iron pipe, tar coated (made in U. S. A.) for Municipal Water Department:

- (a) 30,000 ft. 6-in.
- (b) 30,000 ft. 8-in.
- National C. I. Pipe Co., (a) \$52; (b) \$72 (both sizes sand spun).
- H. B. Squires, (a) \$6025; (b) \$5575 (18-ft. lengths).
- U. S. Pipe & Foundry Co., (a) \$515; (b) \$72.
- Pacific C. I. Pipe Co., (a) \$52; (b) \$735.
- American C. I. Pipe Co., (a) \$50; (b) \$735.
- The Central Foundry, (a) \$525; (b) \$735.

All bids based on delivery 45 to 60 days. Taken under advisement.

COALINGA, Fresno Co., Cal.—Hickey Pipe and Supply Co., Coalinga, at \$36 cwt. (immediate delivery) awarded contract by city council to furnish 5,000-ft. 3-inch lap-welded pipe line (7.70). Complete list of bids follows:

Richmond Sanitary Co., San Francisco (ent. mtd.).....	\$33.12
Santa Fe Pipe & Supply Co., Los Angeles.....	34.75
C. G. Claussen & Co., Inc., S. F.....	35.66

SANTA CRUZ, Santa Cruz Co., Cal.—Granite Const. Co., Watsonville, at \$8,333.96 awarded contract by county supervisors to pave Palm Ave. just outside the Watsonville city limits.

SANTA BARBARA COUNTY, Cal.—Macco Construction Co., Clearwater, at \$22,518 awarded contract by State Highway Commission to grade and pave with Portland cement concrete, 0.3 mile at Nojoqui Creek.

MARIN COUNTY, Cal.—Granfield, Farrar & Carlin, 67 Hoff Ave., San Francisco, at \$189,633 awarded contract by State Highway Commission to grade and surface with bituminous macadam, 3 miles between Alto and Waldo.

SALINAS, Monterey Co., Cal.—Until December 15, 7:30 P. M., bids will be received by M. R. Keef, city clerk (91) to improve Pajaro St. bet. Sausal and Lake Sts., involving grading, hyd. cement concrete curbs, sidewalks 6-inch hyd. cement concrete pavement. 1911 Act, Bond Act 1915. Certified check 10% payable to city required with bid. Plans obtainable from Howard Cozzens, city engineer.

HAYWARD, Alameda Co., Cal.—City council declares intention (826) to improve Prospect St., bet. Simon and Warren Sts., and Warren St., bet. Main and Prospect Sts., involving:

- (1) 700 sq. ft. concrete sidewalk;
- (2) 202 lin. ft. 4-in. vitrified clay side sewer;
- (3) 34,923 sq. ft. 6-inch full penetration Emul. Asph. macadam paving, including grading;
- (4) 54 lin. ft. redwood headerboard.

Estimated cost \$5000. 1911 Act and Bond Act 1915. Hearing December 3. M. B. Templeton, city clerk. Jesse B. Holly, city engineer.

OAKLAND, Cal.—On recommendation of City Engineer Walter N. Frickstad, the city council has cancelled a contract awarded to Hutchinson Co., Oakland, for patented paving in Fourteenth Ave., between E-12th and E-22nd Sts. The contract awarded on a bid of approximately \$80,000. The contractors will be paid \$9500 for work already completed. New bids will be asked to pave the street from E-12th to E-14th Sts., and the balance of the work indefinitely postponed.

LAS VEGAS, Nevada—Until 10 A. M., Jan. 7, bids will be received by the U. S. Bureau of Reclamation, Las Vegas, Nev., for furnishing labor and materials and performing all work for the construction of a highway, approximately 7 miles long, from the vicinity of Boulder City to the Hoover Dam Site, Boulder Canyon Project, Arizona-California-Nevada. The work is located about 25 to 30 miles southeast of Las Vegas, Nev., which town is on the main line of the Los Angeles and Salt Lake (U. P.) Railway. The principal items are:

- (1) 418,720 cu. yds. open cut excav. (all classes);
- (2) 6000 cu. yds. tunnel excav.;
- (3) 249,000 cu. yds. overhaul;
- (4) 2000 cu. yds. backfill;
- (5) 160 cu. yds. concrete;
- (6) 5000 cu. yds. concrete crib wall;
- (7) 5600 sq. yds. dry rock paving (placing);
- (8) 8000 lbs. reinforcement bars (placing);
- (9) 30 M. ft. b. m. erecting permanent tunnel timbering;
- (10) 45 M. ft. b. m. erecting timber in bridge;
- (11) 4510 ft. 18-in. to 72-in corr. metal pipe (laying);
- (12) 29,000 cu. yds. gravel surface (furnish and place);
- (13) 147,000 sq. yds. oil treating surface;
- (14) 27,000 lin. ft. guard rail.

This call for bids does not cover the purchase of materials to be furnished by the government. Materials to be furnished by the contractor and those furnished by the government are described in the specifications which will be a part of the contract. For further information bidders are directed to address the Bureau of Reclamation, Las Vegas, Nevada; Denver, Colo.; or Washington, D. C. Elwood Mead, Commissioner.

WATSONVILLE, Santa Cruz Co., Cal.—Until December 9, 7:30 P. M., bids will be received by M. M. Swisher, city clerk (1980) to improve Roosevelt St. from California to Stanford St., involving grading, macadamized and oiled with asphaltic oil, concrete curbs and gutters. Certified check 10 per cent payable to Mayor of city required with bid. Plans obtainable from H. B. Kitchen, city engineer.

BRICK SIZES AND BRICK LAYING

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, 3rd floor, City Hall, completes specifications to improve crossing at Jennings St. and Underwood Ave.; estimated cost \$1,875. Project involves:

- (1) 95 lin. ft. armored concrete curb;
- (2) 660 sq. ft. 1-course concrete sidewalk;
- (3) 3 brick catchbasins;
- (4) 62 lin. ft. 10-in. V.C.P. culvert;
- (5) 4,413 sq. ft. asphalt concrete pavement, 2-in. asphalt, conc. surface on 6-in. class F conc. base.

NEVADA COUNTY, Cal.—Until December 23, 2 P. M., bids will be received by State Highway Commission to grade 7.4 miles between 1 mile west of Washington Road and $\frac{1}{2}$ mile east of Summit. (Date previously set for opening was December 21).

See call for bids under official proposal section in this issue.

EUREKA, Humboldt Co., Calif.—County Surveyor Frank Kelly instructed by county supervisors to make a survey for a road to Shively by way of Elinor.

LUMBER TERMINAL ON HARBOR PROPOSED

Plans for development of one of the largest lumber terminals on the west coast at Islais Creek are announced by the Board of Harbor Commissioners.

The project, which follows steps already taken by the Islais Creek reclamation district, calls for an additional expenditure of more than \$1,000,000 in providing spacious and up-to-date wharves for the loading and discharge of lumber.

That the improvement is badly needed is indicated by the fact that nearly a dozen small and large lumber concerns are now using the south side of Islais Creek channel for their lumber operations.

When the proposed project is complete, the north side of the channel, where fifteen acres are owned by the McCormick Lumber Company, will be available for wharves. This will greatly relieve congestion.

Already the reclamation district has started construction of a sea wall on the north side of the channel. When this is completed the state will build its new piers, according to Chief Engineer Frank G. White.

Lumber men of the city and lumber shippers of the Coast have been vitally interested in the scheme for the last six months and have held several meetings to further the plans.

San Francisco is the port of entry for most of the lumber consumed in California and the Western section of the country, and the local terminal, already well served by railroads, will have even better rail facilities when the reclamation and development project is complete.

Gross earnings of the Southern California Edison Company, Ltd., for the ten months ended October 31st, at the voluntary lower rates effective this year were \$34,444,140.20 as compared with \$33,600,833.80 for the same period of 1929. The announcement was made by R. H. Ballard, president of the company. This was an increase of \$843,306.40 or 3 per cent. Net earnings, after deductions for operating expenses and taxes for the first ten months, were \$23,301,894.02 compared with \$22,655,600.19, an increase of \$646,293.83 or 3 per cent. The amount remaining for dividends and depreciation, after fixed charges, was \$17,428,962.56 in 1930 compared with \$17,119,879.40, bringing the balance for the year to date \$309,083.16 above last year.

Every now and then someone becomes mildly excited about the size of the burnt clay brick or about the fact that brick are laid today pretty much in the same way they were in Abraham's day at Ur. It is a subject very much like the weather, of which Mark Twain once said everybody seemed to be talking but no one was doing anything about it.

The chief cause of concern appears to be the fact that no drastic changes have taken place in either the method of making brick or the laying of them.

But when you come to consider this, without bias, it doesn't stand up as anything for which brickwork should be condemned or even censured. Change isn't absolutely necessary to excellence. And while perfection is difficult to reach, the effort becomes always more trying the nearer you approach it.

The Lord, you know, is growing trees today just as He did in the days of Eden. And while some folks pretend to believe that somewhere about that time man lost his prehensile tail it isn't a matter of record that he has changed much from Father Adam.

Most of this unrest is due to the increasing passion for new models every spring, for which we have to thank those automobile manufacturers who could find no other way to attract the attention of the average man from Henry Ford and his "Tizzle."

Brick manufacturers, generally, would welcome any new type of brick of which they could make and sell more. And any method of bricklaying which would set brick into the wall more speedily and better. They appreciate just as much as any of the critics of their product that could bricks be laid ten times as fast as they are today there would be no competition for the masonry wall, which is the best wall man has yet devised, everything considered.

But the genius hasn't yet appeared who can solve this problem. Machines have been made to do pretty

nearly everything but lay bricks or turn them out in finished form laid up in sections ready to assemble in the wall. All this advancement, which these occasional spokesmen for the public demand, are things for the future consideration of the inventors and—yes, the labor unions, which might, meantime, by abrogation of some of their restrictive and senseless rules, do much to increase the day-output of the mason and prolong the life of the brick industry and the art of bricklaying.

This apparent lack of initiative on the part of the brick industry, is capitalized always by its rivals in the synthetic material field. Yet despite their frequent wild claims of excellence and superior adaptability none of them have furnished a better wall from any viewpoint, while most of them are under suspicion by the experienced and high-grade builder, architect and engineer. None of them live up to their claims. Nor is any one of them cheaper, quality considered.

Nothing could be more fallacious than the idea that burnt clay products are in any sense deficient because they are made today just as they were a thousand years ago, or at least upon the same principles. Methods sometimes change but usually principles are fixed and endure. Innovations aren't always for the best. The sun has spots occasionally, which play hob with weather conditions. If the science sharps are to be believed, but the sun is just as potent today as it was a million years ago—yet it hasn't changed.

And when some Moses appears along to point the way to bigger and better things for the brick industry, that industry may be depended upon to rise up and call him blessed. It isn't asleep nor lacking in interest. It has simply brought its product a little nearer the ultimate in quality than most others.

OAKLAND BUILDING SUMMARY

A. S. Holmes, city building inspec-
tor of Oakland, reports the issuance
of 244 permits during the month of
November, 1930, for improvements
valued at \$366,616. Following is a
segregated listing of the November
activities:

OFFICIAL PROPOSALS

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C. Nov. 23, 1930.

SEALED BIDS will be opened in this office at 3 P. M., January 12, 1931, for the construction of the U. S. post office, etc., at Santa Ana, Cal. Drawings and specifications, not exceeding six xts., may be obtained at this office in the discretion of the supervising architect by any satisfactory general contractor, and provided a deposit of \$25.00 is made for each set to assure its prompt return. Checks offered as deposits must be made payable to the order of the Treasurer of the United States.

JAS. A. WETMORE,
Acting Supervising Architect

STATE OF CALIFORNIA**DEPARTMENT OF PUBLIC WORKS****DIVISION OF HIGHWAYS****NOTICE TO CONTRACTORS**

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on December 23, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Nevada County, between the mile west of Washington Road and one-half mile east of Summit (111-Nev-13-C,D), about seven and four-tenths (7.4) miles in length to be graded.

Proposal forms will be issued only to those contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor in whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and Sacramento, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on December 17, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

San Luis Obispo County, between Paso Robles and the northerly boundary (V-SLO-2-A), about ten and nine-tenths (10.9) miles in length, to be graded and paved with asphalt concrete.

Santa Barbara County, between Gaviota and one mile north of Las Cruces (V-SB-2-E), about two and eight-tenths (2.8) miles in length, to be graded and paved with Portland cement concrete.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS

C. H. PURCELL,
State Highway Engineer.
Dated November 19, 1930

Building permits issued in Palo Alto during November, 29 in number, registered a total of \$88,125 as compared with \$325,105 for the corresponding period in 1929. Last month 7 permits were issued for residences costing \$36,900 and for a church building to cost \$20,000.

PROPOSED AMENDMENT, ETC.

(Continued from Page 1)

waiver, whenever the fact be established that the required number of laborers and mechanics possessing such qualifications cannot be engaged to perform labor thereunder. The foregoing provisions designated (1), (2), (3) and (4) must also apply to persons performing labor in the commissary or other auxiliary department of labor conducted in the course of the execution of such contract or any part thereof; and the said provisions shall also apply in any work done for or by the City and County, or by any officer, board, commission or department thereof, when such work is to be done at the expense of the City and County or paid for out of moneys deposited in the treasury. Any violation of any of the aforesaid provisions shall be held to subject the contractor to the penalty of ten (\$10.00) dollar a day for each laborer, mechanic or other person required or permitted to perform labor in violation of any provision of the contract, and shall disqualify the contractor from thereafter being held to be a responsible bidder on future contracts for work to be awarded under this Charter; any moneys due, credits earned, or bond filed by the contractor to secure the faithful performance of the accruing under the contract, and an action for the recovery of such penalty shall accrue to the City and County or the proper office or department thereof against the sureties on such bond, without previous demand upon the contractor for the payment thereof; and where the City and County or the treasury is indebted such contractor for work done under the contract, the amount of the penalty may be withheld or deducted from the moneys due and owing. Any officer of the City and County responsible in whole or part for any violation

of the provisions of this section shall be deemed guilty of misfeasance and upon proof of such misfeasance and be removed from office. The Board of Supervisors shall have power and authority to make and enforce regulations in the premises not in conflict with the provisions thereof.

The Sidney Lumber Company at Sidney, B. C., announces it has successfully operated its mills at Sidney, for the past three months' on a strictly profit sharing basis with 125 employees sharing the proceeds of lumber sales. No attempt was being made to earn a return upon the \$600,000 investment, officials said. The employees now have signed for a second three months' period, terminating March 1. Earnings to the employees distributed since last July, officials said, have been substantially larger monthly than the nominal wage scale. The mill is working at 110,000 feet capacity a day as against the old turnout of about 150,000 feet, the announcement said.

An amendment to the Los Angeles plumbing and gas-fitting ordinance, that was introduced by the gas appliance interests, two months ago, and which if passed would have permitted their employees to install certain gas heating appliances, without their first having passed an examination of qualification as gas-fitters, has been withdrawn.

Selection of San Francisco for the next annual Pacific Coast Regional meeting of the safety section of the American Railway Association on January 19, is announced. J. B. Monahan, safety supervisor for the Southern Pacific, has been appointed chairman of the session, according to H. A. Rowe, president of the association. More than 250 safety leaders of railroads and general industries are expected to attend.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

GAS APPLIANCES TO BE REGULATED

A new project for the establishment of American Standards for the basic requirements of gas appliances has just been announced by the American Standards Association. The project will be placed in the hands of a technical committee under ASA procedure at the request of the American Gas Association which will direct the technical work of the committee.

The scope of the work as agreed upon by the American Standards Association is the "establishment of minimum or basic requirements for performance, safe operation, and substantial and durable construction for domestic gas burning appliances; together with laboratory methods of test for determining compliance therewith."

A committee of the American Gas Association has been working on this subject for a number of years. This committee, enlarged to assure balanced representation of producers, distributors, consumers, and other important groups will now continue this work under ASA auspices. Acting under the chairmanship of Mr. R. B. Harper, of the Peoples Gas Light and Coke Company, Chicago, Illinois, the committee will include representatives of U. S. Bureau of Standards; U. S. Bureau of Mines; U. S. Department of Agriculture; U. S. Public Health Service; U. S. Bureau of Home Economics, (Department of Agriculture); American Home Economics Association; Master Plumbers' Association; Heating and Piping Contractors National Association; Five individual gas companies; Seven individual gas appliance manufacturers.

Jack Elliott Joins America-Security Corp.

John S. (Jack) Elliott, well known San Francisco surety underwriter, has become associated with the America and Security Insurance Corporation, a superintendent of the general agency's fidelity and surety department, it announced by Vice-President M. B. Waterbury. The America & Security which is California general agent for the Central West Casualty of Detroit, already has a substantial volume of surety business and the appointment of Elliott at this time is in line with the agency's program of further expansion, according to Waterbury.

Jack Elliott has been on the street for many years, having been superintendent of the Globe Indemnity's fidelity and surety department in recent years. When he recently resigned from the Globe Indemnity he had been with that company for over fourteen years. Elliott is admitted to the practice of law in California. In addition, he served as Secretary of the Northern California Surety Underwriters' Association for a number of years and has taken a keenly active interest in association activities.

STANDARD ELECTRIC TIME WILL PROTECT USERS OF EQUIPMENT

"Our company agrees to prevent injury, damage or annoyance to any customer who purchases our apparatus," says R. N. Smith, manager of the Standard Electric Time Company, in answer to a complaint filed against his company by the Connecticut Telephone and Electric Corp. of Meriden, Conn., claiming an infringement of patent.

The Connecticut Corp. claims the Standard Company is infringing on six of its patents on electric signaling and lighting equipment.

The Standard Electric Time Company refutes the claim of the Connecticut Corporation in its entirety.

"Our company when starting its Berkeley, Calif., plant several years ago for the manufacture of such apparatus, retained one of the most prominent firms of patent attorneys in the United States to make sure that no patents were infringed by any of its apparatus and secured absolute assurance that no infringement was involved," says Smith.

"To vindicate our position the Standard Electric Time Company has already secured patents on three of the devices upon which the Connecticut Corporation claims infringement. This litigation is more in the nature of a friendly action to determine the exact status and value of the various patents owned by each manufacturer and the case may be settled in the near future without further litigation," Smith declared.

COAST LUMBER MERGER RUMORED

A huge Pacific Coast timber merger, involving millions, is in the making, it became known here yesterday.

Negotiations are under way by the Raymond Lumber Company, the Lewis Mills and Timber Company, the Willapa Lumber Company and the Weyerhaeuser Timber Company.

Also heavily interested in the merger is the Sudden and Christensen Lumber Company.

Operating properties of the first three companies and timber lands of the Weyerhaeuser Company in Pacific County, Washington, are involved.

According to dispatches, F. S. Bell, of Tacoma, president of the Weyerhaeuser Company, said:

"If the merger is consummated, the present operating units will continue after January 1 under the name of a new corporation. The merger will make possible various economies in operation.

"There is no change contemplated in the policies of the various companies or in the distribution methods."

The companies are all heavily represented in this region.

FOREST ROAD WORK SHOWS BIG INCREASE

During the past fiscal year 1,726 miles of roads and 6,175 miles of trails were constructed on the 149 national forests of the United States, according to report from Major R. Y. Stuart, Chief of the U. S. Forest Service. This represents an expenditure of \$10,356,172, of which \$8,883,595 was Federal funds and \$1,472,577, cooperative funds.

The estimated expenditures required to complete all road and trail work in the national forests is \$232,588,200 which is divided into forest highways, or first class roads forming part of State or county highway systems within or partly within the national forests, estimated to cost approximately \$19,057 per mile; forest development or secondary roads built by the U. S. Forest Service, estimated to cost \$1,311 per mile, and trails at \$130 per mile. According to the present estimate, when completed, there will be 16,929 miles of forest highways, 51,703 miles of forest development roads, and \$149,768 miles of trails.

To date, \$111,179,571 has been spent by the U. S. Forest Service on roads and trails, representing \$89,122,195 road funds, \$2,152,933 other Federal funds, and \$19,904,743 cooperative funds. This sum has accomplished the construction of 18,455 miles of roads and 53,452 miles of trails. Highways or major roads have cost an average of \$14,368 per mile; forest development roads \$1,327 and trails \$171 per mile.

At present there is an annual authorization of \$12,500,000 for the construction and maintenance of roads and trails in national forests. Of this amount, \$9,500,000 is legislatively set aside for forest highways or major roads and \$3,000,000 for forest development roads and trails.

BRITISH ALUMINUM STANDARDS

The British Engineering Standards Association has just issued a group of standards relating to aluminum. The standards are:

336-1930 Wrought light aluminum alloy tubes for general engineering purposes. This specification covers the alloy generally known as duralumin.

335-1930 Wrought light aluminum alloy sheets and strips. This specification also covers the alloy generally known as duralumin.

335-1930 Pure aluminum tubes for general engineering purposes. This specification covers aluminum tubes up to 6 inches and gives test information.

336-1930 Pure aluminum bars and sections for general engineering purposes (excluding wire bars).

338-1930 Aluminum powder for paints. This specification is one of a series of about 60 specifications for paints, varnishes, and paint ingredients.

MODIFICATION OF STREET IMPROVEMENT LAWS PROPOSED

(Reprint from Southwest Builder and Contractor)

A preliminary report on revision of the street improvement laws of California was submitted at a final meeting of the Joint Legislative Committee held in Los Angeles December 1. After hearings conducted over a period of several months and a study of the situation as presented the committee makes the following recommendations:

First—The establishment of a debt limitation.

Second—That the city or county supervise the circulation of petitions for public improvements and that it be required that each petition circulated contain the following information:

(a) Assessed valuation of the property within the lines of the proposed assessment district.

(b) The existing indebtedness against the property within the assessment district for public improvements.

(c) The estimated cost of the work.

(d) That said petitions be prepared by the city or county authorities to be issued to property owners only residing within the district proposed to be improved.

Third—That in the larger cities and counties provision be made for the appointment or establishment of a commission for the purpose of investigating proposed local improvements to determine the necessity, feasibility, cost, present outstanding indebtedness for local improvements, and assessed valuation of the property within an assessment district, with authority to confer with property owners as to the necessity and desirability of the proposed project, said commission being required to report to the legislative body of the city or county the facts found.

Fourth—This committee recommends that the city authorities make a more careful study of a comprehensive plan of improvement projects to be made, with a view to co-ordinating assessment districts in order that overlapping assessments, so far as possible, may be eliminated and that the cost of the work may be more evenly distributed among property owners.

Fifth—The elimination of the provision in special assessment statutes providing for the levy of an assessment on the ad valorem plan and providing in lieu thereof that assessments against property for local improvements be specific charges against individual properties within the assessment district.

Sixth—The repeal of all local improvement acts, except one act for the construction of local improvements, one act for the opening, widening and straightening of streets and one act for the acquisition and improvement of parks, street lights, etc., and in this respect this committee recommends that those acts which have been used for a period of time covering these types of improvements be continued in force with the amendments hereinafter recommended.

Seventh—The repeal of provisions of all statutes providing for enforcement of special assessments through filing of suit and that provision be made for the foreclosure of assessments through the office of the city or county treasurer.

Eighth—That provision be made for allocation of a portion of gas tax funds to municipalities to be used to defray a portion of the cost of major projects.

Ninth—Amendment to the law to provide that in the acquisition or improvement of streets exceeding 60 feet in width, the difference in cost of the acquisition and improvement of the street to 60 feet and the cost of the acquisition and improvement of the street to whatever width constructed in excess of 60 feet be paid for out of the general funds of the city or county, as the case may be.

This committee has determined that the improvement acts should be amended in many respects of less importance than those hereinbefore pointed out, among which are the following:

First—That assessments collectible in cash be, in all cases, collected directly by the city or county with the elimination of collections by contractors.

Second—The reduction of penalties charged for delinquencies so far as this is possible without jeopardizing the enforcement of collections, and the reduction of the maximum interest rate to eight per cent per annum.

Third—The elimination, so far as possible, of technical language in property descriptions in ordinances and notices.

Fourth—Amendment of bond act used in conjunction with the Opening and Widening Act of 1903, to extend term and to provide for automatic issuance as now provided in Improvement Act of 1911.

Fifth—Provision for sending out notices to property owners of proposed changes of grade of streets in proceedings under the Improvement Act of 1911, notifying the property owners of the work to be done in order that claims may be filed for damages suffered.

Discussing its recommendations the committee says:

Debt Limitation

There has been a growing demand on the part of property owners for protection from the action of legislative bodies in placing heavy burdens on property in the form of assessments, by limiting the power of legislative bodies in the institution of proceedings for public improvements. This subject is one which has been much discussed throughout the state and which came before the legislature and the members of this committee at the last session of the legislature. It was felt at that time, however, that the matter had not received sufficient consideration and study to warrant the legislature in taking action. The difficulty of forming a rule of law to take care of arbitrary and unwarranted acts of legislative bodies has been that it is an attempt by law to control that which should be a matter of discretion in legislative bodies.

It is apparent to this committee that in many cases very useful and valuable improvements, valuable not only to the city and county, but to property owners as well, may not appear to be so to some of those who are faced with the immediate prospect of paying the bill, and that a legislative body with vision and foresight may see the benefits to accrue not only to the city, but to property owners, in the making of such an improvement, even though it be costly, and for this reason it is impossible to recommend to the legislature the passage of an inflexible rule, in order that in those few instances which may arise where improvements should go

through, such improvements may in some manner be authorized. The committee recommends as follows:

That if the cost of an improvement or acquisition, when added to other charges against the property for the making of public improvements, exceeds the assessed valuation of the property within the proposed assessment district, the legislative body of the city or county shall not have jurisdiction to proceed with the work. Provided, however, that if the legislative body shall, by a four-fifths vote of its entire membership, find and determine that the estimated cost will not exceed fifty per cent of the estimated benefits of the work or improvement to be made and the city council shall, by resolution, so determine, it shall have jurisdiction to proceed. Said resolution shall set forth the facts upon which said legislative body bases its conclusion that said property shall be so increased in value after which the legislative body shall have jurisdiction to proceed. The committee approves in substance the report on debt limitation of the Los Angeles Chamber of Commerce Co-ordinating Committee on Special Assessments.

Circulation of Petitions

The committee has found throughout all its hearings considerable complaint upon the part of the property owners of the manner in which petitions for public improvements are circulated. It has been represented to the committee, as hereinbefore set forth, that parties interested in selling products used in the making of public improvements have been instrumental in causing the circulation of petitions. That said circulators have either concealed or misrepresented the actual facts in connection with improvements to be made and that property owners are not fully advised as to the facts, with the result that improvements are started and sometimes consummated before property owners get any idea of the actual cost thereof or the burden being placed upon their property. These are merely a few of the objections made to the present system of circulation of petitions and this committee has come to the conclusion that if petitions are to be circulated, the city or county must exercise a very careful supervision thereover in order that property owners may be fully advised of the facts and not be misled by misrepresentations of the circulators.

The committee is advised that there is no provision in any of the improvement statutes at this time requiring the circulation of petitions, but it is merely a matter of local regulation on the part of the legislative bodies. This being true, this committee recommends that the legislative bodies of cities and counties throughout the state amend their local regulations to provide as follows:

That a petition show estimated cost per sq. ft. or per front ft., as necessity requires, of the making of improvement based upon estimated cost thereof, and that said notice contain a statement to the effect that the cost so given is the estimated cost and that the amount to be charged against the property may be in excess of that as estimated in the petition. These requirements should, of course, be supplemented by a statement of the work to be done and a general outline of the tentative assessment district,

and such other matters as shall fully inform the property owner as to what is to be done, etc.

Investigating Commission

It appears to this committee from its investigation that many ill-advised improvements have been constructed throughout the state. This is the result of a system which has placed the responsibility for the construction of public improvements on property owners filing petitions. The method of making public improvements appears to be for property owners to file a petition signed by a majority of the property owners fronting on the proposed improvement. When this is filed action is taken by the legislative body of the city or county to institute proceedings for the making of the improvement described therein, with such alterations as it may deem advisable. The attitude of legislative bodies is that a petition having been signed by a majority of the property owners expressing a desire to have the improvement made, the responsibility for making the improvement rests with said property owners. Investigation has shown that property owners sign petitions with little or no idea of the work to be done or the cost thereof, and with no conception of the burden to be placed on their property when the improvement is completed.

In some instances it has been found to appear to this committee that property owners were of the opinion that the work would be paid for by the city or county and did not realize that the cost would be borne by an assessment district. In many instances petitions are circulated by parties interested in selling materials to the city or county, or who have some financial benefit in view, and if they do not actually misrepresent the work to be done, at least the property owners receive a picture of the benefit alone to be received, without being fully advised as to the cost thereof. In other words, property owners in signing petitions do so without being fully advised as to the work to be done or the cost thereof or other facts in connection therewith, which, if they did know, would, no doubt, result in petition circulating failing to get the required majority of signatures necessary in order to file the same with the legislative body of the city or county and to have the proceeding instituted. The result of this is that no thorough investigation or report as to the facts in connection with the improvement either as to necessity, feasibility, cost, assessed valuation of the property, amount of existing indebtedness against the district or other facts in connection therewith, are brought to the notice of either the property owners or the legislative body of the city or county in instituting proceedings. The result is that numerous and costly improvements are instituted and completed and the sole warrant for so doing is the filing of a petition which did not truthfully represent the sentiment of the district. It requires no argument to support the statement that if property owners paying large assessments today were advised in advance of the improvements made as to the burden which they would be required to meet, the improvements for which they are paying would never have been constructed. Therefore, it is the purpose of this committee to recommend to the legislature at its coming session that provision be made for the appointment of a commission or body empowered with the duty of investigating the facts concerning all improvements to determine the necessity thereof, the feasibility and the cost thereof, to calculate the present outstanding indebtedness against the district and to report as to the assessed valuation

of the property within the assessment district. In other words to be a fact-finding commission with the duty of advising property owners within the district and the legislative body of these facts.

It is the purpose of this committee to also recommend that this commission be given the authority to hold hearings at which property owners may present their objections as to the making of such improvements, and to be given the opportunity to investigate and determine whether or not there is merit in objections so made and to make a full and complete report to the legislative body of the city or county.

Legislative bodies of cities and counties have, in many instances been held responsible for ill-advised improvement projects and have been censured for failure to give full consideration to protests made by property owners. This committee is of the opinion that due to numerous proceedings which have been put thru and which are now being put thru in cities such as Los Angeles, Oakland and San Diego, and other large cities and counties, with the great amount of business of the city or county which must be attended to, it is impossible for legislative bodies, either as individuals or collectively, to fully investigate the facts in connection with improvement projects.

In the city of Los Angeles there are, no doubt, several hundred projects put through each year. With the large volume of city business which must also be taken care of affecting numerous departments of the city, and other matters which must be given consideration, it is impossible for legislative bodies or members thereof to give these matters the serious consideration warranted. However, if these matters are investigated and the facts are placed before the legislative body of the city or county, we have no doubt as to the fairness or responsibility of these officers acting for the protection of the interests of their constituents. Our investigation has shown that many protests are filed by property owners which have merit, but which are not properly drawn and when read do not fully bring home to the legislative bodies the merit of the objection made. This, we believe, will be overcome by charging a commission with the duty of investigating these objections and by giving such commission time and opportunity to see that all objections made are fully investigated.

This committee, in its study of the apportionment of the cost of public improvements, has had brought to its attention the inequalities in the present system of paying for the acquisition and improvement of major traffic arteries. A large volume of traffic has been thought by a great many to be of value to the abutting property in improving the same for business purposes. This may be true to some extent, but this committee is of the opinion that this is, in a large measure, a mistaken view. That the difficulty of parking, or ready access to business properties on such streets and numerous other reasons, do not make the benefit to the abutting property increase in direct ratio to the increased cost of such work.

The purpose of constructing major traffic arteries is for the rapid movement of traffic and is directly beneficial to the city or county at large, with only an incidental benefit to the abutting property. This committee is of the opinion that it is inequitable and unjust to require abutting property owners to pay the entire cost of doing this work and recommends that the cost of acquisition and improvement beyond width of 40 ft. between property lines be borne out of the gen-

eral funds of the city or county or from some other method of contribution. The acceptance of this recommendation is dependent upon a method of financing being worked out. If the legislature accepts the recommendation as to the allocation of gas tax to cities, these funds would be available for such purposes.

There are numerous other matters of less importance in connection with the protection of property owners and in the interest of the expedition of public improvements that have come to the attention of this committee at its public hearings, and this committee desires to make the following recommendations relative to the amendment of public improvement statutes:

The committee does not wish to be understood as recommending the repeal or the revision of the Improvement Bond Act of 1901 or any other statute providing for the issuance of general obligation bonds by municipalities. Neither does it wish to be understood as recommending the repeal of the Acquisition and Improvement Act of 1925, but believes, if possible, this statute with its many features of great merit, should be continued in effect, but should be amended in the manner set out in the first recommendation of the committee hereinbefore referred to.

This report is merely a preliminary report of this committee and is submitted for the purpose of further discussion and consideration by those interested in order that this committee may have the benefit of their criticisms and suggestions in adopting a final report. This committee recognizes the fact that this report does not cover in detail the changes necessary to be made and may be subject to criticism, but it is merely a general statement of the conclusions thus far arrived at by the committee from the hearings heretofore held and this committee asks for and welcomes discussion and criticism of the matters herein set out.

Members of the committee are: Clare Woolwine, chairman; Charles W. Lyon, vice-chairman; Harry Lyons, secretary; Emory J. Arnold, Walter J. Little, Daniel C. Murphy, Frank C. Weller.

MERGE INDEPENDENT MILLS, SAYS GREELEY

Consolidation of the smaller independent lumber mills and timber holdings of Western Oregon and Washington into units of greater resources and financial strength is suggested by W. B. Greeley, manager of the West Coast Lumbermen's Association.

Greeley told members of the Western division of the United States Chamber of Commerce, in session at Portland last Monday, effective adjustment of current production of lumber to the consumptive demand is one of the greatest problems of the industry.

He asked for further clarification or liberalization of statutes dealing with restraint of trade.

Consolidation movements, he said, must lead the way for orderly control of production.

"And this need not take the form of a single, giant merger of timber holdings and operating facilities," Greeley added. "It may come about most practically through a number of consolidations formed by grouping mills or timber holdings in each of the principal lumber producing districts of Western Oregon and Washington."

THE OBSERVER

What He Hears and Sees on His Rounds

According to word from Seattle, no improvement is evident in the skilled building trades and widespread unemployment continues. All trades report large numbers of idle men.

During the latter part of October the largest plant in the Soviet Union for the manufacture of silicate bricks was completed near Moscow. It has an annual capacity of 80,000,000 bricks and 26,000 tons of hydrated lime, and is equipped with the latest technical improvements. The plant has already begun operations and is expected to produce 265,000 bricks a day.

A nation-wide survey of the building industry reveals, the Indiana Limestone Company announces, that construction so far this year has a value of four and a half billion dollars. Records of leading centers, backed by reports from several hundred other cities and towns, makes up a "somewhat checkered picture," President A. E. Dickinson said, but a "more hopeful spirit is permeating the industry and a far better situation may be expected in 1931."

Reorganization plans of the Pacific Coast Electrical Bureau, formerly the California Electrical Bureau, will be announced to the electrical industry of northern California at a dinner meeting to be held Jan. 9 at the Commercial Club, San Francisco. An added feature of interest to commercial men of the industry will be the announcement at the meeting of the 1931 sales program of the Pacific Gas and Electric Company.

Lumber is being sold in Tacoma in a house-to-house canvass by salesmen for the St. Paul and Tacoma Lumber Company. The Tacoma firm reports that 60 per cent of the home owners so far approached were prospects for improvement work of some kind. So successful has been the campaign in the city that the lumber company is planning to extend the effort to other communities. Salesmen will be provided with a list of 130 suggested home improvements involving the use of lumber.

Senator Davis of Pennsylvania introduced his first bill last Wednesday and it showed the influence of the years he spent as secretary of labor.

It was a measure to empower the government to fix the wage to be paid laborers and mechanics employed on public buildings by contractors and sub-contractors.

Davis said it was to maintain the local wage scale and to promote employment of local workmen, rather than the transfer of laborers and mechanics from other communities.

He explained his experience as labor secretary had convinced him frequent shifts of workers often caused them to become public charges far from home.

Sweden is setting the pace for architectural development, Louis La Beaume, noted architect, declared on a visit to St. Louis. "They have developed a modern style that is individual and not bizarre," La Beaume said. He termed the Chrysler building in New York "a damaging advertising stunt of acrobatics."

An investigation by the U. S. Department of Justice of the increase of more than \$1 a ton in the price of steel, just announced by the steel companies, is demanded by Senator Norris of Nebraska.

Norris said he believed the price increase involved a violation of the anti-trust laws. He called attention to the vast amount of steel to be used in the public building program being speeded to provide employment. He said:

"In face of this patriotic movement we are faced with the announcement that the great steel companies, including the United States Steel Corporation, have agreed upon announcing an increase that amounts to more than \$1 a ton.

"It looks to me like a violation of the anti-trust laws. I hope the department of justice will take notice of it."

The trend of building costs in the middle west is indicated by the bidding on a postoffice building at Lafayette, Ind. An appropriation of \$375,000 was made for it several years ago and on a recent letting the job was bid in at \$179,215. There were 21 bidders whose prices ranged up to \$237,250. The average of the bids was \$212,000. The low bidder's price was \$9600 under that of his nearest competitor.

Electrical dealers and contractors have complained long and bitterly of utility competition in the sale of electrical goods, says the Business Week. At their convention, through their trade publications, they have consistently contended that the central stations could safely leave the merchandising field to them without fear of a slump in the annual increase in the power load which is what the utilities are chiefly interested in. Southern California Edison Co., Ltd., is going to give them a chance to prove their case by temporarily withdrawing from direct sales activities in the city of Long Beach, Calif. (1930 population, 141,528). The whole utilities industry is watching the experiment with keen interest.

An interesting and successful use of color in industry has been made in the shoe-making plant of E. T. Wright Co., Rockland, Mass. All ceilings in the plant are painted white, but all machinery, shoe racks, and overhead piping are in color—one color to each department. Colors used are delicate shades of orchid, green, blue, or orange. In offices, telephones, desks and other equipment have been painted to fit the general scheme. Under these conditions it has been found that workers experience less fatigue than formerly; that use of bright colors has removed the dingy and depressing aspect of factory life; that brighter working conditions induce more efficient workmanship. Accidents have from defects.

By unanimous vote the employment committee appointed by Mayor E. E. Roberts of Reno, Nevada, went on record as opposed to any reduction in wages for the building crafts or in other lines. A reduction in wages was

advocated by the pastor of a local church with a view to stimulating new building construction and repairs in an effort to relieve the unemployment problem.

Speaking at a conference of the American Academy of Political and Social Science on the general topic of Security in Industry, Matthew Woll, vice-president of the American Federation of Labor, declared labor's solution of unemployment can be found in higher wages and fewer working hours and days. Woll said adoption of such a plan would increase opportunities for employment and put in a minor role all other unemployment remedies.

Onyx Manufacturing Co. has established a factory at 857 Alabama St., and will fabricate various articles from raw onyx. According to A. D. Wilson, manager of the company, the products will include auto gear shift balls, door knobs, table tops, drawer pulls, lamp bases, book ends, etc.

Labor has fared much better during the present depression than in past hard times in the opinion of Secretary LaMont.

Speaking under the auspices of the Washington Star over the Columbia broadcasting system, last Saturday night, the commerce secretary used the 1921 depression for comparison purposes and found comfort for the working man.

He said in the earlier depression that "wage reductions were the order of the day," adding that last September only 11 of nearly 14,000 industrial plants reporting had cut wages, and that other months of 1930 were as favorable. He said unskilled and unorganized labor had fared as well and that in some cases the day laborer was getting more per hour than in 1929.

"Every retail lumber dealer accepts the accumulation of odds and ends of material as an inevitable feature of his business. How best to get rid of them, yet turn them into as much cash as possible, is the problem," says the American Lumberman. The Brockville Lumber Corporation of Brockville, Ontario, has a novel method of turning over this material, and one which is particularly effective in bringing the farmers to the yard. For instance, if a number of doors of a slow-moving size or grade or kind are accumulated they are advertised as goods on which old doors may be traded in. The old doors are accepted and an attractive turn-in discount is allowed on a new door, to be selected from doors included in the firm's "bargain counter material." The latter sale is held periodically and may include a wide variety of material that has been in stock for too long a period. In this way all lines of material are kept cleaned up and odds and ends are not allowed to be around until they are beyond any value to anyone. Of course, the trade-in offer cannot be applied to all lines, but it has been found to be a means of bringing in new customers, besides being an economy feature."

Silas L. Gillan, mining engineer, has been elected president of the Engineers' Club of Los Angeles, succeeding Paul Overton. Other officers who will serve for the forthcoming year are: First, vice-president, Harry L. Caldwell; second vice-president, Thurston H. Ross, and secretary-treasurer, Le Roy C. Williams.

TRADE NOTES

Announcement of declaration by Superior Portland Cement Company, of the regular quarterly dividend on the Class "B" stock, amounting to 25 cents per share, was made last Monday, through Tucker, Hunter, Dulin & Co. The dividend is payable on December 20 to stock of record December 13.

Bodinson Manufacturing Company of San Francisco, manufacturers of sand and gravel producing plant equipment, has opened a branch office in Seattle with E. J. Soderblom in charge.

Altorfer Brothers Company, Peoria, Ill., manufacturers of electric washing machines, ironers and table appliances, has opened a Pacific Coast sales office in the Chamber of Commerce Bldg., Los Angeles, with R. W. Gorham in charge.

H. K. Butler, formerly service foreman in the Seattle office of the Edison General Electric Appliance Company, has recently been appointed office manager and factory branch service station manager of the company's Seattle office.

J. G. Williams Construction Co. has merged with the Steel Erectors Consolidated, Ltd., with headquarters at 47 Hubbell St., San Francisco.

Falls Electric Furnace Co., Buffalo, N. Y., manufacturers of electric heat treating furnaces, has appointed the Sierra Equipment Corporation with offices in Los Angeles, San Francisco and Seattle, as its exclusive sales agent and distributor in the Pacific Coast territory.

State Electric Supply, Ltd., wholesale electrical distributors, have opened headquarters at 241 Tenth Street, Oakland. The three owners, Harry E. Perl, W. T. Ahnstrom, and W. V. Etzkorn, were formerly connected with Gilson's Inc., and have taken over that business.

California Desert Products Co. has established San Francisco headquarters at 53 Sutter Street. Sale of clays and clay products for reservoir sealing, which are obtained from the company's Death Valley mine, will be handled from the San Francisco headquarters.

Oregon - Washington Plywood Co., with headquarters at Portland, Ore., has established a San Francisco branch with offices at 24 California street. Stock of the company's "plywood" fir and spruce panels will be warehoused locally.

Merger of the Drendell Electrical & Manufacturing Company with the Trumbull Electric Manufacturing Company of Plainville, Conn., has been completed. The company is now operating under the name of the Drendell-Trumbull Electric Manufacturing Company, with its main office and factory at 1760 Howard St., San Francisco. The new company will confine its activities to the designing and manufacturing of switchboards, panel boards and electrical specialties. L. Siebert, former vice-president and secretary of the Drendell company, is president and manager of the Drendell-Trumbull Company.

ALONG THE LINE

Royal Floor Co., Inc., specializing in hardwood flooring, 609 Seventh St., has been admitted to membership in the San Francisco Builders' Exchange.

Warren C. Perry, professor of the University of California architectural department, has been appointed by Governor C. C. Young as a member of the California State Board of Architecture, Northern District, succeeding James S. Dean, city manager of Sacramento, who resigned.

Executive offices of the Golden Gate Bridge & Highway District have been opened at 722 Financial Center Bldg., with William Felt, Jr., secretary of the district, in charge. This office will be separate from that of the Strauss Engineering Corporation which firm is handling the bridge design.

J. P. Baumgartner announces his resignation from the State Highway Commission. Baumgartner gave as his reason the wish to spare Governor-elect Rolph any embarrassment concerning membership on the commission.

C. W. Fairbanks is president of the Builders' Exchange of San Luis Obispo, recently organized. A. V. Cline is vice-president; James Jepson, treasurer and William M. Black, secretary-manager.

Charles D. Vail, former manager of parks and improvements for the city of Denver, has been appointed state highway engineer of Colorado. He has had extensive experience as a railway engineer, having served in that capacity for six different railway companies.

With forty-two men to a team, two teams will concentrate on a membership drive for the Fresno Engineer's Club. Lee Duncan and W. H. Wheaton are captains of the teams. The drive will end January 14. The losing team will eat a bean dinner and finance a turkey dinner for the winners.

Division heads and the entire personnel of the water and power bureaus of Los Angeles, have been placed under the direction of H. A. Van Norman, chief engineer and general manager of the water bureau. Carl A. Heinze, electrical engineer, will be assistant to Van Norman at a salary of \$1000 a month, and C. K. Chapin will be assistant electrical engineer at \$400 a month. E. F. Scattergood will remain general manager of the power bureau. The reorganization is in the interest of economy. It is announced by the city administration.

A publication of the American Society for Testing Materials, comprising a list of standards which have been adopted by the A. S. T. M., and tentative standards which are now in process of development, has been received and is available for loan or purchase through the ASA Information Service, 29 W-39th St., New York City. The standards are listed under the following subjects: ferrous metals; non-ferrous metals; cement, lime, gypsum, concrete, and clay products; miscellaneous materials; miscellaneous subjects.

HERE—THERE EVERYWHERE

A Salt Lake City ordinance requiring that electric signs shall not extend more than 10 ft. from the building or property line was recently handed to Fred D. Winegar, city electrical inspector, for enforcement.

Rights of journeymen plasterers to old on contracts is being questioned by the Plasterers' Union, Local No. 381, at San Mateo. A special meeting of the union has been called to discuss the matter.

The activities of the Building Industries Association of San Jose, newly organized body to eliminate bad credit risks from the building industry, has been unanimously endorsed by the San Jose Realty Board.

For the third successive year the City Council of Colby, Kan., voted to let the municipal water plant wash away the city's bills. During the last two years the earnings of the plant have paid administration bills, provided \$200,000 for pavements, paid for new equipment and placed a balance of \$45,000 in the city treasury. If this is possible in Colby, Kan., why is it not possible in many other cities? —Turlock Journal.

Arrangements are being completed by the Builders' Exchange of Portland, Ore., for the annual Christmas Tree festival to be held in the exchange quarters. The affair will be held December 24. Members, their wives and kiddies will each receive a Christmas package from (like Stanchfield). Santa Claus. Thirty needy children will also be provided for.

Proposed legislation that would require all contractors in the State of Washington to be licensed, and also requiring pre-qualification of contractors bidding on public works in the state was discussed at a recent meeting of the Seattle Equipment Distributors' Association. The matter has been referred to the Executive Board of the association for report.

National Association of Paris Transit Mixed Concrete Manufacturers, comprising more than fifty operators on Paris Transit Mixers in the United States and Canada, will hold its annual convention in St. Louis, Mo., January 9-10-11-12.

Reno, Nevada, recently adopted a set of rules and regulations regarding electrical work which make the underwriters' rules effective in that city. Ordinances affecting overhead construction, inspections, fees, etc., were also made.

N. E. CODE RECOMMENDED

A number of trade practice rules were approved at the convention of the Association of Electricists as being suitable for adoption by the trade practice conference of the electrical contracting industry, under the auspices of the Federal Trade Commission. One of the rules approved by the convention reads as follows:

"In territories where no governmental laws, rules or regulations as to electrical installations prevail, the regulations as laid down in the National Electrical Code, as approved by the American Standards Association, shall be used."

NEW YORK STEEL ERECTORS SUED FOR \$3,500,000 BY UNION

Charging breach of contract, the International Association of Bridge, Structural & Ornamental Iron Workers on Nov. 21 filed suit in the supreme court of New York asking \$3,500,000 damages from the Structural Steel Board of Trade (New York City), says Engineering News-Record. Specific charges are that the board has refused to live up to a contract agreement made May 12 last to use only union iron workers on New York building work. The several large steel erection contractors forming the Steel Board of Trade have been at odds with the steel workers' union for the past 25 years and have refused to employ union iron men on work in the metropolitan area.

The feud came to a head late last spring with the start of steel erection on the Empire State Building. According to the office of Frank P. Walsh, counsel for the International Association, former Governor Smith, president of the Empire State Co., requested, when the general contract for construction was signed with Starrett Bros. & Eken, that union iron workers be used. Upon the award of a sub-contract for erection to Post & McCord, member of the Structural Steel Board of Trade and advocate of the open shop, sympathetic strikes were called throughout the county on all Starrett Bros. jobs. These strikes were called off upon advice from New York that Empire State controversy would be settled to the satisfaction of the union.

Then, according to the union's counsel, an agreement in the form of a contract was drawn up providing for an end to the long dispute between erectors and the union and was approved by both sides after minor differences had been ironed out by William Green, president of the American Federation of Labor, acting as arbitrator. Though approved by the Structural Steel Board of Trade, the contract was never formally signed by the board officials. The Empire State job went ahead on an open-shop basis.

In bringing the suit for damages, the union contends that the contract is binding, even though not signed, as it was the intent and expression of the board to enter into the agreement. An injunction has been asked for by the union restraining the members of the board from hiring other than union men.

McGraw-Hill in Popular Book Publishing Field

The McGraw-Hill Book Company, Inc., of New York, which heretofore has confined itself to publications in the technical fields of science, engineering and business, has extended its scope into the field of general literature with the formation of Whittlesey House for the publishing of non-technical books addressed to the lay reader and intended for sale through the book stores of the country.

The first list of Whittlesey House publications includes books in such diverse categories as astronomy, economics, history, psychology, diplomacy, aviation, travel, criminology, and other fields of general popular interest, as well as books for children.

PACIFIC COAST BUILDING TOTALS FOR NOVEMBER, 1930

Following is a tabulation of November, 1930, building permit totals covering the states of California, Arizona, Idaho, Nevada, Oregon, Utah, and Washington, as reported by building department executives of the cities named:

CALIFORNIA

City	November, 1930		November, 1929	
	No.	Cost	No.	Cost
Alameda	45	\$ 15,300		\$ 48,579

SOVIET EXILES ARE CONVICTS TREASURY AGENTS WILL HOLD

After satisfying itself that no country in the world, unless Soviet Russia, exports to the United States any goods made by convict labor, the Treasury Department issued this week regulations, effective immediately, permitting it, without affirmative proof, to exclude goods suspected of convict labor origin, says The Business Week.

After a finding by the Commissioner of Customs that convict labor is used in any locality in a foreign country in mining, producing, or manufacturing any commodity, importation of any merchandise of that class from that locality shall thenceforth be prohibited unless the importer establishes by preponderant evidence for each shipment that it was not convict-produced.

Must Put Up Bond

The importer is required either to put up cash or file a bond equivalent to the domestic value of the cargo for its return to customs custody if the commissioner decides convict labor was employed at any stage in producing the merchandise, or if the importer fails to submit within 3 months of date of entry a certificate of origin with affidavits. Such affidavits must be sworn before an American consul, or if the place is too remote from a consulate, then under an oath or affirmation. A similar affidavit is required of the ultimate consignee, who ordinarily would be the American purchaser.

In the absence of a general finding by the Commissioner of Customs that convict labor is used in any locality, any collector of customs is required to report to the commissioner the importation of any merchandise originating in a country where he has reason to believe convict labor is used to produce such merchandise. The collector must hold the shipment for instructions.

Bond is canceled or the merchandise released if the commissioner's decision favors admissibility and the certificates of origin are submitted within the prescribed period of 3 months. The importer can appeal to the courts.

The regulations are more drastic

than appears on their face, and the belief is expressed in official quarters in Washington that they seal the doom of Soviet trade in the United States. Doubt is now voiced that any surety company would file bond for the Amtorg to the amount required to cover the value of incoming Soviet cargoes which run into millions of dollars, or that an American firm would take a chance on swearing to an affidavit that may be shown to be false simply by a decision from the Commissioner of Customs.

It seems apparent that little evidence will be required to convince the Treasury Department that lumber, pulpwood, coal, perhaps wheat, or other commodities are produced in various localities in Russia by convict labor. Manganese appears to be the only exception that the Department now is willing to make and that is involved in a pending investigation under the anti-dumping law. Data culled from Soviet publications, from the reports of consuls in adjacent countries, indeed from any source whatever, will be submitted without undue delay by subordinates in the Customs Bureau for a finding that convict labor is used, but nobody knows just when such findings will be issued.

Exiles Are Included

The regulations do not define what a convict is, but doubtless the dictionary's definition as "one found guilty or undergoing punishment for crime" will be interpreted as meaning the Soviet worker who because of alleged utterances against the government has been exiled to the Siberian forests to cut lumber.

Neither do the regulations define what is meant by "mined, produced, or manufactured." The Treasury's ruling, for example, pulpwood cut by free labor and hauled by convict labor, but as including pulpwood cut by free labor, hauled by convict labor and subsequently sawed by free labor.

The Treasury Department's ruling is regarded in Washington as positive evidence that the administration's policy with respect to Soviet trade has

finally taken shape. Most business interests are reserving judgment, are awaiting a definition of terms, reaction from large companies who bought last year \$30,000,000 worth of Soviet products, and from others who sold Russia \$150,000,000 of manufactured goods. If the move is definitely planned to discriminate against Russian trade, Moscow has a counter-act. A decree was passed Oct. 20 by the Soviets restricting to no absolute minimum all trade with countries discriminating against the Soviets.

Meanwhile the National Lumber Manufacturers Association has filed with the Commissioner of Customs a complaint seeking judgment under the new regulations against all future shipments of goods, when one shipment has been proved convict made.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1694).

R-3429-S PRODUCTION MANAGER, for a company operating several scattered plants in California. The processes are comparatively simple and emphasis is laid upon ability to handle men for efficient results rather than upon technical ability. Salary depends upon experience and ability. Apply by letter. Headquarters, San Francisco.

R-3432-S SALESMAN, with some technical training and experience which must include sales or application of valves and pipe fittings. Acquaintance in the petroleum industry would be helpful. Salary open. Headquarters, San Francisco.

R-3303-S ENGINEER, between 28 and 35 years old, thoroughly versed in thermodynamics, heat exchange and heat transfer problems. Man with some oil refinery experience preferred. Permanent opportunity for right man. Apply by letter. Location, Northern California.

R-3421 SALES ENGINEER, preferably mechanical, with some experience in the paint industry, for machinery sales. Sales experience required. Salary open. Headquarters, San Francisco.

W-1348-C-S SPECIFICATION WRITER, should be well versed in machinery design and capable of preparing purchase specifications covering material used in engine department work aboard ships. This would include the main propelling machinery and the various auxiliaries installed in the engine room of a modern merchant vessel. Apply by letter. Location, East.

K-312-W-1367-C-S MECHANICAL ENGINEER, with good technical education, experienced in a variety of industrial safety problems, also in organization and public relations work. Apply only by letter. Salary, \$8000 a year. Location, New York and some travelling.

X-6900-S ELECTRICAL ENGINEER to design and sell transmission lines. Apply only by letter. Salary, \$5000 a year. Location, East.

K-332-W-2931-C-S PROFESSOR for school of industrial engineering at mid-western university, to teach various phases of printing. Must have had broad experience in printing and be acquainted with the printing industry. Position is likely to lead to development of research. Salary \$5000 a year. Apply by letter. Location, Middletown.

PREPARED PLANS— WITHOUT LICENSE— GOES WITHOUT FEE

Because C. S. Schwartz, building contractor, didn't keep up his correspondence he is going to lose a \$300 architect's fee, according to notice served on the independent School District in Castro Valley by District Attorney Earl Warren of Alameda County.

Schwartz, a building contractor but not a licensed architect, prepared plans for the Castro Valley School, but, as provided for in a state law governing the practice of architecture, he failed to serve written notice on the trustees of the district that he was not a licensed architect.

The State Board of Architectural Examiners, through its attorney, Alan C. Van Fleet, filed a protest with County Superintendent of Schools David Martin, who referred the matter to the district attorney.

Warren notified the school board that it can't pay Schwartz' fee, which would be six per cent of the total cost of the building, which was approximately \$5000.

SEEK TO LICENSE OREGON CONTRACTORS

The General Contractors' Association of Salem, Ore., has started a movement to secure the aid of contractors throughout the state in proposing to the next Legislature a bill for licensing contractors, similar to the California law.

F. Erixon, president of the association, has been authorized to appoint a legislative committee to confer with like committees in other sections of the state to consider introduction of the licensing bill at the next session of the Legislature.

Representatives of the building groups of other cities of Oregon will meet in Salem on December 15 to outline a definite program.

The proposed bill will be designed to provide that no contractor can do business in the state unless he has established his residence therein and can furnish qualifications as to his ability to undertake construction contracts.

STATE DIVISION HEAD PLANS ANTI-ALIEN MOVE

Measures designed to exclude alien labor from public works projects and to stabilize employment conditions in California are being prepared by Walter Mathewson, retiring chief of the state division of labor statistics, for presentation to the legislature this Winter.

The house defeated a bill to exclude alien labor from public works at the last session of the legislature after it has been passed by the senate.

In the new plan to stabilize employment, Mathewson and Arthur L. Johnson, attorney for the division, propose to enforce wage standards by regions so that there will not be discrepancies in the pay for identical work done in the same district by different contractors.

City Attorney Werner has informed the Los Angeles city council that it cannot legally set up a zone surrounding the civic center in which the architectural design of all buildings to be erected in the future would have to be submitted to the Municipal Art Commission for approval.

EDISON COMPANY TO EXPEND \$28,000,000 ON SYSTEM IN 1931

A construction budget in excess of \$28,000,000 for 1931 has been adopted by the Southern California Edison Company, Ltd., according to announcement of R. H. Eallard, president of the company. This budget is one of the largest in the company's history, he said. More than \$25,200,000 of the appropriation will be used for new construction. The remaining \$2,962,000 is allocated for reinforcements and extraordinary maintenance.

One of the largest items in the budget will provide for the installation of another turbine in the Edison steam station at Long Beach. This will have a capacity of 135,000 hp. and, together with facilities for providing a fuel supply will call for an expenditure of \$8,620,000.

For the completion next year of the new Edison building in Los Angeles, \$1,295,000 will be provided by the new budget. This building will be ready for occupancy in the spring of 1931.

For extension and improvement of the electrical distribution system, the new budget provides \$15,270,000, which will be used for the construction of new lines, building of new substations and general expenditures throughout the system.

The new capital required for this program will be provided through the sale of bonds and both preferred and common stocks. Following its general financial policy, the company plans to provide at least 20 per cent of the new capital requirements through the sale of common stock, the remainder being about equally divided between bonds and preferred stock.

GARRISON IS NAMED PUBLIC WORKS CHIEF

Colonel Walter E. Garrison of Lodi has been appointed State Director of Public Works to succeed Bert B. Meek. The appointment is announced by Governor-elect James Rolph.

Mr. Garrison is a native of Modesto, 54 years old and is engaged in farming. He operates one of the large vineyards at Lodi. The new director is a graduate of Modesto High School and the San Joaquin College.

During the World War, Garrison served overseas with the 363d Infantry of the Ninety-first division. He arose from the rank of captain to major during the war. Twice he was wounded in action and was awarded the French Croix de Guerre with a star for gallantry in action. He is executive officer of the 181st Brigade of the Ninety-first division.

WEBBER CONSTRUCTION CO. SUES HIGHWAY DEPARTMENT

A. W. Webber, an official of the Webber Construction Company, has filed suit in the superior court at Sacramento against the State of California, Bert B. Meek, director of the state department of public works, and F. L. Hazelwood, district state highway engineer, for \$268,201 damages.

The amount is claimed for construction work done by the company on the Redwood Highway in Humboldt County.

Webber alleges he was forced to move heavy rock crushing equipment several times during the construction and was not reimbursed by the state for the expense.

STATE PLUMBERS ELECT HILLIKER AT FRESNO CONVENTION

Gay Hilliker, Fresno plumbing inspector, was elected president of the Plumbing Inspector's Association of California during the closing session of a two-day convention in Fresno last Saturday. Fred N. Johnson of San Jose was elected vice-president of the northern division; Charles B. Bailey of Los Angeles, vice-president of the southern division, and Stephen I. Smoot, Los Angeles, state secretary.

Sacramento was chosen as the site of the next convention, which will be held in October.

The convention, the first of the organization since its inception, brought together in Fresno approximately 75 attendants from 25 cities of the state. The principal work of the session rested in further organization and adoption of a uniform building code, which will be based upon the United States Department of Commerce minimum plumbing code. It was expected that a rough draft of the code would be adopted within a few months.

MECHANICAL ENGINEERS MOVE TO STABILIZE EMPLOYMENT

Engineering skill was massed for an attack on unemployment last Wednesday in New York at a conference on stabilization of employment in industry, held in connection with the annual meeting of the American Society of Mechanical Engineers.

The society already has pledged its active aid to President Hoover's emergency employment committee.

A guaranteed employment plan put into effect in 1922 by the Procter & Gamble Company of Ivorydale, Ohio, under which not one of the 10,000 employees of the plant were laid off in the last twelve months, despite a 10 to 15 per cent reduction in business, was described by Harvey C. Knowles, general superintendent of the company. Dr. Royal S. Meeker of New Haven, Conn., suggested "three major policies which may be inaugurated at once for the amelioration and prevention of unemployment." They are:

"1. Planning production to meet the estimated requirements of consumption.

"2. Stabilizing the general price level. That is, the buying power of money.

"3. Providing carefully planned, all-inclusive unemployment insurance to prevent unemployment, as well as to care for the unemployed."

The City of Paris and the Republic of France have both turned landlords and are busy constructing imposing new apartment houses in and around Paris.

Before 1935 it is estimated that nearly 100,000 new apartments will be completed, but already experts are predicting that the housing crisis will be just as bad. Apartments in Paris are at a premium.

Under a law sponsored by Louis Loucheur 5651 apartments comprising 2, 3, 4 and 5 rooms were placed under construction and will be ready for occupancy at the end of next year. Before the Loucheur law went into effect the various departments of the City of Paris had already started construction on 17,833 apartments which are now being finished and occupied.

In all it is estimated there are 55,000 apartments now under construction either by the City or the State, and another 45,000 will be started soon. The majority of these are apartments of two and three rooms rented at low prices to laborers.

STATE HIGHWAY COMMISSION ADOPTS \$35,703,000 PROGRAM

Acting upon the recommendations of P. B. Meek, State Director of Public Works, the State Highway Commission has adopted a two-year highway construction and reconstruction program involving the expenditure of \$35,703,000.

The program will be submitted to Governor Young and made a part of his message to the 1931 Legislature.

Within a week or two the commission is expected to make public the amount of money allocated to each road project in the various counties of the State.

The allocation is now being worked out in accordance with the provisions of the Breed bill, both as to the division of funds as between the north and the south and as to their distribution between primary and secondary roads in the State system.

It was explained that the \$35,703,000 which the commission would spend in highway projects during the next biennial period will be made up of revenues from the gasoline tax, motor vehicle registration fees, highway transportation taxes and Federal aid appropriations.

In a statement given out with the highway budget total, Meek warned against disturbing or impairing the present highway financial setup.

"Danger to the State highway program through impairment of revenues looms chiefly from five sources," said Meek.

"First, the suggestion that gasoline taxes be diverted to other than highway uses.

"Second, the suggestion that major allotments of present revenues be made to improve and maintain through travel streets in cities of the State larger than the village class. To undertake this would take at least \$125,000,000 and would obviously com-

pletely wreck the State highway program.

"Third, the suggestion that there be a still larger division of highway funds for the elimination of railroad grade crossings on the State system. At the present time wonderful progress is being made on this problem and in a few years all of the most dangerous grade crossings on the State highway system will be a thing of the past.

"Fourth, the inclusion in the secondary State highway system of roads not in the recommended list. This would increase mileage, to the point that not only construction funds but maintenance moneys needed for the present State highways would be seriously endangered.

"Fifth, the enlarging of the joint highway district program."

Meek said studies reveal that \$313,563,906 will be required to meet the costs of the State highway building program during the next ten years. The estimate of revenue available for highway purposes during this period, July 1, 1931 to June 30, 1940, is \$422,015,300.

"Given assurance of the continuance of present revenues," said Meek, "California in a few years' time should have a system of highways unequaled anywhere in the world. This can be accomplished without increasing the present source of revenue.

"The motorists realize there is no surplus of highway revenue when the traffic and safety needs of the system are considered. And they will not allow the orderly construction of the system to be interfered with, or the proper maintenance of the roads to be jeopardized by diverting to other uses the revenue that now goes to the State system, however great the temptation may be, or how worthy the particular cause."

cedure is in doubt or where opposition is expected some degree of secrecy is necessary in using the system. But it is the inherent unsoundness of the practice even more than the backstairs methods of applying it that condemns it as opposed to the welfare of contracting. Any agreement on one or more items of a bid and any possibility of collusion and price fixing strikes at the heart of the principle of competitive bidding. It will be recalled that the bridge pooling of former days, first designed to cut down the expense of bidding, developed into a price-fixing and contract-assigning system and was eventually broken up.

Engineers have a right, moreover, to suspect that under a fee system many "complimentary" bids will be submitted merely to collect the estimating fee. Realizing this possibility, the A. G. C. chapter leaves it to the honor of the contractor submitting a complimentary bid to reveal the fact and refuse to participate in the distribution of fees. On the whole, however, it seems more than likely that, should the practice get well established, the fees would naturally rise to a point where bidding would become a profitable business.

If general contractors think that they should receive special consideration for submitting bids, why do they not propose to recompense subcontractors and material men for their share in preparing the total bid? They have not done so, yet the expense and trouble of submitting sub-bids is relatively as great as that of the general contractor. Obviously, such a detailed, though just, scheme would be wholly impracticable. The leaders in the contracting industry realize that the close cooperation with subcontractors and material men is vital to the welfare of the industry, and are working to this end; is it not foolish, then, to set up a practice that threatens to break down such cooperation?

Organized contracting has long sought to improve the contracting industry; to bring it into repute in the eyes of engineers, architects and the public; to establish more cordial relations among all concerned in the disjointed business of construction; and to establish the contract system in the place of day labor work. It has succeeded admirably in this purpose, and should oppose any system that threatens the results of its efforts. The monetary gain of charging fees for bidding falls far short of paying for the loss of public respect and confidence. We look to organized contracting to stop this practice before outside action compels its abandonment.

While other holdings declined, and, in some cases, vanished in 1930, the total assessed value of real estate in twelve American cities climbed to modest heights, says the National Association of Real Estate Boards.

Even though increased assessed values mean higher taxes, such rises make a good case for rent investment, says the Association, because realty transactions continue to be recorded from day to day, and owners are taking their profits while other fields are stagnant. And in places where real estate activity is slow, these values will be there when markets are resumed.

In eleven cities the assessed values on land and buildings increased by \$138,129,538 in the year between 1929 and 1930. These include St. Louis, Mo., Minneapolis, Greenfield, Mass., Athens, Ga., Wausau, Wis., Dallas, Texas, Kansas City, Mo., Bellingham, Wash., Philadelphia, Pa., New Orleans and Boston. The twelfth city is New York City with an increase of \$1,069,613,962.

A. G. C. "UNIT" CITED FOR CHARGING FEES FOR BIDDING

(Editorial in Engineering News-Record, New York)

The cost of preparing a bid is an inseparable part of a contractor's expense in conducting his business, and is taken care of in the overhead item of every bid he submits. If the practice of charging fees for bidding, as established by several groups of contractors in the South, becomes a recognized element of contracting, and if it will surely undermine the confidence and trust in contracting now held by engineers, architects and the public. Such practice penalizes the owner and increases the cost of construction; it is unjustified and unsound. The cost of preparing bids is part of the cost of selling construction service, and is no more entitled to special reimbursement than the selling cost of every other competitive business.

Designed to compensate unsuccessful bidders on competitive bidding projects for their time and expense in preparing estimates which do not result in procuring a contract, the plan is operated as follows: subject to local variations: On each competitive construction job some official of the branch of the Associated General Contractors in whose jurisdiction the work will come ascertain the names of all general contractors bidding on the job. From the engineer's estimate, if available, or by consultation with at least three bidders, this same

official determines the amount of the average bid. Each bidder is then instructed to add to his bid an amount for estimating cost (taken from a standard table and averaging \$100 per \$100,000 bid) multiplied by the number of bidders participating. Each bidder agrees that if he secures the work the added amount will be turned over to the A. G. C. when the first payment on the work is made by the owner. At this latter time the A. G. C. remits to each unsuccessful bidder his portion of the fund, and keeps the successful bidder's share as a fee for handling the transaction. Sometimes, however, the fees are distributed to only a certain number or certain percentage of low bidders, on the theory that the high bidders do not deserve to be reimbursed.

It will be noted that the successful bidder receives no share. Therefore each bidder knows that he must add his cost of estimating to the overhead item in his bid. Thus the owner is already paying for this particular contractor's bidding service and in addition is assessed a surcharge to cover the cost of service of the unsuccessful bidders. It is obvious that the plan operates to penalize the owner.

Ostensibly the owner, the engineer and the architect are aware that the practice is being applied to their job. In cases where the legality of the pro-

A. G. C. TO INSTALL CHIEFS AT S. F. MEET

Nomination of Albert P. Greensfelder, of St. Louis, and William A. Starrett of New York, as president and vice president at large, respectively, of the Associated General Contractors of America for the year 1931, was announced following a special meeting of the nominating committee at the association's national headquarters at Washington last week.

The nominations, which are tantamount to election, will be officially acted upon at the 12th annual convention of the association which is to be held during the week of January 25, at San Francisco.

Both Mr. Greensfelder and Mr. Starrett have been nationally prominent figures in the construction world for more than a score of years and have personally supervised some of the largest construction projects of that period.

They will succeed Anton E. Horst, of Philadelphia, and James E. Cashman, of Burlington, Vt., incumbent president and vice president, respectively, who after having received the signal honor of being nominated to succeed themselves at the fall meeting of the association's executive board, at Rye, N. Y., were obliged to withdraw their names because of the pressure of their private business affairs.

Mr. Greensfelder, who is a graduate of Washington University, started his career in 1901 as an engineer on construction of the Interurban Railway, Kansas, and from 1902 to 1905 was assistant to the engineer of the Terminal Railroad Association of St. Louis on the design and construction of railroad terminal facilities for the St. Louis district prior and subsequent to the St. Louis World's Fair. Since 1906 he has been construction superintendent of the Fruin-Colton Contracting Co., general contractors of St. Louis of which company he was made secretary in 1908 and president in 1927.

Mr. Greensfelder is at present vice chairman of the construction division of the American Society of Civil Engineers; a member of the international relations committee of the Associated General Contractors of America, of which organization he was vice president at large in 1923; and vice governor of the Regional Planning Federation of the St. Louis District. He is also a past president of the American Society of Engineering Contractors and the Engineers' Club of St. Louis.

Mr. Starrett, who is an alumnus of the University of Michigan, in 1901 joined with his brothers in the formation of the now nationally known firm of Thompson-Starrett Company and three years later, when only 27 years of age, was placed in charge of the building of the monumental Union Station at Washington, D. C. Upon completion of this project he was made general superintendent and vice president of the company, in which position he continued until 1913 when he joined as a member in the formation of Starrett & Van Vleck, architects.

At the outbreak of the World War, Mr. Starrett was called into service as Major of Engineers and assigned to duty as chairman of the emergency construction section of the War Industries Board. He was promoted to the rank of Colonel in March 1918.

Following the War Mr. Starrett was made vice president of the George A. Fuller Company and was sent to Japan where he introduced several modern steel frame buildings especially designed to resist earthquake. He subsequently was instrumental in the formation of Starrett Brothers, Inc., Starrett Prothers & Eken, Inc., and

The Starrett Corp., of which he is president. He is a registered professional engineer and architect and a member of the American Institute of Architects, the American Society of Civil Engineers, the American Society of Mechanical Engineers and the American Society of Military Engineers.

LOW BIDDER NOT ALWAYS BEST BIDDER

We know from unfortunate experience more than from any other source that the lowest bidder is not necessarily the most responsible, hence the insertion of those two adjectives into the acceptance clause of a proposal form must be at all times carefully considered and not regarded as mere official phraseology, says the Journal of Commerce. Action in this respect, furthermore, should be cautiously made a part of legislation, at least as far as public building projects are concerned.

The history of contracts being awarded to bidders who are patently unqualified repeats itself too frequently. It goes without saying that one disastrous result is that legitimate constructors are thus deprived of work which they are well qualified to handle and which would give to the taxpayers far greater satisfaction and monetary saving.

There is a case on record of a important road job, the contract for which was placed with bidders who were unknown, and apparently inexperienced, but whose figure was about \$25,000 lower than the average of bids on the \$110,000 project. There was no question of securing bond. The contract was signed, and the work begun. But after a while obstacles blocked the builders' path and a day came when work was halted altogether. Winter was around the corner. Finally the bonding company was ordered to complete the job, but severe cold and frequent snows made their task an impossibility. The farmers in the vicinity were the greatest sufferers. For several months of bitter cold they were forced to haul their products through old roads and detours almost impassable, and in the end they found that their increased costs in these temporary transportation methods vastly outstripped the amount of the bond issue of a highway which should ordinarily have been finished in the early fall.

In every lesson of loss there is a moral. Theoretically, at least, when a constructor loses money all parties concerned in the project lose. In practice the process has been proved countless times.

A. M. HUNT, NOTED ENGINEER, PASSES

A. M. Hunt, 71, electrical and mechanical engineer, died in a Berkeley hospital last Monday following a brief illness.

Mr. Hunt divided his time between the Bay Region and New York City, and made his home in Berkeley with his brother, Philip M. Hunt.

He was well known both on the Pacific Coast and in the East, as many important engineering projects came under his supervision.

A graduate of the U. S. Naval Academy at Annapolis in 1879, he was active for several years as an engineering officer in the Navy, later to be loaned by the Government to San Francisco to become chief engineer of the Mechanical Arts Building of the Mid-Winter Fair in 1894.

Later he established his own offices in San Francisco and became of great value to the engineering profession as a consulting engineer. In 1904 he founded the firm of Hunt, Mirk & Co. in San Francisco, which is still active in the design and construction of some of the West's largest steam power plants.

In 1917 Mr. Hunt was appointed with other noted men of science on the U. S. Naval Consulting Board and served in an important capacity at Washington, D. C., during the World War. During 1921 and 1922 he was vice president of the American Society of Civil Engineers and was also a member of the National Mechanical, Electrical & Chemical Engineering Societies.

Mr. Hunt was a native of Sioux City, Iowa, and is survived by two brothers, Philip M. Hunt and James M. Hunt of Berkeley.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in these opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 547 Mission St., San Francisco, or phone Garfield 8744:

20666—Hardware and Tools. Hamburg Germany. A manufacturing exporter of hardware and tools is anxious to extend operations to the United States.

20667—Slate. San Francisco. Firm is desirous of obtaining list of principal firms in this locality interested in the importation of slate from Italy.

20668—Bauxite Ore. San Francisco. Italian manufacturers of bauxite ore and products thereof are interested in offering product known as bauxitemastic used in paving roads in order to prevent skidding of automobiles in wet weather.

20669—Agency. New York City. A well-known German manufacturer of polished zinc, steel, tin and brass sheets and steel strips desires to have a reliable agency for his products on the Pacific Coast.

20670—Representation. San Francisco. A German manufacturer of China wishes local representation.

20673—Advertising Light Apparatus. San Francisco. A Czechoslovakian inventor of an advertising light apparatus, with changeable pictures and movable inscriptions, intends selling his patent rights, and wishes to get in touch with interested parties.

20684—Chinese Woolen Carpets. Buenos Aires, Argentina. Firm is interested in contacting exporters of Chinese woolen carpets brought in from China and chemically cleaned in the United States.

20688—Representation. Atlanta, Ga. Party contemplating trip around the world wishes to be put in touch with firms planning an expansion program of international scope, or any who desire specific information regarding certain localities.

Miss St. John, Universal Products Co., 557 Market St., San Francisco, desires to secure responsible selling agents or representatives for California and Washington for newly patented household article.

H. S. Waller, 814 California St., San Francisco, desires to represent local manufacturers or importers of household products in New York trading area, to be sold to jobbers and large retailers. Arrangements on commission basis looking toward exclusive territorial rights.

APARTMENTS

Plans Being Prepared.

APARTMENTS Cost, \$40,000
OAKLAND, Alameda Co., Cal. Lake Merritt District.

Three-story wood frame apartments with concrete basement (12 2-rm and 12 3-room apts.)

Owner—Withheld.
Plans by L. F. Hyde, 372 Hanover St., Oakland.

More information will be given shortly.

Sub-Bids Being Taken.

APARTMENTS Cost, \$40,000
OAKLAND, Alameda Co., Cal. W Sixth Ave 150 N E-18th St.

Three-story wood frame and stucco apartments with reinforced concrete basement (12 two-room and 12 3-room apts.)

Owner and Builder—M. Elgarten, 174 41st St., Oakland.

Plans by L. F. Hyde, 372 Hanover St., Oakland.

Sub-Bids Being Taken.

APARTMENTS Cost, \$70,000
SAN FRANCISCO. Corner Cervantes and Prado Streets.

Three-story and basement frame and stucco apartments (21 2- and 3-room apts.; composition roof, steam heat and hot water system, elevator).

Owner & Builder—Ben Leibman, 1555 Francisco Street.

Architect—Irvine & Ebbets, Cal Bldg.

December 8, 1930

To Be Done By Day's Work By Owner
APARTMENTS Cost, \$400,000
LOS ANGELES, Cal. 401 N Rossmore Avenue.

Thirteen-story class A reinf. concrete apartments (135x150-ft.)

Owner and Builder—Harry Feigenbaum, Union Bank Bldg., L. A.
Architect—Max Maltzman, Union B'nk Bldg., Los Angeles.

Financing arrangements have been made.

Sub-Figures Being Taken.

APARTMENTS Cost, \$175,000
SAN FRANCISCO. N Jackson Street E Gough.

Six-story and basement class C concrete apartments (26 apts.)

Owner and Builder—E. Jose, 251 Kearny Street.

Architect—H. C. Baumann 251 Kearny Street.

Plans Being Revised.

APARTMENTS Cost, \$250,000
VALLEJO, Solano Co., Cal. Sonoma and Capitol Sts.

Six-story and basement class C concrete apartments (60x132-ft.; 72 2- and 4-room apts.; tile roof).

Owner—Er. Burton Jones, 327 Georgia St., Vallejo.

Plans by A. J. Mazurette, 576 Fifth St., Oakland.

Awards will be made in about ten days.

Plans Being Completed.

San Francisco 7662

SALES . SERVICE . RENTALS

BONDS

SAUSALITO, Marin Co., Cal.—Sausalito School District contemplates bond issue for \$24,000 to finance playground improvements.

STOCKTON, San Joaquin Co., Cal.—Trustees of the Iron House and Knights School Districts propose to combine the two districts in the formation of a union district following which a bond election will be called to secure funds to finance erection of a school to serve both districts. The new structure will cost from \$20,000 to \$40,000, according to tentative estimates.

SALINAS, Monterey Co., Cal.—Until January 5, bids will be received by C. F. Joy, county clerk, for the purchase of the \$1,000 bond issue of the Tuimcritos School District; proceeds of the sale to finance school improvements.

SAN MATEO, San Mateo Co., Cal.—Trustees of the San Mateo Union High School District contemplate a bond issue for approximately \$300,000 to finance needed school improvements. Tentative proposals provide for:

San Bruno—Erection of a small unit of the promised high school.
Burlingame—Additional or separate building for cafeteria, music and cooking rooms; cement floor and new interior in the girls' locker room, library room and other repairs; equipment for additional or new building, and the purchase of land at the rear of the school to square off the present tract and to make room for necessary expansion.

San Mateo—New auditorium, seats, stage and other equipment for the auditorium; new boiler unit to heat auditorium; complete gymnasium; turf athletic field, bleachers and fence; improvement of grounds, and tennis courts and enclosure.

It is pointed out that the conversion of the present inadequate cafeteria kitchen and music rooms at the Burlingame plant would give additional capacity for recitation rooms to the extent of about 100 pupils.

FRESNO, Fresno Co., Cal.—To relieve unemployment and to provide needed buildings the Fresno city commissioners are considering a bond election to be called in April to vote bonds of \$5,000,000 to finance erection of a new city hall, a new public library, civic auditorium, street openings and widenings, city jail, replacement of obsolete fire department and police department equipment.

SALINAS, Monterey Co., Cal.—Election will be held December 23, in the El Sausal School District to vote bonds of \$9000 to finance school improvements. Trustees of the district are: H. Ruggles, C. A. Lee and R. W. Adcock.

REDDING, Shasta Co., Cal.—By a vote of 34 to 1 the Burney School District has voted bonds of \$7000 to finance erection of a new school.

CHURCHES

Alternative bids required will be for the addition to the contract of the Bakery Unit marked Alternate A on plans and the addition of the Arcade and Patio marked Alternate B, both affecting the Kitchen and Commissary Building and involving both general and mechanical work. A third alternate required involving the omission of elevator equipment in both buildings is designated as Alternate C in the specifications.

See call for bids under official proposal section in this issue.

HOTELS

Plans Completed

HOTEL Cost, \$125,000
REDLANDS, San Bernardino Co., Cal.
 East State Street,
 Four-story reinforced concrete and steel Class A hotel (110x120 feet).
Owner—Arthur Gregory, Redlands Security Bldg., Redlands.

Architect—Perrine & Renfro, Lincoln Bldg., Los Angeles.

Mr. Gregory is completing a two-story store and office building which will be tied into the hotel portion. General contract bids will be taken on completion of the plans. The following steel contractors are bidding: Pacific Iron & Steel Co.; Consolidated Steel Corp.; McClintic-Marshall Co.; Minneapolis Steel & Machinery Co.; Brombacher Iron Works; Atlas Iron & Steel Co. Bids will be taken soon on other parts of the work.

Contract Awarded. Cost, \$550,000
HOTEL
SEATTLE, Wash. Brooklyn Avenue and E 45th St.

Sixteen-story and basement fire proof hotel (156 guest rooms).

Owner—University Community Hotel Corp. (Edmond Meany Hotel).

Architect—R. C. Reamer, 1201 4th St., Seattle.

Contractor—Walter and Brady, Lloyd Bldg., Seattle.

Segregated Bids Being Taken.

HOTEL Cost, \$250,000
SAN FRANCISCO. Pine St. between Powell and Stockton Sts.
 Sixteen-story steel frame and concrete hotel.

Owner—Shell Drake Hotel Co.

Architect—H. C. Baumann, 251 Kearny Street.

SANTA CLARA, Santa Clara Co., Cal.—Barney Martin of Santa Clara is said to be leading a group of local businessmen seeking to finance erection of a three-story and basement rein-

forced concrete hotel building on a site not yet announced. The structure would cost \$150,000, housing a garage in the basement, stores and hotel lobby on the ground floor and a ballroom, 10 three-room apartments and individual guest rooms on the upper floors.

POWER PLANTS

GRIDLEY, Butte Co., Calif.—City trustees contemplate enlargement of municipal electric plant. It is proposed to install a Diesel engine in the present stand-by plant. Profits of the systems will finance the installation.

PASADENA, Cal.—C. C. Moore and Co., 108 W. Sixth St., Los Angeles, awarded contract by the city directors at \$141,555 for furnishing and installing steam generating equipment and appurtenances for the municipal light plant at Glenarm St. and Raymond Ave.

RIVERSIDE, Riverside Co., Cal.—The Southern Sierras Power Co. will probably start Jan. 1 on construction of the transmission line from San Bernardino to the site of the Boulder Dam.

PUBLIC BUILDINGS, FIRE HOUSES AND JAILS

SANTA BARBARA, Cal.—Pauly Jail Bldg. Co., St. Louis, Mo., submitted low bid at \$67,500 to Santa Barbara County Supervisors for the installation of 23 cells in the Santa Barbara county jail. Each cell will provide accommodations for four prisoners. William Mooser Jr., architect, San Francisco. Other bids were: Western Metalcrafts Co., \$74,435; Southern Prison Co., \$75,750; Fries & Son, \$79,697. The bid of Pauly Jail Bldg. Co. was held under advisement until December 15 and all other bids rejected.

Plans Being Prepared.

FIREHOUSE Cost approx. \$10,000
CORTE MADERA, Marin Co., Cal.
 One-story frame and stucco firehouse with tile roof.

Owner—Corte Madera Fire Dept., Inc., Corte Madera.

Architect—Not Given.

Bids will be taken in about 2 weeks.

Sheet Metal Contract Awarded

LIBRARY Cost, \$40,000
FAIRFIELD, Solano Co., Cal.

Two-story concrete public library.

Owner—County of Solano.

Architect—W. E. Coffman, Forum Bldg., Sacramento.

Sheet Metal—Herman Strelehan, 1030 Sonoma St., Vallejo.

Other awards previously reported.

RIVERSIDE, Cal.—Pauly Jail Bldg. Co., St. Louis, Mo., submitted low bid of \$62,254 to Riverside county supervisors and was awarded contract for furnishing and installing jail equipment in the Riverside county jail G. Stanley Wilson, architect, 3646 W. Ninth St., Riverside. Other bids were: Southern Prison Co., \$64,400; Western Metalcrafts Co., \$63,500; Fries & Son, \$69,500.

Plans Being Figured—Bids Close Dec. 15, 3:30 P. M.

ADDITION Cost, \$—
SALINAS, Monterey Co., Cal.
 Addition to city jail and certain alterations in present jail cells.
Owner—City of Salinas, M. It. Keef, city clerk.

Architect—Rutner & Stranahan, Glukharg Bldg., Salinas.

Certified check 10% payable to city required with bid. Plans obtainable from architects.

YUBA CITY, Sutter Co., Cal.—Erection of a two-story corner office building annex to the present county courthouse is contemplated by the Board of Supervisors. It is probable that funds to finance the project will be provided in the 1931 budget.

EUREKA, Humboldt Co., Cal.—Dolson Electric Shop, Eureka, at \$1430 awarded contract by Eureka Public Library trustees for electric wiring in connection with city library. Eureka Electric Co., Eureka, at \$842 awarded contract to furnish and install fixtures. "Holograph" lights will be used in the illumination of the book stacks.

SAUSALITO, Marin Co., Cal.—Town trustees contemplate installation of a heating system in the town hall for the convenience of the public library and for offices in the upper portion of the building. Estimates of cost are being secured.

MARTINEZ, Contra Costa Co., Cal.—Contra Costa County supervisors are considering the selection of an architect to prepare plans and specifications for a new hall of records building in the block just south of the present courthouse. For the past two years the board has been making appropriations for the building, and the final appropriation is to be made next year. A total of \$500,000 for the building will be raised when the appropriations are complete. It is proposed to employ an architect at once and to begin the study of plans for the structure. Just what will be included in the building is to be decided. One proposal is that provision should be made for a third court room, anticipating enlargement of the superior court of the county to three departments.

"Gold Medal" Safety Scaffolding

for use on steel and concrete frame buildings, saves lives, time and money

It pays to use the best Scaffolding Equipment whenever a Scaffold is required. The risk is always great.

The Patent Scaffolding Company

Engineering News Section

BRIDGES

MARSHFIELD, Oregon.—Liesch & Tofte, Marshfield, at \$293,000 for concrete approaches on the west side and cedar on the east side, awarded contract by Coos County Commissioners to construct bascule type bridge over the Isthmus Inlet and Bunker Hill and the East Side, Coos Bay. Pacific Bridge Co., Portland, at approx. \$296,000 next low bidder. Bids were also submitted by: Gilpin Contracting Co., Portland; Union Bridge Co., Portland; Oregon Bridge & Dredge Co., Portland; Pacific Coast Foundation Co., San Francisco; Lindstrom & Feigenson Co., Portland and Seattle.

SAN FRANCISCO.—Healy - Tibbitts Const. Co., 64 Pine St., San Francisco, at \$7,315 awarded contract by Board of Public Works to construct reinforced concrete trestle to support 41-inch pipe line of municipal water department at Alemany Blvd.; estimated cost \$7000. Project will involve: 4,000 lin. ft. timber piling; 110 cu. yds. reinf. concrete piers, slab and girders (class A); 30 cu. yds. plain conc. piers (class B);

18,500 lbs. reinforcing steel in place. **MARIN COUNTY, Cal.**—Healy-Tibbitts Const. Co., 64 Pine Street, San Francisco, at \$329,667 awarded contract by State Highway Commission, Nov. 26, to construct bridge across Richardson Bay and over tracks of the Northwestern Pacific Railroad at Manzanita, consisting of one 56-foot plate girder lift span on concrete piers with pile foundations, one 45-ft. steel stringer span on concrete piers with pile foundations and approx. 2340 ft. of timber trestle on pile and frame bents.

SACRAMENTO, Cal.—County supervisors reject bids to construct corrugated galvanized iron culvert on Rydell-Howard Landing Road, located on Grand Island. Bidders were: Robert Heaney, \$1901; J. W. Hooper, \$2063; J. R. Reeves, \$2422; W. H. Larsen.

SAN JOSE, Santa Clara Co., Cal.—Engineering Department, Southern Pacific Railroad, 65 Market St., San Francisco, is taking bids to construct the Park Avenue Subway. Bids close December 22. The cost is estimated at \$140,000. W. H. Kirkbride, chief engineer for company.

SANTA ROSA, Sonoma Co., Cal.—Until Dec. 23, 2 P. M., bids will be received by Joint Highway District No. 16 to construct steel bridge over the Russian River, 1½ mile above Jenner, involving two 145-feet steel deck truss spans and nine 60 ft. steel girder spans with concrete deck and steel H beam piling and two concrete abutments, one 40 ft. and another 30 ft. Project involves: 58,000 cu. yds. roadway excav.; 27,000 sta. yds. overhaul; 6,000 ft. property fence, 10 gates; 116 ft. 12-in. corr. pipe; 70 ft. 24-in. do.; 180 ft. 30-in. do.; 17 cu. yds. "A" conc. (culverts). Plans obtainable from J. B. Platt, engineer, Daugherty-Shea Bldg., Santa Rosa.

DREDGING, HARBOR WORKS & EXCAVATIONS

LONG BEACH, Cal.—Merritt, Chapman & Scott, San Pedro, submitted low bid to U. S. Engineer Office, Los Angeles, to repair 3000 lin. ft. of outer section of breakwater at Long Beach and to restore defective portions. The items on which bids were submitted follow:

(a) Price per ton of 2000 lbs. of stone in place at the breakwater, furnishing plant, labor, materials, etc., for repairing damaged portions of the outer 3000 ft. of breakwater
(b) Price per hour for rental of stone placing plant for stone salvaging or resetting operations or trestle removal purposes.

(c) Alternate proposal; price per ton of stone in place in the breakwater; this proposal providing for the use of stone from a quarry so situated that direct transportation therefrom would be in part over a land grant portion of a railroad; furnish all plant, labor, etc., exclusive of transportation, between quarry and (Los Angeles Harbor) (Long Beach Harbor), but including all other charges and perform all work required for repairing damaged portion of the outer 3000 ft. of the breakwater at Long Beach Harbor.

The bids follow:
Merritt, Chapman & Scott Corp., (a) \$3.59; (b) \$17 for 20-ton floating derrick lighter, \$17 for 20-ton floating derrick lighter with scow and tender, \$35 for 90-ton floating derrick with slings, \$41 for 90-ton derrick lighter with scow and tender, \$45 per day of 8 hours for driver, tender and gear. (c) \$2.69.

Hauser Constr. Co., (a) \$3.80, (b) \$32, (c) \$2.90.
San Francisco Bridge Co., (a) \$3.97, (b) \$25, (c) \$3.37.
United Dredging Co., (a) \$3.98, (b) \$27.50, (c) \$3.38.

SACRAMENTO, Cal.—Until Dec. 16, 3 P. M., under Circular Proposal No. 31-164, Specifications No. 2731-1743, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish, deliver and place 5,000 tons rip-rap stone along the Sacramento river, between Mayberry Slough and Bakers Point. Specifications and further information obtainable from the above.

SACRAMENTO, Cal.—Franks Contracting Co., 260-California St., San Francisco and Olympian Dredging Co. 249 First St., San Francisco, at \$119 submitted identical bids to U. S. Engineer Office, California Fruit Bldg., Sacramento, to raise existing levee along east and south boundaries of the Liberty Farms Project No. 2, located southerly of Yolanda Station on the Sacramento Northern Railroad, involving approximately 350,000 cubic yards.

RICHMOND, Contra Costa Co., Cal.—Until January 8, 3 P. M., bids will be received by U. S. Engineer Office, Customhouse, San Francisco, for furnishing about \$1,000 tons of core rock and 18,000 tons of facing rock and building an extension to the training wall in Richmond Harbor. Specifi-

cations obtainable from above office. See call for bids under official proposal section in this issue.

IRRIGATION PROJECTS

RICHVALE, Butte Co., Calif.—Authority has been granted by the Railroad Commission to Sutter Butte Canal Co. to transfer to Richvale Irrigation Dist. an undivided one-quarter interest in the water rights of that company on the Feather River, excepting the so-called Sunset pumping permit; and also an undivided one-quarter interest in the company's main dam and diversion works and other diversion facilities at the Feather River; also an undivided one-quarter interest in the main canal from said diversion works to the point where the Biggs lateral branches therefrom; also an undivided one-half interest in the Biggs lateral to the head of the Biggs extension, and also all of said Biggs extension lateral, together with ditches leading therefrom, pumps, buildings and other operative property necessary to serve the so-called Richvale area. The purchase price thereof is \$750,000 of which \$500,000 is payable in bonds of the district and the remaining \$250,000 to be paid within 20 years, with interest at the rate of 6% per annum on the unpaid balance. It is proposed by the district to supply irrigation water to approximately 18,000 acres within the Richvale district and approximately 15,000 acres outside the district, mostly devoted to rice culture and located in Butte County.

STREET LIGHTING SYSTEMS

TURLOCK, Stanislaus Co., Calif.—Until December 29, 2 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for improvements in Districts Nos. 58, 34, 38, 41, 45 and 49, involving:
(1) 648,537 sq. ft. 2-in. concrete canal lining;
(2) 452 cu. yds. concrete in canal structures;
(3) 8,330 lin. ft. 30-inch dia. conc. pipe;
(4) 2,410 lin. ft. 36-inch dia. conc. pipe;

Certified check 5% payable to Turlock Irrigation District required with bid. Plans obtainable from secretary.

LIVERMORE, Alameda Co., Cal.—Informal bids will be considered by the city trustees on December 22 to replace the present electrolier system in the business district. Companies whose standards are manufactured in California are especially requested to submit bid. Standards will be 16 ft. in height and will be installed in First St., between M St. and the Southern Pacific Railroad tracks. A complete new underground system will be required. Further information obtainable from city clerk.

MACHINERY AND EQUIPMENT

OAKLAND, Cal.—Sherman Tractor and Equipment Co., 931 E 14th Street, San Leandro, at \$1,695 submitted low bid to City Port Commission to fur-

nish one new Industrial Type Tractor. Edward R. Bacon Co., San Francisco, \$1,717.50 and Taylor & George, San Francisco, \$1,950, were other bidders. Taken under advisement.

LA MESA, San Diego Co., Cal.—Until 7:30 P. M., Dec. 23, bids will be received by the city council for one 15-hp. tractor, crawler type, with gasoline motor; and one grader, equipped with 8-ft. blade, flat tires, tractor pole, cable and cast steel scarifier with 12 or more removable and adjustable heavy steel teeth, which said tractor, grader and scarifier shall conform with the specifications for Caterpillar Fifteen Tractor, and Caterpillar Fifteen Grader and Scarifier, as manufactured by the Caterpillar Tractor Co. or the equal. O. E. Larnum, city clerk.

SAN JOSE, Santa Clara Co., Cal.—Until December 23, 8 P. M., bids will be received by J. J. O'Brien, clerk, Orchard School District, to furnish and deliver one 40-passenger school bus. Specifications obtainable from the clerk.

STOCKTON, San Joaquin Co., Cal. County will sell at public auction on December 16, 11 A. M., at main entrance to courthouse, the following equipment no longer required:

One 1934 model Reo Speedwagon, engine No. 102566; one 1913 model 3½ ton Reo Truck Engine No. 29337; one 1927 model Dodge Special Coupe, Engine No. D 933596.

Separate offers are desired for each piece of equipment. Permission to inspect the above equipment may be secured from the clerk.

SACRAMENTO, Cal.—E. D. Adams, city controller, will sell at public auction on December 13, 10 A. M., the following equipment at the City Corporation Yard, 33rd and S Sts., no longer required by the city:

One Standard Weather Bureau Shelter.

One No. 255 Lietz U. S. Weather Bureau Standard, Maximum and Minimum Thermometer.

One Standard U. S. Weather Bureau Rain Gauge.

EUREKA, Humboldt Co., Calif.—Until December 17, 7:30 P. M., bids will be received by Geo. E. Albee, city superintendent of schools, to furnish on new Studebaker 6-cylinder Regal 5-passenger sedan, late model, complete with two spare tires, luggage carrier, hydraulic shock absorbers, front and rear bumpers. Certified check 10% payable to Eureka High School District required with bid. Further information obtainable from above.

SEATTLE, Wash.—Until January 2, 10 A. M., bids will be received by Board of Public Works to furnish and erect a 300-ton, two trolley traveling crane for the powerhouse of the Diablo plant, located on the right bank of the Skagit river, situated about one-half mile below Diablo dam. Specifications are obtainable from G. W. Roberge, secretary.

LOS ANGELES, Cal.—Until January 7, 10 A. M., bids will be received by General Manager, Los Angeles Harbor Department, 405 Branch City Hall, San Pedro, to construct and deliver a Diesel Engine propelled pilot boat under Specification No. 569. Specifications obtainable from above.

MADERA, Madera Co., Cal.—Moreland Sales Corp., Fresno, at \$2,555 awarded contract by city council to furnish one new Moreland Truck chassis, not less than 5300 pounds capacity.

SACRAMENTO, Cal.—Until December 18, 3 P. M., bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver Rio Vista, Solano County, under Order No. 2705-1723, one new motor driven air compressor; horizontal water cooled air compressor of not less than 310 cubic feet piston displacement and 110 lbs. working pressure, motor driven, close coupled, with multiple "Y" belt or tuxorope drive and constant speed regulation.

A compressor of approximately 12" bore and 16" strokes is desired. Pressure and volume control to be of unloading inlet valve type and to be equipped with air filters. Compressors of the Ingersoll Rand Class E.R. or Chicago Pneumatic Class P 6-DE class are desired and preferred. The motor shall be similar and equal to a "GE" or Westinghouse 60 H.P., 40 degree, 220 volt, 3 phase, 60 cycle, squirrel cage, induction motor complete with pulley of proper size and the necessary belt. The motor shall be furnished on a sliding base or rails and manually operated, with low voltage and overload protection.

Bidders will also state allowance which will be made for trade in value of single stage 7½"x6", Class N-SE, Sealed Air, 16254 used compressor shown on page 17, Bulletin 720, Chicago Pneumatic Tool Co. This compressor does not include the motor or belt.

SAN FRANCISCO.—Until December 15, 10 A. M., under Schedule No. 923-11-149, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver one clam shell bucket, 1-yard capacity. Height of bucket closed, 7 ft. 6-in.; length 5 ft. 7-in.; width 3 ft. 8-in.; distance between jaws, bucket open 7 ft. 4-in.; height bucket open 8 ft. 7-in.; weight approx. 4380 lbs. To be equal and similar to Browning Reeved Bucket. To work with McMyler Interstate Co.'s Steam Crane No. 3341. Bidder to submit cut and full description of bucket he proposes to furnish. Loose or spare parts to be packed in wooden cases, iron strapped, suitable for export shipment. Further information obtainable from above.

RAILROADS

LAS VEGAS, Nev.—Until Jan. 12, bids will be received by the U. S. Bureau of Reclamation, Las Vegas, for the construction of a railway from Boulder City to the Hoover Dam site. This work will involve construction of 10.5 miles of railroad construction with heavy construction in solid rock formation, including five tunnels within 1 mile. The project will extend from the summit, the end of the L. A. & Salt Lake Ry. section, down to the dam site. The principal items and quantities follow:

- 115,000 cu. yds. of common excav.
- 364,000 cu. yds. of rock excav.
- 163,000 cu. yds. of unclass. borrow;
- 803,000 sta. yds. of overhaul;
- 287,000 cu. yds. of long haul unclass. borrow "loaded into hauling equipment";
- 705,000 yd. mt. of hauling and spreading "long haul unclass. borrow";
- 29,000 cu. yds. of tunnel excav.
- 200,000 ft. b.m. permanent tunnel timbering;
- 800 cu. yds. struc. excav. common
- 1,200 cu. yds. of struc. excav. rock;
- 6,000 cu. yds. of rock fill;
- 220 cu. yds. of concrete;
- 16,000 lbs. of reinforcement steel;
- 2,100 cu. yds. of rock riprap;
- 2,600 cu. yds. of concrete crib wall;
- 1,600 lin. ft. 24-in. corru. pipe;

- 120 lin. ft. of 30-in. do.
- 180 lin. ft. of 36-in. do.
- 280 lin. ft. of 42-in. do.
- 200 lin. ft. of 48-in. do.
- 600 lin. ft. of 60-in. do.
- 30,000 ft. b.m. of bridges or trestle timbering;
- 200 lbs. of rail stringers in rail to top trestle;
- 2,000 lin. ft. of piling;
- 80 pile point shoes;
- 22,800 cu. yds. of ballasting;
- 7 miles of laying track (tie plated);
- 10 miles of laying track (not tie plated).

J. C. Page is office engineer at Las Vegas. S. G. Harper, acting chief engineer, Denver.

FIRE ALARM SYSTEMS

CULVER CITY, Los Angeles Co., Cal.—Until 8 P. M., Dec. 22, bids will be received by the city council for constructing one set of Neon type 4-post sidewalk traffic signals at Washington and Centinella Blvds. P. H. Jarrett, city clerk.

FIRE EQUIPMENT

MADERA, Madera Co., Cal.—Until January 6, 11 A. M., bids will be received by L. W. Cooper, county clerk.

(1) For sale of Second Hand Moreland Fire Truck now owned by Road District No. 3 of Madera County.

(2) For purchase of one New Fire Truck and equipment.

Specifications and further information obtainable from above.

YREKA, Siskiyou Co., Calif.—Seagrave Corp. at \$11,750 awarded contract by city trustees to furnish one 500 g.p.m. motor-driven pumping engine and hose car with water equipment and a motor-driven service hook and ladder truck. Other bids were: American La France and Foamite Corp., \$13,000; \$14,235 and \$15,700; Mack International Motor Co., \$12,544; Ahrens - Fox Fire Extinguisher Co., \$13,560; Travelers Garage (Studebaker), Yreka, \$11,815; Watkins-Hobson Co. (Dodge Bros.), Redding, \$7,296 chassis, hook and ladder equipment.

RESERVOIRS AND DAMS

MODESTO, Stanislaus Co., Cal.—City Engineer Frank J. Rossi has prepared a preliminary design for a weir dam across the Tuolumne River to create a water playground for Modesto. Surveys have been made for 5-ft., 7-ft., and 10-ft. dams. The 10-ft. dam would create a lake approximately 2 miles in length by 330 to 350 ft. in width. Estimates run from \$6000 to \$15,000.

PHOENIX, Ariz.—American Concrete Pipe Co., 4635 Firestone Blvd., Los Angeles, and Schmidt-Hitchcock, Contractors, of Phoenix, bidding jointly, were awarded the contract by the Phoenix city commission Dec. 4, at \$2,053,110.15 for constructing the Verde Intake pipe line, reservoir and distributing system. The bid was based on Schedule A, Granite Reef alternate, for centrifugally cast concrete pipe. The bid on the reservoir was \$130,000. The system to be built includes the following:

Unit No. 1—31.5 miles of supply line from the intake on the Verde River to the new reservoir site, including 36-in., 48-in., 54-in. pipe, with tunnel, largely granite, 5½x7½ ft., lined where necessary. This section includes junction chambers, concrete in crossings, manholes, air and vacuum valves, blowoff and gate valves.

Unit No. 2—20,000,000-gallon reser-

volt, earth embankment, concrete lined, concrete central house and water distributing tower. Work involves 26,000 cu. yds. excavation and embankment, 85,000 cu. ft. concrete, 270 ft. 54-in. and 220 ft. 48-in. pipe, and one 54-in. Venturi valve, and one 54-in. valve, two 48-in. valves.

Unit No. 3.—Construction of supply lines from reservoir to city limits, involving: 256,260 ft. 48-in. or 45-in. pipe, 7900 ft. 42-in. pipe, 4020 ft. 36-in. pipe, 16,023 ft. 24-in. pipe, 1 junction chamber, 2 48-in. elect. operated valves, 2 48-in. hand operated valves, 4 42-in. hand operated valves, 8 24-in. elect. operated valves, 1 16-in. valve, 9 5-in. valves, 10 6-in. valves, also rees, reducers, etc.

No. 4.—Construction of about 6 miles of cast iron distribution mains in the city. Pipe to be 12-in., 8-in. and 6-in. U. S. make. Unite No. 5.—Detritor (sand and silt remover on incoming line just below intake). Work involves one 60-ft. Dorr detritor (basin) with 77-ft. by 71-ft. concrete floor, steel frame roof, and galvanized iron cover. C. C. Kennedy, Call Bldg., San Francisco, is engineer.

PIPE LINES, WELLS, ETC.

SANTA CLARA, Santa Clara Co., Cal.—City trustees will ask bids a once to drill and case a 16-inch well at the municipal water plant. George Sullivan, city engineer.

SEWERS AND SEWAGE DISPOSAL PLANTS

MONTEREY, Monterey Co., Cal.—John Pestana, 1232 35th Ave., Oakland awarded contract by city council (\$342) to construct 6-in. vitrified sewers in portions of Fillmore St., Grace St., Terry St., Parcel St., etc., together with 31 manholes, 4 inspection holes and 570 wye branches.

BAKERSFIELD, Kern Co., Calif.—Stroud Bros. and Seabrook, Bakersfield, at \$1,107.62 awarded contract by city council to construct sanitary sewers in blocks 241, 245 and 246, Bakersfield, formerly Kern in District No. 609, involving 1322 ft. 6-in. cem. sewer pipe; 2 manholes; 3 lampholes.

HAYWARD, Alameda Co., Calif.—City Engineer Jesse B. Holly preparing plans for sewer in Dean St., property owners having petitioned for the work.

BENICIA, Solano Co., Cal.—Engineer E. N. Eager, % County Surveyor's Office, Fairfield, is making surveys for sewer system in eastern section of city.

CARMEL, Monterey Co., Cal.—City trustees will select an engineer shortly to make a survey for a sewer system in connection with drainage of Mission Street.

BERKELEY, Alameda Co., Cal.—Martin Murphy, 777 8th St., Oakland, at \$4670 submitted low bid to city council to construct sewer in Third St. from Glisan St. to Camella St. Following is a complete list of bids received:

Martin Murphy, (a) 550 feet 30-inch pipe, \$5.80; (b) 60 ft. 12-in. pipe, \$2.50; (c) 5 manholes, \$70; (d) 2 catchbasins, \$100; (e) 20 cu. yds. Class B concrete, \$10. Total, \$4670.

Lee J. Immel (a) \$6.25; (b) \$1.60; (c) \$70; (d) \$60; (e) \$4,828.50.

W. J. Tobin (a) \$6; (b) \$2; (c) \$75; (d) \$120; (e) \$4875.

U. B. Lee (a) \$5.91; (b) \$1.55; (c) \$90; (d) \$125; (e) \$15. \$4934.50.

Oakland Sewer Constr. Co. (a) \$6.30; (b) \$1.50; (c) \$60; (d) \$100; (e) \$15. \$4935.

Robert McNair (a) \$6.60; (b) \$2.20; (c) \$67; (d) \$120; (e) \$9. \$5179.70.

Ed. Bowman (a) \$7; (b) \$2.50; (c) \$90; (d) 65; (e) \$12.

OAKLAND, Cal.—Until December 12 noon, bids will be received by F. C. Merritt, city clerk, to construct sewer through the property of Mills College and certain highways adjacent thereto, involving:

- (1) 2660 lin. ft. 18-in. pipe sewer;
- (2) 1160 lin. ft. 21-in. do;
- (3) 40 lin. ft. 18-in. pipe sewer with concrete jacket;
- (4) 20 lin. ft. 21-in. do;
- (5) 16 manholes;
- (6) 3 8-in. drop lampholes;
- (7) 30 Y branches.

Est. cost \$20,000. Bond of one-fourth of contract price required of successful bidder. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

OAKLAND, Cal.—Until December 12 noon, bids will be received by F. C. Merritt, city clerk, to construct sewer in Adeline St. bet. 8th and 22nd Sts., involving:

- (1) 200 lin. ft. 12-in. pipe sewer;
- (2) 2164 lin. ft. 15-in. do;
- (3) 1238 lin. ft. 18-in. do;
- (4) 4 manholes.

Est. cost \$12,000. Bonds of one-fourth of contract price required of successful bidder. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

MISCELLANEOUS CONSTRUCTION

MARTINEZ, Contra Costa Co., Cal.—County supervisors have pledged \$454,000 to aid in the construction of a new inter-county low level tunnel to replace the present tunnel on the Oakland-Pittsburg Highway. Alameda County is to provide an additional \$4,095,100 and the state \$300,000 to finance the project.

SAN FRANCISCO—Anticipating the voting of \$2,500,000 in bonds in January to relieve unemployment the Board of Public Works has directed City Engineer M. M. O'Shaughnessy to prepare plans and specifications for the following improvements:

Development of Meadows in Golden Gate Park;

Bride path from Sutro Heights to Sea Cliff;

Foot path from Sutro Heights to 32nd Ave.;

Foot path around Telegraph Hill; Driveway in McLaren Park;

Foot path through Sunset Square; Improve existing roads in Golden Gate Park (widened Stow Lake Drive);

Planting and grading Telegraph Hill; Improve Aquatic Park, Yacht Harbor and Balboa Park and roadways in Sharp Park in San Mateo County and improve structures, facilities, grounds and equipment of the following playgrounds: Potrero Hill, Ocean View, St. Mary's, Julius Kahn and Funston Annex.

Certain improved routes of road around the shores of Lake Merced, recondition streets and areas in Sunset District bounded by Lincoln Way, Slot Blvd., 7th Ave. and Great Highway; extension over Clarendon Ave. to 7th Ave.; road around Elue Mountain; improve Slatley St. Parkway between Alemany and Junipero Serra Blvds., Bernal Heights Blvd., roadways within and approach of Laguna Honda Home and all such readjustments to substructures, etc.

WATER WORKS.

ANTIOCH, Contra Costa Co., Cal.—A. Bloom, 450 Clemente St., San Francisco, at \$2,447 awarded contract by town clerk to furnish and install a horizontal pressure filter; for enlarging the building housing filters in addition to other minor improvements at Municipal Water Plant.

Following is a complete list of bids: A. Bloom, San Francisco, \$2,447; David Nordstrom, Oakland, \$2,585; International Filter Co., S. F., \$2,925; California Filter Co., S. F., \$3,093. Bids of the Chemical Equipment Co., Los Angeles, was not considered as bids was not submitted in proper form.

MADERA, Madera Co., Cal.—City trustees take under advisement until December 16, bids received to furnish and install pump at sewage disposal plant; 600 g.p.m. to 900 g.p.m. connected to electric motor. Bids were: Industrial & Municipal Supply Co., 7 Front St., S. F., \$1,812; Fairbanks-Morse Co., S. F., \$1,847; C. V. Martin, S. F., \$2,031; DeLaval Steam Turbine Co., San Francisco, \$2,031; Water Works Supply Co., S. F., \$2,049.

REDLANDS, San Bernardino Co., Cal.—Until December 17, 2 P. M., bids will be received by C. F. Hook, city clerk, to furnish and install one horizontal booster pump and motor as follows: 300 pounds pressure, 900 G. P. M. direct connected, 60 cycle electricity. Eider to submit complete specifications of pump, including performance curve. All bids f.o.b. Redlands.

REDWOOD CITY, San Mateo Co., Cal.—Bids will be asked at once by city council to furnish 6- and 8-inch pipe in connection with extensions to water system; total estimated cost, including construction, \$17,500. C. L. Dimmitt, city engineer.

EL MONTE, Los Angeles Co., Cal.—Until December 15, 3 P. M., bids will be received by Beatrice E. Darling, city clerk, to furnish and deliver cast iron water pipe, valves, fittings, etc. Certified check or bond of 10% required with bid. Specifications obtainable from clerk.

RENO, Nevada.—City council plans immediate purchase of two pumps and a water tank to be installed at sewage disposal plant to pump fresh water.

EMPIRE, Ore.—Until December 15, 11 A. M., bids will be received by Public Works Officer, Navy Yard, Bremerton, Wash., to construct water tank and water supply system at Naval Compass Station at Empire; will involve 20,000-gallon wooden tank and supporting structure on concrete piers and install new water system. Plans obtainable from Public Works Officer at Bremerton or from Radioman A. Empire.

SACRAMENTO, Cal.—New breaks have developed in the sedimentation basin at the Municipal Filtration Plant and will require immediate repairs "as the entire basin is liable to collapse at any time," according to reports submitted to the city council. Fred J. Klaus, city engineer, will submit estimates of cost for necessary repairs to the council shortly.

ELLINGHAM, Wash.—City council contemplates bond issue for \$500,000 to finance improvements and extensions to water system. Preliminary estimates of cost have been submitted by R. H. Thompson, engineer. Seattle.

SAN FRANCISCO.—E. J. Treacy, Call Bldg., at \$27,108 awarded contract by Board of Public Works to furnish and install water supply system in Sunset Blvd., involving:

- 10,900 lin. ft. 4-in. c. i. pipe;
- 5,450 lin. ft. 2-in. galv. w. i. pipe;
- 9,324 lin. ft. 1½-in. do;
- 10,920 lin. ft. 1¼-in. do;
- 27,405 lin. ft. ¾-in. do, (sprinkler lines);
- 5 4-in. body, brass trimmed, wedge gate, non-rising stem, standard valves with tub ends including 4-in. valve boxes and covers & socket wrenches;
- 270 brass lawn cocks, hinged cover and outlet threaded for 1-in. hose with 20 keys for above;
- 30 brass boxes with hanged covers for 2-in. gate valves.

BEVERLY HILLS, Cal.—Herbert M. Baruch Corp., 1015 Lincoln Bldg., Los Angeles, submitted the low bid to City Council at \$36,866 to construct Water Treatment plant No. 2.

The low bid on the equipment submitted by the International Filter Co., 108 W. Sixth St., Los Angeles, at \$19,755.

The bids were:

Treatment Plant—Herbert M. Baruch Corp., \$36,866; Nead Constr. Co., \$36,937; Harry Friedman, \$39,700; Fred F. Greenfield Co., \$37,326; Carpenter Bros., Inc., \$37,197.

Equipment—International Filter Co., \$19,755; Californian Filter Co., \$20,328; E. W. Bacharach & Co., \$25,000. Bids were referred to the Consulting Engineers, Salisbury, Bradshaw & Taylor, 745 Petroleum Securities Bldg., Los Angeles, for recommendations.

SAN FRANCISCO.—Until December 17, 3 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to furnish and install electrically driven centrifugal pump with appurtenances at the Mills Field Municipal Airport. Estimated cost, \$4,-

000. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Specifications obtainable from Bureau of Engineering, 3rd floor, City Hall.

TIMBUCK, Stanislaus Co., Calif.—City council plans installation of a fifth auxiliary pumping plant in connection with the municipal water system. James Brown is city water superintendent.

SAN FRANCISCO.—E. J. Treacy, Call Bldg., at \$27,108 submitted low bid to Board of Public Works to furnish and install water supply system in Sunset Blvd., involving:

- 19,800 lin. ft. 4-in. c. i. pipe;
- 5,450 lin. ft. 2-in. galv. w. i. pipe;
- 9,324 lin. ft. 1½-in. do;
- 10,920 lin. ft. 1¼-in. do;
- 27,405 lin. ft. ¾-in. do, (sprinkler lines);
- 5 4-in. body, brass trimmed, wedge gate, non-rising stem, standard valves with tub ends, including 4-in. valve boxes and covers and socket wrenches;
- 270 brass lawn cocks, hinged cover and outlet threaded for 1-in. hose with 20 keys for above;
- 30 brass boxes with hanged covers for 2-in. gate valves.

Complete list of bids follows:

E. J. Treacy	\$27,108
Pacific Irrigation Co.	30,052
F. L. Burr	30,243
F. L. McHugh	31,983
J. Currie	33,904
Pacific Pipe Co.	34,046
L. J. Cohn	35,684
Calif. Const. Co.	35,642
C. B. Eaton	39,436

SACRAMENTO, Cal.—Rensselaer Valve Co., 55 New Montgomery St., San Francisco, at approximately \$4000 awarded contract by city council to furnish fire hydrants.

SAN DIEGO, Calif.—City Hydraulic Engineer H. N. Savage has recommended to the city council that a new pipe line from Dulzura Summit will be constructed to a reservoir in the vicinity of Mt. Helix or the Murray reservoir. The proposed line would be about 20 miles in length with a drop of about 30 ft. per mile. This would eliminate pumping. Preliminary profiles have been prepared.

SEATTLE, Wash.—Bids will be asked shortly by Board of Public Works to replace Cedar River Pipeline No. 1 from Warsaw St. to the Beacon Hill Reservoir. Alternate bids will be received on "cast iron, steel or concrete pipe." Approximately 8,600 ft. of pipe, 54-in. in diameter, is involved.

PALO ALTO, Santa Clara Co., Cal.—Formation of Santa Clara County Water Works District No. 1 was authorized by voters Dec. 1. This district contemplates the installation of

a water system to serve a portion of South Palo Alto, Santa Clara County, and will set date soon to vote on issuing bonds in the amount of \$30,630 for the construction of the water system improvements. Plans and specifications for these improvements are to be prepared by Consulting Engineers Burns, McDonnell-Smith Engineering Co., 422 Western Pacific Bldg., Los Angeles. R. B. Chandler, Court House, Santa Clara County, is the county surveyor. Henry A. Pfister is county clerk.

THE DALLES, Ore.—Until Dec. 15, 8 P. M., bids will be received by City Water Commission to furnish 2,000 ft. 8-in. and 5,500 ft. 6-in. cast iron pipe and a large assortment of fittings to be used in extensions and replacements in connection with municipal water system. Specifications obtainable from city clerk.

BEVERLY HILLS, Calif.—Herbert M. Baruch Corp., 1015 Lincoln Bldg., Los Angeles, at \$36,866 awarded contract by city to construct Water Treatment Plant No. 2. Bids for equipment still under advisement.

PLAYGROUNDS & PARKS

SAN DIEGO, Cal.—An election will be held between Jan. 27 and Feb. 15 to vote on a \$435,000 bond issue to match an equal sum offered by the state for four parks in San Diego County, according to an announcement by the county board of supervisors.

STREETS AND HIGHWAYS

SAN FRANCISCO.—Until Dec. 16, 2 P. M., bids will be received by State Harbor Commission to pave Pier No. 1 and portions of the Embarcadero adjoining Pier No. 1, involving:

- 93,750 sq. ft. 1½-in. Topeka wearing surface;
- 14,000 sq. ft. 2-in. Topeka wearing surface;
- 8,900 sq. ft. 1-in. minimum Topeka wearing surface on depressed track;
- 1,300 sq. ft. 1½-in. Topeka wearing surface on 3½-in. base;
- 150 cu. yds. concrete base;
- 3,720 sq. ft. concrete sidewalk, reconstruction of curbs and catchbasins.

State will furnish Portland Cement required in the work. Certified check 5% payable to Mark H. Gates, secretary of the Board, required with bid. Plans obtainable from Frank G. White, chief engineer of the commission.

SONOMA, Sonoma Co., Cal.—Town trustees have budgeted \$3000 to finance oil macadam paving in various streets.

JAYWARD, Alameda Co., Cal.—Until December 17, 8 P. M., bids will be received by M. B. Templeton, city clerk, (\$26) to improve Prospect St., bet. Simon and Warren Sts., and Warren St., bet. Main and Prospect Sts., involving:

- (1) 700 sq. ft. concrete sidewalk;
- (2) 202 lin. ft. 4-in. vit. clay side sewer;
- (3) 34,923 lin. ft. 6-in. full penetration emulsified asph. macadam paving, including grading;
- (4) 54 lineal feet redwood header-board.

Estimated cost, \$5,000. 1911 Act and Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Jesse B. Holly, city engineer.

SACRAMENTO, Cal.—Until Dec. 11, 8:15 P. M., bids will be received by H. G. Denton, city clerk, to furnish and spread 146,000 gallons of light asphalt on runways at the Sacramento Municipal Airport. Certified check 10% payable to City Controller required with bid. Specifications on file in office of clerk. Fred J. Klaus, city engineer.

SONORA, Tuolumne Co., Cal.—W. C. Colley, 35 North Hampton Street, Berkeley, at \$14,500 awarded contract by county supervisors to improve Montezuma road, for a distance of 3 1/4 miles. D. R. Hanify, at \$17,094, only other bidder. Project involves grading, culvert extensions and Bitumulus surface below Jamestown, connecting the state highway with the Big Oak Flat road near Chinese Camp.

OAKLAND, Cal.—Heafey-Moore Co. 444 High Street, Oakland, at \$83,500 awarded contract by city council to improve portions of Hopkins Street and portions of Hopkins Street, and Coolidge Ave., involving:

- 344,626 sq. ft. grading, \$.02.
- 852 lin. ft. conc. curb with steel curb guard, \$.70.
- 10,350 lin. ft. conc. curb, \$.50.
- 270,020 sq. ft. conc. pavement, \$.216.
- 923 sq. ft. concrete driveway, \$.25.
- 60,816 sq. ft. conc. sidewalks, \$.15.
- 188 lin. ft. 10-in. vit. pipe conduit with conc. covering, \$1.25.
- 14 lin. ft. 10-in. pipe conduit, \$1.25.
- 101 lin. ft. 12-in. do., \$1.23.
- 46 lin. ft. 12-in. do., \$1.45.
- 28 lin. ft. conc. box culvert with reinforced top, \$2.40.
- 2 concrete handholes with cast iron covers, \$15.
- 2 concrete inlets with cast iron grating, \$20.
- 1 manhole, \$60.
- 1 storm water inlet (Type A), \$30.
- 12 storm water inlets (34-in. opening), \$25.
- 176 lin. ft. 8-in. vit. pipe sewers, \$1.
- 2347 lin. ft. 5-in. vit. pipe side sewers, \$.60.
- 9 manhole tops, \$23.
- 2 lampholes, \$15.
- 1 lamphole to be reinforced, \$7.
- 4 Y branches, \$.50.

1911 Act. City will pay 22 1/2% of total cost from Treasury. Complete list of unit bids published in issue of Dec. 5th.

OAKLAND, Cal.—A. Soda, 1139 65th St., Oakland, at \$1,625 sq. ft. awarded contract by city council to construct concrete sidewalks in portions of Ney Ave., Ritchie St., 82nd Ave., and Monticello Ave.

OAKLAND, Cal.—A. Soda, 1139 65th St., Oakland, at \$16 sq. ft. awarded contract by city council to construct cement concrete sidewalks in portions of Allendale Ave., Birdsall Ave. and 57th Ave.

OAKLAND, Cal.—City council declares intention to improve Patterson Ave. adjacent to Harbor View Ave., involving:

- (1) 608 cu. yds. excavation;
- (2) 305 lin. ft. cement curb;
- (3) 616 sq. ft. concrete gutter;
- (4) 474 sq. ft. penetration macadam pavement;
- (5) 1413 sq. ft. cement sidewalk;
- (6) 136 lin. ft. 6-in. pipe sewer;
- (7) 1 manhole;
- (8) 1 lamphole;
- (9) 6 Y branches.

Est. cost \$2300. 1911 Act. Hearing Dec. 24. Chas. M. Don, acting city clerk. Walter N. Frickstad, city engineer.

OAKLAND, Cal.—City council declares intention to improve Macdonald Ave. bet. Florence and Moraga Aves., and portions of Florence and Proctor Aves., Amy Drive and Moraga Ave. adjacent to Masonic Ave., involving:

- (1) 11,673 cu. yds. excavation;
- (2) 5,526 lin. ft. concrete curb;
- (3) 11,078 sq. ft. concrete gutter;
- (4) 80,531 sq. ft. concrete penetration macadam pavement;
- (5) 13,597 sq. ft. concrete cement sidewalks;
- (6) 30 lin. ft. 8x29-in. corr. iron and cement culvert;
- (7) 10 lin. ft. 8x24-in. do.;
- (8) 74 lin. ft. 12-in. reinf. concrete pipe conduit;
- (9) 336 lin. ft. 15-in. do.;
- (10) 55 lin. ft. 12-in. extra strength reinf. conc. pipe conduit;
- (11) 206 lin. ft. 15-in. do.;
- (12) 1 storm water inlet (2-inch opening);
- (13) 6 storm water inlets (34-in. opening);
- (14) 4 concrete handholes with cast iron covers;
- (15) 1 manhole;
- (16) 59 lin. ft. wooden culvert.

Est. cost \$35,815. Street Imp. Act 1913. Hearing Jan. 8. Chas. M. Don, acting city clerk. Walter N. Frickstad, city engineer.

SAN FRANCISCO.—Bids will be asked shortly by S. J. Hester, secretary, Board of Public Works, to improve Montgomery St. from Union to Greenwich Sts.; Alta St. from Montgomery to point 303 ft. easterly; Filbert St. from Montgomery to point 16 ft. westerly and from Montgomery to point 22 ft. easterly; Greenwich St. from Montgomery to point 22 ft. westerly, involving:

- 3,040 cu. yds. excavation;
- 1,255 cu. yds. "B" concrete (retaining walls, balustrade, stairs, fences);
- 115,000 lbs. reinforcing steel;
- 1,540 lin. ft. 4x4-in. reinf. concrete fence, single rail;
- 23,600 sq. ft. 6-in. "E" concrete pavement;
- 11,200 sq. ft. 8-in. waterbound macadam base and oiled surface;
- 6 tons asphalt concrete conform pavement;
- 2,740 lin. ft. armored concrete curb;
- 6,999 sq. ft. 1-course concrete sidewalk;
- 250 lin. ft. 4x16-in. redwood curb;
- 33 lin. ft. wood guard rail, heavy type;
- 450 lin. ft. wood fence, light type;
- 190 lin. ft. wood bulkhead;
- 110 lin. ft. 2-pipe railing concrete posts;
- 3 9-unit rod warning reflectors;
- 810 lin. ft. 8-in. vitrified sewer;
- 540 lin. ft. 12-in. do.;
- 20 lin. ft. class B 8-in. cast iron sewer;
- 35 lin. ft. class B 12-in. do.;
- 140 lin. ft. six-inch vitrified side sewer;
- 32 8x6-in. Y's or T's;
- 10 12x6-in. do.;
- 120 lin. ft. 12-in. vitrified culvert;
- 15 brick manholes;
- 6 brick catchbasins;

2 storm water inlets;
1 lighting system (complete);
Work under Street Improvement Ordinance of 1918.

SAN LUIS OBISPO, Calif.—County supervisors have declared their intention to join with Kings and Kern counties in the construction of the Cottonwood Pass Highway, from the Kings-Fresno county line to the Cholame Lateral at Cholame. Kings county has \$80,000 for its share of the cost and according to tentative estimates \$42,000 would be required of San Luis Obispo county. The road would be graded and graveled according to state specifications and taken over by the state upon completion.

MILL VALLEY, Marin Co., Calif.—McDonald & Magorrio, Sausalito, at \$7,384.76 awarded contract by town trustees to improve portions of Blithedale Ave. involving grading, hyd. concrete paving, hyd. conc. curbs, walks. Complete list of bids follows:

McDonald & Magorrio.....	\$ 7,384
L. J. Immel, Berkeley.....	9,018
Louis Lambretti, San Rafael.....	9,014
G. M. McGaw, Stockton.....	8,773
J. B. Galbraith, Petaluma.....	9,160
F. J. Main, Fairfax.....	10,998
Engineer's estimate.....	9,330

KERN COUNTY, Calif.—Until Dec. 30, 2 P. M., bids will be received by State Highway Commission to grade and surface portions with bituminous macadam on 3.0 miles between Harts Station and 3 miles east. C. H. Purcell, state highway engineer.

See call for bids under official proposal section in this issue.

SAN JOSE, Santa Clara Co., Calif.—Until Dec. 15, 8 P. M., bids will be received by John J. OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on December 30, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Kern County, between Harts Station and three miles east (VI-Ker-33 C), about three (3.0) miles in length, to be graded and portions surfaced with bituminous macadam.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding,

Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

C. H. PURCELL,
State Highway Engineer
Dated December 3, 1930.

NOTICE TO CONTRACTORS

SEALED BIDS will be received by George McQuigall, State Architect, Public Works Building, 11th and F Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, January 6, 1931, said bids thereafter on said day to be publicly opened and read for the erection and completion of the Kitchen and Commissary Building and the Boys' and Girls' Dormitory Building, California School for the Deaf, Berkeley, California, in accordance with plans and specifications therefor.

The Kitchen and Commissary Building to be a one-story reinforced concrete structure with tile partitions, steel and wood roof construction, and tile roof. The total floor area is approximately 14,000 square feet.

The Boys' and Girls' Dormitory Building is to be a two-story reinforced concrete structure with tile partitions, wood roof construction and tile roof. The total floor area is approximately 42,700 square feet.

Separate bids will be entertained for the following segregated parts of the work and combinations thereof as listed:

1. General Work and Alternates
2. Electrical Work and Alternates.
3. Plumbing, Heating and Ventilation Work and Alternates.
4. Complete Mechanical including Plumbing, Heating, Ventilating, Electrical Work and Alternates

The "General Work" bid will embrace all branches of work other than segregated above. Contractors shall state clearly in their application the particular segregation of work that they desire bids for.

Alternative bids required will be for the addition to the contract of the Bakery Unit marked Alternate A on plans and the addition of the Arcade and Patio marked Alternate B both affecting the Kitchen and Commissary Building and involving both general and mechanical work. A third alternate required involving the omission of elevator equipment in both buildings is designated as Alternate C in the specifications. See Section eleven (11) of the specifications for work requiring Alternative bids.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF ARCHITECTURE,
GEO. B. McDUGALL,
State Architect.

B. B. MEEK,
Director of Public Works.

STREETS AND HIGHWAYS

OAKLAND, Cal.—Until Dec. 18, 12 noon, bids will be received by Frank C. Merritt, city clerk, to grade and pave a 30-ft. strip along the center line of Fourteenth Ave. bet. East 12th and East 14th Sts. Bond of \$600 required of the successful bidder. Spec. on file in office of clerk. Walter N. Frickstad, city engineer.

PALO ALTO, Santa Clara Co., Cal.—Until January 12, 7:30 P. M., bids will be received by E. L. Beach, city clerk, (938) to improve High St. bet. Lytton Ave. and Addison St., involving vit. san. sewers, cem. conc. gutters, driveways, curbs and walks, catchbasins, conc. storm sewer pipe, electroler system, resurface roadway with asphalt concrete. 1911 Act. Certified check 10% payable to city required with bid. Plans obtainable from J. F. Byxbee, city engineer.

OAKLAND, Cal.—Until December 13, 12 noon, bids will be received by F. C. Merritt, city clerk, to grade and pave a 30-ft. strip in center line of 14th Ave. bet. E 12th and E 14th Sts., involving 8,392 sq. ft. pavement, including grading. Bond of \$600 re-

quired of successful bidder. Specifications on file in office of clerk.

SANTA BARBARA, Cal.—Until 1:30 P. M., Dec. 18, bids will be received by the city council to improve Mountain Avenue bet. Pedregosa St. and Mountain View Terrace, involving vitrified sewer, manhole, and appurtenances. 1911 Act. Geo. D. Gelb, city clerk. E. B. Brown, city engineer.

KERN COUNTY, Cal.—As previously reported, bids will be received Dec. 30, 2 P. M., by State Highway Commission, to grade and surface portions of 3.0 miles between Harts Station and 3 miles east. Project involves: 134 sta. grading existing shoulders; 23,500 cu. yds. imp. borrow; 755 sq. yds. subgrade; 1,000 tons broken stone (waterbound mac. base); 700 tons broken stone (bitum. mac. surface); 35 tons emulsified asphalt; 5.75 miles move and reset property fences; 213 lin. ft. laminated timber guard rail; 16 monuments; 156 sta. finishing roadway.

SAN FRANCISCO.—California Construction Co., Standard Oil Bldg., at \$45,081 awarded contract by Board of Public Works to improve portions of Lawton St. from 12th and 17th Aves., portions of 16th Ave., 11th Ave., etc., in Golden Gate Heights District. Project involves:

163,000 sq. ft. asphalt pavement, consisting of 6-inch waterbound macadam base and 2-inch asphalt conc. wearing surface.
150,000 sq. ft. emulsified asphalt pavement, consisting of a 6-inch waterbound macadam base and 2-in. emulsified wearing surface;
19,000 lin. ft. armored conc. curb;
38 brick catchbasins;
1 catchbasin;
900 lin. ft. 10-in. V.C.P. culverts;
5,000 lin. ft. 6-in. V.C.P. side sewers.

PACIFIC GROVE, Monterey Co., Cal.—City council declares intention

(3308) to improve Grand Ave., bet. Ocean View Ave. and Park Place, involving cem. conc. curbs; oil macadam surface pavement (composed of graded rock not less than 13 lbs. to sq. ft.) and Duremulse emulsified asphalt; cem. conc. driveways; 4-in. vit. clay lateral sewers. 1911 Act. Bond Act 1915. Hearing Jan. 2. Elgin C. Hurlbert, city clerk.

SAN LUIS OBISPO, San Luis Obispo Co., Calif.—City Engineer Leon Moore is preparing plans to improve ten blocks of Pacific St. with concrete pavement, curbs and gutters; estimated cost, \$110,000.

MISCELLANEOUS SUPPLIES AND MATERIALS

YREKA, Siskiyou Co., Cal.—County supervisors order bids called to furnish County Horticultural Commissioner with Diesel engine oil for the ensuing year. Specifications obtainable from county clerk.

SAN FRANCISCO.—Until December 22, 3:00 P. M., under Proposal No. 662, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver apparatus required by the Department of Electricity for the equipment of a radio transmitting station for the Police and Fire Departments. Specifications obtainable from above.

A bill to authorize an addition to the U. S. Veterans' Hospital at San Fernando at a cost of \$1,000,000 has been introduced by Representative Evans of California. The measure would provide 250 beds. Representative Crail of California sponsors a bill for 500 new beds and additional facilities at the Pacific Branch of the national soldiers' home in Los Angeles county; to cost \$2,000,000.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

ORAL CONTRACT IS BINDING, COURT RULES

It is important to know that a provision in a building contract to the effect that all extra work shall be ordered by the architect or by the owner in writing might be waived, says Leo T. Parker, attorney, in General Building Contractor. Moreover, Parker says, the contract itself may be altered by an oral agreement.

For instance, in Van Nice vs. Christian, 213 N. W. 604, a building contract contained the following clause:

"No extra work or change shall be made unless in pursuance of a written order from the owner, signed or countersigned by the architect, or written order from the architect stating that the owner has authorized the extra work or change, and no claim for an addition to the contract sum shall be valid unless so ordered . . ."

The owner orally directed the contractor to perform extra work. Litigation developed when the owner refused to pay for this extra work, but the Court held the subcontractor entitled to a recovery, notwithstanding the above provision in the contract, saying:

"The contract itself could be altered either by a contract in writing or by an executed oral agreement . . . or the provision invoked by the defendant here might be waived. . . . The work and material which the plaintiff furnished here was not something that he was required to do or furnish under his contract. It was something in addition thereto—something which he was not required to do or furnish under the contract."

GEORGE FORDERER ACCIDENTALLY KILLED

George S. Forderer, president and general manager of the Forderer Cornice Works, secretary and former president of the California State Automobile Association, was instantly killed last Sunday while duck hunting near Suisun in Solano County.

Mr. Forderer's gun exploded as he was climbing out of the blind, a charge of shot from his 12-gauge gun passing through his body just below the ribs.

Mr. Forderer was a director of the American Trust Company and a member of the Olympic Club. He is survived by his widow and two brothers, Joseph F. and Arthur E. Forderer, who was associated with him in the cornice business.

Industrial, porcelain enamel, and aluminum reflectors and fittings for industrial illumination are covered in a new catalog issued by the Ivanhoe Division of The Miller Company, Meriden, Conn.

DRAFTSMAN DRAWS FIFTY BUCKS FINE

Rudolph Sutter, draftsman for a building concern operating in Santa Rosa, pleaded guilty in the Justice Court in Santa Rosa last Monday, to a charge of practicing architecture without a state license. He was fined \$50 by Justice of the Peace Leopold Justi. Sutter was arrested recently on complaint of an inspector for the State Board of Architectural Examiners.

LOW BIDDER MUST GET THE CONTRACT

The school law provides that a board of education must award a school building contract to the lowest responsible bidder, whether he is a local contractor or not. This matter is controlled by state laws when contracts exceeding \$1000 are involved.

This was the ruling given the Sacramento board of education by Alex J. Ashen, assistant district attorney. The board asked for an opinion on whether it might favor local contractors in the award of contracts, in the event the proposed school bond issue for new building additions should be approved by The People.

ARCHITECT WARREN LOSES INSCRIPTION SUIT AT LOUVAIN

An Associated Press dispatch from Brussels, dated December 15, says the Court of Appeals has decided against Whitney Warren, American architect, in the now famous Louvain Library suit, by pronouncing in favor of Louvain University which stood out for removal of Warren's inscription on the library facade.

The inscription, reading, "Destroyed by Teutonic Fury. Restored by American Generosity," was objected to by the university as tended to perpetuate the hatreds of the World War. Warren refused to withdraw it and the lower courts sustained him. Now he must pay the costs of both actions.

The inscription was placed on the building, then removed and a new balustrade erected where it had been. This last decision apparently disposes of the issue.

Type AA Reliance induction motors with ball bearings for two- and three-phase a.c. circuits are the subject of Bulletin No. 109 recently issued by the Reliance Electric & Engineering Co., Ivanhoe Road, Cleveland, Ohio.

UNFILLED STEEL ORDERS INCREASE

The United States Steel Corporation reports the largest November increase in unfilled tonnage since 1925 and an expansion in bookings for the second consecutive month.

The increase of 157,873 tons in bookings last month was fully as large as the more optimistic forecasts and exceeded by more than 100,000 tons the increase of 57,425 tons reported for October.

In trade circles the ability of the corporation to record an expansion in unfilled tonnage for two consecutive months is looked upon as one of the most favorable developments of the last six months.

It was pointed out that there was a marked improvement in demand toward the end of November, when several consumers whose supplies had been reduced to an abnormally low point, placed orders.

The total unfilled tonnage November 30 was 3,639,636, compared with a backlog of 3,481,763 tons on October 31, and 4,125,345 on November 30, 1929.

SOUTHERN CALIFORNIA CHAPTER A.I.A. ELECTS

Election of officers to serve during the coming year and the election of delegates to the national convention to be held in San Antonio next year featured the regular monthly meeting of Southern California Chapter, American Institute of Architects, held at the California Club, Los Angeles, December 9.

The officers elected were: H. C. Chambers, president; Carleton M. Winslow, vice-president; H. Roy Kelley, secretary; Palmer Sabin, treasurer; J. E. Allison, director for the three-year term.

Delegates to the national convention are: William Richards, J. E. Allison, David J. Witmer, Ralph C. Flewelling, Fitch H. Haskell, Gordon B. Kaufmann and C. H. Cheney. Alternate delegates: Palmer Sabin, A. M. Edelman, Pierpont Davis, W. L. Risley, Robert H. Orr, Eugene Weston and Carleton M. Winslow.

The California State Branch of the Associated General Contractors of America will support Jas. F. Collins, state director of professional and vocational standards, in his proposed amendments to the contractor's license law with a view to securing a more effective operation of the law. Mr. Collins, in addition to other proposed changes in the law, favors legislation permitting the director of the department to appoint a deputy to perform the duties of Registrar of Contractors and to give his entire attention to the division embracing the architectural and engineering professions and contractors.

PRESIDENT'S CONFERENCE ON HOUSING OFFERS CHALLENGING OPPORTUNITY SAYS ARCHITECT

After a decade of tremendous activity, the housing business is again in the dumps. Now the leaders of the industry have time to consider the results of their work. So the President has called a Conference on Home Building and Home Ownership to make a national inquiry into the housing experience of the past years, "with a view to a summation of this experience, the mobilization of existing movements and the possible development from it of a new state of thought and action."

The President's Conference has a great opportunity for leadership. If it should develop simpler and easier systems of financing individual houses, it would make an important contribution. But it would not strike at the essential problem. It is not more houses that we need. It is houses and communities worth living in. The basic problem is to reorganize the industry for the economical production and development of planned and orderly-built communities.

When building started up again ten years ago, there was great hope for a better day for housing. All the civilized world had come to a realization of the important relation between home and community life and industrial efficiency and social progress. We had behind us the war-time experience of building planned communities. There was the need of a complete revolution in house and community planning to meet the requirements of a new age. All other industries were undergoing reorganization based on mechanized mass production. There was an insufficient number of houses in almost every part of the country. There was immense wealth, broadly distributed; so there were vast sums of money to be spent on houses.

Ten years have passed. When the President's Conference looks back over this period of stupendous production of houses, how will it sum up the experience?

Whereas there was a housing famine ten years ago, there is now a surplus in most parts of the country. So it is not a problem of quantity that they have to meet; it is one of quality, distribution and organization.

Home ownership has greatly increased. This is due to the broad distribution of wealth during this period, augmented by the propaganda of the "Own Your Own Home" movement. The Conference will probably consider the defects as well as the advantages of home ownership. Here, again, the principal factor to be kept in mind is not quantity but quality. Certainly the ownership of poorly built houses inadequately served by public utilities and roads and badly placed in relation to neighboring houses or places of work and recreation does not lead to better citizenship nor to the creation of contented workers. Quite the contrary.

Construction

The industry is organized as a real business. In spite of the vast number of houses erected in every part of the country, there has been large-scale production in only exceptional localities. Even in these cases, few have taken advantage of the architectural opportunities of grouping for appearance or preservation of light, outlook or open spaces. Similar lines have been placed in endless lines like soldiers on parade. Miles

The Conference on Home Building and Home Ownership, appointed by President Hoover, has a challenging opportunity to mobilize public thought and stimulate action which will lead to much-needed improvements (a) in methods of construction, (b) in group and site planning and (c) in the relationship of the lending institutions to the house-building industry, says Clarence S. Stein, a member of the American Institute of Architects, in an article published in the November issue of "The American City." The article is reproduced herewith.—Editor.

of identical ugly boxes spaced close to each other—dangerously close. Free-standing individual houses with no individuality and no privacy. As a result of the small-scale methods of production, housing has been practically unaffected by the great decade of industrial standardization and mechanization.

The standard of construction as a whole has been lower than before the war. There has been actual progress in the design and construction of all the mechanical equipment of the kitchen, bathroom and furnace room—that portion of the house made and assembled in the factory; but the shell itself, that which is put together by craftsmen on the job, shows practically no technical progress. Except in a few instances, the important problems of fire resistance and insulation against heat and cold are met no better than before. Wood is still the principal material used for the exterior of houses, in spite of fire hazards and its tendency to deteriorate rapidly. An astonishingly large portion of the houses have been jerry-built by ignorant or irresponsible builders. It is questionable whether they will be worth very much by the time the second mortgages have been paid off and the houses belong 100 per cent to the purchasers.

Group and Site Planning

Houses have been placed without any regard to the best use of the site or the preservation of open spaces or the requirements of safety. They have been located without any relation to neighboring houses or the necessity for outlook, light and ventilation. Traditional systems of land subdivision without relation to actual use, as well as the typical municipal regulations, lead to the building of monotonous rows and make it practically impossible to group houses so as to secure beauty or to obtain the maximum advantages of vista and privacy.

Buggy Thinking in Motor Age

Streets and lots have been laid out in a manner appropriate to the days of the buggy. Obsolete methods have been followed, with very few exceptions, in spite of the apparent need of new types of town planning for residential sections to meet the requirements of use of the automobile and the growing demand for peaceful escape from the dangers, noises and odors of traffic highways.

Small and unrelated lots have been sold in much larger quantity than could be used for decades to come. This has led to the breaking-up of forms long before it was necessary. It has fixed the mold of the future

development of our cities in regard to street layouts, which in most cases will be obsolete before they are used. It has made the future economical large-scale development of these sections difficult if not impossible. This pattern can be changed only at vast expense and much labor, by repurchase of individual lots. Most of these developments have been subdivided according to methods that neither lend themselves to economical equipment with public utilities nor are in accordance with more advanced practices in relation to community living in the age of the automobile.

Most subdivisions in which lots and even houses have been sold have been incompletely equipped with roads and utilities. The lots have to a great extent been sold to those who have no understanding of the complete costs they will have to meet in the future, not only for the upkeep of the house but for assessments for roads, utilities and other improvements, as well as taxes.

Subdivisions have been located in accordance with the whim of the speculator, rather than in relation to sound economic development of the community or the region of which they form a part. As a result, there is a chaotic relation between the location of industry and the homes of workers. Municipalities have been put to vast expense, or more often have borrowed on the future, for transportation systems to connect the two. While millions are being spent in laying out and building endless miles of new streets mostly of a temporary nature, with inadequate public utilities, old residential sections which have good roads and adequate public utilities are being depopulated. It is true that the old houses are obsolete. But many of the new sections are so badly planned, built and equipped with utilities that they will probably soon degenerate into worse slums.

Financing

The lending institutions hold the key position in the house-building industry. It is their loans that make housing possible. It is their final say which decides what houses shall be built. In short, they are the real leaders of this chaotic industry. Only a few of the larger lending organizations have an efficient architectural or engineering staff to examine plans or construction of houses on which they lend. Loans have been made without reference to:

1. The quality of house construction.
2. The type of construction organization. In or near large communities it would unquestionably be more effective socially, as well as financially safer, to lend on a large-scale operation of a reliable building organization having an efficient technical staff, instead of on small units or individual houses.
3. The ability of purchasers to meet all the costs of future assessments, taxes and upkeep.
4. The future character of the neighborhood as affecting the value of the house. After all, the obsolescence that affects values in housing is more often that of the neighborhood than of the individual house.
5. The needs of municipal growth. New developments have often been placed inconveniently at a distance from industries, schools, stores, existing roads, sewers or fire protection.

They require unnecessarily large and wasteful municipal investments, as well as waste of time, capital and energy of those who buy or rent in the new developments.

Regulations

Large portions of the country have inadequate regulation of construction or subdivisions. On the other hand, where legal restrictions have been made so stringent that those of moderate means cannot afford new homes, there has been a tendency to escape to the unregulated areas around the rims of these municipalities. Here there are no regulations, the taxes are low. These sections will ultimately have to be taken over by the city. They are being built up without plan. Because of their lack of sanitary facilities, they are a constant danger to the health of the community. They will quickly degenerate into slums that will have to be wiped out at vast expense.

There is an equally dangerous tendency to set legal standards which, although they may seem desirable to cure evils inherent in our usual method of premature land subdivision, are likely to prevent the development of large-scale planning and coordinated building.

Mobilization of Existing Movements

Although the permanent value of most of our experience of the last ten years is meager, there have been movements which have prepared the way of a new state of thought and action. Such are the large-scale operations which have been carried out by a limited number of progressive builders and by organizations actuated by desire for public service rather than immediate profit. A number of these operations have consisted of groups of apartment houses, financed and executed by insurance companies or foundations such as the Rockefeller, Rosenwald, and Marshall Field. In addition to showing the economic advantages of large-scale building, they have preserved large concentrated open spaces and have formed communities. The City Housing Corporation has gone even further at Sunnyside in building a well-knit community of both individual houses and apartments for twelve hundred families. These developments have been part of existing cities. At Mariemont and Radburn a further step has been taken in planning complete new communities. The importance of Radburn lies not only in the fact that a limited dividend organization is successfully producing well-constructed houses that compete with the Jerry-built products; that it is carrying out large-scale operations directed by trained technicians; that it is building orderly planned communities in which every house is placed not only so as to secure for itself the best possible advantage of its location, but where it forms a related part of group and community. Above all, it is important because at Radburn town planning has been based on the needs of today, this age of the motor and of increasing leisure time. A few progressive large-scale operators in other parts of the country are paying Radburn the compliment of imitation.

During the past decade there have been signs of a change in public opinion as to the functions of government in regard to housing. Some people realize that restriction is ineffectual. At least New York State has assumed active responsibility for both state and municipality by offering financial assistance in the form of tax exemption to limited-dividend companies which construct good houses at low rentals.

New State of Thought and Action

This summation of the experience of the past ten years would lead to the conclusion that the primary defect of most housing activity has been

the building of desultory unrelated individual houses instead of homogeneous communities.

On the basis of this misdirected activity, a program for the future might be outlined.

1. The development of our cities must be carefully planned in advance so as to care for the future growth of population in an orderly, economical way. Only so can we minimize the cost of roads, public utilities and transportation.
2. We must in future build communities, not unrelated desultory placed houses.
3. These communities must consist of carefully related units, each placed so as to secure the maximum of vista, sunlight and privacy, and be organized so that they will at the same time form part of a harmonious and beautiful group.
4. Each development should be planned and built as a single operation with complete installation of paving, sewers and other utilities.

The suggestion of large-scale development does not solve the problem of all the small cities and villages. It is, however, applicable to the housing production of such a large portion of the country that it would seem to me that the emphasis of the President's Housing Conference should be placed on it rather than on individual home ownership or financing.

How bring about a new state of thought and action? This cannot be done merely by educating the general public. It is not they who control the situation. It is the lending institutions, the municipal governments and the land subdividers and builders. The two latter groups can, on the basis of past experience in this country and abroad, be shown the advantage of more economical methods of land subdivision and house grouping than those now commonly used. The development of more organizations for large-scale planning and construction should lead not only to more economical production, but should give opportunities for much-needed research into the better use of materials and new structural methods.

The municipalities can prevent short-lived and dangerous construction. They can prevent the subdivision and sale of land which lacks adequate roads and public utilities. But, above all, they can enforce an orderly, economical development of the city and surrounding region, so that only as much land as is really needed and can be immediately supplied with adequate community facilities is opened up for housing purposes.

The lending institutions can do more than any other group to prevent a continuation of past housing follies. It is merely a question of where they place their loans. They should finance only those houses which are economically planned in relation not only to the internal functions of the house but also to its surroundings. They should lend only on soundly built houses, and preferably on those which form part of a large scale operation, or those located where the immediate completion of the building of the neighborhood is reasonably assured. And they should insist that the houses be part of a well-planned community, equipped with necessary roads, utilities and recreational and community facilities, because it is the obsolescence of a neighborhood much more than the obsolescence of an individual house that depreciates not only social but financial values.

NATIONAL TIMBER CONSERVATION BOARD IS NAMED BY HOOVER

President Hoover has announced the membership of the new National Timber Conservation Board, which is a presidential commission, as follows: Secretary of Commerce Lamont, Secretary of Agriculture Hycle, Secretary of Interior William, John W. Hodgett, Grand Rapids, Mich.; John H. Kirby, Houston, Texas; Paul G. Redington, president American Society of Foresters and also head of the Biological Survey; Charles Lathrop Pack, president of the American Tree Association; George D. Pratt, New York, president of the American Forestry Association; John C. Merriam, Washington, D. C., president of the Carnegie Institute; L. J. Taber, Columbus, O., Master of the National Grange; Carl R. Gray, Omaha, Neb., president of the Union Pacific Railway Company; D. C. Everest, Rothschild, Wis., past-president and member of the Executive Committee of the American Paper & Pulp Association; W. M. Ritter, Columbus, O., and Washington, D. C.

The creation of the Timber Board is the outcome of an effort to improve the economic position of the natural resource industries with respect to balance of supply and demand, which was remarked by the report of the President's Committee on Recent Economic Changes. The forest industries and foresters have long been agreed that chronic over-production is one of the chief obstacles to commercial reforestation and the practice of forestry, as it is practically impossible for industries which are not prosperous to undertake the expensive and tedious process of reforestation. After much informal discussion of the problem of over-production, the creation of a Timber Board was proposed to President Hoover by leaders in the forest conservation movement and representatives of agriculture and owners of timber and the lumber and paper and pulp industries.

The proposed task of the National Timber Conservation Board is to compile the important facts of production conditions and trends in the forest industries, analyze and interpret them and develop therefrom recommended policies and programs of public and private action, which may secure and maintain an economic balance between production and consumption of forest products, and lead to the perpetuation of the forests and the industries based on the use of timber. It is not expected that the Board will attempt to frame any board national forestry policies, but rather that it will direct its activities to the national economic problems involving the supply and use of forest products and the maintenance of those important sources of employment and national wealth. It is stated that the forest industries group ranks next to agriculture in the number of people it sustains. Its investments are in the neighborhood of \$10,000,000, and the value of its annual product is ordinarily close to \$4,000,000. The products of the forest industries are in daily use by the whole population and their raw material is drawn from one-fourth the land area of the United States, of which the State and Federal Governments own about 100,000,000 acres, farmers about 160,000,000 acres and commercial interests the rest.

THE OBSERVER

What He Hears and Sees on His Rounds

Sales of electrical appliances by Southern California Edison Company have maintained a lead over 1929 sales throughout the year, reaching \$1,807,634 November 27, compared with \$1,654,504 at the same date last year.

Burlingame city council is considering the adoption of an ordinance levying a \$25 a year license fee on building contractors. The ordinance was introduced by City Councilman Fredrick Peterson.

An ordinance has been submitted to the Humboldt County supervisors providing that all contractors on county work must employ Humboldt county laborers unless they find it impossible to get them, in which case they may employ outside labor.

Due to protests the Oakland city council has postponed an action on the proposed ordinance regulating the filling of gasoline storage tanks. The matter will come up for further consideration on January 8. The ordinance demands that all gasoline service station tanks be filled within the property lines and not from the curbs.

The Sacramento City council has received a communication from the National Conference on Street and Highway Safety asking that consideration be given to a model traffic ordinance drafted for general adoption throughout the United States. The conference seeks to establish uniform traffic regulations in all American cities in order to avoid confusion.

Construction of a \$70,000 bridge, projected by San Joaquin county, is held up by a ruling of Attorney General U. S. Webb who has informed the San Joaquin County district attorney that there was no constitutional authority for bridging a navigable stream according to the plans of the Supervisors. The 1929 Toll Bridge Act, he said, placed the authority for such bridges in the hands of the Board of Public Works.

Composite lumber prices for the Pacific Northwest showed fractional shading during November, with price reductions greater than October figures, but less than any other monthly range since March, according to preliminary estimates of the West Coast Lumbermen's Association. Preliminary production estimates from leading mills indicate the entire industry will be operating on close to a 30 per cent basis by December 15, and will average in the neighborhood of 25 per cent of capacity in the period December 15 to February 1. This compares with current operations of around 40 per cent.

Employees of the Red River Lumber Co. at Westwood, Calif., who have worked continuously since November 1, 1930, who are now unemployed due to the reduction of the force, will not be charged house rent after December 16th, until they are offered work again. Rent only will be free, not heat or electricity, and this rule applies to men who have filed applications for work with the employment department and who will accept any work offered.

San Francisco Labor Council has made the following suggestions to the governor's committee on unemployment:

That citizen labor be employed exclusively on all public work, including the construction of Hoover Dam.

That laborers and mechanics be paid the rates of wages prevailing in the respective trades and occupations in the districts or localities where the work is done.

That the minimum wage for laborers be \$5 per day, both on public and private work.

The governor's committee on unemployment is requested to advocate and propose the foregoing principles to federal and state authorities in charge of construction work.

William Royle, labor commissioner of the State of Nevada, has been informed by J. R. McCarl, controller general of the U. S., in response to an inquiry, that alien labor can be excluded from construction work on the Boulder Dam by writing a clause into the contract providing that American labor, or aliens with first papers, be given preference in employment. In his letter the controller says: "There appears to be no legal objection to including in the advertised specifications to a notification to all prospective bidders and as a stipulation in the contract, an approved condition that preference must be given, so far as practicable to the employment of ex-service men, to the employment of American citizens or aliens who have taken out first papers, in construction work, the former because of the provision in the law passed in December, 1928, giving preference to ex-service men and the latter because it is clearly in the public interest. Such notice in advance would give bidders an opportunity of estimating and computing their costs. An exception to this clause should be permitted only when skilled and unskilled American labor cannot be obtained. Reasonable wages should be paid based on the wage scales of the nearest metropolitan area."

As a penalty for failure to pay his employees the required daily wage scale of \$4.50 on city work, August Fornengo, contractor, may be barred from bidding on city work in Seattle for a period of two years with the possibility that his present contract on 15th avenue west may be revoked. City Engineer R. H. Thomson, and City Building Superintendent J. L. Hardy are acting as a committee for the board of public works and are declared as favoring revocation of Fornengo's contract.

Every employee of the General Electric Co., from president to office boy, who is working 50 per cent or more, will contribute 1 per cent of his December wage to the company's new unemployment fund, and the company will match such contributions dollar for dollar, it is announced by President Gerard Swope.

Under the rules of the unemployment plan, as originally announced, payments were not to be made for at least six months after its inauguration, which would not be until next

January or February, but because of the unemployment emergency it was decided to start relief in December but to limit payments to a maximum of \$15 per week to employees needing assistance. It has also been decided to consider for assistance employees who may not have contributed to the plan but who are in need. Approximately 35,000 employees have been contributing to the fund and on Dec. 1 they had paid in \$550,000.

Edwin Bergstrom at a recent meeting of the Southern California Chapter, American Institute of Architects, made a report on the semi-annual meeting of the national directors of the Institute held in Detroit recently. He stated that at this meeting the directors went on record that it was the stand of the institute that the supervising architect's department of the United States Treasury Department should discontinue the practice of preparing plans for government buildings and should confine its activities to supervision, maintenance and repairs. The same stand was taken relative to buildings constructed by the various state, county and municipal governments. Of the many buildings included in the present program of the United States government, but thirteen are being designed by private architects. Mr. Bergstrom said that the national directors of the institute had also taken the stand against member architects publishing monographs in connection with material dealers or contractors.

Warning that a move is on foot which would cause the collapse of the entire financial setup under which the state highway system is now functioning is sounded by Bert B. Meek, Sacramento, state director of public works.

Destruction of the state's road program would be brought about by diversion of gasoline tax moneys to projects which on the surface are plausible and just, Meek says.

That the move for diversion of gas tax funds would be started within 30 days is Meek's opinion.

Premature grade separation plans, aids to joint highway district groups, efforts to include roads of minor importance in the state system and diversion of funds to pay bond interest and sinking funds are cited by Meek as some of the steps being planned in the "raid" on the gasoline tax funds.

Efforts of municipalities to obtain direct appropriations from the tax fund is another form of attack that would disrupt the present setup, he says.

So that home industry may benefit. Timothy A. Reardon, president of the Board of Public Works, will urge the council to include in the new charter a provision granting local firms submitting bids on city work an advantage over Eastern competitors.

Reardon decided on this step when Assistant City Attorney Henry Heidelberg informed the Board of Works that it could not legally grant the contract to Dyer Brothers, a local concern, for furnishing and installing steel in the new James Lick Junior High School, 25th and Clipper Sts.

The Dyer bid of \$10,500 was \$800 higher than a combined bid of a Minneapolis firm which would furnish the steel and Joseph Garrick of San Francisco who would install it.

The Down Town Association and Home Industry League, eager to obtain as much employment as possible for San Franciscans, urged that Dyer Brothers be granted the contract.

TRADE NOTES

R. C. James, 2321 Second Avenue, Seattle, has been appointed sales representative in the Seattle district for the Ward Leonard Electric Company of Mount Vernon, N. Y.

Lombard Smith Co., 324 North San Pedro St., Los Angeles, has been appointed southern California representative for the Geneva Manufacturing Company at St. Genevieve, Mo., manufacturers of a fan-type portable air heater.

Refrigeration Maintenance Corp., Ltd., of San Francisco, has been incorporated. The company is capitalized for \$25,000. Directors are: E. D. Flynn, A. Osborne, Leonard Tew and F. Larcher.

Hipolite Screen and Sash Company of Los Angeles has filed articles of incorporation with the county clerk in Oakland. The company manufactures windows, screens, fixtures, doors and lumber. Directors are H. H. Mayberry, H. H. Kerchoff, Esperidon Hipolite, M. C. Eshman, S. J. Cook, all of Los Angeles.

J. Allan Ritchie, former Washington representative in Seattle of the Detroit Graphite Company, has been appointed Northwest manager with territory embracing Oregon, Washington, northern Idaho and British Columbia. Seattle offices are in the Lloyd Building.

Frigidaire Sales Corp. has established a Pacific Coast Regional office at 55 New Montgomery Street, San Francisco, having recently moved from Oakland where it was formerly located. Sales of electric refrigerators handled through Pacific Coast, Salt Lake City and Spokane District offices will be supervised from the local headquarters. J. L. Conover is Pacific Coast Regional Manager.

J. G. Pomeroy Company of Seattle, San Francisco, and Los Angeles, has been appointed to represent Fass and Seymour, Inc., Syracuse, N. Y., manufacturers of porcelain and electrical supplies, in the states of California, Nevada and Arizona. A stock of Fass & Seymour products will be carried at the San Francisco warehouse of the Pomeroy Company. George W. Rosekrans, of San Francisco, former northern California salesman of Fass & Seymour, Inc., has joined the Pomeroy Company as a Fass & Seymour specialist.

The trade extension work of the Millwork Institute of California will be accelerated during the coming year and a correspondence course of instruction in the use of the standard millwork schedules will be conducted for the benefit of those who wish to take advantage of it.

Roscoe Neikirk, city building inspector of San Leandro, has resigned and the position will be filled temporarily by Merrill F. Guilwits, superintendent of streets. Guilwits has had considerable previous experience in building inspection work.

Annual convention of the California State Association of Building Owners and Managers will be held in Sacramento, February 13-14. About 250 delegates are expected to attend the meetings. A feature of the convention will be a thorough discussion of the problem of taxation.

ALONG THE LINE

James Everett Havens, manager of the Northern Redwood Company's plant at Arcata, Calif., died in that city Dec. 7, following a brief illness.

Sumner Solitt, past national president of the Associated General Contractors of America, died Dec. 2. At the time of his death, Mr. Solitt was chairman of the board of Sumner Solitt Company of Chicago.

J. G. McMillan, 79, civil engineer and former Santa Clara County Surveyor, is recovering from painful cuts and bruises received when he was run down by an automobile in San Jose last Monday.

Joseph Biven, chief sanitary inspector in the Oakland Health Department, is the newly elected president of the Oakland Municipal Civil Service Association. Merner Morcom is the new vice-president and Jack McNiece, secretary.

L. H. Bennett, president, L. H. Bennett Co., Ltd., northern California distributor of General Electric refrigerators, sailed from San Francisco last month on the steamship President Polk for a trip around the world.

Dr. Frank W. Thomas, president of the Fresno State College, has been elected president of the Fresno City Board of Public Utilities which body will direct the affairs of the municipal water plant, recently purchased from private interests. H. H. Holland and Lucius Powers, Sr., have been elected first vice-presidents of the board; John Roth, second vice-president, and Leon Diamond, secretary.

Joseph A. McMinn has been re-appointed by the Sonoma County supervisors as a member of the board of directors of the Golden Gate Bridge and Highway District. The appointment covers a term of four years.

G. E. Winton, city engineer of Merced, has been appointed chief engineer of the El Nido Irrigation District in Merced County, succeeding A. A. Blakesley, chief engineer of the Merced Irrigation District, who was acting in a consulting capacity during the organization of the district. Improvements involving an expenditure of \$135,000 are to be undertaken at once.

E. C. LaRue and E. F. Jakobsen have dissolved the partnership of La Rue & Jakobsen, consulting engineers, Los Angeles. Both will continue practice as consulting engineers, Mr. La Rue specializing in water-supply problems and Mr. Jakobsen specializing in dam design, irrigation and flood control.

Ray Scoggins, for the last three years assistant engineer of the special construction department of the Bylesby Engineering & Management Corporation, stationed at Marshfield, Ore., has accepted a position as manager of the newly organized Sales Engineering Co., agent for manufacturers of engineering equipment, in Seattle, Wash.

HERE—THERE EVERYWHERE

A bill requiring a state license for all billboards along Colorado State highways will be proposed in January.

Pacific Northwest Branch of the Associated General Contractors of America will hold its annual convention in Seattle, January 9-10. Headquarters will be at the Olympic Hotel.

Annual meeting of the Engineering Section of the Northwest Electric Light and Power Association will be held at Wenatchee, Wash., March 18-20. The scheduling of subjects for the program is already well advanced.

The American Face Brick Association says more than 13,000,000 advertisements ranging from a single column to a full page in four colors will appear in the general and trade press this fall. Since this organization began its advertising campaign in 1919, more than \$1,300,000 has been spent in this activity alone.

George W. Kelham, architect; Robt. A. McKinzie, engineer; Robt. B. Henderson, president of the Pacific Portland Cement Company, and Robt. G. Hooker, Jr., assistant to the president of Gladding, McBean and Company, have been elected members of the Board of Directors of the Industrial Association of San Francisco.

Chas. G. Bird, manager of the Stockton Lumber Company, was elected president of the Central California Lumbermen's Association at the annual meeting held in Stockton Dec. 13, succeeding Warren Tillson of Modesto. T. L. Gardner was re-elected secretary and W. O. Mashek of Modesto was elected treasurer. D. Eslee of Los Angeles, secretary-manager of the California Retail Lumbermen's Association was the principal speaker at the meeting.

L. J. Blanchet, engineer for the A. C. Horn Company, from New York, in addressing the Cement Contractors' Association of Southern California, told of cement contractors' practices throughout the East. He contended that architects and owners can secure better cement work by stating in their specifications that work must be done by a cement contractor approved by the architect and requiring the general contractor to name the cement contractor in his proposal.

Los Angeles county supervisors have under consideration a plan whereby the county's allotment of the State gasoline and motor vehicle taxes may be used for improvement of major traffic arteries to relieve property owners of burdensome assessments which have heretofore been levied for this purpose.

Major O. A. Piper, chief assistant city engineer of Seattle, was elected president of the Seattle Post, Society of American Military Engineers at the annual meeting and election of officers last week. The feature address of the meeting was made by Rear Admiral Luther E. Gregory, retired, past-director of the national body. Other officers elected for 1931 are: Col. W. H. Greeley, first vice-president; Maj. S. E. Hutton, second vice-president; R. A. Davies, secretary and treasurer; Col. Vinton Birch, director-at-large.

TRADE LITERATURE

Equipment and methods used in the manufacture of corrugated concrete pipe are discussed in a 42-page illustrated bulletin of the McCracken Machinery Co., Sioux City, Iowa.

Hungerford & Terry, Inc., Clayton, N. J., have issued a 36-page bulletin on water-purifying apparatus, including softening equipment. This outlines present methods of treating water to fit it for industrial use.

Engineering data on the selection, construction and use of all types of cranes are contained in an unusually complete 160-page handbook published by the Whiting Corp., Harvey, Ill., which is being distributed at \$2 per copy. The book is handsomely bound in flexible leather, and is profusely illustrated.

A German instrument known as the Kuppens Sag Meter, used in the determination of the height of transmission lines and supports and the sag of overhead cables, is described in an 8-page illustrated bulletin issued by the American Askania Corp., 1624 Marine Bank Bldg., Houston, Texas.

"Alpha Cement—How to Use It," a 112-page handbook on the manifold uses of portland cement, has been re-issued in enlarged and improved form by the Alpha Portland Cement Co., Easton, Pa. This handbook contains many valuable data on the mixing of concrete, the use of reinforcement, the construction of forms, concrete blocks and piles, cold weather pouring, and a large variety of other subjects.

A new catalog has been brought out by the Meter Devices Company, Canton, Ohio, incorporating its complete line of metering devices, test switches and accessories.

The development and application of the neon glow lamp are described in a recent bulletin, No. 702, of the General Electric Vapor Lamp Company, Hoboken, N. J.

A revised and enlarged edition of the handbook, "A Guide to Productive Lighting for Industry," has been issued by the Benjamin Electric Manufacturing Company, Des Plaines, Ill.

The Westinghouse general catalog, 1931-1932, comprised of 1352 pages presenting descriptions and illustrations of apparatus representative of the products manufactured and sold by the Westinghouse Electric & Manufacturing Company, has been announced recently by that company.

SAN JOSE PAINTERS ELECT LOOS PRESIDENT

Harry E. Loos was elected president of the San Jose Master Painters' Association at the annual meeting held in the Builders' Exchange of that city last Thursday evening.

N. H. Johnson was elected vice-president, W. Brown, second vice-president, H. E. Hunter, secretary and W. M. Herman, treasurer.

Following the election of officers reports of committees and plans for attendance at the annual state convention to be held in Long Beach on January 22 were discussed.

Cement Contractors of Los Angeles Sign Union Wage Agreement

A majority of members of the Cement Contractors' Association of Southern California have signed an agreement with the cement finishers' union of Los Angeles on a proposed new wage scale. It is reported by A. C. Miller, secretary of the association. Terms of the agreement are summarized by Secretary Miller as follows:

(1) Contractors will be considered as foreman on their work, providing they are on the job continually for duration of the job. (a) Where two or more members constitute a contracting firm, only one member of the firm will be allowed foremanship privileges. (b) Where a contracting firm has more than one job under way, it shall designate one of its members as foreman, paying him foreman's rate of pay, \$11 per day, provided, however, there are three men or more in the crew.

(2) Foreman's rate of pay, \$11, with three or more men in crew.

(3) Cement finishers, other than foreman, \$1.25 per hour.

(4) Overtime rate of pay for Sundays and holidays, time and half time as follows: Memorial Day, Fourth of July, Thanksgiving Day, Christmas Day and New Year's Day. No work on Labor Day, excepting in the saving of life or property.

(5) Men reporting for work at the hour specified by a contractor shall draw pay from that hour, provided, however, there are no delays caused by breaking down of machinery, shortage of materials or delays caused by the elements.

(6) Contractors agree to hire only members of Local No. 627.

FL (9219)

THREE AND ONE-HALF MILLIONS FOR STATE STRUCTURES IN 1931

Plans for a \$3,500,000 program of state building construction which, if approved by the legislature and Governor-elect James Rolph, will provide work for 1000 men during the early part of 1931 were revealed by Rolland A. Vandegrift, Rolph's budget-maker, and the state department of public works.

Vandegrift said the new administration hopes to be able to arrange finances so that more than \$3,000,000 will become available in March, 1931, for construction work at state institutions.

He also announced consideration is being given the request of State Printer Carroll H. Smith that funds be provided in the budget for constructing an addition to the state printing office in Sacramento. The work would cost approximately \$80,000.

The state division of architecture will be prepared to call for bids on twenty-three state building projects in March or three months before the end of the present fiscal year if the money can be appropriated in advance.

Fourteen of the projects are tentatively planned for completion under old appropriations and nine with moneys provided by the new budget for 1931-33. Ordinarily approximately \$1,800,000 would be available for construction work at the time this enlarged and advanced program might be put into effect.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from New-ton D. Cook, Room 715, 67 Post Street, San Francisco. (Phone SUitter 1684).

R-3429-S PRODUCTION MANAGER for a company operating several scattered plants in California. The processes are comparatively simple and emphasis is laid upon ability to handle men for efficient results rather than upon technical ability. Applicants must have plant operating experience. Salary depends upon experience and ability. Apply by letter. Headquarters, San Francisco.

R-3320-S MECHANICAL ENGINEER 30-40 years, for sales and service work in connection with the application of petroleum products in the industrial and automotive world. Must be well acquainted with various types of industrial machinery and automotive equipment. Apply by letter with photo. Salary open. Territory, east of Rocky Mountains. Headquarters, Oklahoma.

R-3421-S SALESMAN, experienced, preferably acquainted with conditions in paint manufacturing industry. Must be mechanically inclined, aggressive, and have local references. Salary open. Location, San Francisco.

R-3303-S ENGINEER, between 28 and 35 years old, thoroughly versed in thermodynamics, heat exchange and heat transfer problems. Man with some oil refinery experience preferred. Permanent opportunity for right man. Apply by letter. Location, Northern California.

W-2030 MECHANICAL ENGINEERS young, single, out of college three or four years, who have had some experience in the way of sales contracts, and who would like to apply such experience to the exploitation of cork in the mechanical field. This would be industrial service selling and would entail considerable travelling. Salary to start, \$175-225 a year. Apply only by letter. Headquarters, East.

K-323-W-2071-C-S ASPHALT ENGINEER, graduate civil engineer, single, not over 32, with experience on hot mixed type sheet asphalt, asphalt concrete, penetration preventing by the grouting method, asphalt emulsions, ability to decide proper percentages of various grades of stone, sand, cement and asphalt to secure a road of maximum density, etc. Must be familiar with asphalt literature. Salary \$3600-4000 a year. Apply only by letter. Location, India.

G. E. PLASTIC DEPARTMENT

The various plastic activities of the General Electric Company have been co-ordinated into one department known as the Plastic Department, according to an announcement just made public by Gerard Swope, President of the company. R. E. Coleman has been appointed manager of the new department with an advisory committee consisting of Vice-Presidents J. G. Barry, Chairman, W. R. Burrows, and C. E. Eveleth. The new department will be responsible for sales, engineering and manufacturing of plastic and involves activities at the Pittsfield, Schenectady, Fort Wayne, Erie and Lynn (River) plants of the company.

TRANSPORTATION BODY HAS OPTIMISTIC VIEWS

At a meeting of the Pacific Trans-
Los Angeles yesterday, attended by
over five hundred representatives of
all industries within the states of
California, Arizona, Nevada and New
Mexico, and by representatives of
railroads within the territory and
eastern lines, an optimistic view was
evident concerning business conditions
for the quarter January 1st to March
31st, 1931.

G. A. Lethner, District Manager,
Car Service Division, American Rail-
way Association, San Francisco, re-
ported that for the first ten months
of 1930 there were 1,561,392 carloads
of freight originating in the territory,
a decrease of 150,104 cars, or 10.8% as
compared with the loadings during a
corresponding period of 1929.

This report further pointed out that
perishable loadings show a decrease
of 3054 cars up to November 1st as
compared with the same period of last
year. This decrease being caused by
a much smaller movement of citrus
fruits due to a much shorter crop than
was available the year previous.

An indication of the position the
railroads in the territory are in from
the standpoint of adequate car sup-
ply is shown by the fact that there
was a surplus of 23,432 freight cars
as of November 15th, an increase of
5412 over same date last year.

The fact that only 9% of the total
freight cars on all lines in this ter-
ritory are in bad order indicates that
the railroads have maintained their
equipment in first-class condition.
This is also true of condition of
freight locomotives. Of the 1553 lo-
comotives in the territory only 7.1%
were held for classified repairs.

A resume of anticipated car re-
quirements of various industries re-
porting at the Conference, follows:

BRICK AND CLAY PRODUCTS:
Lack of demand for the products of
this industry accounts for a de-
crease of 6.4% for the coming quar-
ter, compared with 1930, 2262 cars es-
timated as being required. Conditions
are reported as being fair in this in-
dustry.

CEMENT: For the first quarter of
1931, it is estimated that 8164 cars
will be required for this industry, or
approximately the same number as
were actually loaded during the first
quarter of 1930. General outlook is
reported as fair.

GRAVEL, ROCK AND SAND: For the
first quarter of 1931 it is estimated
that 46,712 cars will be required, an
increase of 7.2% as compared with
actual loading during the same period
of 1930. General outlook for the com-
ing quarter reported as being fair.

IRON AND STEEL: It is estimat-
ed that 3351 Cars will be required to
take care of the needs of this indus-
try for the quarter commencing Jan-
uary 1st. This is a decrease of 15.0%
compared with the actual loading dur-
ing the same period of 1930, and at-
tributed to lack of demand. The
general outlook at present is reported
as being fair.

Harry L. Montford, 41, civil en-
gineer and partner in the road build-
ing firm of Montford & Armstrong,
of Sacramento, died in the capitol
city Dec. 11. He had been ill for
eight days.

Montford was a native of Sacra-
mento and was with the California
State Highway Commission about
seven years, serving part of the time
as maintenance superintendent of the
state highway between Placerville and
the Nevada line.

CALIF. MILLWORK INSTITUTE ELECTS

Arthur W. Bernhauer of the Fresno
Phanung Mill, Fresno, has been re-
elected president of the Millwork In-
stitute of California. E. J. Nutting of
Herring & Nutting, San Francisco,
will serve as vice-president of the
Northern District, and J. Wesley
Shrimp of the Cresmer Sife Co., Riv-
erside, as vice-president of the South-
ern District for the coming year. E.
A. Nicholson of Pacific Sash & Door
Co., Los Angeles, will continue as
treasurer, and Lester G. Sterrett as
secretary.

New directors of the institute are:
Elmore King, Bakersfield; R. R. Smith
Portuna; A. W. Bernhauer, Fresno;
H. Coor-Pender, Los Angeles; A. J.
Todhunter, Los Angeles; D. N. Ed-
wards, Oakland; C. W. Lannom, Oak-
land; W. L. Leishman, Pasadena; E.
V. McClinck, Pittsburg; J. W.
Shrimp, Riverside; C. O. Chinchase,
Sacramento; J. Sullivan, Sr., San Di-
ego; H. W. Gaetjen, San Francisco;
E. J. Nutting, San Francisco; H. E.
Weyler, Santa Barbara; J. G. Ken-
nedy, Santa Clara, and T. J. Bridge-
ford, Sebastopol.

GROUND WATER SUPPLIES IN DESERT REGIONS

Contrary to popular opinion, the
water levels in wells are seldom sta-
tionary but are almost constantly
moving slowly up or down. It has
been found that these fluctuations are
due to many different causes, and if
they are accurately recorded and
critically studied they give much defi-
nite information as to the occurrence,
movement, and quantity of the water.
In almost all parts of the country the
water levels decline during the sum-
mer, owing chiefly to the heavy
though invisible draft made upon the
underground reservoirs by plants. In
some wells the water levels decline in
the daytime, when the plants are
transpiring moisture, and recover dur-
ing the night when transpiration is
greatly reduced. Fluctuations of the
water levels are also due to many
other causes, such as changes in at-
mospheric pressure and the ebbing
and flowing of the ocean tides.

Recently the Geological Survey, De-
partment of the Interior, has obtained
continuous records of the daily fluc-
tuations of the water levels in nearly
100 wells in the Eucalyptus Valley,
Utah, by means of automatic water-
stage recorders that were installed
over the wells. From these records
it was possible to compute the amount
of water that is annually withdrawn
by the desert vegetation from the
great underground reservoir beneath
this arid region, and hence to esti-
mate the quantity of water that can
safely be recovered annually for
irrigation or other uses. It is expected
that the methods developed in this
investigation can be applied in many
other desert regions where it is of
great consequence to determine the
quantity of water available.

A report on the results of the Eu-
calyptus Valley investigation has been
completed by W. N. White and will
eventually be published by the Geo-
logical Survey. To make the results
immediately available, the report has
been released to the public in manu-
script form. The complete report can
be consulted at the office of the Geo-
logical Survey in Washington, D. C.,
and copies of the text, without the
illustrations, can be obtained from the
district office of the Geological Sur-
vey, Federal Building, Salt Lake City,
and at the office of Prof. William Pat-
erson, State geologist, Logan, Utah.

LOCAL MATERIAL AND LABOR URGED FOR WAR MEMORIAL

Use of local materials and the em-
ployment of local labor on the San
Francisco War Memorial Buildings is
urged in a resolution adopted by the
Ornamental Plasterers' Union No. 460
and unanimously approved by the San
Francisco Building Trades Council,
the San Francisco Labor Council and
many civic and fraternal organiza-
tions. The resolution is published
herewith:

"WHEREAS, the leading American
communities are pursuing the policy
of patronizing their local industries
and keeping the local payrolls within
their respective territories;

"Whereas, a like policy has been
publicly announced by the San Fran-
cisco city administration, prominent
civic and labor organizations, with
the further emphasis upon economical
use of taxpayers' money;

"Whereas, the inclusion in the gen-
eral contract for the War Memorial
buildings of the stone, natural or arti-
ficial, for the facing of the said build-
ings and the interior, amounting to
about \$1,000,000, would violate the
above mentioned policies for the fol-
lowing reasons:

"1. Such inclusion would result in
the usual addition of 10 per cent, or
about \$100,000, by the general con-
tractor, this money constituting a
total waste with the work supervised
by the architect and the building su-
perintendent.

"2. Such inclusion would result in
giving the general contractor the au-
thority of sub-contracting the work
to whomever he wished, with the
likelihood that the matter would be
decided not upon the individual prefer-
ences or prejudices of the general
contractor, with the further likelihood
that the work would go to an out-of-
town concern and the huge payroll
lost to this community.

"Therefore, be it resolved, that we,
the Ornamental Plasterers' Union,
Local No. 460, of San Francisco, in
the regular meeting assembled this
eleventh day of November, 1930, go
on record favoring the segregation of
the contract for the stone for the fac-
ing of said buildings, and the interior,
with a view of saving about \$100,000
of the taxpayers' money and of safe-
guarding the interests of local in-
dustry whose product we consider to
be superior in quality and more ap-
propriate.

"Be it further resolved that copies
of this resolution be sent to the Board
of Trustees of the San Francisco War
Memorial, the Board of Supervisors,
the War Veterans' Organizations,
Down Town Association, the press,
and such other parties as may be
legitimately interested in the matter."

Bids will be considered December
29 by the Director of Supplies, U. S.
Department of Commerce at Washing-
ton, D. C., for installation of lighting
facilities on the San Diego-Los An-
geles airway. The work will include
installation of 6 24-inch electric re-
volving beacons, together with other
necessary appurtenances and acces-
sories, between San Diego and Los
Angeles, Calif., a distance of about
200 miles. The beacons as a rule will
be mounted on 51 ft. or other height
galvanized steel skeleton towers and
the appurtenances will include course
lights and concrete directional ar-
rows.

CEMENT INDUSTRY ABOLISHES MUCH-ABUSED DEALER'S DISCOUNT

Cement producers took a long step toward improvement of conditions in their harassed industry when they decided to eliminate the traditional "dealer's differential," says the Business Week. Lehigh Portland Cement Co. led the way. Others promptly joined; 70% of the industry's total capacity already is pledged. More will fall in line.

The "dealer's differential," commonly 10c a barrel, was all right in theory. In practice, it served to screen many destructive practices. Some of the "dealers" who got it would have been hard put to it if asked to show a store or warehouse, and horribly embarrassed if forced to tell what they did with some of the money.

The average road job calls for 3500 barrels of cement to the mile. In 1920, contracts for 148 million square yards of concrete paving were let, calling for millions of barrels of cement. Scramble for this business made "dealers" out of men who knew little about concrete but much about practical politics. Cases are on record where the "dealer" handled the differential on 50,000 barrels; got only \$100 for himself.

Started Direct Buying

In revolt against such conditions many states and municipalities have come to insist on buying cement direct from the producer. Michigan went so far as to build its own cement plant.

Something radical had to be done. Other attempts to stabilize the industry failed. Price-cutting, special concessions, dubious ethics gained ground steadily.

The cut-throat scramble for business was inevitable, because even in good times producing capacity exceeds consumption. In 1924, consumption was 150 million barrels; 14.7% of plant capacity was idle. In 1929, consumption had reached 171 million barrels, and 34.2% of equipment was idle. Plant construction had far outstripped market growth.

So they went after volume. Bids on public works involving open price competition automatically reduced current price levels. With a constantly increasing overhead due to carrying idle equipment and to higher labor costs, the profit margin had been reduced to the danger point. Average selling price at plants dropped from \$1.843 per barrel in 1924 to \$1.601 in 1929.

—And Direct Selling

Struggling for volume, producers invaded territories where freight rates prohibit competition at a profit. Many disregarded all dealer connections and quoted the consumer direct.

Most of these disturbing practices originated with the smaller producers, but affected all. Earnings of three leading companies reflect the unsatisfactory state of affairs in the industry. Net income of Alpha Portland Cement Co., operating 9 plants in 8 states, dropped 52.4% from \$3,814,579 in 1925 to \$1,815,018 in 1929. Lehigh Portland Cement Co., with 20 plants in 10 states, in the same period lost 38.4% in sales, while net income dropped 56.2%. International Cement Co. increased its sales by 46.3% while earnings rose only 13.3%.

All this disorganization of price levels and trade practices in the cement industry affected the position of contractors anxious to bid on construction jobs. They came to contend that where most of the dealers performed no function, they had no right to collect a differential. A single price, contractors said, would greatly improve general competitive conditions in the field.

Seeing the entire distributing struc-

ture of the cement industry endangered, anxious to adhere to its announced policy of distribution thru dealers only, Lehigh Portland Cement Co. decided on a new plan of marketing. Henceforth Lehigh will sell cement to dealers and contractors at the same price. The "trade discount" or "differential" is eliminated. At the close of the calendar year, and at no other time, dealers will be paid a 5c a barrel service payment for cement actually shipped to their warehouses, or on carload orders actually sold at consumer prices for shipment to other points.

Advantages claimed for the new plan: (1) preservation of the principle of dealer distribution; (2) elimination of the waste of paying differentials for no service rendered; (3) incentive to established dealers to build for stability of their cement business; (4) elimination of the break-down of trade practices by weaker dealers; (5) improvement of incentive for dealer service to contractors; (6) lower and more stable basic cost to the consumer.

Although many established dealers of cement and building supplies oppose the new plan, others are enthusiastic, welcome the change. Contractors believe that it will greatly improve their chances when bidding on specific jobs.

Makers of Alpha, Universal, Penn-Dixie, Edison, Hercules, Glens Falls, Sandusky, Bessemer, Vulcanite, Superior, Nazareth, Dragon, South Western, Columbia Portland cement, have already fallen in line. International Co. is one of the larger concerns having the matter still under advisement.

The volume of construction in Chicago for the year 1930 will be considerably less than half of the amount for 1929.

NEW PROJECT FOR DOMESTIC GAS BURNING APPLIANCES ANNOUNCED

The American Gas Association has been appointed sole sponsor for a new project, Approval and Installation Requirements for Domestic Gas Burning Appliances (Z21), by the American Standards Association Standards Council. The scope of the project has been approved as follows:

"Establishment of minimum or basic requirements for safe operation, satisfactory performance, and a substantial and durable construction for domestic gas burning appliances; together with laboratory methods of test for determining compliance therewith."

The sectional committee in charge of the project is under the chairmanship of Mr. R. B. Harper, The People Gas Light and Coke Company, 122 South Michigan Ave., Chicago, Illinois, and includes in its membership representatives of five gas companies, seven gas appliance manufacturers, the United States Bureau of Standards, the United States Bureau of Mines, the United States Public Health Service, the United States Department of Agriculture, the Bureau of Home Economics, The American Home Economics Association, the Master Plumbers' Association, and the Heating & Piping Contractors National Association. The secretary of the committee is Mr. R. M. Conner, American Gas Association, 1032 East 62nd Street, Cleveland, Ohio.

Plans to enlarge the recently organized Santa Rosa Builders' Exchange into a county-wide organization were made at a banquet-meeting held in the Occidental Hotel, Santa Rosa, last Wednesday. Officers of the exchange will be elected at a meeting January 5 when it is expected the present membership will be increased from 60 to 100. Don Dickinson is chairman of the membership committee.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

PLANS STARTED FOR FRESNO COUNTY HOSPITAL ADDITIONS

ADDITIONS TO THE FRESNO COUNTY GENERAL HOSPITAL. SWARTZ & RYLAND ARCHITECTS.

Swartz and Ryland, Fresno architects, have started plans for the proposed additions to the Fresno County Hospital. Bonds of \$250,000 were authorized at the November General Election to finance the work which will consist of two separate buildings, the main structure being at the west side of the present main hospital building. This unit will provide for the care of children on the first floor and for contagious cases on the second floor with a therapy ward in the basement.

The other unit will replace the present two-story section of the hospital attached to the north of the main building. This unit will be three stories in height and equipped entirely as an operating unit. (Cut, courtesy of Fresno Republican).

Building News Section

APARTMENTS

Contract Awarded.
APARTMENTS Cost, \$100,000
LOS ANGELES, Cal. No. 5546 Lexington Avenue.
Four-story Class C brick apartments (50 rooms).
Owner—Victoria C. Miller.
Architect—Not Given.
Contractor—Garikd K. Sgaw, 3457 W. Sixth St., Los Angeles.

Plans Completed.
APARTMENTS Cost, \$40,000
OAKLAND, Alameda Co., Cal. Lake Merritt District.
Three-story wood frame apartments with concrete basement (12 2-rm. and 12 3-room apts.)
Owner—Withheld.
Plans by L. F. Hyde, 372 Hanover St., Oakland.
Bids will be taken within a few days.

Preparing Plans.
APARTMENTS Cost, \$200,000
CALIFORNIA, East Bay Section.
Six-story and basement reinforced concrete apartments.
Owner—Withheld.
Plans by C. M. Baker, 155 Montgomery St., San Mateo.
Bids may be taken in two weeks. More definite information will be given shortly.

Preparing Working Drawings.
APARTMENTS Cost approx. \$20,000
SANTA ROSA, Sonoma Co., Cal. 7th and A Sts.
Two-story frame and stucco apartments (6 apts.)
Owner—P. Gambini and S. Testorelli, Santa Rosa.
Architect—Wm. Herbert, Rosenberg Bldg., Santa Rosa.
Bids will be taken in one week.

Plans Being Completed.
APARTMENTS Cost, \$25,000
FURLINGAME, San Mateo Co., Cal. Two-story and basement frame and stucco apts. (17 2- and 3-room apts.)
Owner—E. Cobo, care architects.
Plans by Grimes & Schoening, Balovich Bldg., San Mateo.
Bids will be taken about Dec. 19.

Plans Being Completed.
APARTMENTS Cost, \$50,000
SAN MATEO, San Mateo Co., Cal. Ellsworth Avenue.
Three-story and basement frame and stucco apts. (18 2- and 3-room apts.)
Owner and Builder—A. J. Feasey, 1411 B St., San Mateo.
Plans by Grimes & Schoening, Balovich Bldg., San Mateo.
Sub-bids will be taken in a few days.

Structural Steel Contract Awarded.
APARTMENTS Cost, \$200,000
SAN FRANCISCO, SE Sacramento and Gough Streets.
Seven-story steel frame, wood and concrete class C apartments (42 apts.)
Owner—W. Pors, 1801 California St.
Architect—Irvine & Ebbs, Call Bldg.
Engineer—W. Adrian, 417 Market St.
Structural Steel—Golden Gate Iron Works, 1541 Howard St.
Sub-bids are being taken on other portions of the work.

Sub-Bids Wanted.
APARTMENTS Cost, \$50,000
ALAMEDA, Alameda Co., Cal. 1538 St. Charles Street.
Three-story and basement frame and stucco apartments (48 rooms).
Owner and Builder—J. M. Kinley, 2120 Delaware St., Berkeley.
Plans by Owner.
Sub-bids are wanted on sash and doors, trim and heating.

To Be Done By Day's Work.
APARTMENTS Cost, \$45,000
SAN FRANCISCO, NW Thirtieth Ave. and Fulton St.
Three-story and basement frame and stucco apartments (15 apts.)
Owner and Builder—A. T. Morris & Sons, 3500 Fulton St., San Francisco.
Plans by Owner.

Sub-Bids Wanted.
APARTMENTS Cost, \$50,000
SAN MATEO, San Mateo Co., Cal. Ellsworth Avenue.
Three-story and basement frame and stucco apts. (18 2- and 3-room apts.)
Owner and Builder—A. J. Feasey, 1411 B St., San Mateo.
Plans by Grimes & Schoening, Balovich Bldg., San Mateo.

Bids Opened—Held Under Advertisment.
APARTMENTS Cost, \$50,000
SAN FRANCISCO, N Oak St. W Occavia St.
Three-story and basement frame and stucco apartments (24 2-rm apts.)
Owner—Lennon Estate, % architect.
Architect—Krafft and Sons, Phelan Bldg.
Engineer—A. J. Krafft, Phelan Bldg.

Completing Plans.
APARTMENTS Cost, \$30,000
SAN FRANCISCO, Marina District.
Three-story and basement frame and stucco apartments (six four-room apts.)
Owner and Builder—Ben. Liebman, 1555 Francisco St.
Architect—R. R. Irvine, Call Bldg.
Sub-bids will be taken in one week.

Low Bidder.
APARTMENTS Cost approx. \$300,000
ALAMEDA, Alameda Co., Cal. NW Webster and Taylor Sts.
Seven-story reinforced concrete and

steel apartments (60 2-3- and 4-room apts.)
Owner—J. S. Bercovich, Activo Bldg., Oakland.
Plans by Thomas Keenan, 1440 Broadway, Oakland.
Low Bidder—G. P. W. Jensen, 320 Market St., San Francisco.

BONDS

LAKEPORT, Lake Co., Cal.—Election will be held January 3 in Sulphur Banks School District to vote bonds of \$8,000 to finance erection of a new school. Previous election failed to carry by a slight majority. Trustees of the district are Luella B. Carr, Albert F. Wolbert and A. L. Story.

OROVILLE, Butte Co., Cal.—City Council contemplates a bond issue to secure funds to finance purchase of site and erection of a new fire department building.

SALINAS, Monterey Co., Cal.—Election will be held December 29 in El Sausal School District to vote bonds of \$9000 to finance school improvements. Trustees of the district are: H. Ruggles, C. A. Lee and R. W. Adcock.

ONTARIO, San Bernardino Co., Cal.—Chaffey Union High School District, Ontario, proposes erection next year of second unit of Chaffey Junior College in Chaffey Junior College site at Ontario. Allison & Allison, 1005 California Reserve Bldg., Los Angeles, architects. Cost, \$110,000.

CHURCHES

Sub-Contracts Awarded.
CHURCH Cost Approx. \$100,000
SACRAMENTO, Sacramento Co., Cal. SW 39th and J Sts. (106x324 ft).
Two-story brick and concrete church.
Owner—Roman Catholic Bishop (Rev. M. J. Lyons, Pastor).
Architect—Harry Devine, California State Life Bldg., Sacramento.
Contractor, Wm. C. Keating, Forum Bldg., Sacramento.
Plumbing, Heating and Ventilating—Luppen & Hawley, 3126 J St., Sacramento.
Electric Work—J. C. Hobrecht, 1020 J St., Sacramento.
Mill Work—Capital City Planing Mill, 1812 9th St., Sacramento.
Terrazzo Work—Oakland Concrete & Terrazzo Co., Oakland.
Terra Cotta—Cladding, McBean & Co., San Francisco.
Reinforcing Steel—Harry L. Weaver, 3909 Miller St., Sacramento.
Sheet Metal—McLaughlin Sheet Metal Works, 1914 I St., Sacramento.
Painting—P. C. Roddy, 614 25th St., Sacramento.
Plastering—Thomas F. Scollan Co., 2919 T St., Sacramento.
Glass—East Bay Glass Co., Oakland.
Lumber—Diamond Match Co., Chico.
Excavation—J. R. Reeves, 12th St. and American River, Sacramento.

SAN FRANCISCO.—Architect Arnold Constable, 580 Market St., is taking bids from a selected list of bidders for furnishing oak choir stalls and screens and church furniture. They are to be installed in St. Dom-

SKILSAW Portable Electric Hand Saws (4 models).

SKILSAW Portable Electric Sander
SKILSAW Radial Arm Attachments.

SYNTRON Portable Electric Hammers (4 models, motorless).

MALL Flexible Shaft Machines (50 models).

Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

Labor Saving Portable Electric Tools.

1248 Mission St. Underhill
San Francisco 7662
SALES . SERVICE . RENTALS

Inic Church, Hush and Stelner Sts., for the Roman Catholic Archbishop of San Francisco.

Prospective Bidders.
CHIAPEL \$40,000 Appropriated
SAN FRANCISCO. Presidio Reservation.

Two-story reinforced concrete chapel, (70x47 ft., seating 200; Mission style Sunday school in basement).
Owner—United States Government.
Architect—Constructing Quartermaster, Fort Mason, San Francisco.

Following is a list of contractors who have secured plans:

General Contract

P. F. Spiedel, 185 Stevenson St.
Wm. Martin, 666 Mission St.
Strehlow & La Voie, 1274 Dolores St.
Gauley & Yount, 299 22nd Ave.
S. Rasori, Call Bldg.
F. C. Amoroso & Sons, Wallace and Keith Sts.

J. Harold Johnson, Hearst Bldg.
H. L. Petersen, 731 Treat Ave.
Sorensen & Hagmark, 2652 Harrison St.

Frank J. Kelly, 666 Mission St.
McCarthy & Johans, 741 14th St.
T. B. Goodwin, 2250 Divisadero St.
Meyer Bros., 727 Portola Drive.
Monson Bros., 475 6th St.

I. M. Sommer, 901 Bryant St.
L. M. Bruce, 3653 Divisadero St.
J. A. Bryant, 185 Stevenson St.
A. Nelson, 242 Ocean Ave.

George Johnson, 758 Monterey Blvd.
Jacks & Irvine, 74 New Montgomery
N. H. Sjoberg & Son, Call Bldg.
Joel Johnson & Son, 666 Mission St.
Sullivan & Sullivan, 2653 Best Ave., Oakland.

K. E. Parker, 135 South Park.
William Spivock, Hobart Bldg.
Thomas R. Smith, 1483 Palou Ave.
Young & Horstmeier, 461 Market St.
J. W. Cobby & Son, 260 Tehama St.
Pearl Lind, 64 Stanton St.

Electric, Plumbing and Heating
Atlas Elec. & Eng. Corp., 343 11th St.
Aladdin Heating Corp., 557 Market St.
G. H. Armstrong, 2890 Howard St.
Henry Ernst & Sons, 1551 Hayes St.
Pence Merf Elec. Co., 10 Brady St.
Aetna Elec. Co., 1337 Webster St.

Others who have secured plans follow:

N. Clark & Son, 116 Natoma St.
W. W. Wetenhall, 17th and Wisconsin Streets.

Ace Sheet Metal Works, 444 Clementina St.

Noyes Roach & Co., 415 Clinton St., Joliet, Ill.

Mangrum Holbrook Co., 1235 Mission Wiley T. Vaughn, Wildon Ave., Oakland.

LeRoy Building Service, 354 Hobart St., Oakland.

Seth E. Butler, 353 10th St.

Bids are to be opened December 29, 11 A. M. Tile roof, cast artificial stone and terra cotta front, artificial tile floors, hot air fan system, oil burners, oil tanks, motor and outlet for organ, 3 lavatories, acoustical plaster interior, Spanish Mission texture. Organ not included in general contract.

Completing Plans.
CHURCH Cost, \$12,000

TAFT, Kern Co., Cal.
One-story frame and stucco church (70x50 ft.) auditorium to seat 250.
Owner—First Christian Church of Taft.

Architect—Robert H. Orr, Corporation Bldg., Los Angeles.

H. J. Kirchlein is chairman of the building committee

Composition shingle roof, steel sash, gas steam radiators, wood trusses, etc.

Plans Being Prepared.
CHURCH Cost, \$75,000
BERKELEY, Alameda Co., Cal.
Scenic and Le Conte Aves.
One-story brick church (to seat 5000).
Owner—University Christian Church
Architect—W. H. Ratcliff Jr., Chamber Commerce Bldg., Berkeley.
Bids will be taken in 30 days.

Being Done by Day's Work.
CHURCH Cost, \$8500
BERKELEY, Alameda Co., Cal. No. 1521 Derby Street.
One-story and basement frame and stucco church (5 rooms).
Owner—Free Methodist Church, Berkeley.

Plans by G. W. Slack, 2412 Acton St., Berkeley.
Sub-bids will be taken on plumbing, plastering, roofing, etc.

FACTORIES AND WARE-HOUSES

Plans Being Completed.
SERVICE BLDG. Cost, \$60,000
SAN MATEO, San Mateo Co., Cal.
Group of service buildings (concrete construction).
Owner—Pacific Gas & Electric Co., 245 Market St., San Francisco.
Plans by Eng. Dept. of Owner.
Bids will be taken within a week.

Plans Being Figured—Bids Close Jan. 2, 8:15 P. M.
HANGAR Cost, \$35,000
SACRAMENTO, Sacramento Co., Cal.
Freepoint Blvd. at Municipal Airport.

Steel frame and wood hangar and air terminal station, 80x100-ft.
Owner—City of Sacramento (to be leased to Boeing Air Transport Company).

Architect—Harry Devine, 1405 Forty-first St., Sacramento.
Structure will be of steel frame and wood construction covering an area of 80 by 100 ft., with an exterior covering of corrugated iron.

Preparing Preliminary Plans.
WAREHOUSES Cost, \$600,000
LOS ANGELES, Cal. Pico Blvd. and Highland Ave.

Two reinforced concrete Class A warehouses (60x300 ft. each).
Owner—Hancock Park Warehouse Corp.

Architect—Rudolph Falkenrath Jr., Chamber of Commerce Bldg., Los Angeles.

Will contain elevators, steel canopies, double tract transportation facilities, etc.

Contract Awarded.
ADDITION Cost, \$11,800
SAN FRANCISCO. Eighteenth and Carolina Streets.
Wood and structural steel addition to factory.

Owner—Kaiser Paving Co., 74 New Montgomery St., San Francisco.
Engineer—L. H. Nishiklan, 525 Market St., San Francisco.
Contractor—Barrett & Hill, 918 Harrison St., San Francisco.

Contract Awarded.
SHED Cost, \$10,000
STOCKTON, San Joaquin Co., Cal. No. 1024 East Channel St.
Frame packing shed.
Owner—Citizens Investment Co., 1024 E Channel St., Stockton.
Architect—Not Given.
Contractor—E. H. Riley, Wolf Hotel Bldg., Stockton.

Plans obtainable from Cashier's window, California Hall, University of California, on deposit of \$50, returnable.

See call for bids under official proposal section in this issue.

EAGLEVILLE, Modoc Co., Calif.—Upon petition of the Eagleville Farm Board, the California Public Service Corp. contemplates extension of its electric lines into this section. The company has spent approximately \$250,000 in development work in central Modoc County and recently completed a new high tension power line from Alturas to Cedarville and central Surprise Valley.

SEATTLE, Wash.—Bids will be asked shortly by Board of Public Works on copper conductor wire for the high tension power line from Diablo powerhouse to the city of Seattle, estimated to cost approximately \$100,000. The wire will total about 740 miles in length and will comprise two three-wire circuits. Bids for the construction of the steel towers will be called before early next spring. This job will cost approximately \$1,700,000, bringing the total cost of the high tension line to about \$2,500,000. If possible the contract to roll and fabricate the steel for the towers will be let to Seattle plants, the city council believing that local firms can do the work.

Contract for the superstructure of the Diablo powerhouse remains to be let and it is estimated that this work will cost between \$50,000 and \$750,000. Work on the foundation for this structure, contract for which was recently let to the Ward Construction Co. of Tacoma, for \$279,847, will be started at once.

SEATTLE, Wash.—Ward Construction Co., Tacoma at \$279,847.50 awarded contract by Board of Public W'ks to construct power house in connection with Diablo Power Project.

and concrete bank.
Owner—Monterey County Trust and
Savings Bank.
Architect—H. H. Winner Co., 580
Market St., San Francisco.
Bids will be taken in about 1 week.

Plans Being Revised.
STORES Cost approx., \$75,000
OAKLAND, Alameda Co., Calif. SW
19th and Broadway.
Group of one-story steel frame and
terra cotta shops and stores.
Owner—Twentieth & Broadway Realty
Co., Oakland
Architect—A. J. Evers, 525 Market St.,
San Francisco.

Contract Awarded.
ALTERATIONS Cost, \$8,000
SAN FRANCISCO. 635 Folsom St.
Alterations for offices.
Owner—Railway Express Agency, Inc.
244 Wells Fargo Bldg.
Plans by J. H. Humphreys, 408 Wells
Fargo Bldg.
Contractor—Forrester Corneice Works
and James F. Smith, 271 Minna St.

Plans Completed—Construction To Be
Started Shortly.
ADDITION Total Cost Approx., \$50,000
VALLEJO, Solano Co., Cal. No. 418
Georgia Street.
One-story addition to present building.
Owner—F. W. Woolworth Co., Finan-
cial Center Bldg., San Francisco.
Architect—Eng. Dept. of Owner (A. J.
Maclure in charge).

A complete new front of granite
and copper, with three entrances, will
be constructed. A heating plant and
refrigerating equipment will be in-
stalled in a basement to be dug under
front portion of building.
Freight elevators will be installed
in both front and rear. Lunch counter
and fountain will be installed.
New fixtures of mahogany and light-
ing fixtures. New flooring will be laid
and new metal ceiling is to be built.

Contract Awarded.
OFFICES Cost, \$60,000
WATSONVILLE, Santa Cruz Co., Cal.
Main St. N Fifth St.
One- and two-story offices with tile
roof (reinforced concrete construc-
tion with cement plaster; 91x236
feet).
Owner—Coast Counties Gas & Elec-
tric Co., N. E. Paulsen, manager,
Watsonville.
Architect—Albert F. Roller, First Na-
tional Bank Bldg., San Francisco.
Contractor—Wm. Radtke, Gilroy.

Preparing Working Drawings.
BANK Cost, \$50,000
MONTEREY, Monterey Co., Cal. SE
Alvarado and Franklin Sts.

One-story and basement reinforced
concrete bank and store building
(2 stores).
Owner—B. F. Wright, Monterey.
Architect—W. H. Weeks, 111 Sutter
St., San Francisco.
Lessee—Bank of Italy and Palace
Drug Company.
Mr. H. A. Minton, Bank of Italy
Bldg., San Francisco, will prepare
plans for the interior bank fixtures,
etc.

Sub-Contracts Awarded.
CAFE Cost, \$60,000
SAN FRANCISCO, N Columbus Ave.
from Chestnut St. to Houston St.
Frame and concrete cafe.
Owner—Frank Martinelli, 3743 Scott
St., San Francisco.
Architect—Miller & Pfeuger, 580 Mar-
ket St., San Francisco.

Contractor—J. Martinelli, 1355 Fran-
cisco St., San Francisco.
Will contain dining room, 60x120 ft.,
large lobby, ladies' lounges, men's
smoking room, private dining rooms,
special illuminating features on in-
terior and exterior. The exterior is
to be faced with glazed tile with an
entrance of illuminated glass.
Masonry—Hock & Hoffmeyer, 666
Mission St., San Francisco.
Heating—Atlas Heating Co., 557 4th
St., San Francisco.

Plumbing—Frank Davison, 65 Chesley
St., San Francisco.
Electric—Alta Electric Co., Inc., 938
Howard St., San Francisco.
Mill Work—J. A. Hart Mill & Lum-
ber Co., Jerrold and Napoleon Sts.,
San Francisco.

Reinforcing Steel—W. C. Hauck &
Co., 280 San Bruno Ave., S. F.
Ornamental Iron—Wrought Iron
Shoppe, 1364 Pacific Ave., S. F.
Sheet Metal—Morrison & Co., 74 Du-
boce Ave., San Francisco.
Lumber—J. H. McCallum, 748 Bryant
St., San Francisco.
Rock, Etc.—John Cassaretto, 6th and
Channel Sts., San Francisco.

Construction Postponed.
OFFICES Cost, \$750,000
SACRAMENTO, Sacramento Co., Cal.
SW 7th and J Sts.
Eleven-story class A steel frame and
reinforced concrete office bldg.
Owner—Louis Lurie, 315 Montgomery
St., San Francisco.
Architect—O'Brien Bros. and W. D.
Peugh, 315 Montgomery St., San
Francisco.

Contract Awarded.
FILM EXCHANGE BLDGS.
Cost approx. \$100,000 each
SAN FRANCISCO. Hyde Street near
Eddy Street.
Two 2-story and basement reinforced
concrete film exchange buildings
Owner—Bell Bros., Mills Bldg.
Architect—O'Brien Bros. and W. D.
Peugh, 315 Montgomery St.
Contractor—Cahill Bros., 206 Sansome
Street.
Construction will start after Jan. 1.

Contract Awarded.
ADDITION Cost, \$25,000
SAN FRANCISCO, 468 Turk Street.
One-story concrete addition to build-
ing.
Owner—Bell Bros., Mills Bldg.
Architect—O'Brien Bros. and W. D.
Peugh, 315 Montgomery St.
Lessee—Hoover Sweeper Company, 628
Golden Gate Ave.
Contractor—Cahill Bros., 206 Sansome
Street.
Construction will be started im-
mediately after Jan. 1.

Contract Awarded.
ALTERATIONS Cost, \$30,000
SAN FRANCISCO, California Street
bet. Montgomery and Kearny.

Alter market for store and garage.
Owner—California Market Properties
Co., 738 Merchants' Exchange
Building.
Architect—G. W. Kelham, 315 Mont-
gomery St.
Contractor—Barrett & Hilp, 918 Har-
rison Street.

Preliminary Plans Being Prepared.
NEWSPAPER BLDG. Cost, \$15,000
SOUTH SAN FRANCISCO, San
Mateo Co. Grand Ave. near Maple.
One-story newspaper building (25x140
ft. (type of construction not de-
termined).
Owner—Peninsular Newspapers, Inc.,
Palo Alto.
Architect—John McCool, 381 Bush
St., San Francisco.
Will be known as "The Enterprise."

Plans To Be Prepared.
NEWSPAPER BLDG. Cost, \$—
PALO ALTO, Santa Clara Co., Cal.
Newspaper building.
Owner—Peninsular Newspapers, Inc.,
248 Hamilton St., Palo Alto.
Architect—John McCool, 381 Bush St.,
San Francisco.

Plans To Be Prepared.
NEWSPAPER BLDG. Cost, \$—
REDWOOD CITY, San Mateo Co., Cal.
Newspaper building.
Owner—Peninsular Newspapers, Inc.,
248 Hamilton St., Palo Alto.
Architect—John McCool, 381 Bush St.,
San Francisco.

THEATRES

Contract Awarded.
AMPHITHEATRE Cost, \$250,000
LOS ANGELES, Cal. Cahuenga and
Highland Aves.
Reinforced concrete amphitheatre (to
seat 1500).
Owner—Pilgrimage Play Association.
Architect—William Lee Woollett, Ar-
chitects Bldg., Los Angeles
Contractor—Wm. Simpson Constr. Co.,
Architects Bldg., Los Angeles.
Construction will start in one week.

Sub-Contracts Awarded.
THEATRE Cost, Approx. \$1,000,000
OAKLAND, Alameda Co., Cal. Broad-
way near Hobart Street.
Class A theatre building.
Owner—Publix Theatres, Inc.
Architect—Miller & Pfeuger, 580 Mar-
ket St., San Francisco.

Contractor—Geo. Wagner, 161 South
Park, San Francisco.
Concrete Piling—Raymond Concrete
Pile Co., Hunter-Dulin Bldg., San
Francisco.

Excavation—J. Catucci, 1212 18th Ave.,
Oakland.

Reinforcing Steel—Soule Steel Co.,
Rialto Bldg., San Francisco.
As previously reported, structural
steel awarded to Moore Drydock, Ft.
of Adeline St., Oakland; plumbing to
Scott Co., 113 10th St., Oakland;
sprinkler system to James Pinkerton,
927 Howard St., S. F.; electrical work
to Radeflinger Bros., 234 4th St., S. F.;
heating and ventilating to Carrair
Eng. Corp., Ltd., 748 E. Washington
St., Los Angeles.

RENO, Nevada.—T. & D. Jr. Enter-
prises, M. Naify, president, Golden
Gate Theatre Bldg., San Francisco,
plans to spend \$60,000 in refinishing
and redecorating the Grand and
Majestic Theatres. The work is to
start February 1.

Preparing Plans.
THEATRE Cost, \$—
SAN MATEO, San Mateo Co., Cal.
Class C theatre (to seat 1000).
Owner—Withheld.

Architect—S. Charles Lee, 2404 W. 7th St., Los Angeles.
Contractor—Leadley & Wlaeman, 207 2nd St., San Mateo.

WHARVES AND DOCKS

Reinforcing Steel Contract Awarded.
PIER Cont. price, \$345,597
SAN FRANCISCO, Pier No. 23.
Reinforced concrete pier (150x800-ft.; green piles, concrete jacket and reinforced concrete deck).
Owner—State Board of Harbor Commissioners.
Engineer—Frank White, Ferry Bldg.
Contractor—Healy-Tibbitts Const. Co., 64 Pine St.
Reinforcing Steel—Soule Steel Co., Rialto Bldg.

MISCELLANEOUS CONSTRUCTION

OAKLAND, Calif.—H. C. Leavitt Spray Painting Co. at \$1,008 awarded contract by county clerk for cleaning and painting of steel and iron and painting certain timber work on the Bay Island Farm Bridge in Brooklyn Township.

Following is a complete list of bids:
H. C. Leavitt Spray Painting
L. B. Morris \$1,311
Ed. Anderson 1,604
East Bay Painting Co. 1,665
H. Katterer 1,742
The McCrean Decorating Co. 1,790
Pacific Painting & Dec. Co. 2,048

Plans Completed.
SWIMMING POOL Cost, \$90,000
LOS ANGELES, Cal. No. 4600 Olympic Blvd.
One-story brick and concrete swimming pool and bleachers, 166x32 ft.) and 188x78 ft.) respectively
Owner—City of Los Angeles School District.
Architect—J. C. Austin & F. M. Ashley, Chamber of Commerce Bldg., Los Angeles.

GILROY, Santa Clara Co., Calif.—John Rikschein, 5th and Dowdy Sts., Gilroy, at \$407, awarded contract by city clerk to erect steel bell tower and remove present bell to new location at Fifth Street Firehouse.
Only other bid was submitted by Wm. Radtke, Gilroy, at \$495.

Plans To Be Prepared.
TRACK Cost, \$—
BERKELEY, Alameda Co., Cal. University Campus.
Track in the Stadium Bowl.
Owner—University of California.
Architect—Warren C. Perry, 260 California St., San Francisco.
Proposed project is in a very preliminary stage.

Contract Awarded.
STUDIO BLDG. Cost, \$100,000
BURBANK, Los Angeles Co., Cal.
One-story concrete and frame studio cutting and projection room bldg (87x130-ft.)
Owner—First National Studios, Burbank.
Plans by Eng. Dept. of Owner
Contractor—Macdonald & Driver, 111 W 7th St., Los Angeles.

SAN JOSE, Santa Clara Co., Cal.—As previously reported, bids will be received by Southern Pacific Railroad, 65 Market St., San Francisco, to construct Park Avenue Subway; to have overhead clearance of 15 ft., with roadway width of 30 ft., 6 ft. sidewalk on each side, length of barrel between approaches to be 100 feet.
Project involves:
15,600 cu. yds. excavation;
614 cu. yds. 1-2-4 reinf. concrete;
130 cu. yds. 1½-1½-1½ do;

42 cu. yds. reinf. conc. precast;
2,337 cu. yds. unreinf. concrete;
450 cu. yds. conc. paving, 1-½-3;
118,000 lbs. reinforcing steel.
Plans obtainable from Engineering Department, 65 Market St., San Francisco.

Plans Being Completed.
ALTERATIONS Cost, \$25,000
OAKLAND, Alameda Co., Cal. Telegraph Ave. near 29th St.
Alterations and additions to two-story and basement brick veneer residence for mortuary and chapel.
Owner—Grant D. Miller, 2365 E 14th St., Oakland.
Architect—Miller and Warnecke, Financial Center Bldg., Oakland.
Bids will be taken in a week or ten days.

DEATH VALLEY, Imperial Co., Cal.—C. A. MacNelliedge, 627 S. Carondelet St., Los Angeles, is completing working plans for a large swimming pool to be built at Death Valley for Death Valley Scotty; 300x30 feet in area, reinforced concrete construction, glass walls, tile work, filtering system, brass railings. There will be reinforced concrete tunnels under the pool. Cost, \$200,000. Work will be done by day labor under the supervision of Mr. MacNelliedge.

COMPTON, Los Angeles Co., Cal.—Architect Clarence N. Aldrich, Pacific Southwest Bank Bldg., Long Beach, is taking bids for the concrete work for the construction of a two-story, 4000-crypt addition to the Angelus Abbey Mausoleum on East Main St., Compton. The building will be 219x61 feet, reinforced concrete construction, plaster exterior, stone or terrazzo trim, composition roofing, marble, terrazzo and stone floors and walls, art glass, bronze work, ornamental iron, tile work, etc. Further information is not available from the architect.
Cost, \$500,000.

MISCELLANEOUS SUPPLIES AND MATERIALS

OAKLAND, Cal.—East Bay Municipal Utility District rejects bids Dec. 19 to furnish 50 tons of pig iron and new bids will be asked. John H. Kimball, secretary of district.

SAN FRANCISCO.—Until Jan. 5, 3 P. M., under Proposal No. 664, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver 35 radio receiving sets for the Department of Electricity. Specifications obtainable from above.

YREKA, Siskiyou Co., Cal.—Until January 6, 10 A. M., bids will be received by W. J. Neilon, county clerk, to furnish county buildings with fuel oil for the twelve-month period commencing Jan. 6, 1931; same to be commercial grade the gravity degrees A.P.I. 27 plus, or the degree required by the various heating plants; also such quantity, by car load lots, of Diesel Engine Oil 33 Degrees Gravity as may be required by the Horticulture Commissioner of Siskiyou County.

Prices to include delivery by car load lots f. o. b. Yreka. Further information obtainable from clerk.

SAN JOSE, Santa Clara Co., Cal.—Until January 5, 11 A. M., bids will be received by Henry A. Pfister, county clerk, for the sale of an electric vacuum building cleaner with motor and fuel equipment at the county hospital and no longer required for county purposes. Further information and authorization to inspect the equipment obtainable from clerk.

SACRAMENTO, Cal.—Until Dec. 26, 8 15 P. M., bids will be received by H. G. Denton, city clerk, to furnish gasoline for the year 1931 for use in automobiles and trucks of various city departments. Certified check 5% payable to City Controller required with bid. Specifications obtainable from clerk.

SACRAMENTO, Cal.—Until Dec. 26, 8 15 P. M., bids will be received by H. G. Denton, city clerk, to furnish lubricating oil for the year 1931 for use in automobiles and trucks of various city departments. Certified check 5% payable to City Controller required with bid. Specifications obtainable from clerk.

BUSINESS OPPORTUNITIES

Name and addresses of persons or firms concerned in these opportunities will be furnished on request to Business Opportunity Department, Larsen Advance Construction Reports, 547 Mission St., San Francisco, or phone GARfield 8744.

20693—Representation. Rockport, Mass. A perisian lady is anxious to represent some business firm in Paris during the French International Exposition in 1931.

20694—Electric Drilling Machines. Paris, France. Manufacturers of electric drills and stands desire to contact interested parties.

20695—Ceramic Works. San Francisco. Party inquires for list of local firms who might be interested in the sale of Norwegian Ceramic works.

20698—Steel Rakes and Forks. San Francisco. A Czechoslovakian manufacturer of steel rakes and forks wishes to get in touch with interested importers.

20702—Manufacturers' Representation. Stuttgart, Germany. Party would like to act as manufacturers' representative for local manufacturers in Shanghai, China. 17 years experience.

20704—Representation. San Salvador. Party is anxious to represent local exporters in El Salvador.

20705—Railway Ties. Haverwoods. San Salvador, El Salvador. Party inquires for names of lumber firms handling railway ties in large quantities, also firms which buy hardwoods.

NEW FORM OF COMPETITION

Considerable alarm is felt over the country concerning the growth of a new form of competition for home builders and material dealers. It is the large mail order houses, department stores and chain store groups which are offering to the public complete plans, specifications, materials, construction and financing as a single service. The increase in this new "service" is indeed alarming and demands of consideration of all men in the industry.

Various trades journals over the country are calling builders to arms to meet this new rival. One, "Building Age," is offering prizes of \$500 for the best ideas for meeting this new competition. (Kansas Construction News).

Pacific Telephone and Telegraph Co. will spend \$40,000,000 in new construction during 1931. It is announced by H. D. Hilsbury, president of the company. The 1931 budget will exceed by \$5,000,000 the average annual expenditure on large-scale construction during the past 12 years.

Engineering News Section

BRIDGES

MERCED, Merced Co., Cal.—C. C. Disney, Merced, at \$1360 awarded contract by county supervisors to construct concrete Bridge No. 226 over Mustang Creek on the Looney Road.

VENTURA, Ventura Co., Cal.—County Surveyor Chas. Petit completes plans for steel and concrete bridge over Renolon Slough on Oxnard road; 30 ft. wide, 60 ft. long; est. cost \$10,000. Bids will be asked shortly.

BERKELEY, Alameda Co., Cal.—Until December 23, 10 A. M. bids will be received by Florence E. Turner, city clerk, to construct culvert in Codornices Creek at Glen Ave. Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from city engineer on deposit of \$10, returnable.

SANTA ROSA, Sonoma Co., Cal.—Until January 13, 12 noon, bids will be received by Geo. P. Sanborn, county clerk, to construct a 140-ft. riveted steel truss bridge over Sonoma Creek near the Sonoma State Home in the First Supervisorial District. Project involves:

- (a) 185,000 lbs. structural steel;
- (b) 202 cu. yds. class "A" conc.;
- (c) 225 cu. yds. struc. excav;
- (d) 25,000 lbs. reinforcing steel;
- (e) 2,500 cu. yds. approach fills.

Plans on file in office of clerk and obtainable from E. A. Peugh, county surveyor.

LOS ANGELES, Calif.—Bridge and tunnel construction amounting to \$3,000,000 (including engineering and rights of way) will be bid on probably within the first six months of 1931, according to H. H. Winter, Assistant Chief Engineer of Bridges.

Sixth Street Viaduct—Bids for construction will be called as soon as the substructure and approaches to the river bed on the west bank of the river have been completed, which will be about May 1. This will be a reinforced concrete viaduct, of girder span type, with structural steel river span, a total length of 3600 ft. Est. cost, \$1,200,000.

First St. and Glendale Blvd. Separation—Plans are being prepared for grade separation, which will carry First St. traffic over the intersection of Second St. and Glendale Blvd. This structure will be of all-steel construction with a main span of 200 ft. It is described as a steel arch structure, part through and part open deck of a type used in Continental Europe. The total length is 950 ft. Est. cost, \$300,000. Total cost, including property, etc., is \$650,000.

Gaffey St. Opening and Widening Bridges—Plans are being prepared for two bridges to be built in connection with the Gaffey St. opening and widening. They will be of reinforced concrete construction and will be let in one contract. Est. cost, \$280,000.

Vermont Ave. and Pacific Electric Ry. Grade Separation—North of Anaheim St.—Plans are being completed for a reinforced concrete grade separation structure on Vermont Avenue across the San Pedro-Gardena line of the Pacific Electric Ry., north of Anaheim St. Est. cost, \$60,000.

Pedestrian Subways—Plans are being prepared for three pedestrian sub-

ways estimated to cost a total of \$40,000. These tunnels cross wide thoroughfares and will be somewhat more pretentious type than usual, but will have appearances common to the type of pedestrian subways now being built by the city.

Tunnel Station Bridge Widening—Plans are being prepared for the widening of Tunnel Station Bridge on San Fernando Road, where San Fernando Road crosses the Southern Pacific Ry. east of Newhall tunnel. Will be reinforced concrete and cost about \$35,000.

Additional Figueroa St. Extension Tunnel—Preliminary plans have been ordered for an additional tunnel on the Figueroa St. extension. Will be 700 ft. in length and cost about \$400,000. Rights of way have been secured.

Marengo St. Bridge—Preliminary plans have been ordered for the Marengo St. bridge across the Pacific Electric Railway at Covina Junction, replacing an old bridge. Construction will be of reinforced concrete. Est. cost is \$100,000.

OAKLAND, Cal.—Southern Pacific R. R., 65 Market St., San Francisco, is awaiting the signing of an agreement with the city of Oakland before proceeding with construction of the Seventh Street Subway; estimated cost \$205,000 of which the city is to pay one-half and the R. R. one-half.

ROSEVILLE, Placer Co., Cal.—Engineering Department, Southern Pacific R. R., 65 Market St., San Francisco, is completing plans for a steel overpass west of Dry Creek, near Roseville; estimated cost \$14,000. The project will be financed by the railroad, the Pacific Fruit Express Co., and owners of the property in the vicinity.

BERKELEY, Alameda Co., Calif.—Until December 23, 10 A. M. bids will be received by Florence E. Turner, city clerk, to construct culvert in Codornices Creek at Glen Ave. Project involves: 60 lin. ft. 6-ft. by 6-ft. culvert. Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from city engineer on deposit of \$10, returnable.

OAKLAND, Cal.—Until January 6, 10:30 A. M., bids will be received by Geo. Gross, county clerk, to construct reinforced concrete culvert on the Alvarado-Centerville road; est. cost, \$10,000. Project involves:

- (1) 570 cu. yds. excav. for structure, complete;
- (2) 340 cu. yds. Portland cement concrete in structure in place;
- (3) 63,000 lbs. reinf. steel in place;
- (4) remove existing bridge.

Plans on file in office of clerk and obtainable from Geo. A. Posey, county surveyor.

SEATTLE, Wash.—City council and the Seattle Toll Bridge Co., Dexter Horton Bldg., Seattle, have decided upon the route of the south approach of the proposed Mercer Island Bridge, the estimate cost of which \$2,500,000. Early construction is contemplated. The bridge, to be financed by the Seattle Toll Bridge Co., will be approximately 3400 ft. in length with a roadbed about 30 feet wide to provide for a pedestrian walkover as

well as vehicle traffic lanes. The deck of the bridge will be approximately 20 feet above the water level, with piers resting on a roadbed 20 feet below the surface of the lake. This span will be of the lift type, following the style of the Montlake bridge and will allow passage of the same type of water traffic as the latter span.

BUTE COUNTY, Cal.—J. H. Pomerooy Co., 251 Kearny St., San Francisco, at \$139,543 awarded contract by State Highway Commission to construct steel bridge with concrete deck over the tracks of the Western Pacific Railroad and across north fork of Feather River at Pulga, composed of one 349.95 ft. steel arch span, one 32 1/4 ft. plate girder span, one 79.06 ft. plate girder span, two 52.51 ft. plate girder spans and one 44.02 ft. plate girder span. Project involves: 590 cu. yds. class A Portland cem. conc.; 92,000 lbs. reinf. steel; 1,540,000 lbs. struc. steel including erection steel; 35,000 lbs. cast steel; 59,000 lbs. struc. in railing; 34,000 lbs. cast iron in railing; 1000 lbs. bronze expansion plates; 1 lot misc. items of work.

DREDGING, HARBOR WORKS & EXCAVATIONS

LOS ANGELES, Cal.—E. C. Eaton, chief engineer of the Los Angeles County Flood Control District, states that projects on which he hopes to start work early in the spring of 1931 include the following:

Alamitos Bay Outlet, including channel, levees, jetties, bridges and dredging. The bridges will consist of one reinforced concrete structure, and two pile trestle bridges, plans for which are being prepared by the engineers of the flood control department. Approximately 500,000 cu. yds. of dredging will be required. The total estimated cost is \$750,000. The condemnation suits are under way and the engineering plans being prepared.

Construction of about one mile of rip-rap channel in the San Gabriel River and in the Los Angeles River. Work is to start after the winter emergency work is over.

Plans are under way for ten miles of channel protection work, including dredging, fencing, piling and wire protection work, with Gunite lining and other cement work. This type of construction will be spread over 20 locations in the county.

Present forces of the department are preparing for emergency patrol work during the winter storms. Fifteen patrol houses have been built and 15 other locations have been made available for the use of the flood control district employees and channel guards.

LONG PEACH, Cal.—Merritt-Chapman-Scott Corp., Wilmington, submitted low bid to city manager Dec. 12 at \$4.15 per ton for furnishing and placing 4000 tons of stone for the west jetty located on the west bank of the entrance channel under Spec. H. D. No. 53. The other bids were: Hauser Const. Co., \$4.25 per ton; and San Francisco Bridge Co., \$4.63 per ton.

SACRAMENTO, Calif.—Blake Bros., Balboa Bldg., San Francisco, at \$260 ton (\$13,000) submitted low bid to U. S. Engineer Office, Sacramento, to

furnish, deliver and place 5,000 tons rip-rap stone along the Sacramento River between Mayberry Slough and Takers Point. Other bids all taken under advisement, are: Hutchinson Co., Oakland, \$2.65 ton (\$13,250); Healy-Tibbitts Co., San Francisco, \$2.76 ton (\$13,800).

PETALUMA, Sonoma Co., Cal.—City council is considering preliminary plans for proposed vehicular tube, across the Petaluma River at D St. to replace the present bridge.

IRRIGATION PROJECTS

FLORENCE, Ariz.—Plans and specifications for a \$624,000 development of the Randolph Irrigation District, Pinal county, are now in the process of preparation. R. G. Langmade, attorney for the district, announces.

Bids will be called as soon as possible on the many sided projects to be undertaken in the 9602 acres of land in the district. It is expected that contracts for such work can be let the first of next year.

Engineering estimates on the project have called for installation of 34 wells equipped with electrical pumps. This will give 135,000 lin. ft. of distribution. The wells recommended will be of 20-in. diameter and at a 200 ft. depth will pump 2000 gallons per minute with a lift of 80 ft.

Under the plans, all 34 wells will be of uniform construction with the same motors and pumps. The wells can be installed in series, all connected by canals so that water from any group can be distributed to any part of the project.

EL NIDO, Merced Co., Cal.—G. E. Winton, city engineer of Merced, has been appointed chief engineer of the El Nido Irrigation District, succeeding A. A. Blakesley, chief engineer for the Merced Irrigation District, who has been acting as consulting engineer. The district recently voted bonds of \$135,000 to finance the following irrigation works:

- (1) 12 miles of main canal, involving 150,000 cu. yds. canal excavation, 65,000 sq. ft. 2-in. concrete lining.
- (2) 15 miles lateral canals, involving 120,000 cu. yds. canal excavation;
- (3) Construction of 24-in. to 48-in. siphons with headwalls, bridges, drops stop-gates and side-gates, etc.

MACHINERY AND EQUIPMENT

RENO, Nevada—Until January 16, A. M., bids will be received by E. H. Deemer, county clerk of Washoe County, to furnish and deliver one ½ yard full swing gasoline shovel. Further information obtainable from clerk.

PHOENIX, Ariz.—Until January 12, 2 P. M., bids will be received by Dr. A. J. Wheeler, Phoenix Indian Sanatorium, 1550 East Indian School Road, Phoenix, to furnish and deliver a 1½-ton motor truck. Specifications obtainable from above.

FRESNO, Fresno Co., Cal.—Orange Center School District sells \$2500 bond issue for a premium of \$6. The sale will finance purchase of a bus for the transportation of pupils.

LONG BEACH, Cal.—Until 2:30 P. M., Dec. 23, bids will be received by the city manager, C. C. Lewis, for one-track laser tractor in accordance with specifications which may be obtained from the offices of the city manager.

SACRAMENTO, Cal.—Until Dec. 26, 8:15 P. M., bids will be received by H. G. Denton, city clerk, to furnish one gasoline engine driven, three-wheeled road roller for use of the Street Maintenance Division of the Engineering Department. Cert check 5% payable to City Controller required with bid. Specifications on file in office of clerk. Fred J. Klaus, city engineer.

SACRAMENTO, Cal.—Until Dec. 26, 8:15 P. M., bids will be received by H. G. Denton, city clerk, to furnish three motor trucks for use of the Street Cleaning Division of the Engineering Department. Certified check 5% payable to City Controller required with bid. Specifications on file in office of clerk. Fred J. Klaus, city engineer.

SACRAMENTO, Cal.—Until Dec. 26, 8:15 P. M., bids will be received by H. G. Denton, city clerk, to furnish three dump bodies for use on trucks of the Street Cleaning Division of the Engineering Department. Certified check 5% payable to City Controller required with bid. Specifications on file in office of clerk. Fred J. Klaus, city engineer.

SAN FRANCISCO.—Until December 29, 3 P. M., under Proposal No. 670, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver one motor boat for San Francisco Municipal Airport. Specifications obtainable from above office.

ROSEVILLE, Placer Co., Cal.—As previously reported, Edward R. Bacon Co., 17th and Folsom Sts., San Francisco, at \$500 awarded contract by city council to furnish one asphalt machine, including tool heaters, tamping heaters, etc. Complete list of bids follows, all bidders being in San Francisco with the exception of Peerless Machinery & Mfg. Co. of Oakland:

A. L. Young Machinery Co.	264
Kratz & McClelland, Inc.	285
Harron, Rickard & McConce Co.	292
Aeroliol Burner Co., Inc.	375
Jenison Machinery Co.	389
Peerless Machinery Mfg. Co.	418
Taylor & George.	475
Edward R. Bacon Co.	500

SAN FRANCISCO.—Until December 30, 2 P. M., bids will be received by J. W. Grace, superintendent of equipment, Shop No. 4 State Highway Commission, California State Bldg., Civic Center, for the sale of the following equipment no longer required:

- CHC 2560 Chevrolet Touring, located at Fruitvale Highway Yard
- CHC 3353 Durant 4-Door Sedan, located at Fruitvale Highway Yard
- CHC 76 Buick Buick, 24-in. by 96-in., located at San Jose Highway Yard.
- CHC 60 Grader Tractor Attachment, International Duplex 12 foot Road Maintainer, located at Fruitvale Highway Yard.
- CHC 35 Mixer, Concrete, ½ sack, Foote No. 4-E, located at San Jose Highway Yard.
- CHC 27 Pump 2-in. Centrifugal, G. W. Price Type, located at Petaluma Highway Yard.
- CHC 38 Scraper, Dairling Disc, located at Petaluma Highway Yard.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways' yards as noted after each item, between the hours of 8:30 A. M. and 4:30 P. M.

REDDING, Shasta Co., Cal.—Until December 30, 2 P. M., bids will be received by J. M. O'Malley, superintendent

of equipment, Shop No. 2 State Highway Commission, Redding, for the sale of the following equipment, no longer required:

- CHC 2490 Touring Car, Dodge, 1927 model.
- CHC 2558 1-ton Truck, Chevrolet, 1927 model.
- CHC 2673 Touring Car, Dodge, 1928 model.
- CHC 46 Compressor, Ingersoll-Rand, 9x8 Type, 20 portable.
- CHC 72 Grader Tractor Attachment, Spears-Wells.
- CHC 46 Kettle, Asphalt, 110-gal.
- CHC 181 Tractor, McCormick-Deering.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways' yards at Redding, Calif., from 7:30 A. M. to 4:30 P. M.

HUMBOLDT COUNTY, Cal.—Until December 30, 2 P. M., bids will be received by W. H. Pierce, superintendent of equipment, Shop No. 1, State Highway Commission, Eureka, for the sale of the following equipment, no longer required:

- CHC 2497 Dodge Touring.
- CHC 2640 Chevrolet Coach
- CHC 2717 Chevrolet Coach.
- CHC 10 Elevator, 32 inch Bucket.
- CHC 11 Elevator, 34 inch Bucket.
- CHC 236 Grader, Austin Giant, 8 inch
- CHC 4 Screen, Revolving, 36 inch by 12 feet.
- CHC 12 Screen, Revolving, 36 inch by 12 feet.
- Ingersoll-Rand Compressor, Type 12, 4½x5-23 cu. ft.
- Ireland Scraper attachment for 8 ft. Austin Grader.
- 1 lot of parts for ¾ yd. P. & H. Shovel.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered. All equipment may be inspected at the Division of Highways, yards at Eureka.

RAILROADS

PHOENIX, Arizona—The Santa Fe Railway is planning to expend \$5,000,000 on the construction of a 30-mile branch line to serve the Paradise Deer valley section in connection with the \$23,000,000 Verde Irrigation and Power District project covering 100,000 acres north of Phoenix.

FIRE EQUIPMENT

NATIONAL CITY, San Diego Co., Cal.—Until 7:30 P. M., Jan. 6 bids will be received by the city council for furnishing a 500-gal. pumping engine for the fire department of the city, in accordance with specifications which may be obtained from the city clerk, O. A. Mullen.

SAN JOSE, Santa Clara Co., Cal.—Osen Motor Sales, San Jose, at \$1250 allowing \$175 for turn-in on chassis of Chemical No. 3, awarded contract by city council to furnish one Dodge Bros. truck, Model U. S. 30, 160-in. wheel base, equipped with 30x5-inch S-ply tires (dual on rear) to replace Chemical No. 3.

RESERVOIRS AND DAMS

PASADENA, Los Angeles Co., Cal.—Construction of a 4,000,000-gal. reservoir on the Allen Avenue site will start soon after the first of the year, according to a statement by Samuel

R. Morris, chief engineer of the water department. Plans are being prepared. The estimated cost is \$40,000.

SAN DIEGO, Cal.—The construction of a diversion dam at Mission Gorge site No. 2 will probably be authorized by the city council as the first development of the San Diego river by the city. The work will probably be started as soon as the Otay pipe line is completed, when \$350,000 of unexpended Otay pipe line funds will be released. City Hydraulic Engineer H. N. Savage plans to pump water into the San Diego Lake side pipe line, which runs by Site No. 2, to the University Heights reservoir. The construction of this diversion dam will provide an average of 2,500,000 gallons a day.

ORANGE, Orange Co., Cal.—Bids will be taken probably within the next four months for the construction of a dam in Santiago Canyon as a joint project of the Irvine Co., Irvine, The Carpenter Water Co., El Modena, and the Serrano Irrigation District, Orange. The Irvine Co. will pay one-half and the others one-quarter each, of the total cost which is estimated at \$750,000. Ponds have been voted by the districts and the issues \$200,000 each, have been sold to the First National Bank of Orange and the First National Bank of Santa Ana. Kempke, Hobart Elder, San Francisco, consulting engineer, is completing the plans for the structure, which is to be an earth fill dam 125 ft. in height, with concrete spillway, etc., providing a 25,000-acre feet storage reservoir. As soon as completed the plans will be forwarded to the State Engineer for approval. Financial details will be handled by Willard Smith, First National Bank, Orange.

LOS ANGELES, Cal.—E. C. Eaton, chief engineer of the Los Angeles County Flood Control District, reports that plans are under way and sites are being explored for the construction of three dams, check dams, spreading grounds, and appurtenant works in the San Gabriel Canyon, estimated to cost a total of \$20,000,000, funds for which are provided in the San Gabriel Bond issue previously set aside for the high dam in San Gabriel Canyon. The three principal dams will be of the flexible type, of either rock fill or flexible concrete type.

HAWTHORNE, Nevada—Bureau of Yards and Docks, Navy Department, Washington, D. C., is preparing plans for a concrete reservoir to be constructed at Hawthorne, Nevada, in connection with the Naval Ammunition Plant, storage capacity 25,000,000 cu. yds. Estimated cost \$150,000. Details will be published when the plans are further advanced.

PIPE LINES, WELLS, ETC.

RENO, Nev.—Feasibility of piping natural gas from the California oil fields to Reno and Sparks, Nev., and the possibility of making Reno a distribution point for the gas through the use of railroad tank cars, is being studied by engineers of the Standard Oil Co. and the Pacific Gas and Elec. Co., according to word from Reno.

SEWERS AND SEWAGE DISPOSAL PLANTS

LOS ANGELES, Calif.—The County Sanitary Sewer Division of the County Surveyor's office lists projects for which bids will probably be taken within the next few months as follows:

County Improvement No. 928—Han-

over St., Montebello Park. Plans are completed. The system will be built of vitrified clay sewer pipe and cost approximately \$70,000.

County Improvement No. 874—The Strand, north of Manhattan Beach. Plans completed for a sewer system in The Strand, north of Manhattan Beach, and bids will be asked after the first of the year. This sewer is part of a combination road and sewer project designated as County Imp. No. 874, including pavement, sewers and water mains. The work will involve about two miles of vitrified sewer with appurtenant structures.

County Improvements Nos. 70 and 757—Plans are being prepared to complete the Belvedere sewer system. The proposed lines, which will total several miles of cement concrete pipe sewer, will be built in the vicinity of Arizona Ave. Bids will probably be taken within four months.

County Improvement No. 962—Plans have been ordered by the county board of supervisors for a sewer system to be built in Arteria to serve the thickly-populated section of this community and covering approximately 175 acres. The lines will total several miles but the type of pipe to be used has not been determined. The outlet will connect with the trunks of the County Sanitation District.

LOS ANGELES, Cal.—A. K. Warren, chief engineer, County Sanitation Districts, preparing plans for sewage digester tanks at Sewage Treatment Plant in District No. 2. Estimated cost \$100,000.

LOS ANGELES, Cal.—A. K. Warren, chief engineer, County Sanitation Districts, preparing plans for extension of Downey-Bellflower Trunk Sewer in District No. 2, involving 4 miles of 21-in. and 24-in. sewer.

LOS ANGELES, Cal.—A. K. Warren, chief engineer, County Sanitation Districts, preparing plans for Hooper Ave.—Compton Creek Trunk Sewer in District No. 1, involving 33-in. and 36-in. reinforced concrete pipe, approximately 4 miles in length. Est. cost, \$200,000.

SPARKS, Nev.—City council plans to extend sewer system to Coney Island. Tentative estimates place the cost at \$10,000. C. C. Taylor, city engineer.

MODESTO, Stanislaus Co., Calif.—With a view to relieving unemployment, Mayor Sol P. Elias advocates construction of sewers in the industrial district costing \$15,500, a unit of the \$55,000 sewer extension program contemplated by the city. Frank J. Rossi is city engineer.

MISCELLANEOUS CONSTRUCTION

LOS ANGELES, Cal.—City Harbor Commission is considering the construction of a vehicular tunnel to connect Terminal Island with the mainland near Wilmington. The concrete tube would be 5,375-ft. long with a 2-way 25-ft. driveway in the center. Its top would be 45-ft. below mean low water. Estimated cost \$5,250,000. Additional details of this project will be given when the plans are further advanced.

LOS ANGELES, Calif.—Co. Bridge Engineer, W. B. Armstrong, 12th floor Hall of Records, is completing plans for two grade separations on which the board of supervisors will probably take bids within the next few months. They are:

A grade separation structure at Victory Place and Southern Pacific Ry. tracks carrying traffic under the railway tracks on Victory which connects with Riverside Drive for interurban traffic. This structure will be of steel and concrete and cost \$100,000. The cost will be shared by the railway company, the county, and the City of Burbank. Plans are under way.

A grade separation structure at Firestone Blvd. and the Union Pacific Ry. carrying Firestone Blvd. under the railway tracks. This structure is of steel and concrete design, and the county portion is estimated to cost \$40,000. The railway company is working on its portion at the present time.

BERKELEY, Alameda Co., Calif.—Until December 30, 10 A. M., bids will be received by Florence E. Turner, city clerk, to construct a dam in Cragsmont Slide Area and drill holes to release sub-surface water. Project involves:

Alternate A

- (1) Entrance opening;
- (a) 50 lin. ft. tunnel section (where depth of cut exceeds 12 ft.);
- (b) 20 cu. yds. open cut (where depth of cut is less than 12 ft.)

Alternate B

- (a) 145 cu. yds. open cut throughout length of entrance opening;
- (2) 215 cu. yds. open cut in galleries;
- (3) 125 lin. ft. 8-in. corr. iron pipe;
- (4) 120 cu. yds. gravel backfill;
- (5) 1 cu. yd. concrete in place.

Certified check 10% payable to city required with bid. Plans on file in office of clerk.

WATER WORKS

MILLBRAE, San Mateo Co., Cal.—Election will be held January 24 in the Millbrae Utility District to vote bonds of \$14,000 to finance construction of a water system involving piping system, storage tank, pumps, hydrants, etc. Line will connect with a main of the Spring Valley System at

CONTRACTORS' MACHINE WORKS

Builders of Rosenberg Portable Car Unloaders

CREAR & BATES

57 Zoe St., bet. 3rd and 4th, off Brannan St.
Phone GARfield 4374 San Francisco

El Camino Real and Chadbourne Ave. and will terminate at a storage tank on the Mills property.

SAN FRANCISCO.—Hyron-Jackson Co., 55 New Montgomery St., at \$2,900 submitted low bid to Board of Public Works to furnish and install electrically driven centrifugal pump with appurtenances at the Mills Field Municipal Airport. Complete list of bids follows:

Hyron-Jackson Co.	\$2,900
C. D. DeVelliss	4,198
Butte Elec. & Mfg. Co.	4,600
P. L. Burr	5,162

SACRAMENTO, Cal.—City council has authorized preparation of plans for a new sedimentation basin at the municipal filtration plant to replace the present structure. It is possible a bond election will be held to secure funds to finance the work, although, in emergency, the council has power to build the project by levying a special assessment. Fred J. Klaus is city engineer.

REDWOOD CITY, San Mateo Co., Cal.—Until December 22, 3 P. M., bids will be received by E. E. Myers, city clerk, to furnish and deliver f.o.b. cars Redwood City:

- (a) 6,000 lin. ft. 8-in. c.i. water pipe;
- (b) 3,000 lin. ft. 6-in. do.;
- (c) 1 8-in. cast iron tee;
- (d) 6 8x8x6-in. cast iron tees;
- (e) 4 8x8x4-in. cast iron tees;
- (f) 6 6-in. cast iron tees.

Pipe to be bell and spigot pattern in lengths of not less than 12-ft. nor more than 16-ft. All tees to be all bell. Pipe to conform to American Water Works Assn. specifications for class "B". Delivery 60 days after award of contract. Certified check 10% payable to city required with bid. Specifications obtainable from C. L. Dimmitt, city engineer.

SAN FRANCISCO.—Until December 22, 10 A. M., under Schedule No. 928-31-154, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver 450 pipe fittings; soil, cast iron, standard; "T" branches, sanitary, 2-hubs, equal and similar to #C-36260, Page 725, Crane Cat., 140 as follows: 250 2x2-in. 200 4x4-in.

Further information obtainable from above.

PORTLAND, Ore.—Until Dec. 29, 2 P. M., bids will be received by Frank Coffinberry, city purchasing agent, to construct Ross Island Bridge mains and connecting lines for the Bureau of Water Works. Estimated cost, \$200,000. The new lines will consist of a 30-in. cast iron main from East Tenth and Division Streets to the east line of the Ross Island bridge at Powell boulevard and Grand avenue, where the main will be split into two 24-in. steel lines to cross the bridge under the sidewalk area and suspended to the bridge. At the west end of the bridge the two lines again meet in a 30-in. cast iron main which hooks up at Mill and Water streets with the 32-in. supply line from one of the reservoirs in the city park. Certified check 5% payable to city required with bid. Specifications obtainable from Bureau of Purchases, 205 City Hall.

LOS ANGELES, Calif.—Plans have been ordered and are under way for a metal tank to be built at the General Hospital for the storage of soft water. The capacity will be about 15,000 gallons. The estimated cost is \$18,000. A separate contract will be let for the concrete platform which will have a roof. The estimated cost of the latter work is \$1300.

SAN FRANCISCO.—Following contracts awarded by Leonard S. Leavy, city purchasing agent, to furnish and deliver underground brass fittings for San Francisco Water Department, under Proposal No. 6-7:

300 $\frac{3}{4}$ by $\frac{3}{4}$ -inch Coupling cocks $\frac{3}{4}$ -inch "P" tail pieces, complete with nuts, at \$9.61 each; Mueller Co.

50 $\frac{1}{2}$ by $\frac{3}{4}$ -inch Coupling cocks $\frac{3}{4}$ -in. "AA" tail pieces, complete with nuts, at \$9.21 each; Mueller Co.

600 $\frac{3}{4}$ by $\frac{3}{4}$ -inch lead and iron unions, $\frac{3}{4}$ -inch "AA" tail pieces, complete with nuts, at \$9.21 each; Mueller Co.

2500 $\frac{3}{4}$ -inch Locking stop cocks at \$9.30 each; James Jones Co.

150 1-inch Locking stop cocks at \$9.45 each; James Jones Co.

100 1 $\frac{1}{2}$ -inch Locking stop cocks at \$1 each; James Jones Co.

100 2-inch Locking stop cocks at \$1.50 each; James Jones Co.

150 2-inch Main stop cocks at \$1.45 each; James Jones Co.

500 $\frac{3}{4}$ -inch Screw taps complete with nuts and $\frac{3}{4}$ -inch "AA" tail pieces at \$0.55 each; James Jones Co.

600 $\frac{1}{2}$ -inch Screw taps complete with nuts and $\frac{3}{4}$ -inch "B" tail pieces at \$0.55 each; James Jones Co.

50 1-inch Screw taps complete with nuts and $\frac{3}{4}$ -inch "AA" tail pieces at \$0.75 each; Mueller Co.

50 1 $\frac{1}{2}$ -inch Screw taps less nuts and tail pieces at \$1.35 each; James Jones Company.

25 2-inch Screw taps less nuts and tail pieces at \$2.25 each; James Jones Company.

SAN JOSE, Santa Clara Co., Cal.—Election will be held January 15th in the Santa Clara County Water Works District No. 1 (near Palo Alto) to bond for \$30,630 to finance construction of a domestic water distributing system.

LOS ANGELES, Calif.—American Concrete Pipe Co., 4635 Firestone Blvd., awarded contract by city purchasing agent to furnish 1,824 ft. 30-in. centrifugally cast cement concrete pipe, under Specification No. 2245.

OAKLAND, Cal.—Until January 5, 8:30 P. M., bids will be received by East Bay Municipal Utility District, 512 16th St., to furnish and deliver:

- (1) approximately 50,000 ft. 20-in., 16-in. and 6-in. cast iron pipe;
- (2) 500 valves, 6-in. to 16-in. inclusive, for distributing system.

Specifications obtainable from the above.

LOS ANGELES, Calif.—American Concrete Pipe Co., 4635 Firestone Blvd., awarded contract by city purchasing agent, under Specification No. 2261, to furnish centrifugal (Hume) concrete pipe, as follows: 384 ft. 42-in., \$4.58; 744 ft. 33-in., \$3.25; 304 ft. 24-in., \$2.03; 160 ft. 21-in., \$1.71.

PLACERVILLE, El Dorado Co., Cal.—Until December 30, 10 A. M., bids will be received by H. W. Irwin, secretary, El Dorado Irrigation District, for equipment in connection with the Webber Creek Dam, under

Schedule A:

One 30-inch c. i. thimble.
One 30-inch butterfly valve, complete with all appurtenances.
Two 5-inch air valves, complete, with connections.

Schedule B:

One needle valve, complete with operating mechanism and special connections.

Schedule C:

755 lin. ft. 30-inch sinice and double riveted 30-inch plate steel pipe, complete installed with connections, bends and specials.

Certified check 10% payable to district required with bid. Specifications obtainable from secretary on deposit of \$20, returnable.

LOS ANGELES, Cal.—Western Pipe and Steel Co., 5717 Santa Fe Avenue, awarded contract by city purchasing agent to furnish welded steel pipe 34,920 ft. 51-in., \$6.29 ft.; 240-ft. 35-in., \$5.20 ft.; 96 ft. transitions, \$10.80 foot.

EXETER, Tulare Co., Cal.—City council contemplates water system improvements. Tentative plans submitted by Irvn H. Althouse, engineer of Porterville, provide for the installation of a 200,000-gal. storage tank; well drilling installation of a deep well and booster pumps and extensions to mains.

SANTA BARBARA, Cal.—Until 3 P. M., Dec. 18, bids will be received by the city council for furnishing 1560 ft. of 8-in. class B cast iron pipe. Specifications may be obtained from Carl E. Hasse, city purchasing agent. Certified check or bond, 10%.

SACRAMENTO, Cal.—Following is a complete list of the bids received by city clerk to furnish and deliver 31 water meters of various sizes for use of Water Mains Division:

- (1) 8 $\frac{3}{4}$ -in. meters each; (2) 11 1-in., (3) 7 $\frac{1}{2}$ -in.; (4) 52-in.

Worthington Co., 543 Howard St., San Francisco, (1) \$12.80; (2) \$17.00; (3) \$27.80; (4) \$56.70.

C. C. Clausen Co., San Francisco, (1) \$14; (2) \$20.25; (3) \$27.50; (4) \$56.50.

Sacramento Pipe Works, Sacramento, (1) \$15.75; (2) \$23.10; (3) \$49; (4) \$60.

Crane Co., Sacramento, (1) \$16.70; (2) \$24.36; (3) \$43.20; (4) \$64.80.

Schaw-Batcher Co., Sacramento, (1) \$18.75; (2) \$31.10; (3) \$54; (4) \$75.

Bids held under advisement until Dec. 18.

SANTA BARBARA, Cal.—Victor H. Trace, Water Works Superintendent, reports that the city water commission has recommended to the city council that a \$2,100,000 water bond issue be called to provide funds for improvements to the city water system. A date for the election will probably be set by the city council shortly after Jan. 1. The work proposed, as recommended by Quinton, Code and Hill, consulting engineers, includes:

Raising the present Gibraltar Dam, and constructing new rock fill dam within a period of five years, \$2,000,000.

Underground water development, \$200,000.

El Cielito and La Mesa Reservoirs with necessary connections, \$90,000.

Repairs to the Sheffield reservoir, \$80,000.

Replace of 24-in. redwood line, \$60,000.

Tunnel repairs, \$50,000.

Repairs and replacements must be built from earnings and the commission recommends the items reduced to bring the issue to \$2,100,000.

GLENDAL, Calif.—National Cast Iron Pipe Co., 417 S. Hill St., Los Angeles, was awarded the contract by the city council Dec. 11, at prices shown below, for cast iron pipe as follows:

- (1) 204 ft. 30-in. class D cast iron pipe;
- (2) 2200 ft. 30-in. class B do;
- (3) 500 ft. 24-in. class B do;
- (4) 600 ft. 20-in. class D do.

The prices were: (1) \$9.78; (2) \$7.24; (3) \$5.07; (4) \$4.98.

Reliable Iron Foundry, 1611 Fishburn St., Los Angeles, was awarded the contract for 40 tons class D fittings at \$78.50 ton.

STREETS AND HIGHWAYS

BURLINGAME, San Mateo Co., Cal.—Action on the proposed improvement of Newhall Road from Forest View Ave. to Sanchez Ave., involving grading; 6-inch waterbound macadam base paving with 2½-in. asphalt wearing surface, walks, etc., has been postponed by the city council until February 1, due to protests of property owners.

SALINAS, Monterey Co., Cal.—W. A. Dontanville, Salinas, at 6770-97 awarded contract by city council (91) to improve Pajaro St., bet. Sausal and Lake Sts., involving grading, hyd. cement concrete curbs, sidewalks, 6-in. hyd. cement concrete pavement.

SAN RAFAEL, Marin Co., Calif.—Peter Bottini, San Rafael, awarded contract by County Purchasing Agent Frank L. Brown to construct sidewalks and curbs in 4th and 5th Sts., fronting county property; 15c sq. ft. walks, 40c lin. ft. curbs.

SANTA BARBARA, Cal.—Until 1:30 P. M., Jan. 2, bids will be received by the city council to improve Calle Poniente between Valerio St. and its northerly terminus, and a portion of Valerio St., involving asphaltic concrete pavement, vitrified sewer, manholes, house connections, etc. 1911 Act. E. E. Brown, city engineer. G. D. Gelb, city clerk.

WATSONVILLE, Santa Cruz Co., Cal.—Granite Construction Co., Watsonville, awarded contract by city council to improve Roosevelt St. from California to Stanford Sts., involving grading, 2½c sq. ft.; macadamizing, 14c sq. ft.; asphaltting, 3c sq. ft.; conc. gutters, 25c sq. ft.; conc. curb, 65c lin. ft.

OAKLAND, Cal.—Until December 24, 12 noon, bids will be received by Frank C. Merritt, city clerk, to improve E-Tenth St., bet. 11th St. and 60th Ave., Russet St., bet. 60th and 54th Aves., etc. Project involves:

- (1) 156,749 sq. ft. grading;
- (2) 341 lin. ft. conc. curb with steel curb guard;
- (3) 2597 lin. ft. concrete curb without steel curb guard;
- (4) 154,790 sq. ft. conc. pavement;
- (5) 93 lin. ft. 8-in. by 20-in. corr. iron and concrete culvert;
- (6) 14 lin. ft. 10-in. vit. pipe conduit;
- (7) 34 lin. ft. 15-in. vit. pipe conduit;
- (8) 2 handholes;
- (9) 1 concrete inlet with cast iron top;
- (10) 1 storm water inlet (21-in. opening);
- (11) 1 manhole top.

1911 Act. City will pay 29% of cost from Treasury. Est. cost \$47,500. Certified check 10% payable to City required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

SAN BERNARDINO COUNTY, Cal.

—Until December 22, 3 P. M., bids will be received by E. Q. Sullivan, district engineer, State Highway Commission, San Bernardino, to furnish and apply as a dust layer, heavy fuel oil on 0.9 mile of Mojave River bridge approaches, about 3 miles north of Victorville. Specifications obtainable from engineer.

FRESNO, Fresno Co., Cal.—Bids are being received (date for opening not set) by D. M. Barnwell, county clerk, to furnish during the calendar year of 1931 not less than 125,000 or more than 175,000 barrels of road oil processed or unprocessed, the pure asphalt bitumen content to be not less than 58 per cent or more than 70 per cent. Bids shall be per barrel in carload lots f. o. b. shipping point same to be designated in all bids, freight to be prepared to all points in Fresno County and to be billed by adding freight to contract price at shipping point. Factors to be considered in awarding bid are the quality of the oil as shown by the bid and the total cost of the oil as ultimately delivered f. o. b. Fresno.

Deliveries shall be made between the first day of June and the first day of November, 1931, at such time as the same are requisitioned by the said Board of Supervisors, provided that contractor shall not be required to deliver more than 40,000 barrels of oil in any one calendar month, nor more than 2400 barrels any one day. One barrel hereunder shall be understood to contain forty-two gallons.

Certified check \$1,000, payable to county required with bid. Further information obtainable from Chris P. Jensen, county surveyor.

MENLO PARK, San Mateo Co., Cal.—City council declares intention (30) to improve College Ave. and Cambridge Ave. from Arbor Road to El Camino Real; Harvard Ave. bet. University Drive and El Camino Real; University Drive from Middle Ave. to Stanford Ave.; Yale Road bet. Middle Ave. and Stanford Ave.; Princeton Road bet. College and Stanford Aves., including all street intentions, involving grading, 1½-in. emulsified asphalt wearing surface on 4-in. waterbound rock base, hyd. cem. conc. curbs, 4-in. vit. ironstone pipe sewer service connections. 1911 Act. Bond Act 1915. Hearing December 30. Fannie I. Kurtz, city clerk.

Bonds, \$4324 each. Limit, London & Lancashire Indemnity Co. of America. Limit, 200 working days. Forfeit, none. Plans and specifications filed.

HEATING AND VENTILATING SYSTEM on above.
Contractor—A. J. Peters & Son, 455 Washington St., San Jose.

Filed Dec. 9, '30. Dated Dec. 12, '30.
Payments same as above.....
TOTAL COST, \$19,435
Bonds (2) \$9717.50 each. Surety, The Fidelity & Casualty Co. of New York. Limit, 200 working days. Forfeit, none. Plans and specifications filed.

FURNISHING HARDWARE ON above.
Contractor—Associated Hardware Co., Inc., 39th St. and San Pablo Ave., Emeryville.

Filed Dec. 9, '30. Dated Dec. 12, '30.
Payments same as above.....
TOTAL COST, \$1984
Bonds (2) \$992 each. Limit, 90 working days. Forfeit, none. Plans and specifications filed.

ALL TILE WORK ON ABOVE
Contractor—W. T. Kawalkowski, C. McGowan and O. A. Anderson (as Art Tile & Mantel Co.), 221 Oak St., San Francisco.

Filed Dec. 12, '30. Dated Dec. 12, '30.
TOTAL COST, \$5950
Bonds (2) \$2975 each. Surety, United States Guarantee Co. Limit, 200 working days. Forfeit, none. Plans and specifications filed.

SHEET METAL WORK ON ABOVE.
Contractor—Superior Metal Products Co., Inc., 4400 Market St., Oakland.
Payments same as above.....
Filed Dec. 9, '30. Dated Dec. 12, '30.
Payments same as above.....

TOTAL COST, \$3635
Bonds (2) \$1817.50. Surety, Glen Falls Indemnity Co. of Glen Falls, N. Y. Limit, 200 working days. Forfeit, none. Plans and specifications filed.

COMPOSITION ROOFS ON ABOVE.
Contractor—W. J. Porter, 1473 W-San Carlos St., San Jose.

Filed Dec. 9, '30. Dated Dec. 12, '30.
Payments same as above.....
TOTAL COST, \$1625
Bonds (2) \$812.50 each. Surety, Indemnity Insurance Co. of North America. Limit, 200 working days. Forfeit, none. Plans and specifications filed.

Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

LOANS FOR SMALL HOMES TEND TOWARD INCREASE IS REPORT

Building and loan associations, holders of \$8,000,000,000 for some twelve millions of individual members, have on hand adequate funds for financing construction of one-family residences in nearly all parts of the country, says The Business Week. The exceptions are the South and two Middle Western states. Demand for such loans ranges from fair to good; is below that of a year ago in many states; tends on the whole to increase. Numerous applications fail to meet standards, are denied.

These are outstanding points drawn from a nation-wide survey conducted by the U. S. Building and Loan League.

Withdrawal of funds is normal, and below a year ago for a majority of associations, but there are important areas where prolonged unemployment is increasing the drain, and the statutory delay is being invoked.

Little New Money

Little new money is coming in. Some states have so much on hand that new funds are not accepted. Collections are slow in many regions. There have been some repossessions but total real estate holdings are less than 1% of loans. Failures have been negligible.

New York reports marked decrease in withdrawals in recent weeks, a slightly better demand for loans, but with many applications considered unsound. New Jersey associations believe they have felt the worst effects of the depression, say that legitimate applications for loans are being accommodated in all cases.

Fewer Bank Loans

Most Pennsylvania associations have more requests for loans than they can meet, due to fewer loans by banks and trust companies. California associations report more new money coming in than they can care for, a growth in assets in the year ended Sept. 30 of 13 1/2% and no embarrassment from withdrawals.

Illinois associations have experienced a decided change for the better in the last month and expect progressive modernization of homes, with some new building, to bring a continued good demand for loans. Funds are generally in excess of loan requirements in the larger Massachusetts communities, inadequate in the smaller centers. Large amounts of funds are available for loans in Wisconsin.

Ohio reports no improvement in a strained situation. Practically no new loans are being made in Alabama, Florida, Indiana, Mississippi, West Virginia, due to inadequate supply of funds or poor demand or both. Southern states generally report conditions ranging from poor to fair.

Byers Machine Co., Ravenna, Ohio, has appointed the Blazer Machinery Co., Portland, Oregon, its distributor in western Oregon and Washington.

COURT RULING ON LIEN VERSUS BOND

Although a subcontractor furnishes a bond which guarantees payment for materials used in the construction of a building, the circumstances may be such that the bonding company is not obligated to pay for the materials used by the sub-contractor, says Leo T. Parker, attorney, in General Building Contractor.

For illustration, in Piedmont vs. Vance, 148 S. E. 858, the owner of a lot leased it to a corporation and the latter contracted to erect a building. A sub-contractor furnished a bond but abandoned his contract. A materialman sued both the principal contractor and the corporation to recover the value of the material used by the sub-contractor in the construction of the building.

During the trial it was shown that the cost for completing the sub-contractor's work exceeded the balance due on the sub-contract. Therefore, the Court held the materialman not entitled to a lien on the building, saying:

"The policy of the lien law is to protect sub-contractors and laborers against loss for labor done and materials furnished in building, repairing, or altering any house or other improvement on real estate, to the extent of the balance due the original contractor at the time of notice to the owner of claims therefor; but it is not provided that the owner shall be liable in excess of the contract price, unless he continues to pay after notice of claim from the sub-contractor or laborer, and then only to the extent of such payments after notice."

ALAMEDA A. G. C. ELECTS OFFICERS

W. G. Thernally, S. G. Johnson, Roscoe Littlefield and Ted Griffin, at the general meeting of the Alameda County Chapter, Associated General Contractors of America, were elected directors to serve for the next year term. It is announced by Wm. E. Hague, manager of the Chapter.

The new board elected W. E. Lyons, president; S. G. Johnson, vice-president; H. J. Christensen, secretary-treasurer and Wm. E. Hague, manager.

Lyons was re-elected president in view of the splendid service he rendered the Chapter during 1930.

The Chapter has extensive plans under way for stabilization of credit in the building business next year. The material dealers are co-operating in this movement and the co-operation of all units financially interested in building operations is to be sought.

The Contractors License Law, qualification of bidders and many other important matters are on the program of the Chapter for close attention during the coming year.

PROTEST USE OF OUTSIDE LABOR IN SAN MATEO COUNTY

"The local skilled mechanics, such as the carpenter, plasterer, etc., hasn't a chance with the outside contractor who undertakes a building job in this county. The outside contractor won't give up to the local wage scale, but instead brings in men from elsewhere who are willing to work for less."

Thus asserted Mayor W. H. Weeden of Menlo Park, a builder himself before a meeting of a special committee of the county committee for the Relief of unemployment, at Redwood City, when a program was outlined to urge the use of local workmen on all building projects in the county.

Mayor Weeden attributed the present critical unemployment situation in San Mateo county, particularly as far as the building trades are concerned, to this:

"Hundreds of skilled workers with families who make their homes in this county are idle because the outside contractor hires men who'll work under scale," he said.

He was backed in his assertions by J. A. Brogan of San Mateo, business agent of the San Mateo Building Trades Council, and J. F. Conhano, representative of the San Mateo Carpenters' Union.

Brogan told the committee that approximately 55 per cent of the building trades mechanics in the county are out of work at the present time.

PRIZE AWARDS FOR STEEL BRIDGE DESIGNS

Prizes aggregating \$1700 are being offered by the American Institute of Steel Construction for the best design of a steel bridge.

There will be two competitions each having a first prize of \$500, a second of \$250 and a third of \$100, one given to engineering students and the other to architectural students. The first will be judged by a national jury of engineers and architects and is open to any engineering student attending a school or college in the United States or Canada. The second will be held through the Peaux Arts Institute of Design.

The problem is a monumental bridge of restrained simplicity, such as would be erected over a navigable river within the extreme limits of a city of approximately 100,000 inhabitants. It will be 80 feet wide including two sidewalks of 10 feet each and a total length of 175 feet. The approaches for a distance of 15 feet would represent retaining walls and abutments. Night illumination would be provided for.

This is the third annual student competition held by the American Institute of Steel Construction. Previous competitions of this nature have enlisted the interest of hundreds of students and have developed many bridge designs of remarkable aesthetic appeal.

BASIC PRINCIPLES OF CONCRETE MAKING COORDINATED

By Joseph A. Kitts
Consulting Concrete Technologist, San Francisco

2. Making Concretes for Modern Needs is a Technological Manufacturing Process.

Article No. 1 (appearing in these columns Nov. 17, 1930), under the title "Absolute Volume, The Basic Measure of Ingredients," introduced the modern thought expressed by this title at the most fundamental law of concrete mixtures.

It was shown that lack of appreciation of this absolute volume fundamental—the use, down the ages, of an indefinite measure of ingredients, bulk volume, including the variable air space between particles—accounts for the facts: (1) that today's most troublesome construction problem is how to make good concrete; (2) that, despite millions of dollars spent in modern concrete research, the fundamental principles of mixtures are not fully established and generally accepted matters of engineering knowledge; (3) that the fragments of fundamental principles of mixtures discovered by individual workers in concrete research have not been coordinated heretofore; (4) that current engineering knowledge of concrete making is inadequate for modern requirements because the fundamental facts of mixtures have been obscured by the error of this ancient bulk volume measure; and (5) that failures in the use of concrete continue to occur, despite the most scrupulous and well intentioned engineering care, because the principles of mixtures are not wholly understood as a result of this ancient heritage of the bulk volume as the basis of measure.

As a corollary of this approximate measure of ingredients, there could be no exact technological process of concrete manufacture; the specified proportions of ingredients have necessarily been approximate and, accordingly, the greater volume of concrete produced today is specified in various arbitrary ratios, 1:1.2, 1:2.4, 1:3.6, 1:3, 1:6, 1:9, etc., by loose-moist or dry-rodded bulk volume, or by weight, before the ingredients to be used are decided upon. A more modern procedure has been to send a few cubic feet of the materials to a laboratory for chemical and physical analysis, and determination (by Thacher, Fuller or other theory) of proportions for a satisfactory grading and quality and then, a thousand or a hundred thousand cubic yards of concrete is made in designed proportions such as 1:2.23.8, etc., assuming, subsequent uniformity of the materials as per samples. The most recent procedure of wide application has been to maintain the fineness of grading of the aggregate and the water-cement ratio in accordance with the Abrams fineness modulus principle and water-cement-strength law, sponsored by the Portland Cement Association. None of these procedures has been complete as a technological process of concrete making adequate for modern needs.

The most nearly complete technological process of concrete making generally known is that of the Portland Cement Association based on the Abrams water-cement ratio and fineness principles as presented by Abrams in "Design of Concrete Mixtures," first published in the Minutes of the Annual Meeting of the Portland Cement Association, December, 1918, and elaborated in "Design and Control of Concrete Mixtures," published by the Association, January, 1927. This work is the result of hun-

dreds of thousands of experiments and research tests by the Association subsequent to September, 1914. While this development of the water-cement and fineness modulus principles has been the most important accomplishment in concrete research, it has met an impasse due to lack of appreciation of the absolute volume as the basic measure of ingredients. Until divorced from the dry-rodded bulk volume basis of measure of aggregates, it will have many limitations of impracticability. However, the half million or more experiments by the Association have supplied a great fund of data which has paved the way to the discovery and coordination of laws of proportioning complementary to the water-cement-strength law; and a complete, simplified and expedient technological process of concrete making is now available for the first time in the history of concrete.

Before going into the details of principles and their coordination, it should be appreciated that the making of strong and durable concrete, with economy, for modern requirements, is a manufacturing process and not a haphazard matter of 1:2.4 etc., as handed down from antiquity.

Production A Manufacturing Process
Consideration of the general requirements of concrete, the complex elements affecting quality, the many special purposes, and the economics of quality and efficiency in production, will show that the production of concrete of quality with economy is a complex manufacturing process demanding technological skill and special facilities of plant and laboratory. These considerations also show that there is no simple formula for the production of concrete of quality any more than there is for cement, steel, or other structural products.

Concrete Defined
"Concrete" embraces the product of various mixtures of fine particle aggregates, hydraulic cements, fresh water, and admixtures, in innumerable possible combinations, which, after being placed in the mold or forms in a plastic or fluid state, harden under water or in air into artificial stone. The resulting concretes have as many different physical characteristics (workability, flowability and cohesion in the fresh mix, and strength, density, etc., in the cured concrete) as there are combinations. Concretes of definite qualities are made only by definite technological processes, and the general problem of making good concretes, for many purposes, of many types of materials and with fundamental economy, is a comprehensive and complex one in the many conditions to be evaluated. We may have any maximum size of aggregate up to 12 inches in diameter, any proportion of cement, a wide range of water content, any degree of consistency or flowability from dry and stiff to wet and sloppy, and any strength up to 10,000 lbs. or more per sq. in. at a given age.

Concretes of definite qualities, in consistency of the fresh mix, strength, density, impermeability, texture, etc., must have definite structures of mix in definite absolute volumes of the cement and water and of aggregates of various diameters, and these qualities and basic mix structures must be predetermined by tests with the given types of aggregates and cements and sustained by technological processes as the materials vary from day to day. A specific concrete is described, in

general, by three given requirements:

- (1) Maximum size of aggregate;
- (2) Workability (Slump or flow);
- (3) Compressive strength at a given age;

And, in particular, by two additional requirements:

- (4) Type (or brand) of cement, and
- (5) Type of aggregates.

Many Characters of Cements

Concretes are made with many kinds of hydraulic cements; hydraulic lime, natural cement, puzzolan cement, normal portland cement, high-early-strength portland, super-portland, slag cement, bauxite cement, etc. While the principles of mixtures are the same for all cements, the resulting physical values of the concretes are widely different for the same cement contents. (Normal standard portland cement will be meant, herein, unless otherwise stated.)

Types of Aggregates Innumerable

The natural aggregates used for concrete are sand, gravel, crushed rock, volcanic cinders, coral, etc. Artificially prepared aggregates are crushed brick, blast furnace slag, coal cinders, crushed and burned shale, etc.

The natural aggregate may be igneous, sedimentary or metamorphic rocks and, in the case of gravel, the natural deposit may be various combinations of these three general classes of rocks.

The number of size separations of aggregates used to make a particular mixture may be one or more; two to four sizes are generally used and, for 12 inch maximum size, from eight to twelve sizes have been used to advantage.

Aggregates from a given source and plant vary from day to day in fineness, specific gravity, density, moisture content and absorption. Measured proportions for concrete today give poor results tomorrow, because of these changes.

With a given cement content and water-cement ratio, the strength, density, impermeability, durability and workability of the resulting concretes vary widely with the shape, grading, maximum size and the peculiar physical and chemical characteristics of the various classes of rocks.

Many Admixtures

Admixtures of various earths, minerals, chemicals, oils, emulsions, etc., are used in concrete to increase workability, flowability and cohesion, to accelerate or retard setting, as waterproofing, as hardeners, or as cures. Many admixtures have merit in one or more respects and all are harmful unless used with an understanding of their purposes, qualities, limitations, permissible quantities, etc.

Many Qualities Required of Concrete

The essential characteristics of concrete, determining the technological processes, are as enumerated in the following, the relative importance of each depending upon the particular use:

1. Durability:

Concrete must be composed of such ingredients and in such definite proportions that it will have, with due regard to the conditions of use, resistance to ice, fire, salts, liquids, gases, wear, stress, etc.;

2. Impermeability:

The essential quality of concrete for marine and hydraulic structures is impermeability to fluids. Impermeability is important in the protection of steel reinforcing. Durability is

largely dependent upon impermeability.

3. Strength:

Structural concrete must have elastic resistance to flexural and compressive stresses of various definite predetermined amounts per square inch. Resistance to wear is largely dependent upon the strength.

4. Density:

Concrete of the maximum workable density of solids has the optimum of weight, strength, impermeability and durability in proportion to cost.

5. Uniformity:

Uniformity of quality can be obtained only by uniformity of mix structure. Uniformity of texture is essential in architectural concrete.

6. Workability, flowability and cohesion in the fresh mix:

Concrete must have a workability, flowability and cohesion in the fresh mix suitable for the conditions of use. This means adequate cement and water and a proper uniformity and fineness of grading of the mixed aggregate.

7. Economy:

Economical concrete is that which has values in strength, durability, etc., adequate for the purpose and sufficient to make a proper return on the investment.

Saving of cement by the making of mixtures too dry for the conditions of use and necessitating an excessive expenditure of labor in placing and patching, is not economy. On the other hand, extravagant and inefficient use of cement, which permits of no return on the investment, is not economy, and the money so expended never buys another yard of concrete, barrel of cement, or day of labor. Comparison of results will show that economical concrete is obtained by employment of efficient materials, efficient production equipment, skilled workmanship and technological skill in control of production. Concrete, of a given strength, made with modern technological manufacturing skill, requires additional cement and costs from \$0.15 to \$0.30 more per cubic yard, the additional cost increasing with the strength required.

Excepting in the unusual case, the concrete having the best quality for the purpose is the most economical and, likewise, that having the best quality in proportion to its cost is generally a concrete of the optimum qualities for the purpose. As an example, normal standard portland cement concrete having the greatest strength in proportion to its cost is that having a strength between 3000 and 4000 lbs. per sq. in., and, using that strength as a basis of structural design, savings of \$0.03 to \$0.25 per total square footage of floor area are effected as compared with usual design for 2000-lb. concrete. Further, 3000-4000-lb. concrete is more economical to handle and has the optimum qualities of durability, strength, elasticity, impermeability, density, and shrinkage in setting, and minimum of plastic flow under stress and of expansion and contraction by moisture variation.

The evidence is quite clear that fundamental economy in the use of concrete lies in improvement in quality by improvement in manufacturing processes. Just as cement has been made more economical and improved in quality by better technological facilities of manufacture, so is concrete being made more economical.

Special Requirements of Concrete

The special requirements of concretes for various purposes, demanding technological manufacturing processes, are as follows:

Structural Concrete: Greatest compressive strength in proportion to cost of materials; the best workability, flowability and cohesion in the fresh mix; small maximum size of aggregate.

Plain Gravity Structures: Optimum weight and compressive strength in proportion to cost of materials and placing; large maximum size of aggregate; plastic consistency.

Plain Gravity Structures (Hydraulic): Optimum weight, density, and compressive strength in proportion to cost of materials and placing, large maximum size aggregate, preferably igneous; initial flowing consistency.

Plain Arch Dams: Greatest compressive strength in proportion to cost of materials and optimum conditions of strength, density and impermeability; preferably igneous aggregate; initial flowing consistency.

Plain Pavements: Greatest flexural strength in proportion to cost; wear resistance; plastic consistency.

Reinforced Concrete: Greatest compressive strength in proportion to cost of materials; impermeability; wear resistance; plastic workability.

Marine Structures: Optimum strength, density and impermeability in proportion to cost; igneous aggregate; initial flowing consistency in tropical climates.

Pressure Pipe: Optimum conditions of tensile strength, density, and impermeability in proportion to cost; small aggregates; igneous; optimum workability, flowability and cohesion.

Architectural: Optimum strength, density, uniformity and texture; small maximum size aggregate, specific rocks; optimum workability, flowability and cohesion.

Elements Affecting Quality

The accomplishment of these requirements depend upon evaluation of the following elements affecting qualities and characteristics of the concrete:

Cement quality and content, chemical and physical characteristics;

Water to cement ratio;

Lithologic quality, shape, maximum, minimum and average sizes of aggregate particles, specific gravity, moisture content and absorption;

Uniformity and character of grading of the mixed aggregate;

Cement to voids in the fine and in the mixed aggregate;

Sand and mortar to voids in the coarse aggregate;

Accuracy of the absolute volume measurement of aggregates, cement and water;

Time and efficiency of mixing;

Consistency, workability, flowability and cohesion of mix;

Workmanship in measurement, mixing, placing and curing;

Moisture and temperature of curing;

Practical and technical manufacturing control on the job as required by the foregoing variables; and

Practical and technical basis specifications making essential provisions for the foregoing.

Preliminary, Control and Research

Tests Essential

Given any set of materials and a project requiring concretes for various purposes, preliminary studies must be made of basic mixtures of same before satisfactory mixtures can be determined. Basic mixtures so determined, must be sustained during production by constant testing of the materials and readjustment of the measured proportions as the physical characteristics of the materials vary. Special materials and special requirements require special research tests and studies. The ever-changing demands require constant research as a normal operation of concrete production.

Scope of Concrete Research

Considering the whole gamut of practicable mixtures, it is readily seen why there is no simple absolute formula of mixtures such as 1:1:1, water-cement ratio, etc. With a given kind and maximum size of aggregate, a given cement, and a given slump or flow of mix, there is an equation for

the cement for any strength, related to an equation of the water content, related to an equation of the fineness modulus of grading, related to an equation of the yield of combinations. The abstract equations $\log C = B \log K + A$, $W = FCIG - \log B K$ and $f.m. = D \log C - E$ are basic laws of concrete mixtures, in which C = cement content, W = water content, $B K$ =

strength of concrete, $f.m.$ = fineness modulus and A, B, C, D and E are constants, for given set-ups of aggregate, cement, maximum size and consistency, and, variables for varying set-ups.

Appreciation of the enormous task which has confronted concrete research in the past, in the determination of the laws of mixtures, is convincing proof of the technological character of concrete making, shows the involved and abstruse difficulties of the exploration, and accounts for the groping progress.

In order to determine the effect of change of cement content, for example all other effects must be held constant. Likewise the determination of effect of maximum size of aggregate, of fineness modulus, of consistency, etc. In order to determine the mathematical curve of cause and effect, we must have at least four values of cause and four corresponding values of effect. Taking the simple case of a given type of cement and aggregate,—determination of the effects of maximum size of aggregate, fineness modulus, cement content and consistency, required for mixtures with four different maximum sizes of aggregates, four different gradings of each, four different cement contents of each, and four different consistencies, a total of 256 mix combinations. This may be multiplied in turn by the number of types of aggregates, the number of types of cement, of admixtures, of mixing time, etc., which may make a total of 20,000 or 50,000 mixtures. Determinations of yield, W/C, S/C, Weight, Strength, Density, Equations of Cement Content, Fineness Modulus, Water Content, etc., may amount to 500,000 determinations. As a matter of fact the Portland Cement Association has a record of about a quarter million of experiments, including a number of determinations in each.

Knowing the laws of the cement content, of the water content, of the fineness modulus, of the maximum size and of the yield of combinations, 16 mix combinations are required instead of the 256 mentioned preceding.

Commercial Central Plant Production

The industry of making concrete at central plants is, on the face of it, a manufacturing industry. The daily problem of technological control is to produce concretes of a number of a different maximum sizes of aggregates, of a number of definite strengths, of a number of definite consistencies and of correct yield. The tolerance of strength must be various. Slump must be within $\frac{1}{2}$ " and yield within one-half of one percent the first load delivered; and trial methods are impracticable and inadequate.

Will Encourage Research

Appreciation of this evidence that the making of concrete for modern needs is a technological manufacturing process will encourage concrete research and do much to improve the cement and concrete production industries.

Agreement of F. T. Webber of the Oregon Insurance Rating Bureau to form a new code on the protection of exterior wall openings that may be submitted to the sheet metal interests for approval, was obtained at a recent meeting of nine representatives of the sheet metal trades in Portland.

THE OBSERVER

What He Hears and Sees on His Rounds

A severe test of electric welding in building construction is to be given in the erection of the one million dollar manufacturing building begun for the Pittsfield plant of General Electric Co. More than 55 ft. long, 150 ft. wide, and 70 ft. high, it will probably be the largest all-welded structure of its kind. The entire building will be of steel and glass on a concrete foundation. Welded steel pilasters will replace the conventional brick type. A welded steel blanket covered with waterproof compound will form the roof.

The Pine Bluff (Ark.) Commercial has barred from its columns such expressions as "financial depression," "business depression" and "hard times."

"The United States has been completely sold on the depression," an editorial by W. B. Sorrells, Jr., managing editor, said. "One year ago it was a mild cessation of business. Today it is just what the name implies—depression. Millions of words already have been written in an effort to comfort the hating public. But the reaction has been just the reverse. We have done our part in the past 12 months in reminding you that we have a depression. But now we renege. As far as the columns of this paper are concerned, there is no depression."

When New York City assessed a water charge of \$2.50 a year for each mechanical refrigerator using running water in its operation, the rule seemed a damaging point against Electrolux, the gas refrigerator, as opposed to electrical refrigerators. Electrolux, however, made capital of the matter by running full-page advertisements headed "New York City confirms economy of water used in Electrolux refrigerator." The copy emphasized that the charge was only two-thirds of a cent a day.

Salinas city council is considering adoption of an ordinance making employment of local labor mandatory. City Attorney Russell Scott has been directed to secure sample ordinances which will be given a thorough study with a view to adopting such a measure.

A revised plumbing ordinance will be considered shortly by the Sacramento city council. Details of the new measure are said to be satisfactory to plumbers and contractors. The ordinance requires an annual fee of \$30 from all plumbing contractors. It sets up an inspection fee of 25 cents for every gas outlet and 50 cents for installation, extension or alteration of house gas pipes. Elaborate regulations covering the installation of new gas appliances in homes already constructed are included.

Contrary to the belief of a majority, the mere fact that a contractor furnishes material and labor to a tenant who improves leased property does not always entitle the contractor to a lien particularly if the owner did not acquiesce in making the improvement. So held the higher Court in the late

case of Stevens vs. Stamm, 152 S. E. 602, says Leo T. Parker, attorney, in General Building Contractor.

Here it was disclosed that a tenant, who had leased property, engaged a contractor to perform work. The contractor purchased material and proceeded to fulfill his contract. When the owner refused to pay the amount due a mechanic's lien was filed. Since the owner did not agree to having the improvements made the Court held the lien void, stating the following important law:

"The mere knowledge of the landlord that the improvements are being made by the tenant is insufficient to charge him or his premises with their cost. He must either expressly or impliedly authorize the tenant to make the improvements for the former's benefit."

The Cement Contractors' Association of Southern California has adopted a uniform cement work bid form which is to be used by all the members in submitting bids to the general contractors and others for flat cement work.

The most expensive lumber on the market today, says the U. S. Forest Service, is the wood of the yew tree. Archery experts agree with Robin Hood of Sherwood Forest and with the English bowmen who defeated the armored chivalry of France at Crecy and Poitiers over 600 years ago, that the yew furnishes the most ideal material for bows. Basing estimates on the cost of a stave 2 by 2 inches thick and 6 feet long at \$10, the value per thousand board feet would be \$5000, or fifty times the price of California's choicest sugar pine lumber.

November production of the Portland cement industry was 21 per cent under the corresponding month in 1929, amounting to 11,098,000 barrels. Shipments were off 21.7 per cent from 1929 to 7,784,000 barrels. Stocks at the end of the month were 23,011,000 barrels, 26.3 per cent above those of November last year.

The cost of building is lower at the present time than it has been at any period for five years and a resumption of new construction activity in the Greater Oakland area already noticeable is anticipated throughout 1931, according to a bulletin issued by the Oakland Real Estate Board. Occupancy surveys now under way covering the entire Eastbay district indicate that the surplus of housing and floorspace in most classes of property, created by the abnormal building activity of 1922 to 1926, has been absorbed, the board reports, and for many types of buildings throughout the most of the community a normal occupancy status exists.

Ways and means of reviving local building work and the necessity for the early commencement of work on proposed city and county building projects to relieve unemployment conditions, was discussed by members of the Fresno Builders' Exchange at their monthly meeting last week.

Builders, contractors and architects stressed the fact that building ma-

terials and real estate are now at the lowest prices in years and also urged Fresnoans to repair and paint old buildings to furnish employment for scores of skilled workmen who have been without work for months.

Fred Swartz, architect for the new \$250,000 addition to the county general hospital, reported that county bonds will be sold next month and bonds will be sold next month and to start work at the earliest possible date.

California highway expenditures totaling \$63,322,500 for the next two fiscal years, are recommended in a budget prepared by Bert B. Meek, State Director of Public Works, and approved by vote of the State Highway Commission. The commission announced this budget will be transmitted to Governor Young and the State Department of Finance.

(Continued on page three)

Ohio's state highway department, this year, has inaugurated the policy of letting contracts for highway maintenance, thus departing from the traditional practice of handling this type of work by day labor with its own forces. The first awards on bids received last April covered the sealing of cracks and joints in 1903 miles of concrete pavement. Bid prices were below the engineer's estimate on each of the ten contract sections, the average cut being about 25 per cent.

Public works to be undertaken by the government in the calendar year 1931 will total approximately \$700,000,000 compared with \$253,000,000 in 1928. This figure includes that part of the fiscal year, 1931, from January 1, 1931, until July 1, 1931, and the 1932 budget up until January 1, 1932. The work is distributed among the emergency unemployment relief bill of \$116,000,000 and the regular appropriation bill.

W. J. Serrill, retiring president of the American Standards Association, at the annual meeting of that body, reported the association's completion of 46 new national standards in the fields of mechanical, civil, chemical, and electrical engineering and in mining, woodworking, and a number of other industries. These include a number of safety codes which are being used by regulatory bodies, insurance groups, and industry as the basis for nationally uniform methods of safeguarding the lives and health of workers.

The action of the Water Board of Grants Pass, Oregon, in rejecting the low bid on a set of water mains in order to give the contract to a local firm was protested by the Portland Chapter of the Associated General Contractors as unfair to the publicly invited responsible bidders from out of town. The chapter pointed out that the out of town bidders had hazarded the expense of investigating the project and had taken the pains of making accurate bids and that the action of the board was an unwarranted expense to the intending bidders. Members and associate members of the chapter have been warned of this occurrence by Mr. George B. Herington, secretary of the chapter, who urges that before submitting bids on future work they ask the city authorities and Water Board to state in writing if the award of contract will be made to the responsible low bidder among those making tenders on the work.

TRADE NOTES

Gypsum Association, 211 West Wacker Drive, Chicago, Ill., has opened a district office at 11 West 42nd St., New York City, in charge of J. Kent Smith, district engineer.

John A. Roebbing's Sons Co., Trenton, N. J., on January 1 will take over the business of the New Jersey Wire Cloth Co., a subsidiary. On that date that corporate existence of the latter company will cease.

The board of directors of the Calaveras Cement Company has declared the regular quarterly dividend of \$1.75 a share on the 7 per cent cumulative preferred stock, payable January 15 to stock of record on December 31.

Universal Stucco Co. of Calif., Ltd., with headquarters at Reno, Nevada, has filed articles of incorporation with the county clerk in Los Angeles. Directors are A. Murtaugh, Samuel Platt, John S. Sinal, J. N. Guinn and V. Friesen, all of Reno.

Stromberg Electric Company has established a district office and display stock at 7 Front St. to serve Northern and Central California. The concern, whose headquarters and factory is located in Chicago, manufactures a line of electrically operated time equipment. R. E. Peters is manager of the division office.

Information for estimating the requirements of prospective water supply customers and instructions for installing shallow or deep well systems, are contained in a 32-page booklet just published by the George D. Roper Corporation, Rockford, Ill.

Santa Cruz Portland Cement Company has declared an extra dividend of \$2 per share on the company's common stock, payable December 24 to stock of record December 19, in addition to the regular quarterly dividend of \$1 per share which is payable January 1 to stock of record December 19.

GOTT NAMED CHIEF OF TRADE DEPARTMENT

Philip P. Gott has been made manager of the Trade Association Department of the Chamber of Commerce of the United States, succeeding Hugh P. Baker, who resigned to become dean of the New York State College of Forestry. Mr. Gott has been acting manager of the department since Dr. Baker's departure September 1. He joined the Chamber as assistant manager in 1928, shortly after the Trade Association Department was established. The Trade Association Department was created to further the Chamber's promotion of trade association work. Mr. Gott has been engaged since coming with the Chamber in this effort, carrying on a number of studies and activities in this general field. Mr. Gott has had a wide trade association experience, having been manager of a number of organizations in the building industry. He holds membership in the American Statistical Association, the American Academy of Political and Social Science, the American Trade Association Executives, the Kiwanis Club and other organizations.

HERE—THERE EVERYWHERE

G. E. Kimball, electrical engineer of the California State Industrial Accident Commission, was elected president of the California Safety Society at the annual dinner-meeting held in the Palace Hotel last Tuesday evening. R. E. Donovan, safety director of the Standard Oil Company, retiring president, presided at the meeting.

Other officers elected to serve for the ensuing year are: Vice-President, A. J. Lamle; Secretary, A. G. Anderson; Treasurer, A. F. Belmke; Librarian, N. C. Sagan; Chairman, Board of Control, E. W. Bullard.

National Lumber Manufacturers Association, through its executive committee, has approved a budget approximating \$1,000,000 for activities during 1931. Items for which this money will be spent include research, field promotion work, educational promotion, building code service and advertising.

The annual meeting of the Northwest Furnace Builders will be held at Milwaukie, Ore., December 30. It is announced by Clancey M. Lewis, secretary.

Prof. Walter Irvine Silchester, head of the department of electrical engineering in Columbia University, has been elected treasurer of the American Institute of Electrical Engineers. He succeeds George A. Hamilton, one of the pioneers of the electrical industry, who occupied the post for thirty-five years. Mr. Hamilton was with the Western Union Telegraph Company from 1875 to 1889, and with the Western Electric Company from 1889 to 1903.

Merrill Stoddard, Reno, Nevada, lumber mill operator, was arrested in that city last Saturday on a charge of arson, resulting from a fire which destroyed his lumber yard in Reno, November 12, with damage estimated at \$75,000. He is being held in jail unable to furnish bail of \$10,000. The complaint, signed by Police Chief Kirkley, alleges that Stoddard set fire to his lumber yard.

Utilization of natural resources and economic problems of western reclamation will be discussed by members of the American Society of Agricultural Engineers who will meet in convention in San Francisco on January 6 and 7. Sessions will be held at the Hotel Whitcomb and addresses will be made by B. B. Meek, State Department of Public Works, and George W. Malone of Nevada, a member of President Hoover's committee on conservation.

A. F. Foulter has been named manager of the Bear Gulch Water Company by the regents of the University of California. Mr. Foulter, a graduate of the College of Civil Engineering in 1927, has been an engineer in the department of grounds and buildings at the university since that time. He succeeds the late E. Britton. He has been working on problems of the Bear Gulch Water Company at Menlo Park for the past two years and is familiar with the properties, system and operation of the company.

TRADE LITERATURE

A new 96-page catalog of the Ohio Gear Company, 1213 E. 10th Street, Cleveland, Ohio, gives a full information on the company's stock gears and brings together in standard pocket-size form formulas and information on the design and adaptation of gearing and reduction units of various types to meet particular requirements. A simple method of figuring weight of triangular, octagonal and other sectional bars of various materials is included.

A catalog recently brought out by the All-Steel Equipment Company, Aurora, Ill., contains illustrated descriptions of a complete line of cut-out boxes, flush cabinets, pull boxes, wiring troughs, special boxes, fuse caps, and guttered and weatherproof cabinets.

"Falcon," electrically heated vertical coating tanks for asphalts, tars, compounds, oils, varnishes and similar substances are described in Bulletin No. 22 of H. O. Swoboda Co., 3409 Forbes St., Oakland Station, Pittsburgh, Pa. The tanks are designed for the coating of large pipes, culverts and similar products.

"How to Get a Job in Engineering," by Francis W. Wilson, is the title of a booklet now being distributed by the Wilson Engineering Corp., Cambridge, Mass., at 50c per copy. This contains 79 pages of pertinent advice on securing employment and is written with particular reference to the engineer or draftsman in search of a job. While the methods outlined are by no means new, the logical and clear way in which they are described should make the book of real assistance.

The importance of proper cleaning before the application of coatings to pipe lines is thoroughly discussed in a 32-page illustrated booklet, "How to Add Years to the Life of Steel Pipe Lines," published by the W-K-M Co., Inc., Houston, Tex.

Bulletins have been issued by the Sullivan Machinery Co., 400 N. Michigan Ave., Chicago, Ill., describing the following pieces of equipment: models 10 and 50 diamond core drills, model L-6 rotator rock drill, Turbular portable hoists and the Sullivan Cathed, a pump operated by compressed air or steam. "Core Drilling by Contract" is another publication describing the service rendered by the drilling department of the company in the making of test borings and mineral prospecting.

An illustrated bulletin L-4-C-BL has been prepared by the Worthington Pump and Machinery Corporation, Harrison, N. J., to acquaint equipment users with the characteristics of the Multi-V-Drive for industrial reductions.

Catalog No. B-4s now being distributed by the Rorer-Smith Company, 231 Broadway, New York, covers the entire line of the company's dynamometers and their multiple switchboard type instruments and accessories.

Fred Moody of San Francisco, member of the California State Highway Commission, has submitted his resignation to Governor-elect James Rolph. The resignation is effective when Governor Young retires from office.

ASPHALT INTERESTS FIGHT "LEGAL GRAFT"

A movement to control graft in public construction work gained ground at the ninth annual meeting of the Asphalt Paving Conference held at Memphis, recently.

Its author, Arthur H. Blanchard, consulting engineer of Toledo, said the program would follow that practiced by insurance firms when they outlawed rebates of premiums.

Namely a law demanding that books of construction companies, machinery and equipment builders be opened for public inspection, will be avoided. The companies, he said, favor the passing of the statute.

Where it is shown that payment had led to awarding of contracts, he said, prosecution will be demanded.

Blanchard estimated roughly that this form of "legal graft" amounts to \$10,000,000 yearly, which is one-tenth of the annual construction bill of the United States.

This amount, he explained, is added to construction costs now by concerns bidding for the work.

Blanchard maintained that most of this money was being paid to commissioners, county and city board and state authorities who are in charge of awarding contracts. He told of a situation in a Rocky Mountain town where a city engineer was dismissed by the council when he favored a firm contrary to the council's wishes. The engineer favored the firm which could do the best work, Blanchard explained, the council the firm where favors has been presented councilmen.

AGRICULTURAL ENGINEERS TO MEET IN JANUARY

The annual winter meeting of the American Society of Agricultural Engineers, Pacific Coast Section, will be held in San Francisco January 6 and 7, according to announcement of W. W. Weir of the Irrigation Investigations division of the department of Agriculture, which has charge of the program. The sessions will be held in the Whitcomb Hotel.

Among the speakers who are to appear on the two-day program are A. B. Meek, director of the California State Department of Public Works; George W. Malone, state engineer of Nevada and member of President Hoover's committee on conservation and administration of public domain; M. A. Schnurr, assistant to Dr. Elwood Mead, commissioner of reclamation; Lewis A. Jones, senior drainage engineer in charge of soil erosion, of the United States Department of Agriculture, and John W. Hay, director of the agricultural development department of the Northern Pacific Railway.

The meeting is in charge of the reclamation section, and will be given over largely to discussions of reclamation problems. At the banquet session on the first day's program, Prof. Charles F. Shaw of the University of California will speak on "Reclamation in China."

An architect is anxious to procure a metal door to mount on a Dimmer Cabinet that sets flush with the wall; that will be neat in appearance and yet give ventilation or allow the circulation of air through the cabinet. He has in mind a door similar to the louvered ventilator type doors as used on steel lockers. The opening in question is approximately 20 1/2 inches square. If interested advise Service Department, Daily Pacific Builder, Garfield 8744.

STATE PLUMBING ACT HELD LEGAL

Ruling that the state plumbing act is legal, Superior Judge S. L. Strother of Fresno refused to grant writ of mandate which would force City Commissioner of Finance William Glass to issue a master plumber's license to H. H. Cobb and Charles Lee Jr., operators of the Bellvue Hardware Company. The petition for the writ of mandate was filed by Cobb and Lee, after Glass had refused to issue them a license, acting upon the theory that they had failed to take the Board of Health examination.

The city ordinance under which all plumbers in Fresno are required to obtain either master or journeyman licenses from the city is based upon the state law and hinges upon the action of that law. The state law provides that before plumbers can be licensed they must pass a satisfactory examination to be given by the health officer or the board of health.

Cobb and Lee failed to take the health board examination, holding that the state law was indefinite and it could not be determined exactly what a satisfactory examination is. They applied to Glass for the master plumbers' license and were refused when they failed to show proof that they had passed the state examination.

Through their attorney, Arthur Allyn, they petitioned for the writ of mandate which has been refused. They alleged they had performed all that was required of them, including the posting of the required bond of \$2500, excepting that they had failed to take the test. The act requiring that the test be held was not constitutional, they alleged.

Glass, through City Attorney Claude Rowe, in combating the petition for the writ of mandate, contended that the act was constitutional and was a part of the state's police power.

PSUEDO ARCHITECTS ARE GIVEN SENTENCES

The granting by the Board of Architectural Examiners, Southern District, of six new licenses during October increased the total of licentiates operating under this board's jurisdiction to 706. This total was reduced, however, with the cancellation of 21 existing licenses through the death or failure of licentiates to pay their annual fees. The total number of licentiates as of October 31 was, therefore, 685.

Prosecution of two persons in the courts of San Luis Obispo for operating as architects without having first secured licenses were brought to a successful conclusion when the court held both defendants guilty. Sentences of 30 days in jail were suspended by the court, pending the good behavior of the defendants.

Cancellation of the licenses of three persons on the roster of the Board of Architectural Examiners, Northern District, reduced the total number of architects operating under this board's jurisdiction to 614, as of October 31.

Prosecution in court was resorted to by the board in the case of one offender, who, posing as an architect, exacted a large fee from a client for services. The man was convicted of operating as an architect without a license and was given a suspended sentence of \$100 fine or 30 days in jail.

Investigations were launched in 7 cases involving complaints and at the close of the month 27 investigations were pending completion.

PRECAST GYPSUM SLABS FOR ROOFING

To meet the demand for a lightweight, permanent, fire-resistant roof at a reasonable cost the Structural Gypsum Corp., Linden, N. J., has developed a construction utilizing gypsum slabs with which the amount of field labor necessary is reduced to a minimum. This is designed for use with purlin spacings up to 7 ft. 9 in. centers where the live loads do not exceed 30 lb. per sq. ft. An essential feature is the factory assembly of units long enough to extend from purlin to purlin, usually from 5 to 8 ft. These units are built up on a pair of specially designed rolled-steel sub-purlins between which are carried a number of 30-in. hollow gypsum slabs. On the job these units are placed in parallel lines approximately 30 1/2 in. apart, the spaces between being filled with additional slabs of the same size used in the unit. All joints are flushed with gypsum grout even with the top surface.

Manufacture of the unit in the factory makes possible the economies of quantity production, as well as permitting the use of an economically shaped sub-purlin which would not be practicable if used in the field. According to the manufacturer this sub-purlin is lighter in weight than any other section on the market of comparable strength. As the bulk of the work is done in the factory, this permits a closer control of labor cost and reduces field work to a minimum.

For use on pitched roofs, a small plate is riveted to the sub-purlin on each unit. These plates are bent around the top flanges of the purlins to form a clamp and prevent movement.

Leonard E. Brownson, an American architect, is credited with having done more to change the skyline of Havana in the last 30 years than any other single individual.

When Brownson went to Cuba at the close of the Spanish-American war, he found Havana "old world" to its very foundations.

Its buildings were piles of solid masonry, erected by men whose first conviction it was that masonry made for strength. Strength is still an important factor in Cuba, subject as it is to hurricanes.

Squat buildings with massive foundations and walls of great thickness were the architectural heritage of the Spanish regime. Brownson knew that buildings constructed with a tough backbone of steel could be made taller, less bulky and stronger than those built of masonry alone, and in his first big contract, he "put across" his idea to "reinforce with steel."

Brownson's first big job was the Miramar hotel, and he made it Cuba's first modern edifice. This opened the way to a fresh era of construction on the island.

Brownson's crowning work was the new \$17,000,000 capitolio, considered one of the most beautiful of the world's capitolis. The new National hotel, completed at a cost of \$7,000,000, is his most recent achievement.

"With this modern construction of steel frame-work we have practically eliminated danger of collapse in case of hurricanes," he said.

Plans for the removal of the W. P. Fuller Company branch at Fresno, from 1022 Fulton street to 1246 Fulton street, are announced by S. E. Chase of San Francisco, district manager and Jack Luftenberg, Fresno manager. The company recently closed negotiations for a 5-year lease as the new location.

JOINT CONFERENCE COMPOSED OF REPRESENTATIVES BUILDING TRADES DEPARTMENT, A. F. OF L., NATIONAL ASSOCIATION BUILDING TRADES EMPLOYERS

Washington, D. C., Nov. 10, 1930.

For the purpose of averting jurisdictional discord in the building industry, and the promotion of a greater amity between the parties principal hereto, there is hereby approved and adopted an agreement entitled

THE BOARD OF TRADE CLAIMS Preamble

The construction industry is constantly confronted with many and complex problems.

Conditions in the industry are ever changing due to improved and changing methods, materials, engineering, design, etc.

These changing conditions present peculiar and unusual problems to both employer and labor. Labor in the construction field is subdivided into trade groups, each of which has its own particular work to perform. This field labor becomes skilled in its particular class of work by application and study.

The question of which trade shall be charged with the responsibility of doing certain work upon a construction project when new materials and methods are presented is at times difficult to determine.

However, the insistence by two or more trades that the placing of the material or manufactured product, or that the work to be performed is properly theirs, and unwillingness on the part of any trade to concede to another the right of erection or installation makes it necessary that there be set up a tribunal or board that shall determine such matters and which shall also determine whether the issue has already been disposed of by decision or otherwise, and whether there shall be further consideration of the issue.

The desire on the part of the entire industry and the public that means be found whereby these costly and troublesome questions may be amicably, economically and expeditiously disposed of that construction may proceed uninterrupted, and with the distinct understanding on the part of the parties hereto that there shall be no abandonment of the work or refusal to do the work pending a decision to be arrived at in the manner herein set forth, prompts us to set up and make effective this

BOARD OF TRADE CLAIMS.

Now, therefore, this agreement entered into this tenth day of November, 1930, by and between the Building Trades Department of the American Federation of Labor and the National Association of Building Trades Employers, to be signed by affiliated International Unions and Employers' Associations, parties hereto. It is agreed:

ARTICLE 1. The Board of Trade Claims shall consist of the Executive Council of the Building Trades Department of the American Federation of Labor and an equal number from the National Association of Building Trades Employers.

ARTICLE 2. The Board shall elect from within its membership a Chairman and a Vice-Chairman.

ARTICLE 3. The Secretary of the Building Trades Department shall act as Secretary of the Board. The Secretary shall engage such assistants as may be required, subject to the approval of the Board.

ARTICLE 4. The Board of Trade Claims shall meet at least four times each year and also at the call of the Chairman with the approval of a majority of both sides of the Board. The first meeting of the year shall be the annual meeting.

ARTICLE 5. The Board of Trade Claims shall receive only from Inter-

national Unions claims for jurisdiction or control over work to be done in the field on construction work. All International Unions affiliated with the Building Trades Department shall be notified and sent a copy of any claims made, by registered mail and receipt returned.

ARTICLE 6. The Board shall investigate each claim and determine by a majority vote whether it has already been disposed of. However, the Board shall recognize and shall not allow to be reopened, except by consent of the trades involved, any past decision rendered by the American Federation of Labor or Building Trades Department or the former National Board of Jurisdictional Awards which have been approved by the Building Trades Department, and which decisions shall be filed with the Board.

ARTICLE 7. If the claim has not been determined already by decision or otherwise the matter shall be set for arbitration.

ARTICLE 8. The Board shall immediately state the question to be arbitrated and shall request the claimant to immediately name their arbitrators.

ARTICLE 9. Each claimant shall name its arbitrator within fifteen days and the arbitrators so chosen shall name an umpire within ten days thereafter. Should the arbitrators fail to agree on an umpire within ten days, then the President of the Building Trades Department shall within 15 days thereafter submit to arbitrators 3 names from within the construction industry, and the arbitrators shall within five days thereafter name an umpire from within the industry or select one of the three so submitted, and should they fail within five days to agree upon an umpire, then the first available of the names so submitted shall be accepted as the umpire.

ARTICLE 10. Should there be but two claimants, one of which fails to name its arbitrator within the stated time, the work in question shall be declared in possession of the trade which names the arbitrator within such time. Should there be more than two claimants, any trade which fails to name its arbitrator within the stated time shall be eliminated from the arbitration.

ARTICLE 11. Where there are but two claimants the decision of any two of the arbitration committee shall be final and binding upon the parties. Where there are more than two claimants and a majority decision cannot be arrived at, then the decision of the umpire shall be final and binding upon the parties.

ARTICLE 12. The arbitrators shall in each instance consider all evidence presented relevant to the question as stated and shall render a decision within ten (10) days after the hearing of evidence and arguments, and shall present said decision to the Board of Trade Claims in writing.

ARTICLE 13. If in the judgment of the Board, a decision is clear, concise, and in line with the QUESTION AS STATED, the Board shall approve the decision and shall set a date upon which such decision shall become effective, which date shall not exceed ninety (90) days thereafter.

All decisions from the Board of Trade Claims shall be made uniformly effective in all localities.

ARTICLE 14. If, in the judgment of the Board, a decision is not in line with the QUESTION AS STATED, then it shall be immediately sent back to the arbitrators for further consid-

eration.

ARTICLE 15. No lawyer shall act as arbitrator, umpire or counsel in any proceedings held under this plan.

ARTICLE 16. It is the purpose in setting up this Board to disturb conditions which are satisfactory in any community, and decisions rendered in the manner herein set forth shall not in any way affect the conditions in such community if they are at variance with the decision accepted as set forth in ARTICLE 17.

ARTICLE 17. Should a condition exist in any community wherein the employer of the trade in possession of the work and some other trade object to the continuance of such trade in possession of the work, then upon joint request sent to the Board of Trade Claims by these two parties, the arbitration decision as handed down by the Board of Trade Claims shall be made effective in that community or district.

ARTICLE 18. A quorum of the Board of Trade Claims shall be a majority of its members. A majority vote shall prevail on all questions.

ARTICLE 19. The arbitrators and the umpire shall be paid by the parties to the arbitration and they shall have the right to request satisfactory assurance that the fees agreed upon will be paid.

ARTICLE 20. The members of the Board of Trade Claims shall serve until December 31st of each year or until their successors are duly elected and qualified.

ARTICLE 21. Resignations or vacancies shall be filled from the Building Trades Department of the American Federation of Labor or the National Association of Building Trades Employers, as the case may be, for the unexpired portion of the term.

ARTICLE 22. The duties of maintaining the office of the Board of Trade Claims shall be equally borne between the parties hereto.

ARTICLE 23. Each of the parties hereto shall pay any salaries or expenses of their respective members of the Board of Trade Claims.

ARTICLE 24. There may be set up wherever there is a Building Trades Council and an Employers' Organization in the construction industry, a conference board, arbitration board, or local Board of Trade Claims, composed of parties to this plan, which shall temporarily suspend jurisdictional claims for that district when such claims arise between meetings of the National Board of Trade Claims and the decision by such local board shall be effective only until a final decision is handed down by the National Board of Trade Claims, and there shall be no strike, abandonment of the work, or refusal to do the work or to go upon the job, because of jurisdictional claims.

ARTICLE 25. Such local board, arbitration board, or Board of Trade Claims shall meet within twenty-four hours of the presentation of a claim and shall render its decision within twenty-two hours thereafter.

ARTICLE 26. Before proceeding with the arbitration of any local jurisdictional issue the matter shall first be referred to the Secretary of the National Board of Trade Claims to ascertain if the matter in dispute has already been Nationally determined.

ARTICLE 27. Should any local labor union fail, within twenty-four hours to abide by and work under any decision arrived at as herein set forth, then the International Union of which that union is a part, shall be notified of the failure and shall furnish skilled men to do the work within forty-eight hours thereafter.

ARTICLE 28. Should the International Union fail to furnish men as herein set forth, then the employers shall be at liberty without being adjudged in violation of this agreement or any trade agreement, to fill the places with such men, members of

other unions, as in his judgment can perform the work, and the members of such unions shall do the work.

ARTICLE 29. Inasmuch as the purpose of this agreement is to maintain peace and harmony in the industry in the public interest and to foster its economic welfare, it is recommended to architects, engineers, builders, owners, contractors and other concerned with construction work, that the decisions and findings handed down by this National Board of Trade Claims be observed in the drawing up of specifications, and in the making of contracts. A strict observance of this will contribute much to the advancement of the industry and will give to the public the necessary assurance in their building operations.

ARTICLE 30. It is agreed by the parties to this plan, that all provisions of said plan shall be fully carried out by their membership. Any of their members failing to comply herewith shall be disciplined by their respective organizations.

This agreement shall be continued in full force and effect until December 31, 1932.

Approved in Joint Conference by Building Trades Department, A. F. of L., by M. J. McDonough, President; Wm. J. Spencer, Secretary; John J. Hynes, P. J. Morrin, L. P. Lindelof, Arthur M. Huddell, Wm. J. McSorley, National Association Building Trades Employers by David T. Riffle, President; E. M. Craib, Secretary; W. W. Rosenthal, Chairman; C. G. Norman, James J. Scully, W. P. Carroll, A. F. Schutlz.

C. R. Stevenson, engineer of New York City, in addressing the annual meeting of the American Face Brick Association, declared that the history of mergers has by no means shown them to have been uniformly successful but that they are apt to be more effective than either large or small individual plants because they have the advantage of more money for technical and sales research. They are in a position to give more steady employment and better wages. With these advantages, plants operate more efficiently and buyers benefit from the resulting low-cost production.

According to Mr. Stevenson, some merging in the brick field would not be impracticable, both in the manufacturing or selling ends, although there are limits to the advantages to be gained. He suggested, however, that mergers should begin with a few small concerns where there would be no doubt that the executives of the merging companies could work together.

He also placed emphasis on the importance of capable management. In capable management is responsible for the failure of a large per cent of unsuccessful mergers.

The merging of a group of trunk manufacturers was given as an example. It was found that one manufacturer was capable of turning out a cheap trunk more efficiently than the others of the group. That plant was devoted entirely to cheap trunks which were sold under their original name. One of the other plants made a medium grade trunk and another a high grade trunk. In this case each plant retained its own name, consequently the consumer would find the three lines in shops across the street from one another, apparently in competition but in reality they were being made by the same company.

General Motors operates on a somewhat similar plan.

BUILDING FINANCE CITED BY CONSTRUCTION ENGINEER

(By Walter J. Aring of the H. K. Ferguson Company, Engineers and Builders, Cleveland, Ohio)

The average annual volume of construction work of all kinds in the United States during the past ten years has been close to three billion dollars. To provide funds to finance this huge volume of business has been a task of immense proportions.

Commercial banks and many other financial institutions are obliged to make a quicker turnover of funds than the ordinary long-term mortgage will permit. Therefore, they are not interested in this type of investment. On the larger projects it is impossible to obtain from individuals sufficient capital in unit loans of large amounts to satisfy the current demand.

The natural source of loan money is the saver or his agent, the savings bank. Records indicate that the savers in the majority are folks of modest means who are in position to take only a fractional portion of the loans offered. This fact has been capitalized by the introduction of the mortgage bond which divides the mortgage into fractional units and provides for distribution to the individual or institutional purchaser in small or large blocks as desired.

This type of financing should constitute one of the soundest and most desirable forms of investment. It fosters civic, business and engineering progress. It furnishes a large portion of the capital available for the construction of commercial and industrial buildings. It opens new channels for the production of wealth which would otherwise remain closed.

The popularity of the mortgage bond during the last decade may be measured by the fact that approximately 18 billion dollars is now outstanding in this form of security.

The buying public looks with favor upon mortgage bonds as long as interest and amortization are met promptly, but when this fails as it has in many cases, the buyer of mortgage bonds looks farther and refuses to be interested in further purchase of this type of security.

The mortgage bond, however, is not the only type of real estate investment which has suffered losses. There have been numerous cases in which straight first mortgages on apartment houses, hotels and various commercial enterprises, as well as mortgages on industrial plants, warehouses and other related enterprises, have shown indications of a similar weakness.

There must be an underlying reason for such failures. The condition is not confined to any one locality but is more or less prevalent throughout the country.

A recent article on real estate investments states that certain types of real estate bond houses in Chicago have over two hundred and fifty million dollars of real estate bonds on Chicago property now in actual default.

One of the outstanding causes of this evident weakness is over-expansion. The wide popularity which real estate bonds have enjoyed has made it necessary for bond houses to promote construction in order to provide enough bonds to meet the demand. This has led to an over-supply of apartment, hotel and office space and consequently to a high rate of vacancy. The earnings of new properties have failed to meet the estimates of their sponsors. Older properties have also suffered because of a drain created by newer and more attractive buildings.

In some cities several years must pass before normal growth and expansion of business will absorb the over-supply of floor space. In the meantime owners of buildings are bound to suffer through reduced earnings and foreclosures.

It is a well-known fact that many building projects are not financed sufficiently to guarantee full completion with a sufficient balance of working capital to carry the project through the lean earning period. Projects are too often promoted on the basis of appraisals of cost and earning power which are over-optimistic. This is especially true of buildings with speculative income such as apartments, hotels and office buildings.

The income of such property should be estimated conservatively on the basis of reasonable occupancy. It is a fact that in many instances income has been over-estimated with a minimum of vacancy allowed in order to stretch the balance sheet to justify a mortgage of the desired amount. This condition, together with inflated building and land values, are danger signs at the outset.

Generally the sponsor only is familiar with the real facts. He may not intentionally mislead, but his judgment is influenced by his keen desire to create a new project, regardless of his own past experience or the experience of others.

Recently the question was asked me, "Why is it necessary to spend so much effort on the preliminary investigation of a new project?" Preliminary analysis is the most important step in the development of any project. To determine the facts accurately and present them truthfully is the essence of the success of the venture. This can only be accomplished by a careful analysis of the cost factors in ratio to the earning power, making allowance for substantial vacancies and including generous operating costs in addition to amortization of funded indebtedness. If a project passes this test satisfactorily and provides in addition compensation for the investor, subsequent steps are merely a process of development.

Previous, of course, to the preliminary work outlined, it is necessary to determine whether or not a building of the type considered is actually needed and whether or not the location and environment of the site selected will best fit the building needs. It may be necessary to make an extended survey of existing buildings of the type planned to determine if there is sufficient demand for floor space to warrant the new venture.

If a wealthy individual owns a piece of valuable frontage and desires to build a monument for himself, he can no doubt afford to proceed without making such an investigation. Such is not true of the average investor. He cannot afford to gamble on the safety or earning power of his investment.

Industrial plants, warehouses and factories differ from commercial projects only in the fact that rental is usually fixed. Income can be definitely predicted without considering the vacancy factor providing the business remains sound. Moreover, industrial property is generally of special type, built to the manufacturer's requirements.

The safety of an investment in this type of construction depends not only upon the soundness and permanence but also upon the manner in which

the space is arranged to suit production requirements. This is the work of specialists in problems of production layout.

It is just as important in the case of commercial buildings to plan the arrangement of floor space carefully to meet the requirements of tenants. Because a building is designed "to last a hundred years," it is not necessarily a good investment.

It must be arranged to yield the last possible foot of rentable floor space. In it there is no room for expensive fads which will not help to earn an adequate return.

It seems to be a popular theory at the present time that garage space combined with office space for the convenience of tenants is a wise investment. A careful analysis of high-class commercial property of this type indicates that in some cases this may prove an expensive type of advertising. Our engineers recently made an analysis of a proposed building of this type and found that losses due to the low earning power of the garage space more than offset the earnings from the balance of the building. Because of the high cost of land in the locality, use of the building must be confined to office, apartment or hotel occupancy in order to return a profit on the investment.

There are many costly buildings, portions of which are profitable while other sections are constantly taxing earnings because the project as a whole was poorly planned.

Great care is usually exercised in arranging the floor plans and the elevations of a building in order to achieve a satisfactory architectural result. Often, however, too little attention is given to the engineering details of the structure and to the lasting quality of the materials specified. All too soon in the life of a building the owner is called upon to spend large sums for repairs and maintenance which should be allotted to amortization.

Early disintegration occurs because materials were not selected which would stand the wear and tear of hard usage. The sharp-eyed engineer is quick to discover the things which contribute to early obsolescence when he is asked to report for a possible loan. A shoddy appearance also has its effect upon the reputations of the firms which the building houses, and unfortunately cannot be overcome except at unreasonable and unwarranted cost.

Many times the quality of a proposed building has been limited due to lack of appreciation on the part of the financial houses of the value of good construction. A mortgagor recently made the statement that without exception any and every office building in his estimation is valued at a certain standard and very definitely low price per cubic foot. In applying such limits the mortgagor makes it impossible for the sponsor to build into a structure the qualities that avoid high maintenance cost and easy obsolescence. He invites cheap construction and thereby decreases the possibility of maintaining the building on a high class rental standard. This practice invariably reacts unfavorably upon the value of the loan.

The protection of a good building requires that a sufficient sum of money be set aside as a depreciation fund to be invested in the building each year to safeguard the mortgage against "early rack and ruin of the plant." This will maintain the prosperous atmosphere of the property and protect the owners against the necessity of making a large lump sum expenditure at a future date which in most cases is considerably larger than the combined cost of a consistent maintenance program.

If the judgment of the sponsors of any construction project is faulty, on

whom shall the bond purchaser rely for safety?

Certainly the average layman cannot judge for himself the merits of a large bond issue in the same sense that he is able to judge a similar amount investment in a mortgage on his neighbor's house and lot.

He is obliged to place his trust in the house from which he purchases the bonds. He must accept their recommendations assuming that they are based on a full knowledge of all the factors which have entered into the preparation of the issue.

The bond distributor, like a banker, cannot be expected to have the combined knowledge of the architect, engineer, builder and building manager. He must depend to a great extent up-

on individuals of these professions for recommendation and approval of the details of the building plans. These statements he must coordinate and pass on to his clients.

Anticipating the growing need of service under one management to provide authentic, authoritative and co-ordinated information covering all phases of engineering and management preliminary to the development of a project, engineering organizations are extending the scope of their work for the preparation of all-inclusive reports for sponsors, bankers, and bond distributors. In this way they are able to assist in a practical way in the proper development of building projects so that the pitfalls which have been encountered on many occasions in the past may be avoided.

ECONOMIC DEVELOPMENT OF STRUCTURAL STEEL INDUSTRY

By James A. Farrell, President, United States Steel Corp

Address before the Eighth Annual Convention of the American Institute of Steel Construction at Pinehurst, N. C., October 29, 1930.

I have been asked to discuss tonight some of the economic conditions confronting the steel fabricating industry.

It was about fifty years ago that structural steel first began to be used in buildings and bridges. During this time there have been remarkable developments. In 1929 over 3,550,000 tons of steel were used in the construction of steel buildings, bridges and lesser structures.

In its continuous annual development, the industry has coped with many problems involving daring in engineering and ingenuity in fabrication, assisted by metallurgical research and effective rolling mill practice.

The American Institute of Steel Construction has become in the last decade a national institution. It has exerted a commendable co-operative effort in its program of standardization, simplification and the elimination of waste. The consequent reduction in cost of fabricated structural steel serves the public interest in promoting the building of modern steel structures at reasonable cost. This recognition of the fact that public welfare is of paramount importance ensures that the interests of the industry, while apparently subordinated, are nevertheless more surely advanced.

Your Institute recognizes that effective industrial development can best be accomplished through proper and legal co-operation.

Standard Specification

It is asserted that your Standard Specifications, generally adopted by the industry, have reduced the cost of building construction by millions of dollars annually by the employment of standard, uniform practices. The public is the principal beneficiary of this reduction, but the industry profits through the creation of broader markets.

Technical research is another activity of importance. The work in connection with wind bracing, welding, the proper fireproofing of structural steel, and other similar technical problems will lead to more intelligent and economical uses.

Recognition should likewise be accorded your work with technical schools and colleges, educational meetings and your Bureau of Technical Service and Standard Handbook,

as promoting a keener interest and wider understanding of structural steel and of the industry that is producing it.

Public opinion cannot be artificially manufactured. Advertising and publicity alone, no matter how skillfully manipulated, will not achieve anything of lasting value unless founded upon economic results. Public confidence can be maintained only if actual and authenticated achievement accompany announcements and claims.

Work of Engineers

The constructive work of your engineers, as shown by the record which they have established in promoting wider uses of structural steel, is commendable. No less important is the service extended to users and to those who prepare specifications.

Interest is being successfully stimulated in new and practical uses for steel. Steel dams, steel framed buildings, battlecreek steel plate floor construction, the steel hangar, and other similar enterprises result in a larger consumption of steel. Where excess plant capacities exist, increasing consumption will be found the only sure panacea.

Other research problems are important, such as the abatement of noise in construction, the use of alloy steels, the economic height of buildings, and the demand for greater speed in erection occasioned by the consideration of the high cost of land.

Keen Rivalry Cited

There is naturally keen rivalry between reinforced concrete and structural steel. This rivalry is wholesome as long as it is constructive. There is a legitimate market for both materials. Both fulfill a public need. Each can properly claim economy, durability and safety. Practicability and sound engineering practice can and should determine the limitations of each. It should be the aim of the producers to stimulate fair consideration of both types of construction. In all promotional effort, including advertising and selling, the presentation of all claims should be governed by facts free from misrepresentations or misleading statements. Honest competition is a business stimulant; destructive competition undermines business stability and retards national progress.

At the Spring Meeting of the American Iron and Steel Institute I called attention to the smaller manufacturers and to the importance of the smaller consumers, who in the aggregate account for a large tonnage. These

smaller concerns are working the highways and byways, and are entitled to full consideration and encouragement. They are educating new users who later may develop into large consumers. Many of these companies are equipped to render specialized service and are of importance to the steel industry.

Similar to other problems of standardization is that of structural shapes. Producing mills appreciate the intrinsic merit of the principle and are prepared to delve into the details. Any practical program of standardization and simplification is deserving scrutiny and collaboration.

Prices and Profits

You are all conversant with conditions that influence prices and profits. When one considers all the hazards involved in the erection of our modern skyscrapers and large bridges, it is difficult to understand why prices frequently are quoted which do not bring a return in the form of profit.

All industry throughout the world has been passing through a transition that has effected prices, largely due to the fall in values of basic commodities and to the underlying world causes for such decline. I am confident that in the end stabilization and recovery will develop from intelligent management. The "Spirit of Live and Let Live" is a necessary doctrine of modern business, and no satisfactory substitute has been found for the Golden Rule, whether in the field of economics or any other phase of existence.

During the past year there has been much talk of a depression. This was but a logical outcome following the period of activity during 1929. Steel production has declined very materially, but I am one of those who like to think that our business has been making for better times, considering the increase in the general and more widely spread demand for fabricated material which has developed during the last several years.

Plant Modernization

The millions spent in being expended in modernizing plants to reduce costs will be justified by the inevitable return of a period when demand will again overtake supply. This, however, can apply only to those lines in which capacity has not far outstripped the potential demand for some years to come.

While competition in industry may be termed euphemistically the life of trade, it must be healthy competition, because carried to the excess which leads to destruction of competitors, it is harmful to business and destructive of national prosperity. The middle ground must be found in legitimate co-operation combined with legitimate competition.

Expansion of capacity, without the realization of commensurate consumption, has forced upon us the present problem of promoting better distribution and enlarged markets.

Business exists for making profits. When profits disappear, business likewise disappears. The satisfaction of labor working for adequate wages, of the consuming public for an adequate supply of goods at reasonable prices, of the investor for a fair return on his money of the government for an unimpaired source of tax returns, are all dependent uniformly upon the profitable operation of business.

This problem of earning a profit, however, is properly left to the discretion of business management. Consequently management is in duty bound to apply scientific thinking and planning in effecting better methods

for the stabilizing of business prosperity.

Economies Effected

By co-operative effort we have effected economies through standardization, simplification and the elimination of waste. Inefficient plants and improper selling methods are not entirely extinct, and the latter will not serve to offset the failings of the former. Changing conditions and accelerated methods are forcing the transition to modernized plants and improved commercial practices.

Eventually business concerns throughout the country will see the need of determining accurate costs and of establishing their sales prices on a basis of total cost plus a reasonable profit. This is the only procedure by which business can permanently endure, and it is the first essential of sound, intelligent management.

As we look into the future we cannot fail to be imbued with optimism and a firm belief in the greater development of our industrial activities. We envision our buildings rising higher and higher and as demand for transportation increases we foresee the necessity for heavier and wider bridges.

We are extending the use of steel in the erection of all-steel office buildings and residences of all-steel frame with steel floor construction. The art of welding is improving.

Research, educational and sales effort, properly directed, will develop

our markets to the benefit of the fabricators and the steel mills. It behooves all to prepare for a greater future by modernizing our own business methods and by having a proper regard for the rights of others.

In conclusion I again wish to commend you for the constructive work that has been accomplished by the American Institute of Steel Construction. It should indicate very clearly the benefits to be derived through proper co-operative efforts. It should demonstrate that individual success and prosperity is based primarily upon the prosperity of the industry itself. No individual can possibly achieve permanent success if exclusive reliance is to be placed upon individual effort. The forces marshalled against him are altogether too great. This is a time in which the constructive, co-operative effort of all is essential if the industry is to profit from its full possibilities during the years ahead.

Fortunately for the structural steel industry its future, if judged by the progress made during the past nine years, offers much in the way of encouragement. It has made a commendable record during 1930. The shipments of fabricated structural steel during the first eight months have been in excess of 1929, a year which saw the largest tonnage consumption. The industry is confronted by greater possibilities which your Institute is designed to assist to its full achievement.

LUMBER, A SICK INDUSTRY, CHAFES UNDER SHERMAN ACT

The lumber industry is sick. The troubles of the business have been told and suggested remedies are to be put to the test by the National Timber Conservation Board.

The accompanying article published in the Business Week summarizes the troubles in the industry and the suggested remedies.—Editor.

Lumber prices are off \$5 per M on the average. No. 1 common boards, a fair example, sell at \$16, f.o.b. Chicago against \$21 a year ago.

Land covered with good timber, ripe for logging, is worth less an acre than it was 10 years ago when its trees were smaller.

There are 15,000 lumber mills; 2,500 of them make 60% of all the lumber; the other 12,500 make 60% of all the trouble. When the market is demoralized, the little mills close down, that is, after prices have been down for so long that even they, without any system of cost accounting, discover they are losing money. When prices perk up, they glut the market again. Just now, lumber production and consumption are in balance. It has taken 8 months of the severest depression of prices to accomplish this.

No lumberman is making any money just now. Of course, that isn't literally true, but it is truer than most sweeping statements.

In short, the lumber industry is another of the sick industries. All of which explains why the lumbermen asked President Hoover to appoint a National Timber Conservation Board to study lumber's sickness, suggest remedies. The Board has just been appointed. On it are the Secretaries of Commerce, Agriculture, Interior, 3 lumber manufacturers; a paper manufacturer; 4 forestry men; a farm leader; a railroad president.

Lumber, oil, coal—there is a close parallel. All three industries utilize natural resources. In each industry, wasteful overproduction with competi-

tion run wild loses money for all investors, wastes harm to labor, wastes the natural wealth of the nation. In his message to the Congress, the President suggests the anti-trust laws may need revision to cover such industries. He mentions only coal by name, but the lumbermen hail his words with joy. They frankly hope the Conservation Board will reach the same conclusion.

"Fundamentally the purpose of this movement," says Wilson Compton, secretary and manager of the National Lumber Manufacturers' Association, "is through cooperation with public agencies and relying upon frank public disclosure of economic facts to seek a sound economic basis upon which to build a permanent and profitable future for the lumber and wood-using industries. It is not a task for a day. It may be a vision but at least it is no dream."

The notion that our forests are disappearing, that it is an act of patriotic virtue not to use lumber because we must have our trees, has taken extraordinary hold upon the public mind. Probably because propaganda of forestry enthusiasts for years was much more aggressive than the lumberman's. Incidentally, that war is about over. Lumbermen and conservationists have made their peace, are in substantial agreement.

Forests Still Equal Farms

As a matter of fact, after 300 years of use and waste, 3 centuries of steady conquest by the axe and saw, the agricultural lands of the United States now are exactly equal to the forest lands—500 million acres each. Canada's forests cover somewhat more acreage than ours, but the stand is thinner; Canada probably has only half the potential lumber we have. The stand of wood in the United States has been estimated at 746 billion cubic (not board) feet. Of this, about 25 billion cubic feet are used, burned, or wasted annually. Fuel takes 40% of this; lumber, 35%; posts, piling, ties, etc., 10%; pulp, 4%; fire and tree diseases,

HOOVER DAM BID OPENING IS SCHEDULED FOR MARCH 4

10%. Annual growth once was estimated by the Federal Forest Service at 6 billion cubic feet annually. Lumbermen bitterly dispute this; are working hard to get a complete survey; offer to prove that in the South, for example, annual growth already substantially equals annual cut.

What no one disputes is that, given better economic conditions in the industry, our forests can be made to last forever. For example, it would pay to spend more money on fire prevention and fire destroyers more acres than are cut annually—though not as many board feet of lumber.

Third in Employment

The industry ranks third in number of employees, 600,000; eighth in value of annual product, two billion dollars. Investment is eight billion dollars. In five states, more than half of all employed persons are in lumber.

Annual use of lumber is declining rather steadily. Substitutes are still cutting in, although during the past two or three years lumber has been at least holding its own in competition. Yet we shall use 28 billions of board feet this year. The industry is big enough to be worth saving.

Besides some modification of the law to permit closer cooperation, the lumbermen suggest various other remedies. Most important of all is taxation reform. They insist it is outrageous to tax standing timber annually; that forces the lumbermen to cut his trees to raise money for present taxes, and to avoid future taxes. Taxes, they believe, should be based on annual yield. The forest is the problem is knotty for hundreds of counties in which taxes upon forests are virtually the only revenue for the support of schools and government. But they hope a formula can be found.

They suggest the industry needs huge mergers, to create in lumber something comparable to the great oil companies, or to U. S. Steel. Only corporations of such size, they point out, can afford to carry on the research in which, they are convinced, lies the future hope of the industry. So, with a sideways glance at the Sherman Act, they talk of bigger combinations.

Research may transform the industry. It is a physical industry now; it is likely one day to become a chemical industry. There are 200 possible by-products. Their possibilities need to be explored. The future of cellulose is not yet to be forecast. Plastics are in their infancy. It is not improbable that virtually all wood now wasted in lumbering some day will be made into products much more valuable than lumber. The chemicals derivable from wood are an imposing list. The possibilities of chemical treatment of wood to make it fireproof, waterproof, rotproof are just beginning to be sensed.

What Is Needed

Grading and trademarking are officially endorsed. The market extension work is being pushed aggressively. Lumber, its producers stoutly insist, is better and cheaper than iron or concrete in many of the places where it has been shoved aside by good salesmanship of the competing industries. Coordination of the work and of markets is badly needed. The average haul to market used to be 200 miles, now it is 1,000 miles.

And over the horizon is always Russia, with forests probably greater than ours in stand of saw timber; certainly greater than ours in area, but wasting horribly through the vastness of which this country cannot conceive. Russia has no costs, save freight paid foreign bottoms. Present tariff is called just big enough to irritate Canada, not big enough to keep out the Soviets.

These are lumber's troubles; these the suggested remedies. The National Timber Conservation Board has a job.

March 4 has been tentatively fixed as the date for opening bids for the construction of the Hoover Dam, and appurtenant tunnels and cofferdams, and the power plant building. Plans and specifications have been approved by the engineers of the Reclamation Bureau at Washington, D. C., and have been submitted to the Secretary of the Interior, whose approval may be announced within the next few days.

The first contract to be let will include the 727-ft. dam, the four 50-ft. diversion tunnels, the cofferdams, and the power plant (except installation of machinery). The principal items and approximate quantities are:

1,800,000 cu. yds. open cut excav. (all classes);
1,500,000 cu. yds. shaft and tunnel excavation;

1,200,000 cu. yds. earth and rock fill in cofferdams and river channel protection;

4,400,000 cu. yds. concrete;
228,000 cu. ft. of grout;
5,500,000 lbs. reinf. bars (placing);
190,000 ft. placing grout and drainage holes;

1,900,000 lbs. small metal pipe and fittings installed;

32,500,000 lbs. large metal conduits;
10,600,000 lbs. structural steel;
20,000,000 lbs. of gates, hoists and other metal work.

The proposed dam, originally known as the Boulder Dam, will be constructed in upper Black Canyon on the Colorado River about 30 miles southeast of Las Vegas, Nevada. The project embraces a dam, power house, and All-American Canal. The project has been planned for several purposes, among them flood control, river regulation, irrigation, silt control, power development, and domestic water supply.

According to the most recent figures the Act of Congress authorizing the construction appropriates \$165,000,000, to be expended as follows: \$70,000,000 for the dam and reservoir; \$38,200,000 for power development; \$17,700,000 for the All-American Canal, and \$17,700,000 for interest during construction.

Preliminary plans provide for a maximum height of 727 ft. above bed rock. The dam will be of the arch-gravity type, the load being carried by both gravity action and horizontal arch action. It will be about 950 ft. in length along the crest, with an up and down stream width of 45 ft. at the top and 650 ft. at the base.

The estimated quantities of concrete to be used are 3,500,000 cu. yds. in the dam, or 4,400,000 yards in the dam, power plant, and appurtenant works. The work will require 3,500,000 blbs. of cement and 19,000,000 lbs. reinforcing steel.

The foundation and abutment rock is reported to be of volcanic origin, known as andesite breccia. Borings and testings have been in progress for many months.

The department plans to complete the work in approximately seven years after the award of contract. It is not probable that the payroll will exceed 1000 men at any time during construction.

The construction of the dam will create a reservoir having a capacity of 30,500,000 acre feet. The arch of the reservoir will be about 227 square miles. The lake thus formed will extend 115 miles to Bridge Canyon and 35 miles up Virgin River. The maximum width of reservoir will be eight miles and the minimum several hundred feet. The length of the shoreline will be about 560 miles. Practically all of the lands on the reservoir site have been withdrawn from entry for construction purposes.

During construction, the river will be diverted by temporary earth and rock-fill cofferdams through four 50-ft. concrete lined tunnels, two on each side of the river. The four tunnels, which will be driven through rock, will have a total length of 16,300 lin. ft. After completion of the dam, the tunnels will be utilized for penstocks and spillways. Two of the tunnels will serve as main supply tunnels for forty 72-in. needle valve outlets located in the canyon walls. Water will be delivered to the valves through 28-ft. diameter power intake towers. The dam itself will have eight metal lined conduits, 7 ft. 9-in. in diameter, to carry the low flow of the river when the diversion plugs are being poured. Each of these sluiceways will be controlled by a pair of 6x6-ft. slide gates.

Plans for spillways include two glory-hole type spillways discharging through 50-ft. diameter shafts into the outside diversion tunnels. The spillways will have a capacity of 200,000 cu. ft. per second without overtopping the dam.

The power plant is to be located just below the dam, one-half on the Nevada side and one-half on the Arizona side, forming a U shaped structure. The water will be delivered to the turbines through four pressure tunnels, two on each side of the river, each provided with shut-off gates and trash racks. Tentative plans for the 1,000,000-horsepower installation, call for twelve 85,000 h. p. hydraulic turbines, twelve 11x10-foot balanced valves, twelve 75,000 K. V. A. generators with exciters, thirty-six 25,000 K. V. A., 220,000-volt transformers, four 250-ton cranes, switchboard, control apparatus, and a completely equipped machine shop. The turbines will operate under a maximum head of 582 ft. and a minimum of 422 ft., averaging 520 ft. The plant will be operated by the City of Los Angeles and the Southern California Edison Co., under the general supervision of a director appointed by the Secretary of the Interior. The machinery and equipment to be installed by the government will cost approximately \$17,700,000.

Establishment of a board of reference is contemplated by the Oregon Building Congress at an open forum meeting held in the Multnomah Hotel, Portland, last week. The board, which has already been established in parts of the East, will be for the purpose of settling differences between the general or sub-contractor and the architect or engineer. When the former, competitively bidding on plans and specifications, discovers therein any requirements which in his opinion are unfair as to general conditions and guarantees, or inadequate in their explanations, he is invited to submit the matter promptly to the board, before the competitive proposals are handed in.

An active Own Your Home campaign will be launched by the California Real Estate Association in cooperation with other state bodies beginning with the first of the year.

Watersheds under protection of the U. S. Forest Service serve 80 per cent of the irrigated farms in 87 per cent of the irrigation enterprises in the 12 western States. There are 782 municipalities dependent wholly or in part for their water supplies upon the national forests, and 335 water power projects are located wholly within these same Federal forests.

WESTERN METAL CONGRESS MEETS HERE IN FEBRUARY

Structural steel, builders' hardware and silent welding of steel frames for large structures are subjects listed throughout the programs now being outlined for the National Western Metal Congress and National Western Metal and Machinery Exposition, to be held February 16 to 20 in the Municipal Auditorium, San Francisco.

While the programs, as yet, are far from complete, they are being rushed to a finish by a San Francisco and Oakland committee, headed by Ivan L. Johnson, of the Best Steel Casting Company, Oakland. W. H. Eisenman, of Cleveland, secretary of the American Society for Steel Treating, already is on the ground, and has opened offices in the auditorium building, which he will occupy until the show and convention is finished.

One session of the meet, that sponsored by the American Chemical Society, largely will be devoted to resisting corrosion, one of the important subjects, now confronting the builder and hardware man.

F. N. Speller, of the National Tube Company, Pittsburgh, will give a thorough review of corrosion findings as ascertained during the past year. On the same program, a speaker from the Merco-Nordstrom Valve Co., San Francisco, is scheduled to talk on corrosion and lubrication of valves, showing how his theories may be applied to other items of industry, as well.

Chromium and Chrome-nickel steels are to be discussed by M. A. Grossman, of the Republic Steel Corporation, Canton, Ohio.

Fully two sessions have been assigned the American Welding Society, although dates for all the sessions are yet to be set.

On the programs devoted to welding will be heard J. C. Hodge, of the Babcock and Wilcox Company, Beaver Falls, Pa., whose subject is fusion welding. Linde Air Products Company is planning to assign one of their metallurgists to talk on carburizing flame and acetylene welding. Coated electrodes and coated welding rods will be the topic of A. B. Stroebel, of the Stoddy Company, Whittier, Calif., while another Stoddy speaker, M. C. Smith, will talk on welding of alloy overlays.

Welding of aluminum and its alloys is to be the topic of W. N. Dunnlap, of the Aluminum Research Laboratories of the Aluminum Company of America, Pittsburgh.

The societies, which are taking part in the sessions, in addition to those already mentioned, are American Institute of Electrical Engineers, American Institute of Mining and Metallurgical Engineers, American Society for Testing Materials, Institute of Metals, National Purchasing Agents' Association, Pacific Coast Electrical Association, Pacific Coast Gas Association, Society of Automotive Engineers, and National Association of Power Engineers.

Plans for the congress have been made on a scale of registering 5,000 delegates and interested persons, while 60,000 men, identified with the industrial end of the metal industry, are expected at the exposition.

Two years ago, the congress and exhibition was held in Los Angeles, where it achieved a distinct success to mark its first appearance in the west. The San Francisco event is expected to be planned on a considerably more comprehensive scale.

issues, said that the process of readjustment will show eventually that real estate is substantially the only form of investment that has come through with a reasonable degree of security and investment return. He pointed out especially two factors of the present long-time trend in the development of real estate practice which are bound to affect favorably the degree to which real estate securities can be safeguarded. They are the development of nationally accepted and detailed standards of practice in the appraisal of real estate, and the coming of a new realization that the management of an office building or apartment building is a specific business calling for the same kind of specific management ability and specialized experience as would be taken for granted as necessary in the management of any other business where a like capital was invested.

Adventures Blamed for Improperly Guarded Issues

Mr. Reaume said:

"The present situation in regard to real estate bonds has been brought about by the entrance in to the real estate field of adventurers without experience and without scruple. They have sold as a conservative investment bonds that were not even a half decent speculation. These adventurers represent a very small percentage of the men and firms in our field.

"The general prosperity of the last few years, with their rising real estate returns, has induced the entrance of these adventurers and has concealed from the public the fundamental unsoundness of their projects. Conditions prevailing over the last few months have tested the stability not only of real estate bonds, but of all business. Where, as has happened, either through actual chicanery or culpable ignorance the appraisal upon which a bond issue was sold did not fairly represent the income producing value of the security, where because of inexperience a bond issue was made without due regard to changes that might come in the general business situation and hence in the earning power of projected building, or where real estate securities have become involved because of losses sustained by the issuing house in other investment or business operations, real estate bonds have gone into default.

"The times are helping us to weed out the unfit operator. But in the meantime we must take action, or the public will permanently confuse the defaulted bonds with bonds based on valued projects and on conservative negotiations.

"We have had, and still have, a situation in which owners of real estate who have no knowledge or experience in the management of properties are undertaking the management of \$400,000 or \$500,000 properties. At the same time, these very owners would not invest \$40,000 in any ordinary business unless they were assured that someone who was recognized as able in that particular field would be in charge of the management of the business.

"But within recent years we have concurrently developed the business of property management, a highly specialized business, and we as realtors can now say to the world that there is no other investment which offers so great an element of security as does real estate where the project is developed after accurate survey of the market demand, protected against inflation by sound appraisal, and given that skilled direction that we take for granted is needed in every other major experience of capital, the advantage and guidance of experienced and competent property management."

GENERAL SOUNDNESS OF MORTGAGE BONDS CITED BY REAL ESTATE CHIEF

Holders of real estate bonds should be warned not to allow hysteria over the present business situation to lead them to part with their bonds at an unjustifiably low rate, Leonard P. Reaume, president of the National Association of Real Estate Boards, states in a letter sent out to the presidents of the Association's member boards in 25 larger cities.

The letter calls on real estate boards over the country to advise the holders of real estate bonds against acting upon mere rumor or upon misconception in relation to their bonds. It asks every member board of the Association in cities where real estate bonds as a valuable modern instrument of finance have come into general use, to set up a special committee or other machinery to give the public, owners of bonds and owners of equities alike, unbiased and informed advice.

Such machinery would act against forces reported to be at work to discourage real estate bond holders, buy up sound issues at abnormally low rates, induce foreclosures, and profit selfishly by the consequent loss to the original investors.

The Securities Division of the State of Illinois has already taken cognizance of the fact that certain persons in the state are finding it profitable to circulate adverse rumors as to the stability of real estate mortgage bonds and thereafter to pick up valuable bonds from uninformed invest-

ors in exchange for worthless securities or for entirely inadequate cash payment, and says:

"Land has always been the basis on which the wealth and prosperity of our country has been built and while other kinds of wealth change continuously, land throughout the ages has continued to be the greatest part of the world's wealth. There is no reason today why investors should lose confidence in securities based upon land at a conservative valuation.

"From information which has come to the Securities Department of the State, many investors are frightened, and their fear is being augmented and exploited by certain agencies who are trying to trade holders out of their mortgage bonds at low prices.

"Holders of real estate and real securities will do well to sit tight and hold their investments. Securities based on real estate, should pay out in full in practically all cases. The important thing at this time is that the owners of bonds and the owners of equities cooperate. The best way to make bonds worth a hundred cents on the dollar is to prove that real estate is worth more than the bonds, and this cannot be done by sacrificing the real estate at forced sales during hard times."

Emphasize Security

Mr. Reaume, in outlining the present need of emphasizing the very real degree of security behind real estate

APARTMENTS

Plans Being Figured.

APARTMENTS Cost, \$15,000
BURLINGAME, San Mateo Co., Cal.
 Broadway near California Drive.
 One-story and mezzanine floor reinforced concrete apts. and stores.
 Owner—Peter Lemperopolus.
 Architect—Russell Coleman, 1404 Broadway, Burlingame.

Bids To Be Taken Within a Few Days.
ALTERATIONS. Cost, \$—
SAN FRANCISCO. 499 Buena Vista Avenue.

Alter residence for apartments.
 Owner—Mrs. J. A. Wilcox, 499 Buena Vista Ave.
 Architect—Henry H. Guttererson, 626 Powell St.

Preparing Preliminary Plans.
ADDITION Cost, \$12,000
BERKELEY, Alameda Co., Cal. College Avenue.

Two-story brick addition to apartment.
 Owner—Withheld.
 Plans by Mr. Yerrick.
 Contractor—A. J. Yerrick, 5263 College Ave., Oakland.

Sub-Bids Wanted.
REMODELING Cost, \$6000
OAKLAND, Alameda Co., Calif.
 Remodel 2-story and basement frame and stucco store and apartments.
 Owner—A. Tulanian, 2998 College Ave. Berkeley.
 Plans by Mr. Yerrick.
 Contractor—A. J. Yerrick, 5263 College Ave., Oakland.

Excavation Contract Awarded.
APARTMENTS Cost approx. \$50,000
SAN JOSE, Santa Clara Co., Calif.
 Mariposa and Rice Sts.

Two-story and basement frame and stucco apartments (8 apts.)
 Owner—W. Hodges.
 Architect—Charles McKenzie, Twohy Bldg., San Jose.

Excavation—Dan Dorsey, San Jose.
 Mill Work and Lumber—Hubbard and Carmichael, 354 W Santa Clara, San Jose.

Bids wanted on plumbing, electric, plastering, painting, hot air heating system, etc.

To Be Done By Day's Work By Owner
APARTMENTS Cost, \$40,000
SAN FRANCISCO, NW Broderick St. and North Point St.
 Three-story and basement frame and stucco apartments (15 apts.)
 Owner—Robinson & Johnson, 871 31st Avenue.
 Architect—Irvine and Ebbets, 72 New Montgomery St.

Contract Awarded.
APARTMENTS Cost, \$200,000
LOS ANGELES, Cal. 445 S Gramercy Place.
 Seven-story and basement class A reinforced concrete apartments (60 apts.)
 Owner—W. G. J. Bentley.
 Architect—Arthur LeBrun, H. L. Booth, H. W. Charlton, Fay Bldg., Los Angeles.
 Contractor—Harris Bowers Const. Co., I. W. Hellman Bldg., Los Angeles.

Contract Awarded.

APARTMENTS Cost Approx. \$300,000
ALAMEDA, Alameda Co., Cal. NW Webster and Taylor Sts.
 Seven-story reinforced concrete and steel apartments (60 2, 3 and 4-room apts)

Owner—J. S. Bercovich, Actico Bldg., Oakland.

Plans by Thomas Keenan, 1440 Broadway, Oakland.

Contractor—G. P. W. Jensen, 320 Market St., San Francisco.

Financing arrangements are now being made.

Sub-Figures Being Taken.

APARTMENTS Cost, \$—
LOS ANGELES, Cal. No. 218 S. Kingsley Drive.

Five-story and basement Class B brick and steel apartments (75x138 feet).

Owner and Builder—Harry Feigenbaum, Union Bank Bldg., L. A.
 Architect—Max Maltzman, Union Bank Bldg., Los Angeles.

Construction Started.

APARTMENTS Cost, \$200,000
LOS ANGELES, Cal. No. 535 S. Gramercy Place.

Eight-story and basement Class A apartments (42x122 feet)

Owner and Builder—Peter Elvad, 535 S. Gramercy Place, Los Angeles.
 Architect—Thomas P. Barber and Paul Kingsbury, Union Insurance Bldg., Los Angeles.

Plans Being Figured—Bids Close Jan. 5th.

ALTERATIONS Cost, \$—
SAN FRANCISCO, No. 499 Buena Vista Avenue.

Alter residence for apartments.
 Owner—Mrs. J. A. Wilcox, Premisee.
 Architect—Henry H. Guttererson, 526 Powell St., San Francisco.

Sub-Bids Being Taken.

APARTMENTS Cost, \$30,000
SAN FRANCISCO, W Fillmore St N Beach St.

Three-story and basement frame and stucco apartments (8 apts.)

Owner and Builder—B. Lieberman, 1555 Francisco St., San Francisco.
 Architect—Irvine & Ebbets, Cal Bldg., San Francisco.

SKILSAW Portable Electric Hand Saws (4 models).

SKILSAW Portable Electric Sander Radial Arm Attachments.

SYNTRON Portable Electric Hammers (4 models, motorless).

MALL Flexible Shaft Machines (50 models).

Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

Labor Saving Portable Electric Tools.

1248 Mission St. Underhill
 San Francisco 7642
 SALES . SERVICE . RENTALS

BONDS

OXNARD, Ventura Co., Cal.—(Oxnard Union High School District affirmed bond issue on December 16, providing \$60,000 for construction of new buildings on the Oxnard High School site. Allison & Allison, 1005 California Reserve Bldg., Los Angeles, will be the architects.

SAUSALITO, Marin Co., Cal.—Election will be held January 10 in Sausalito School District to vote bonds of \$24,000 to finance miscellaneous school improvements including playground developments. Trustees of the district are Chas. W. Ellis, Grace Green and S. G. Ratto.

CHURCHES

Completing Plans.
AUDITORIUM Cost, \$100,000
TUCSON, Arizona.

Marble and stucco church auditorium (to seat 1000).
 Owner—Trinity Presbyterian Church.
 Architect—Robert H. Orr, Tucson.

Bids To Be Taken Shortly.
CHURCH Cost, \$100,000
LOS ANGELES, Cal. No. 4103 W. Adams Blvd.
 Class C reinforced concrete church (65x142-ft.)

Owner—Memorial Congregational Church (Dr. Isaac C. McCarty), 1264 W. Adams Blvd., Los Angeles
 Architect—Thos. P. Barber and Paul Kingsbury, Union Insurance Bldg., Los Angeles.

Preparing Working Drawings.
CHURCH Cost, \$75,000
BERKELEY, Alameda County, Calif.
 Scenic and Le Conte Avenues.
 One-story brick church (to seat 5000).
 Owner—University Christian Church.
 Architect—W. H. Ratcliff, Jr., Chamber of Commerce Bldg., Berkeley.
 Bids will be taken in about 30 days

Bids Wanted—To Close January 5, 12 Noon.
CHURCH Cost, \$40,000
SAN MATEO, San Mateo Co., Calif.
 San Mateo Drive.

One-story frame and stucco church with tile roof (auditorium to seat 350).

Owner—First Congregational Church.
 Architect—Kent & Hass, 525 Market St., San Francisco.

Present organ is to be used. Bids are being taken from a selected list of contractors for general contract, electrical work, heating and ventilating, seating and chancel fittings.

Concrete foundations, reinforcing bars, wood frame structure, stucco exterior, brush coat finish to cover old and new buildings, cast cement, brick and cement steps and walks. T. C. tile roof, wood wash and doors, cathedral glass.

Interior: Pine, hardwood and rubber floors, plaster walls, ceilings, acoustic plaster and celotex in main church, open truss and beam ceilings alternate bids on pine, Philippine mahogany and oak finish alternate bids on warm air and steam heating, gas and oil burners. Allowance for painting, hardware, fixtures and landscaping.

Plans Being Figured.
CHURCH Cost, \$70,000
OAKLAND, Alameda Co., Cal. Emer-
 son and Excelsior Avenues.
 Reinforced concrete church.
 Owner—Roman Catholic Archbishop of
 San Francisco, 1100 Franklin St.,
 San Francisco.
 Architect—W. E. Schirmer, 700 21st
 St., Oakland.

SAN FRANCISCO, Calif.—Dinwid-
 die Construction Co., Crocker Bldg
 awarded the lead roof contract to the
 Northwest Lead Co., Crocker Bldg.,
 and the acoustical tile and tinbrel
 vaulting to the Gustafson Co. Boston
 Mass., in connection with the con-
 struction of the Grace Cathedral, lo-
 cated on California and Mason Streets.
 Plans prepared by Architect Lewis P.
 Hobart, Crocker Bldg.

Plans Being Prepared.
CHURCH Cost, \$19,000
SAN FRANCISCO. Thirty-second Ave.
 and Ulloa
 One and two-story frame and stucco
 church with slate roof (to seat
 400).
 Owner—St. Stephens Protestant Epis-
 copal Church.
 Architect—Chas. Strothoff, 2274 15th
 St., San Francisco.
 Bids will be taken right after Janu-
 ary 1.

George Honore, San Jose... 9,367
 Sub-Contracts Awarded.
WAREHOUSE Cont. price, \$73,450
SAN FRANCISCO. Fifteenth and Har-
 rison Streets.
 First unit of two-story reinforced con-
 crete central storage warehouse
 (flat slab construction).
 Owner—City and County of San Fran-
 cisco.
 Architect—Dodge Reidy, Pacific Bldg.
 Contractor—Mahony Bros., Flood Bldg.
Ready Mix Concrete—Golden Gate At-
 las Co., 16th and Harrison Sts.
Reinforcing Steel—Truscon Steel Co.,
 Call Bldg.
Plastering—Peter Bradley, 639 Bran-
 nan Street.
Elevators—Spencer Elevator Co., 166
 7th Street.
Roofing—Malott & Petersen, 3221 20th
 Street.
Tile Work—Malott & Petersen, 3221
 20th Street.
Steel Doors—Kernerson Mfg. Co., 361
 Brannan St.
Glass—W. P. Fuller Co., 301 Mission
 Street.
Hardware—Marshall Newell Co., Spear
 and Mission Sts.
Painting—D. Zelinsky and Sons, 165
 Grove St.
Miscellaneous Iron and Sheet Metal—
 Conlin & Roberts, 410 Natoma St.
Brick Work—Mutual Const. Co.
Vault Doors—Hermann Safe Co., How-
 ard and Main Sts.

Construction Started.
LABORATORY Cost, \$200,000
CULVER CITY, Los Angeles Co., Cal.
 Reinforced concrete film laboratory.
 Owner—Metro-Goldwyn-Mayer Studios
 Plans by The Austin Co. of Calif., 777
 E Washington St., Los Angeles.
 Contractor—The Austin Co. of Calif.,
 777 E. Washington St., Los An-
 geles.

Contract Awarded.
WAREHOUSE Cost, \$125,000
GLENDAL, Los Angeles Co., Cal.
 Seven-story reinforced concrete stor-
 age warehouse.
 Owner—Bekins Van & Storage Co.,
 1335 S. Figueroa St., Los Angeles.
 Architect—F. Eugene Barton, Crocker
 Bldg., San Francisco.
 Contractor—John T. Bibb, 231 N. Cen-
 tral Ave., Glendale.

Construction to Start January 2.
FACTORY Cost, \$—
SAN LEANDRO, Alameda Co., Cal.
 Foothill Blvd. and 163rd Ave.
 One-story brick and steel factory (60x
 108 feet).
 Owner—Wurm Woven Hosiery Mills,
 J. W. Tilley, Mgr., 414 13th St.,
 Oakland.
 Plans by Owner
 Contractor—Drew Caminetti, 2212 21st
 Ave., Oakland.

FACTORIES AND WARE- HOUSES

Preparing Plans.
ADDITION Cost, \$—
LONG BEACH, Los Angeles Co., Cal.
 Long Beach Harbor.
 Precast reinforced concrete automo-
 bile factory addition (900 feet
 long).
 Owner—Ford Motor Company.
 Architect—Albert Kahn, Inc., Detroit,
 Michigan.

Bids To Be Taken January 2.
FACTORY Cost, \$70,000
OAKLAND, Alameda Co., Cal. Eigh-
 ty-first Avenue near 14th St.
 One-story reinforced concrete factory.
 Owner—Blue Bird Potato Chips, Inc.,
 68th Ave. and Beck St., Oakland.
 Architect—Charles W. McCall, 1404
 Franklin St., Oakland.

Plans Being Figured.
FACTORY Cost, \$200,000
OAKLAND, Alameda Co., Cal. 102nd
 Avenue.
 One-story Class C concrete factory (to
 cover area of 12,000 sq. ft.)
 Owner—Hammer Bray Co., 26th Ave.
 and E-12th St., Oakland.
 Architect—Clay N. Burrell, American
 Bank Bldg., Oakland.
 Consulting Engineer—W. W. Hanscom

D-3637. Representation. Dayton, O. Firm manufacturing a che wing gum wishes to secure representation in San Francisco, someone in a position to sell the jobbing trade.

D-3638. Representation. Brooklyn, N. Y. Manufacturer of elevators and dumbwaiters desires to secure representation in San Francisco for the sale of his goods, to architects and contractors.

D-3639. Sales Outlet. Oakland, Cal. Manufacturers of gas heating appliances, maintaining sales forces and agencies, wish to secure additional lines to sell along with their own product. They have trained sales forces as well as trained mechanics.

D-3642. New England Distribution. Manchester, Conn. Firm in East has large warehouses connected by spur track, and would like to represent San Francisco firm in that territory in order to use these facilities.

D-3643. Eastern Representation. New York City. Firm in East who will stock merchandise in New York, carry all accounts and discount bills, wishes to secure representation of San Francisco firms, desiring this type of service.

31

The Pacific Odorless Incinerator Company which has proposed to build and operate an incinerator in Portland, Oregon, on a site furnished by the city, and take payment out of the by-product obtained from garbage, take the opportunity opened by the protests of various communities over any site within their districts being considered for location of a new incinerator, to emphasize to the council that the system proposed to be employed by it is absolutely odorless.

ARCHITECTS FAIL IN DUTY TO PROMOTE BUILDING SAFETY

Architects are failing in their duty to promote building safety, it is charged in a report of the Committee on Health and Safety of the American Institute of Architects, of which Samuel R. Bishop of New York is chairman.

Though a safety code has been compiled by the committee and adopted by other groups, architects have accorded it scant consideration, it is asserted. "We are criticized by the U. S. Department of Labor for keeping it locked in our desks, and accused of hiding our light under a bushel," declares the committee in announcing plans to stir architects throughout the country to the need of "putting into practice what we preach."

"Construction accidents are a serious problem, and the building construction industry holds the unenviable distinction of being the cause of more deaths than occur in any other branch of work," the report says.

"The most serious accidents occur in the larger cities. In New York City last year the average cost per case was \$474 as compared with \$441 in the State as a whole. The State of New York made compensation awards on 104,848 accident cases last year, paying \$35,000,000, or \$3,000,000 more than in the previous year. The average cost per case each year was practically the same. The most costly accidents both in total cost and average cost per case were in the construction industry.

"Architects enjoy reciprocal relations with the master craftsman in many directions, yet they have refrained from participating in the movement to establish safe working conditions and to eliminate the greatest source of economic waste.

"Some contracting organizations have prepared manuals and have adopted rules of safety, but these measures affect only their own members, and consequently have little in-

fluence on the industry as a whole. By this attitude these organizations have been responsible in a measure for the legislation that has been forced upon them in various states.

"The code framed by the Committee on Health and Safety of the American Institute of Architects has been adopted by the Industrial Commission of the State of Arizona and New Jersey. It has become a section of the new building code of Cincinnati; paragraphs have been taken from it for insertion into the section on safety in the proposed new code for the City of New York, and it has been referred to by the committee engaged in revising the Industrial Safety Code of the State of New York.

"In fact, it is known as the architect's code, despite the meagre response it has awakened among architects. The architect does not advocate legislation. He is taking no part in the enactment of legislation. He need only encourage the erection and maintenance of appropriate safeguards for workers in operations under his supervision.

"The aid of the architect is necessary, for notwithstanding the educational methods employed by such organizations as the Associated General Contractors of America, and the existence of such safety codes as have become state laws, accidents are not decreasing."

Other members of the Health and Safety Committee of the Institute are:

Victor Abel, Philadelphia; Theodore I. Cne, New York; Albert Farr, San Francisco; Carl F. Gould, Seattle; Louis A. Walsh, Waterbury, Conn.; Carl E. Heimbrodt, Western Springs, Ill.; Joseph W. Holman, Nashville; Dnn A. McLaren, Minneapolis; E. C. Wachendorff, Atlanta.

A proposal to form the West San Joaquin Irrigation District, comprising 210,000 acres in Fresno, Merced and Stanislaus Counties, was defeated at a recent election.

DAILY PACIFIC BUILDER

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California — featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction; bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies; business opportunities; building permits; building contracts, mechanics' liens; acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California, and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

Engineering News Section

BRIDGES

VENTURA. Ventura Co., Cal.—Until 10 A. M., Jan. 20, bids will be received by the county to construct bridge over Revolon Slough on E 5th St., east of Oxnard about four miles. Cash contract No. 711. L. E. Haulowell, county clerk. Chas. W. Pettit, county surveyor.

BERKELEY. Alameda Co., Cal.—Lee J. Immel, 1031 Evelyn St., Berkeley, at \$1691.60 awarded contract by city council to construct culvert in Codornices Creek at Glen Ave. Project involves: 60 lin. ft. 6-ft. by 6-ft. culvert.

SANTA ROSA. Sonoma Co., Cal.—Rocca & Coletti, San Rafael, at \$151,255 submitted low bid to Joint Highway District No. 16 to construct steel bridge over the Russian River, 1½ miles above Jenner, involving two 145 ft. steel deck truss spans and nine 60 ft. steel girder spans with concrete deck and steel H beam piling and two concrete abutments, one 40 ft. and another 30 ft. Project involves:

- (1) 58,000 cu. yds. roadway excav.
- (2) 27,000 sta. yds. overhaul;
- (3) 6,000 ft. property fence;
- (4) 10 gates;
- (5) 116 ft. 12-in. corr. pipe;
- (6) 70 ft. 24-in. do.;
- (7) 180 ft. 30-in. do.;
- (8) 17 cu. yds. "A" conc. (culverts);
- (9) tremie;
- (10) bridge complete.

Rocca and Coletti bid is approximately \$5,000 above estimate of J. B. Platt, engineer, Daugherty-Shea Bldg. Santa Rosa. Fred J. Maurer, Eureka, only other bidder at \$165,000. Unit bids follow:

Rocca & Coletti	F. J. Maurer
(1) 32c	32c
(2) 2c	3c
(3) 10c	10c
(4) 18.00	18.00
(5) 2.00	2.00
(6) 3.75	3.75
(7) 6.00	6.00
(8) 16.10	16.00
(9) 10.00	20.00
(10) \$151,255	\$165,000

Bids taken under advisement for 1 week.

DREDGING, HARBOR WORKS & EXCAVATIONS

PETALUMA. Sonoma Co., Cal.—Until January 6, 3 P. M., bids will be received by U. S. Engineering Office, Customhouse, San Francisco for dredging in Petaluma Creek. Project involves 73975 cu. yds. Specifications obtainable from above office.

SUISUN. Solano Co., Cal.—Until January 6, 3 P. M., bids will be received by U. S. Engineer Office, Customhouse, San Francisco, for dredging in Suisun Bay, involving 521,240 cu. yds. Specifications obtainable from above office.

SAN RAFAEL. Marin Co., Cal.—Until January 6, 3 P. M., bids will be received by U. S. Engineer Office, Customhouse, San Francisco, for dredging in San Rafael Creek. Project involves 42,115 cu. yds. Specifications obtainable from above office.

LONG BEACH. Cal.—R. R. Bishop, 5017 East Broadway, Long Beach, at \$104,912.12 awarded contract by city council to furnish all plant and appliances for construction of a cressonet timber wharf and stone berm at Berths Nos. 1, 2, 3 and 12 and for dredging and filling Outer Harbor.

MONTEREY. Monterey Co., Cal.—Bids will be called early in 1931 by the U. S. Engineer, San Francisco, for the construction of a rock mound breakwater at Monterey harbor, Monterey county, to provide a fishing boat anchorage. The proposed breakwater, for which plans are under way, will extend 1300 ft. north from a point near the west line of the Presidio of Monterey. The project involves over 150,000 tons of rock and a concrete cap. An appropriation of \$610,000 is available. Major E. H. Ropes, Corps of Engineers, U. S. Army, is district engineer at San Francisco.

LOS ANGELES. Calif.—Bids for dredging of Los Angeles and Long Beach harbor will be called by the office of the U. S. Engineer, 751 S. Figueroa St., soon after Dec. 31. These projects are included in the \$750,000 expenditure planned for Los Angeles, Long Beach and San Diego harbors. The two projects are: (1) removal of the shoal in the local port's east basin, entailing dredging of 782,000 cu. yds. of material; (2) dredging of both the Los Angeles and Long Beach sections of the Cerritos channel to a width of 400 ft. and a depth of 35 ft., thus giving both ports two points of egress.

VENTURA. Ventura Co., Cal.—Plans for a reinforced concrete seawall costing \$300,000 for Pierpont Bay District have been announced by D. A. Rizer, subdivision manager for Frank Melrose Co. at Pierpont Bay. The proposed construction will be about one mile in length and will be from 12 to 20 ft. in depth, extending 7 to 8 ft. above the high tide line. The west end will be located 500 feet east of the Pierpont Bay bathhouse.

VALE PROJECT. Oregon—W. H. Puckett Co., Boise, Idaho, was low bidder on Schedules 1, 3, 4, 5 and 6 of the Vale project at \$75,323. Bids for this project were opened Dec. 19 by the U. S. Bureau of Reclamation. Low bidders on other parts of the work were:

H. C. Boyer, Ontario, Ore., Schedule 2, \$5800.

Gabbey & McNeill, Boise, Schedules 7 to 11, inclusive, \$32,630.

The next lowest combination was E. T. Fisher, of Stockton and A. Ritchie Co., Baker, Ore., at \$139,927.

This work comprises the construction of sawwork and structures between stations 2060 plus 55 and 2450 of the Vale main canal and the Bully Creek east bench lateral system, Vale project, Oregon, involving:

- (1) 582,350 cu. yds. excav., all classes;
- (2) 25,000 station cu. yds. overhaul;
- (3) 8400 cu. yds. backfill about structures;
- (4) 1890 cu. yds. concrete;
- (5) 118,000 lbs. place reinforcement bars;
- (6) 5590 lin. ft. laying 12, 15, 18 and 24 in. concr. pipe;

- (7) 20,900 lbs. installing gates, gate lifts and structural steel;
 - (8) 22 M. ft. b. m. erecting bridges.
- Materials will be furnished by the government.

IRRIGATION PROJECTS

MERCED. Merced Co., Cal.—Proposal to organize the West San Joaquin Irrigation District, embracing 210,000 acres of land in Merced, Fresno and Stanislaus Counties, failed to carry by a vote of 1,256 in favor and 544 against. A two-thirds majority vote was necessary to carry.

YUMA. Ariz.—An election will be held in the Mohawk Municipal Water Conservation District Jan. 6, 1931, to vote on \$323,000 bond issue for irrigation purposes. Mrs. A. B. Bing is the secretary of the district.

STREET LIGHTING SYSTEMS

PORTERVILLE. Tulare Co., Cal.—City council plans to install ornamental street lighting system in S Main St. bet. Olive and Date Sts. Fred Pease, city engineer, is preparing estimates of cost.

SAN LEANDRO. Alameda Co., Cal.—Until January 7, 8 P. M., bids will be received by city trustees to install street lighting system in S Main St., involving 29 electricolier standards with underground system; estimated cost, \$7,000. Plans obtainable from office of city engineer, 1120 E 14th St., San Leandro.

MACHINERY AND EQUIPMENT

COCO SOLO. C. Z.—Bids will be asked shortly by the Bureau of Yards and Docks, Navy Department, Washington, D. C., for 3-ton electric bridge crane, 1-ton hand operated bridge crane and 1½-ton trolley chain hoist at Coco Solo, C. Z. Specifications (No. 6357), obtainable from above office on deposit of \$10, returnable.

OAKLAND. Cal.—Sherman Tractor & Equipment Co., at \$1695 awarded contract by City Port Commission to furnish and deliver industrial tractor.

SOUTH GATE. Los Angeles Co., Cal.—Until 7:30 P. M., Jan. 6, new bids will be received by the city council for furnishing:

- (1) One 21-passenger bus chassis;
 - (2) One 11-passenger bus body;
 - (3) E. R. Adams, bus superintendent.
- H. C. Peiffer, city clerk. Bids received Dec. 16 were rejected.

SACRAMENTO. Cal.—White Truck Co., at \$3,877 awarded contract by city council to furnish dump truck for city street department.

SACRAMENTO. Cal.—Until Dec. 29, 2 P. M., bids will be received by R. H. Stalnaker, equipment engineer, State Highway Commission, 1805 34th St., Sacramento, for the sale of the following equipment and other materials too numerous to itemize:

One only used White Truck with boom and hoist attachment.

One only used steam boiler, mounted on wheels.

One only used asphalt boiler, 700 gal. capacity, unmounted.

One lot (191) steel and wooden pulleys, solid and split.

Numerous auto and truck parts of several makes and designs.

Auto and truck motors, gas engines, pumps, transformers.

Hotel and camp ranges and stoves, tent heaters and many other articles too numerous to enumerate.

Arrangement for inspection of the above mentioned equipment and materials, which is stored at Mather Field, near Sacramento, should be made at the Department of Public Works, Division of Highways, Headquarters Shop, 1805 34th Street, Sacramento, Calif.

SAN MATEO, San Mateo Co., Cal.

—Until January 5, 8 P. M., bids will be received by E. W. Foster, city clerk, to furnish and deliver:

One 2-passenger coupe;

One 1½-ton truck.

Certified check 5% required with bid. Specifications and further information obtainable from clerk.

HUNTINGTON BEACH, Orange Co., Cal.

—Until 7:30 P. M., January 12, bids will be received by the Huntington Beach Union High School District for furnishing laundry equipment as follows:

ITEM 1.—One 36x62-in. No. 11 iron bearing standard wood washer, type "A" motor driven, cylinder to have one partition, two doors, shell and cylinder to be brass trimmed; equipped with 2½x3 two-way Chace floatless automatic valve.

ITEM 2.—One 30-in. Marathon extractor, vertical motor driven, with type "B" safety cover.

ITEM 3.—One 42x60-in. Premier drying tumbler type "A" M D, with lint retriever.

All the above to be Troy Laundry Machinery Company equipment, or equal, delivered f. o. b. Huntington Beach Union High School.

RAILROADS

HOOVER DAM RAILWAY—Approximate list of quantities as shown on the bid form for the construction of the Hoover Dam Railway for which bids will be received by the U. S. Bureau of Reclamation at Las Vegas, Nevada, 10 A. M., Jan. 12 (previously noted) are shown below. This project will involve 10.23 miles of track, using 90-lb. second-hand or relay rails, extending from Summit where a connection will be made with the Union Pacific Ry. from Las Vegas, to the site of the Hoover Dam. The work is located from 25 to 30 miles southeast of Las Vegas. The specifications (No. 515), state that unless otherwise fixed by the official invitation for bids, the performance bond shall be for not less than 20% of the amount of the bid. The items follow:

- (1) 270,00 cu. yds. excav. for roadbed, common;
- (2) 202,000 cu. yds. excav. for roadbed, rock;
- (3) 574,000 sta. cu. yds. overhaul;
- (4) 221,500 cu. yds. excav. and loading longhaul borrow;
- (5) 384,000 cu. yds. m. hauling and spreading long-haul borrow;
- (6) 26,000 cu. yds. excav. of tunnels;
- (7) 180 M. ft. b. m. erecting permanent timbering in tunnels;
- (8) 700 cu. yds. excav. for structures, common;

- (9) 1000 cu. yds. excav. for structures, rock;
- (10) 5500 cu. yds. backfill about structures;
- (11) 200 cu. yds. concrete;
- (12) 15,000 lbs. placing reinforcement bars;
- (13) 4500 sq. yds. dry rock paving;
- (14) 2500 cu. yds. furnishing, erecting and filling concrete crib walls;
- (15) 1400 lin. ft. laying 24-in. diam. corr metal pipe;
- (16) 100 lin. ft. laying 30-in. diam. corr metal pipe;
- (17) 160 lin. ft. laying 36-in. diam. corr metal pipe;
- (18) 260 lin. ft. laying 42-in. diam. corr metal pipe;
- (19) 180 lin. ft. laying 48-in. diam. corr. metal pipe;
- (20) 550 lin. ft. laying 60-in. diam. corr. metal pipe;
- (21) 25 M. ft. b. m. erecting timber in bridges or trestles;
- (22) 2000 lin. ft. driving piles;
- (10.23 track-miles of laying ties and track;
- (24) 6500 each, applying rail anchors;
- (25) 2 M. ft. b. m. placing crossing planks;
- (26) 20,400 cu. yds. ballasting.

VANCOUVER, B. C.—W. C. Arnett, Vancouver, B. C., awarded the contract at approximately \$260,000 for the construction of 8.5 miles of the Kettle Valley Railway to connect the Okanagan Falls—Oliver line with branch line from South Penticton to Skaha Lake for the Kettle Valley Railroad Co. The work involves the following approximate quantities: 120,000 cu. yds. solid rock excavation; 45,000 cu. yds. loose rock excavation; 155,000 cu. yds. hard-pan excavation; 20,000 lin. ft. of piling.

SUNNYVALE, Santa Clara Co., Cal.—Southern Pacific Railroad, 64 Market St., San Francisco, has advised Congressman Arthur M. Free that the company will construct a line 1½ miles long to the site of the Sunnyvale dirigible base at its own cost.

FIRE ALARM SYSTEMS

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—Until January 19, 7:30 P. M., bids will be received by Daniel McSweeney, city clerk, to install traffic signals at intersection of Grand and Linden Aves., and at Grand Ave. and San Bruno Road. Certified check 10% payable to city required with bid. Work will be financed from Treasury. Specifications on file in office of clerk.

FIRE EQUIPMENT

SACRAMENTO, Cal.—Until Jan. 2, 8:15 P. M., bids will be received by H. G. Denton, city clerk, to furnish one Seagrave or equal Aerial Platform Ladder for use in tree trimming by

City Park Department. Specifications obtainable from above. Certified check 5% payable to City Controller required with bid.

RESERVOIRS AND DAMS

HOOVER DAM—See article on page one of this issue. Bids to be opened in March for construction of the Hoover dam, the appurtenant tunnels and cofferdams and the power plant building.

HOOVER DAM—The contract for the Hoover Dam will provide for completion of the work in 2565 days from April 4, the date tentatively fixed as the time for starting work. Bids for the construction of the dam tunnels, cofferdams and power plant will be opened March 4 as previously reported. Three separate time limits have been set, viz: 1600 days for the diversion of the Colorado river and completion of the foundations for the power plant; 1565 days to complete the main dam up to the elevation necessary for generating power, or 300 ft. from the top; 2565 days or approximately seven years, which will bring final completion in 1938. Under the first time limit, power must be ready to supply the Los Angeles water and power department under its contract, which calls for power by September, 1936. Generating of power will start when water of 495 ft. depth has been stored. Three thousand dollars per day has been set as the penalty for delay. The first mass concrete in the cofferdams must be placed not later than Dec. 1, 1933, and provisions of the specifications call for completion of five-sevenths of the dam must be ready for storage of water by June 15, 1935. As planned in the final drawings which have been approved by Ray Lyman Wilbur, Secretary of the Interior, the dam will be 727 ft. high from bedrock and 580 ft. above the present low water level as it exists today. It will be 650 feet thick at the bottom and 45 ft. at the top. The length is 1180 ft. Approximately 4,400,000 cu. yds. of concrete, 5,500,000 lbs. of reinforcement bars, 1,800,000 cu. yds. open cut excavation, 1,200,000 cu. yds. of earth and rock fill for cofferdams and channel protection will enter into the construction in addition to various other items of equal magnitude.

Congress has appropriated \$108,200,000 for the dam and power plant—\$70,000,000 for the dam and reservoir, and \$38,200,000 for construction to provide 1,000,000 horse-power generating capacity. The power plant, machinery, steel, cement and other materials will be purchased by the government and supplied to the contractor, S. C. Harner, acting chief engineer, Denver, is in charge of construction.

SEWERS AND SEWAGE DISPOSAL PLANTS

LOS ANGELES, Cal.—Culjak & Zelko, 1358 Bonnie Brea Place, at \$209,530 submitted low bid to Board of Public Works to construct sanitary sewers in Oxnard St. and Van Nuys Blvd., Sunset District.

BEVERLY HILLS, Cal.—Westinghouse Electric & Mfg. Co., 420 S. San Pedro St., Los Angeles, submitted low bid to city council for furnishing 168 ornamental lighting posts to be installed on Santa Monica Blvd. The bids, which were taken under advisement, are as follows:

Westinghouse Electric & Mfg. Co., item (1) \$171.10; (2) \$139; (3) \$173.86; 4, \$228.85; alternate bid on item (1) is \$157.25.

Western Lighting Co. (1) \$218.45; (2) \$186.74; (3) \$281.65; 4, \$341.66; alternate bid on item (1) is \$198.89; (2) 167.17; (3) \$273.12; 4, \$333.18.

Newberry Electric Co. (1) \$217.50; (2) \$157.50; (3) \$211; 4, \$276.
Lalux Mfg. Co. (1) \$218.50; (2) \$178.90; (3) \$267.50; (4) \$416.50.

HILLSBOROUGH, San Mateo Co., Cal.—Town trustees declare intention (20-3) to construct storm sewer system, consisting of 12-in., 15-in., 18-in. and 24-in. concrete pipe sewers; brick manholes and catchbasins. 1911 Act. Hearing Jan. 6. John A. Hoey, town clerk. 33

OAKLAND, Cal.—Until Dec. 31, 12 noon, bids will be received by Frank C. Merritt, city clerk, to construct drainage structures in portions of E 8th St. and E 10th St., and certain streets and avenues adjacent thereto. Project involves:

- (1) 375 ft. 10-in. pipe conduit;
- (2) 352 ft. 12-in. do;
- (3) 536 ft. 15-in. do;
- (4) 320 ft. 18-in. do;
- (5) 930 ft. 24-in. do;
- (6) 300 ft. 15-in. pipe sewer;
- (7) 389 ft. 18-in. pipe sewer;
- (8) 6 manholes, standard tops;
- (9) 4 manholes, inlet top, 34-in.;
- (10) 4 catchbasins, 34-in.;
- (11) 2 catchbasins, 21-in.;
- (12) 4 storm water inlets, 34-in.;
- (13) 5 storm water inlets, 21-in.

Pond in the sum of one-quarter of the contract price required of successful bidder. Specifications on file in office of clerk. Walter N. Frickstad, city engineer.

OAKLAND, Cal.—Until Dec. 31, 12 noon, bids will be received by Frank C. Merritt, city clerk, to construct sewers in portions of Pothill Blvd., 84th Ave., Iris St., Dowling St. and Blanche St. Bond of one-fourth the amount of the contract price required of the successful bidder. Specifica-

tions on file in office of clerk. Walter N. Frickstad, city engineer.

OAKLAND, Cal.—John White, 3214 E 12th St., Oakland, at \$13,948 awarded contract by city council to construct sewer through the property of Mills College and certain highways adjacent thereto, involving:

- 2660 lin. ft. 18-in. pipe sewer, \$3.14;
- 1160 lin. ft. 21-in. do, \$3.53;
- 40 lin. ft. 18-in. pipe sewer with concrete jacket, \$3.64;
- 20 lin. ft. 21-in. do, \$4.03;
- 16 manholes, \$75;
- 3 8-in. drop lampholes, \$15;
- 30 Y branches, \$1.

OAKLAND, Calif.—Martin Murphy, 777 Eighth St., Oakland, at \$5,981 awarded contract by city council to construct sewer in Adeline Street bet. Eighth and 22nd Sts., involving:

- 200 lin. ft. 12-in. pipe sewer, \$2;
- 2164 lin. ft. 15-in. do, \$2.10;
- 1238 lin. ft. 18-in. do, \$3;
- 4 manholes, \$80.

MISCELLANEOUS CONSTRUCTION

SACRAMENTO, Cal.—City council has approved contract between the city and the Southern Pacific Railroad for construction of the proposed H Street Subway, the city agreeing to pay one-half of the cost of the project, estimated at \$90,000, exclusive of paving. The city's share of the project will be financed with funds to be appropriated in the 1932 budget.

SAN FRANCISCO.—February 6 is date set by Board of Supervisors to vote bonds of \$2,500,000 to finance miscellaneous improvements to relieve unemployment. Plans for improvements now being prepared by Bureau of Engineering, Department of Public Works, 3rd floor, City Hall, will provide the following:

Development of Meadows in Golden Gate Park;
Bridle path from Suto Heights to Sea Cliff;

Foot path from Suto Heights to 32nd Avenue;
Foot path around Telegraph Hill;
Driveway in McLaren Park;
Foot path through Sunset Square;
Improve existing roads in Golden Gate Park (widened Stow Lake Drive);
Planting and grading Telegraph Hill;
Improve Aquatic Park, Yacht Harbor and Balboa Park and roadways in Sharp Park in San Mateo County and improve structures, facilities, grounds and equipment of the following playgrounds: Potrero Hill, Ocean View, St. Mary's, Julius Kahn and Funston Annex.

Certain improved routes of road around the shores of Lake Merced, recondition streets and areas in Sunset District bounded by Lincoln Way, Sloat Blvd., 7th Ave. and Great Highway; extension over Clarendon Ave. to 7th Ave.; road around Blue Moun-

tain; Improve Slatley Street Parkway between Alameda and Junipero Serra Bldvs., Bernal Heights Blvd., roadways within and approach of Laguna Honda Home and all such readjustments to substructures, etc.

WATER WORKS

OAKLAND, Cal.—Until Jan. 5, 8:30 A. M., bids will be received by J. J. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., to furnish and deliver:

- (a) 50,000 gals. grade E hot asphalt;
- (b) 4,000 concrete meter boxes;
- (c) 6,000 concrete water meter box covers.

Specifications obtainable from the above.

SACRAMENTO, Calif.—Sacramento Pipe Works, Sacramento, awarded contract by city council to furnish 31 water meters. Bid follows: eight ¾-in. meters, \$15.75 each; eleven 1-in. meters, \$23.10 each; seven 1½-in. meters, \$40 each; 52-in., \$60.

INGLEWOOD, Los Angeles Co., Cal.—Until 8 P. M., Dec. 29, bids will be received by the city council for bell and spigot cast iron pipe, class B, as follows:

- (1) 6000 ft. 4-inch;
- (2) 2000 ft. 6-inch;
- (3) 1000 ft. 8-inch;
- (4) 1000 ft. 10-inch.

Certified check or cashier's check, 10%. Bids to be f.o.b. trenchside or corporate yard, City of Inglewood. Otto Duelle, city clerk.

ST. HELENA, Napa Co., Cal.—Until January 13, 8 P. M., bids will be received by E. R. Palmer, town clerk, to furnish 4000 ft. of class 150, B & S McWane Pacific cast iron pipe and fittings.

SANTA BARBARA, Cal.—Grinnell Co., 520 Mateo St., Los Angeles, awarded contract by city council at \$1.10 per ft. for 1560 ft. 8-in. class B cast iron pipe.

ONTARIO, San Bernardino Co., Cal.—Until 8 P. M., Jan. 5, bids will be received by the city council for furnishing and installing a centrifugal booster pump in Pumping Plant No. 6. Specifications may be obtained from the water superintendent. Cert. check or cashier's check or approved surety company bond, 10%. D. B. Wynne, city clerk.

CARMICHAEL, Sacramento Co., Cal.—Until January 12, 8 P. M., bids will be received by Roy W. Sullivan, secretary, Carmichael Irrigation District, 2509 I St., Sacramento, to furnish and deliver f. o. b. Fair Oaks, Sacramento County, 4300 feet of welded steel pipe. BEVERLY HILLS, Cal. — Marko Matick, 1436 W. 51st St., Los Angeles, was awarded contract at \$14,700 by city council to install pipe line on Maple Dr., involving 5050 feet of 14-in. class A and B cast iron, or class 100 and 150 centrifugal cast iron pipe line or alternate using double asphaltum dipped and wrapped casing, together with all fittings.

Marko Matick awarded contract by city at \$10,800 for laying of pipe lines to Water Treatment Plant No. 2, involving 900 ft. of 16-in., 2360 ft. of 14-in. and 1125 ft. of 8-in. pipe lines, together with all fittings.

SAN FRANCISCO.—Byron Jackson Co., 55 New Montgomery St., at \$2,966 awarded contract by Board of Public Works to furnish and install electrically driven centrifugal pump with appurtenances at the Mills Field Municipal Airport.

SAN FRANCISCO.—Following contracts awarded by Leonard S. Leavy, city purchasing agent, under Proposal No. 661, to furnish and deliver cast iron pipe, bell and spigot type, tar coated (made in the U. S. A.): 30,000 ft. size 6-in. at \$0.50 per lineal foot. Awarded to American Cast Iron Pipe

Co., Ballou Bldg., 15,000 ft. size 8-in. at \$0.72 per lineal foot. Awarded to National Cast Iron Pipe Co., 671 Mission St.; 15,000 ft. size 8-in. at \$0.42 per lineal foot. Awarded to United States Pipe and Foundry Co., Monadnock Bldg.

STREETS AND HIGHWAYS

SAN FRANCISCO — Until January 15, under Circular No. 15, bids will be received by the Depot Quartermaster, Fort Mason for repairing certain roads at Fort Mason. Specifications obtainable from above.

MENLO PARK, San Mateo Co., Cal. — City council declares intention (20-3) to improve College Ave. and Cambridge Ave. from Arbor Road to El Camino Real; Harvard Ave. bet. University Drive and El Camino Real; University Drive from Middle Ave. to Stanford Ave.; Yale Road bet. Middle Avenue and Stanford Ave.; Princeton Road bet. College and Stanford Ave., including all street intersections. Project involves:

- (a) 30,000 cu. yds. grading;
 - (b) 670,400 sq. ft. 1½-inch emulsified asphalt surface pavement on 4-in. macadam base;
 - (c) 32,000 lin. ft. conc. curb;
 - (d) 220 water service connections.
- 1911 Act. Bond Act 1915. Hearing December 30. Fannie I. Kurtz, city clerk. Bert J. Mehl, city engineer.

OAKLAND, Calif.—M. J. Revanda, 319 Elks Bldg., Stockton, at \$119,633 awarded contract by city council to improve Foothill Blvd. bet. Parker Ave. and Hollywood Blvd. and portions of Jones and Truman Avenues, adjacent to Foothill Blvd. Project involves:

- 486,393 sq. ft. grading, \$0.15;
- 713 lin. ft. conc. curb with steel curb guard, \$60;
- 15,733 lin. ft. concrete curb, \$40;
- 475,428 sq. ft. conc. pave., \$20;
- 654 lin. ft. 2-ft. 3-in. by 3-in. concrete culvert, \$4;
- 200 lin. ft. 10-in. vit. pipe conduit, \$130;
- 96 lin. ft. 12-in. do, \$150;
- 1,114 lin. ft. 15-in. do, \$170;
- 59 lin. ft. 15-in. extra strength reinf. conc. pipe conduit, \$260;
- 67 lin. ft. 18-in. vit. pipe conduit, \$225;
- 202 lin. ft. 21-in. do, \$3;
- 318 lin. ft. 24-in. do, \$4;
- 6 concrete inlets with cast iron top (34-in. openings), \$50;
- 1 storm water inlet (Type A) \$50
- 3 storm water inlets (21-inch opening), \$40;
- 13 storm water inlets (34-inch opening), \$40;
- 5 manholes with standard top, \$60;
- 2 manholes with inlet top (34-in. opening), \$68.
- 1 15-inch lamphole, \$20.

NEVADA COUNTY, Calif.—Frederickson & Watson & Frederickson Bros., Oakland, at \$92,012, submitted low bid to State Highway Commission Dec. 23 to grade 7.4 miles bet 1 mile west of Washington Road and ½ mile east of Summit. Following are the three low bidders: Frederickson & Watson and Frederickson Bros., Oakland \$92,012
Hemstreet and Bell, Marysville 104,420
Morris Knudsen, Boise, Idaho 118,367

OAKLAND, Cal.—Hutchinson Co., 1450 Harrison St., Oakland, at \$24 sq. ft. awarded contract by city council to grade and pave a 30-ft. strip in center line of 14th Ave., bet. E-12th and E-14th Sts., involving 832 sq. ft. pavement, including grading

LAS VEGAS, Nev. — City Attorney F. A. Stevens has been authorized by the city commission to prepare notices of intention for street work included in eleven petitions which have been filed with the board. The petitions call for curb, gutter, grading, and 3 in. gravel surface. One street, Stewart St., must be surfaced with hard materials due to federal government requirements. Fremont St. will also be surfaced with a hard type pavement due to special requests of property owners. The list of streets follows: Sixth St. from Linden to Garces; Seventh St. from Linden to Garces; Eighth St. from Stewart to Clark; Ninth St. from Stewart to Bridger; Tenth St. from the south line of Grandview Addn. to Carson, Mesquite Ave. from Fifth St. to Ninth St.; Stewart St. from Main to Linden to Ogden St. from Fifth St. to Twelfth St.; Fremont St. from Eighth St. to Twelfth St.; Carson St. from Fifth to Tenth St.; Bridger St. from Fifth to Ninth St.; Lewis St. from Fifth to Seventh St.; Clark St. from Fifth to Eighth St.; Garces St. from Eighth to Seventh St.; Garces St. from Fifth to Seventh St.

RIVERSIDE, Riverside Co., Cal.—Inclusion of a total of 804 miles of secondary roads in the state highway system, including five highways in Riverside county, is provided in bills which Assemblyman Kline, of San Jacinto and Senator Nelson T. Edwards, of Orange, will introduce in the 1931 session of the California legislature.

The bills will embody the recommendations of the California highway commission. The 1929 legislature directed the highway commission to make a careful study of the state's roads and ascertain what roads, now maintained by the individual counties, should be included in the system of state maintained.

The Riverside county roads designated for inclusion in the state system would be:

Riverside, Orange and San Bernardino Counties—A 53 mile highway from the southern terminus, No. 43, from the San Bernardino mountains to Newport Beach, via Riverside, Corona and Santa Ana canyon.

A 19 mile highway from Riverside to Beaumont.

A 36 mile highway from Pomona to Temecula, extending through both Los Angeles and Riverside Counties.

A 95 mile highway from Riverside to San Diego, extending from Temecula to the southern city.

Four miles of road from Blythe to the California-Arizona line and 19 miles of the route from Indio to connect with Route 64.

Proposed for inclusion are 171 miles in the north and 633 miles in the southern part of the state, bringing the total mileage of secondary roads to 1949 in the north and 1155 miles in the south. The increase in mileage would adjust the present lack of balance and uneven development of the secondary system in the two ends of the state, the commission said.

OAKLAND, Cal. — City council declares intention to improve portions of E-5th St., E-10th St., 3rd Ave., 5th Ave., 6th Ave. and 7th Ave., involving grade, curbs, corr. iron and concrete culverts, conduits 1911 Act. City will pay 25% of cost from Treasury Hearing January 15. Frank C. Merritt, city clerk. Walter N. Fricstad, city engineer.

OAKLAND, Cal.—Until January 5, 1931 A. M. bids will be received by J. J. Knebel, secretary, East Bay Municipal Utility District, 312 16th St., to furnish labor and materials for repaving approximately 4000 sq. ft. bit street surface. Specifications obtainable from above

ment conc. curbs, gutters and walks; corr. metal culverts with manholes; 24-in. asph. conc. base with 1½-in. asph. conc. surface and liquid asphalt and rock screening surface coat. 1911 Act. Hearing January 8, H. S. Foster, City Clerk. C. C. Van Valkenburg, city engineer.

FRESNO, Fresno Co., Cal.—City Council declares intention (107-D) to improve alley in Block 85 and a portion of Fresno St., involving grading; pave and repave with 4-in. asph. conc. base and 2-in. asph. conc. surface, said surface to consist of binder course 1½-in. thick and sheet asphalt finishing course ½-in. thick, 1911 Act. Hearing Jan. 8, H. S. Foster, city clerk. C. C. Valkenburg, city eng.

SAN FRANCISCO.—Until December 26, 2 P. M., informal bids will be received by State Harbor Commission, Ferry Bldg., to lay asphaltic wearing surface on basalt block pavement in 16th St.; estimated cost, \$2500. Specifications obtainable from Frank G. White, chief engineer, Ferry Bldg.

FRESNO, Fresno Co., Cal.—Until January 2, 2 P. M., bids will be received by D. M. Barnwell, county clerk, to furnish during the calendar year of 1931 not less than 125,000 or more than 175,000 barrels of road oil processed or unprocessed, the pure asphalt bitumen content to be not less than 58 per cent or more than 70 per cent. Bids shall be per barrel in carload lots f. o. b. shipping point same to be designated in all bids, freight to be prepared to all points in Fresno County and to be billed by adding freight to contract price at shipping point. Factors to be considered in awarding bid are the quality of the oil as shown by the bid and the total cost of the oil as ultimately delivered f. o. b. Fresno.

Deliveries shall be made between the first day of June and the first day of November, 1931, at such time as the same are requisitioned by the said Board of Supervisors, provided that contractor shall not be required to deliver more than 40,000 barrels of oil in any one calendar month, nor more than 2400 barrels any one day. One barrel hereunder shall be understood to contain forty-two gallons.

Certified check \$1000, payable to county required with bid. Further information obtainable from Chris P. Jensen, county surveyor.

IMPERIAL-SAN DIEGO COUNTIES Cal.—Until January 7, bids will be received by Imperial-San Diego County Joint Highway District No. 17 for the construction of the first unit of the Julian-Kane Springs Road. The total length is 25.41 miles, of which 13.17 miles are located in Imperial County and 12.24 miles in San Diego County.

The former section will cost \$164,126.58 and the latter \$124,405.60, or a total of \$288,532.18 for this contract. The State will pay one-third and the counties each one-third. The proposed work will consist of grading to a width of 32 ft. and filling to a width of 20 ft., with construction of overflow sections and drainage structures. A permanent pavement is planned as a later improvement. Ernest R. Childs, San Diego County surveyor is engineer for the district, George E. Krueger is secretary and L. H. Aul is chairman. The approximate quantities follow:

- (1) 74,077 cu. yds. excavation;
(2) 128,077 sta. yds. overhaul;
(3) 1725 lin. ft. type A dykes;
(4) 68,131 lin. ft. type B dykes;
(5) 2075 lin. ft. type C dykes;
(6) 2500 lin. ft. type D dykes;
(7) 95,400 lb. B. M. in bridges;
(8) 3000 lin. ft. pilling;
(9) 218 ft. 18-in. corr. iron culvert;
(10) 164 ft. 30-in. corr. iron culvert;
(11) 132 ft. 26-in. corr. iron culvert;
(12) 2800 cu. yds. concrete headwall,
(13) 5500 sq. ft. rock mat

Election of Bancroft Gherardi, vice-president and chief engineer of the American Telephone and Telegraph Company, to the presidency of the American Standards Association was announced at the annual meeting of the Association at the Hotel Astor, New York, December 11. Mr. Gherardi who has been a member of the Association's Board of Directors, will assume the direction of the national and international standardization activities of the organization, a task in which over 2,000 representatives of about 500 national trade, technical, and governmental bodies are engaged under American Standards Association auspices. Mr. Gherardi has been affiliated with the American Telephone and Telegraph Company since 1907, and has been vice-president and chief engineer since 1920. He is past president of the American Institute of Electrical Engineers, and has also served as president of the United Engineering Society.

Cloyd M. Chapman, an engineering specialist of New York City, was re-elected to the vice-presidency of the Association for the year 1931. Mr. Chapman entered the employ of Thos. A. Edison in 1899 as assistant in his private laboratory on experimental work. He has been engineer for Westinghouse, Church, Kerr and Company in the line of design and construction work and as engineer of tests. His work has included the design and construction of a number of important central stations and industrial plants.

The Board of Directors of the Association for the next year will include Quincy Bent, vice-president, Bethlehem Steel Co.; George K. Burgess, director, U. S. Bureau of Standards; Cloyd M. Chapman, Consulting Engineer; C. L. Collins, president, Reliance Electric & Engineering Co.

Howard Conley, president, Walworth Company, L. A. Edging, president, Illinois Central Railroad, R. E. MacKoy, president, Improved Products Corporation, W. J. Scerril, United Gas Improvement Company, M. S. Sloan, president, New York Edison Co. and Affiliated Companies, R. J. Sullivan, vice-president, Travelers Insurance Company.

Cloyd M. Chapman will, it was announced, also be chairman, and John C. Parker, vice-president of engineering of the Brooklyn Edison Company, will be vice chairman of the ASA Standards Council, the body in charge of the technical work of the Association.

Mr. Gherardi succeeds in the presidency, William J. Scerril of the United Gas Improvement Company of Philadelphia, who has held this office since 1928.

Hollow columns and floor girders designed to accommodate all pipes and wire services, which are thus concealed but are readily accessible for inspection, alteration or repair constitute a strikingly novel structural feature in the new steel-frame building for the engineering and research department of the A. G. Smith Corp. plant at Milwaukee, Wis. Unobstructed floor areas, walls composed largely of glass, easy connection to any utility service at any part of a floor, and provision for future alterations and interior rearrangement of rooms or laboratories to suit changing requirements are other important features. The glass frontage is also an architectural feature, arranged as a triangular bay window in each panel. For the vertical spaces between the windows and for the shallow spandrels the exterior finish is of aluminum, the only masonry being buff stone for the corners and a base course of black stone.

Directors of Gladding, McBean & Co. have voted the regular quarterly dividend of 75 cents per share on the company's stock, payable January 1, to stockholders of record December 30.

The opening gun in an organized war on obsolete ordinances has been touched off by the Oil Heating Institute with the announcement that American home owners are carrying an annual burden of more than \$10,000,000 imposed by obsolete restrictions on household heating equipment alone. At the same time it was revealed at the Institute's headquarters that leaders of many other lines of industry which are similarly affected had joined with the Institute in a drive for the modernization of these regulations.

The home owner's burden on heating equipment, says the Institute, is imposed by well meaning but obsolete ordinances requiring certain methods of installation and certain added equipment both of which are made unnecessary by improvements in domestic heating equipment. Ordinances have failed to keep step with the progress of the industry.

The Institute announces that other building and household equipment industries supporting the movement had taken canvasses for detailed information which could be turned over to the Federal authorities as a basis for concrete action.

In future two instead of three conventions will be held by the M. W. Work Institute of California. The annual meeting will be held in the north in November and a mid-year meeting will be held in the south in May. Additions to the Institute staff will be made as finances permit.

A total of 92 municipalities throughout the United States have now incorporated sections in their building codes allowing the use of welding in building construction. The most recent was New Orleans which on September 2 adopted its own ordinance for that purpose. New Orleans, with a population of approximately 500,000 is the most populous city to take this action.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

309 13th Street, Oakland 478 Sutter St., San Francisco
